PROTOTYPE DESIGN KIT
.545 Sq. x 1.00 H.

TYPE 6370

The C-B 6370 Multitran Assembly provides the engineer with a flexible approach to R.F. and I.F. transformer design. The 6370 assembly is available with a choice of shielding cups (powdered iron or ferrite) and tuning cores in a wide range of sizes and materials. Type 6373 coils, designed for use in the 6370 assembly, are wound on slip-tubes and may be moved on the coil form, permitting precise adjustment of coupling and bandwidth. Or the coils may be used singly for the design of tuned circuits,

When an optimum design has been established, we will manufacture transformers, to specification, in any quantity.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

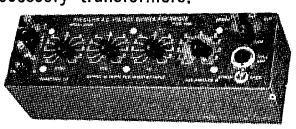
PRECISION AC VOLTAGE DIVIDER AND BRIDGE, MODEL 2200

This compact, inexpensive unit contains a precision AC voltage divider and bridging transformer. This combination forms the essential circuitry of a precision AC bridge. The divider may be used for precision attenuation of a voltage; for calibrating and checking resolvers, meters, potentiometers; for the measurement of voltage ratios, especially transformer turns ratios. It's indispensible in the lab. The unit will serve in place of the expensive 6 and 7 decade units for 90% of measurements.

Basic accuracy is 0.004%. Resolution is 0.0005%. Models cover 50Hz to 10,000Hz. Input voltage ratings to 2.5X input frequency are available. Input signal conditioning (scaling) transformers are available and add to flexibility. Size is 12⅜"x3⅞"x3½" (less terminals). Weight is 5½ lbs. Available also in panel mounting version with or without accessory transformers.



Ask for:
Bulletin PAVD: Precision AC voltage divider
Bulletin BT: Bridging Transformers
Bulletin ST: Scaling Transformers
Bulletin AFBM: Application Notes

BRIDGING TRANSFORMERS

Ask for:
Bulletin BTI: Model 2100 Bridging Transformer
Bulletin BT2: Ultra Precision Bridging Transformer
Bulletin AFBM: Application Notes

Bridging transformers are used to provide coupling between isolated branches of an AC circuit. Typical applications include bridging networks and as signal pickoff. When used with AC voltage dividers, a bridging transformer designed to utilize the low output impedance of the divider can provide excellent guarding and high accuracy.

The Model 2100 series of bridging transformers has been designed to achieve optimal properties when used with AC voltage dividers. Data is supplied showing the additional error contribution of the bridging transformer as a function of circuit parameters. Sizes is 2⅜"x 2⅜"x1".

These inexpensive transformers are useful in a variety of circuit applications where AC signal isolation is needed.

CUSTOM FILTERS (AMI)

Our filter design engineer is one of the finest in the business. In addition to knowing filters, he knows systems and understands the total picture. This is vital to good filter design. Basically, all work is done by computerized design routines including ECAP and proprietary programs. Our breadboarding expertise as used with the powerful analytical techniques available to us allows the solution of the most difficult problems. We pioneered in the use of miniature inductors and chip caps in sub-miniature filters.

Your requirements will receive our immediate attention.

Filter Types: Band Pass, Low Pass, High Pass, Band Stop, Delay Lines, Matched Filters

Filter Functions: Bessel, Butterworth-Thompson, Tchebycheff, Elliptic, Hybrid

Specialties: Miniature VCO low pass
Precision Pairs — Phase match and tracking
MIL-F-18327

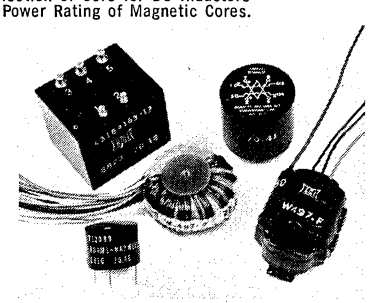
CUSTOM MAGNETIC COMPONENTS

Since 1951, the Coast Coil Co. has been a prime West Coast source for custom magnetic components. Over the years, the company has solved some of the knotiest magnetics problems around. May Coast Coil suggest to you your consideration of its capability.

Types: Toroidal, Bobbin, Multiple, Open Frame, Encapsulated, Hermetically Sealed
Families: Inductors, Transformers, Reactors, Coils
Sizes: To 10Kva
Services: MIL-T-27, MIL-I-45208, High-Rel, NASA
Specialties: Converter-Inverter, Toroidal, High Voltage Toroidal, Precision Ratio, Quick Prototype delivery

Write for our facilities brochure. Also available:
Bulletin DCI: Selection of Core for DC Inductors
Bulletin PRIAL: Power Rating of Magnetic Cores.



DECADE INDUCTOR

Write for **Bulletin DI-1.**

The Models 100, 101 and 102 decade inductors are ideal units for general laboratory use. Small in size, yet high in performance, they serve as convenient circuit elements of inductance for work in the audio and ultrasonic frequency range.

Model 100: 10mH to 9.99H, steps of 10mH, 3 decades
Model 101: 1mH to 999mH, steps of 1mH, 3 decades
Model 102: 100 uH to 99.9mH, steps of 100 uH, 3 decades
Current Rating: $\frac{2000}{\sqrt{L}}$ ma max (2000ma below 1mH) (L in mH)
DC Resistance: 0.16 L ohms (L in mH)
Voltage Rating: 150 volts AC Max (see current rating)
Accuracy: 2%
Size: 6¼"x3¾"x2" (excluding knobs)

DECADE FREQUENCY DIVIDER

A compact, inexpensive accessory to use with your low frequency counter. It will extend the range to as high as 30MHz at a fraction of [illegible] vides input frequency by 10 or 100 with no loss of accuracy. Original counter resolution is unchanged. Indispensable in labs, communications, "Hams," etc.

Frequency Division: Model 500: 10:1, Model 501: 10:1 & 100:1
Frequency Range: 30 MHz Max at input
Input: Level: 10 mv to 10 volts, Impedance: 50 ohms or 5000 ohms
Output: 0.5 v RMS into 500 ohms
Power: 117 V, 50-400 Hz

TURNS COUNTER FOR TOROIDAL WINDER

Coast Coil Co. has pioneered and patented the only real way to count the turns on a high speed toroidal coil winder. This equipment will count to 3000 Turns/Min using AWG 20 thru 50 and **never** miss. Dirty contacts, dirty apertures are a thing of the past. Essentially zero maintenance. Counter is adaptable to all machines: Gorman, Boesch, Universal and others.

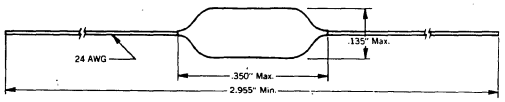
DALE® for Optimum Value in Inductive Components

TYPE IR-2 EPOXY CONFORMAL COATED INDUCTORS

■ Designed primarily for commercial applications
■ Combines durability and low cost ■ Flame retardant coating

Standard tolerance: ±10%. **Inductance range:** .10 μh to 1000 μh. 49 standard values. Q, self-resonant frequency, DC resistance, rated current and core material as specified in MS-75083, 75084 and 75085.

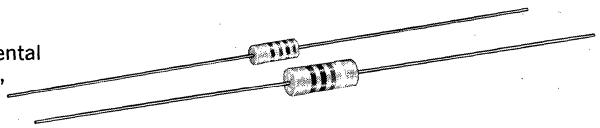


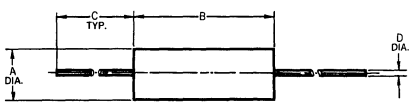
Maximum Dimensions: Body .350" L x .135" W with leads 2.955" L.

TYPE IM-2 and IM-4 MOLDED INDUCTORS

■ Designed to meet electrical, material, mechanical and environmental requirements of MIL-C-15305D ■ Features precision performance, reliability ■ Wide range of inductance values in a small package
■ Flame retardant molded coating

Standard values IM-2 (49) and IM-4 (47). Tolerance, Q, test frequency L & Q, self-resonant frequency, DC resistance, DC current rating and core material per standards shown in the Inductance Range and MIL Standard Chart below.





INDUCTANCE RANGE

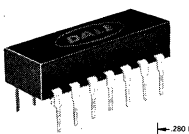
MODEL NO.	INDUCTANCE RANGE FROM	INDUCTANCE RANGE TO	CLASSIFICATION GRADE	CLASSIFICATION CLASS	MILITARY STANDARD
IM-2	.10 μh	1.00 μh	1	B	MS-75083
	1.2 μh	27. μh	1	A	MS-75084
	33. μh	1000. μh	1	A	MS-75085
IM-4	.15 μh	33. μh	1	B	MS-18130
	36. μh	240. μh	1	A	MS-90538

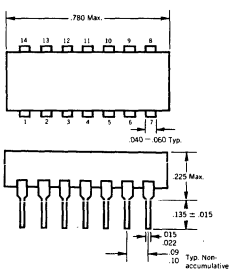
DIMENSIONS

MODEL NO.		A	B	C	D
IM-2	MAX.	.105	.260	1.626	.0215
	MIN.	.085	.240	1.250	.0185
IM-4	MAX.	.165	.385	1.626	.027
	MIN.	.145	.365	1.250	.023

TYPE PT 14 and PT 16 DIP PULSE TRANSFORMERS

■ Machine or hand insertable package designed to contain 3 pulse transformers (14 pin size) and 4 pulse transformers (16 pin size)
■ Fully sealed to permit cleaning in common solvents ■ Suitable for production soldering ■ Pulse transformers within the package designed with controlled precision characteristics to your requirements.





.300 between rows, pins on .100 centers.

TRANSFORMER SPECIFICATIONS

Electrical

Inductance Range: 1 μh to 2.0 mh
Temperature Range: −55°C to +125°C
Temperature Stability: ±10% standard, lower available
Tolerance: ±20% standard, lower available
Leakage Inductance: As low as 0.2% of inductance
Interwinding Capacitance: As low as 3 pf
ET Product: Up to 10 volt-microseconds
Dielectric Strength: 100 VRMS at 60 hz, winding to winding

Material

Body: Molded plastic
Standard Terminals: Phosphor bronze, tin plated
Weight: Approximately 1 gram

NOTE
There is an inherent compromise between parameters which sometimes makes certain exact combinations unattainable.

TYPE TE-2, TE-3, TE-4 and TE-5 ENCAPSULATED TOROIDAL INDUCTORS

Epoxy encapsulated precision toroids designed to meet MIL-T-27C, Type TF5SX20ZZ for outstanding stability and performance under severe environmental conditions. Offers high Q and wide selection of Q vs frequency ranges, plus a large number of inductance values.

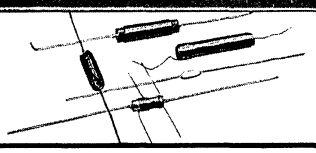
DALE® for Optimum Value in Inductive Components

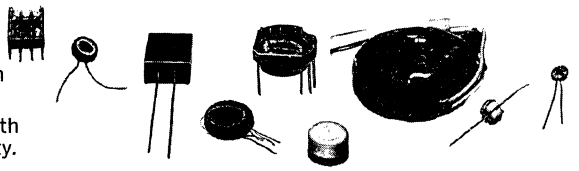
CUSTOM CHOKES

- Axial lead models
- Transformers on choke forms
- Universal wound models



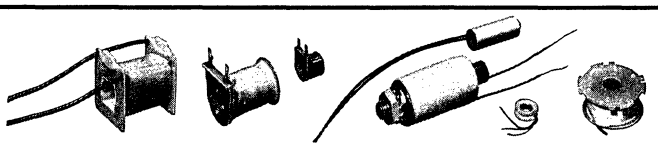
CUSTOM TOROIDS

- Potted with case sizes to fit your specific designs
- Open wound using Dale-formulated coatings for extra protection
- Hermetically-sealed cans
- Pulse transformers, inverters, RF inductors and transformers with or without terminal boards. Unusual shapes and sizes a specialty.



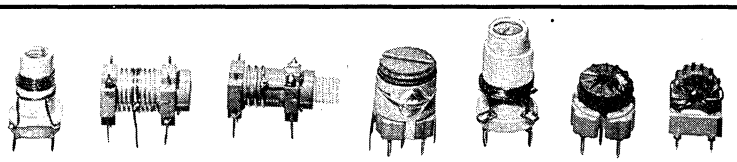
CUSTOM BOBBIN COILS

- Statistical control on high volume production items
- Low initial tooling cost



RF TRANSFORMERS & INDUCTORS

- Powdered iron bobbins
- Ceramic form types
- Molded solenoids
- P.C. cans & transformers

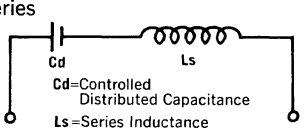


VARIABLE PITCH INDUCTORS

- Extensive design background in all sizes
- Complete engineering assistance

SERIES RESONANT TRAP

- Combines the electrical characteristics of an inductor and a capacitor in series
- Provides controlled self-resonance in a miniaturized circuit
- Saves space, reduces inventory
- Speeds assembly



BASIC SPECIFICATIONS

- Can be designed for any resonant frequency from .4 Mhz to 50 Mhz
- Impedance at design frequency: 15 ohms or less
- Impedance at ±50% of design frequency: 1500 ohms minimum
- Frequencies readily available: 10.7, 12, 14, 18 Mhz

TOUGH COIL JOBS?

Whether you need a hundred pieces or a million, we offer:

- Broad selection from standard lines, backed by men who believe in and give excellent customer service.
- Complete facilities to design, engineer and produce prototype quantities.
- Faster turn-around on custom samples and short run production quantities.
- Production engineering to translate your specifications into a product with optimum quality and economy.
- Development engineering to provide the electrical function you require.
- Design engineering to transform your basic idea into parts.
- Close production coordination including cost-saving statistical control on high volume items.
- Fulltime quality control personnel enable fast action in establishing military test procedures and in meeting other government requirements—including MIL-Q-9858.

TOROIDAL INDUCTORS

Hisonic Toroidal Inductors are wound on either nickel-iron molybdenum (molybdenum permalloy) or carbonyl iron powder cores. Standard tolerance is 1% and values are true inductance. Units are available uncased, molded or cased as shown. Molded units are compression molded in high strength, high temperature thermosetting resin and pass requirements of MIL T 27 Grade 5 Class R. Cased units are hermetically sealed in shield cans and pass requirements of MIL T 27 Grade 4 Class R.

Above units also available in encapsulated construction with pin terminals arranged for printed circuit board applications. Write for information on 5101 - 5103 and 5105 series.

The above units represent only a small percentage of those available as standard from Hisonic, but represent those most commonly used. Thousands of additional standard inductors are available, one of which should meet your requirements. Special requirements get prompt and accurate development from Hisonic Custom Design Service.

Hisonic, with a background of 23 years experience in toroidal components, is headquarters for all your needs.

Write today for the Hisonic, Inc. catalog which contains full information on all Hisonic standard Toroidal Inductors and Hisonic Custom Design Service.

Encapsulated Subminiature and Miniature Toroidal Inductors

Features

- Applications: printed circuits and modules
- Environmental: designed to meet MIL-C-15305, Grade 1, Class B (−55°C to +125°C)
- Moisture and shock resistant, immersion proof
- Powdered iron toroidal core, low external magnetic field
- Identification: part number and inductance value printed in contrasting color

General Specifications (All Series)

Maximum operating temperature: 125°C
Rated temperature rise (at 90°C): 35°C
Dielectric withstanding voltage: 700 v rms
Terminal pull: 5 pounds
Altitude rating: 70,000 feet
Overload current: 1.4 times the rated current
Add Suffix -S to P/N for side leads configuration

MOLDED SHIELDED MINIATURE R F CHOKES

An extremely useful series of chokes where extraneous coupling presents problems in dense packaging. Electromagnetic shielding limits coupling to less than 3% when two units are placed side by side.

MICRO MITE MOLDED RF CHOKES

Nicknamed the "Micro-Mite", these rugged coils exhibit high Q and very low distributed capacity, all concentrated into an amazingly small package. Size reduction ranges up to 80% of equivalent standard molded chokes. The construction of these coils permits miniaturization without the use of ferrite materials, thus maintaining temperature stability.

MICRO-MINIATURE MOLDED RF CHOKES

We are pleased to offer the following series of molded RF chokes. They represent what we believe to be the smallest package for the current rating specified. Color Coding is per MIL-C-15305.

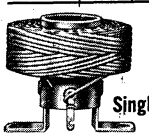
DUAL LINE FILTER CHOKES

Miller Dual Duo-Lateral Line Filter Chokes are wound with two coils on one form, giving the advantage of small physical size in cases where space requirements are stringent and two single coils would occupy too much area Identical in specifications, except for dimensions, to our single type Duo-Lateral chokes. They are wound on white ceramic forms 2" in diameter by 4½" long.

Cat. No.	Amps.	Ohms	Uh.	Dimensions
D-7826	5	.28	570	4½" x 4"
D-7827	10	.15	370	4½" x 4"
D-7828	15	.085	200	4½" x 4"
D-7829	20	.05	135	4½" x 4"



LIGHT DUTY DUO-LATERAL LINE FILTER CHOKES

Single Line Filter Chokes

Dimensions: 1⅞" x 1¾".

Cat. No.	Amperes	Ohms	Uh.

SUB-MINIATURE RF CHOKES

An extremely versatile series of iron core RF chokes designed to meet the industries' demand for high reliability, ultra-miniature components. The coils are ideally suited to network and filter design, delay lines, and computer applications. The coils are impregnated with a moisture resistant lacquer and on special order they can be fungus-proofed per JAN-T-152 using varnish per MIL-V-173A. They can also be encapsulated in epoxy resin to conform to Grade 1, Class B of MIL-C-15305.

RESINITE ADJUSTABLE RF COILS

Resinite is a phenolic impregnated tubing which combines the mechanical and dielectric advantages of phenolics with the high dielectric strength, moisture resistance, and non-corrosive properties of cellulose acetate. Resinite can be certified to MIL-P-79B Type PBG. This series features an extremely wide choice of inductance ranges and utilizes only the highest quality commercial materials throughout. They find application where the severe moisture resistant characteristics of the encapsulated units and the mechanical properties of the ceramics are not required.

SHIELDED SUBMINIATURE ADJUSTABLE R F COILS

These compact adjustable coils offer a minimum two-to-one inductance range with relatively small changes in Q. The tuning adjustment is accessible from either the top or bottom of the coil assembly. Magnetic shielding is achieved through the use of cup cores while the metal shield offers effective electrostatic shielding. Printed circuit terminals on base and shield.

Dimensions: 1/2" sq. x 5/8" high.

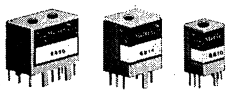
I F COMPONENTS SUB MINIATURE



The transformers in this series represents the state of the art, as it relates to a commercial product. In both the 455 kc. and 10.7 Mc. groups there are a complete set of I.F. transformers as well as Ratio Detector and Discriminator transformers. Part No. 8814 incorporates a single section mechanical filter that sharpens the I.F. passband appreciably 4 kc. @ 6 db and 12 kc. @ 20 db. The physical dimensions of this unit are .415 wide .460 deep and .600 high.

Dimensions: 8849, 8850, 8851, 8805, 8806 & 8807 — 25/32" x 7/16" x 1/2" high.
8852, 8853 & 8854 — 13/32" sq. x 5/8" high.
8808* & 8809* — 1/4" sq. x 7/16" high.
***To be used as a pair.**
8810, 8811, 8812 & 8813 — 3/32" sq. x 13/32" high.
8814 — 13/32 x 13/32" x 7/16".

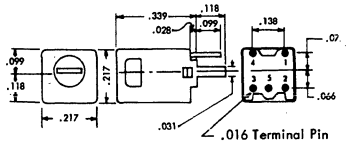
TRANSISTOR COILS ... SMALLEST YET LESS THAN 1/4"



A complete set of 455 KHz IF transformers and matching Osc. coil, and a complete set of 10.7 MHz IF transformers and matching Discriminator coils ... all so small as to be almost unbelievable.

Each unit measures only .217 x .217 x .339 and is for printed circuitry.

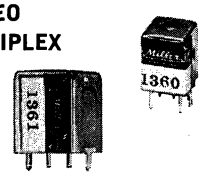
(Tuning capacitor 67-78 pF maximum)

SMALLEST YET STEREO MULTIPLEX



These recently developed Multiplex units when used with a Motorola IC #MC1304 FM Stereo Demodulator form a complete FM Stereo Decoder System. They provide excellent opportunity for OEM and Experimenter projects. Ask for "The Coil Forum" Application Note.

Each Multiplex System requires:

1 No. 1363 — PCB (PC Board)
2 No. 1359 and 1 No. 1360 or
2 No. 1361 and 1 No. 1362

Cat. No.	Description	Size

Inductors

Wee-Ductor — Magnetically shielded with inductance range 0.1 to 180,000 μH, designed to MIL-C-13305, Grade 1, Class B.
Encapsulated Envelope:
0.157″ diameter x .450″ length.

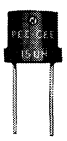
Wee Wee-Ductor — Magnetically shielded with inductance range 0.1 to 10,000 μH. Designed to MIL-C-15305.
Encapsulated Envelope:
0.125″ diameter x 0.335″ length.

Pee-Wee Ductor — The Pee Wee Ductor represents a 66% size reduction from the smallest magnetically shielded inductor previously available anywhere. Inductance values from .025 μH to 10,000 μH. 49 values available from stock from 0.1 μH to 1,000 μH.

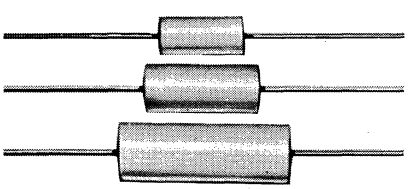
Super Wee-Ductor — Manufactured in accordance with MIL-C-15305D, Molded Magnetically shielded with inductance range 0.1 to 100,000 μH ±10% tolerance.
Molded Envelope:
0.163″ diameter x 0.410″ length.

Super Wee-Wee-Ductor—Miniature shielded with inductance range 15.0 μH to 10,000 μH. Designed to MIL-C-15305, Grade 1, Class B.
Epoxy-Molded Envelope:
0.125″ diameter x 0.335″ length.

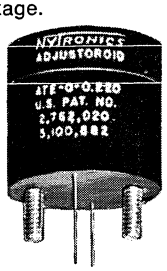
Pee-Cee Ductor — This inductor is designed to meet MIL-C-15305C, Grade 1, Class B. Printed board mounting is facilitated by 0.200 grid spacing and unit has shielded construction to allow maximum density packaging. Standardized in 73 stock values.



S-M-L Inductors—Non-shielded with inductance range 0.1 to 10,000 μH. Designed to MIL-C-15305, Grade 1, Class B.
Molded Envelope:
"S" Type — 0.188″ diameter x 0.44″ length
"M" Type — 0.25″ diameter x 0.60″ length
"L" Type — 0.31″ diameter x 0.90″ length

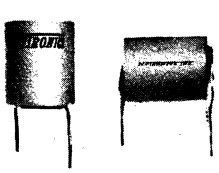


Adjustoroid—Adjustable toroid available in nominal values from 0.01 Hy to 12 Hy. This unit provides stepless adjustment in a completely hermetically sealed package.



Wee V-L — Magnetically shielded adjustable range 0.1 to 100,000 μH. Designed to MIL-C-15305, Grade 1, Class B. Epoxy Molded 0.300″ diameter x 0.400″ length.

Variable Inductor — Unlimited with adjustable range 0.1 to 4700 μH. Designed to meet MIL-C-15305, Grade 1, Class B.
Encapsulated Envelope:
0.400″ diameter x 0.500″ length. Vertical or Horizontal mounting.



Wee-Chip Inductor—The Wee-Chip Inductor is a magnetically shielded miniaturized inductor made especially for mounting on substrates. Copper terminations are of the wrap-around type for the highest degree of mounting flexibility. Available from stock in 23 standard values.

Deci-Ductor — Subminiature with inductance range 0.1 to 1000 μH. Designed to MIL-C-15305, Grade 1, Class B.
Molded Envelope:
0.100″ diameter x 0.250″ length.

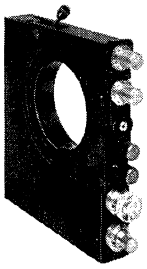
Pee-Dee Ductor — For hybrid circuit applications. Smallest unshielded inductor available. Less than 3/32″. Epoxy-encapsulated. Axial leads. Designed to meet MIL-C-15305. Forty-nine standard values, 0.1 to 1000 μH, ±10%.

Nytronics, Inc.

YOKE SPECIALISTS

COMPLETE LINE for every Military and Industrial Purpose in PRODUCTION QUANTITIES or CUSTOM DESIGNED to your specific requirements

- Yokes for ALL types of ⅞", 1", 1⅛", 1½", and 2⅛" neck dia. CRT's—only representative types are shown.
- Special designs for all types of computer and high speed character displays.
- Wide variety of coil impedances in both push-pull and single-ended configurations.
- Most experienced yoke engineers in the industry, plus complete production and testing capability.



MODEL D4499

MICROMETER—CONTROLLED PRECISION COIL ALIGNER

For fast, convenient alignment of yokes and focus coils in (1) ultra precision displays and flying spot scanners, and (2) laboratory research and prototype evaluation. **Exclusive** independent micrometer adjustment of pitch, yaw, horizontal and vertical translation . . . with firm precision locking. **Exclusive** true precision control and exact repeatability, plus rugged construction. For full details request catalog page.

TYPE F20

PRECISION ELECTRO-MAGNETIC FOCUS COILS for ⅞", 1½", 2⅛" and other neck dia. CRT's.

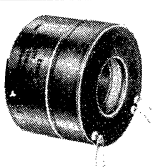
All designed for ultimate focus. Negligible effect on spot size when properly aligned to beam. Static types (all sizes)—low power or high power. Dynamic-static combinations (1½" neck dia.) . . . compact single gap design . . . or double gap design to simplify circuitry by eliminating coupling between static and dynamic coils. Wide range of coil resistances available. For full technical details, request catalog pages. Please specify your CRT and beam accelerating voltage.

TYPE P7

TYPE P8

ANTI-PINCUSHION DEVICES, both PM and EM types

Eliminates CRT geometrical picture distortion. Type P7 permanent magnet anti-pincushion assembly requires no current . . . occupies small space . . . easily adjustable . . . mounts directly on standard yokes . . . available in wide choice of magnet strengths with tight tolerances. Type P8 electromagnetic coil anti-pincushion assembly has very high precision construction . . . allows convenient front panel adjustment. For full technical details request catalog page.

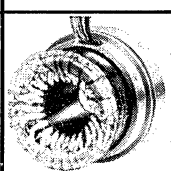


TYPE C4942

Request catalog page

SHIELDED DYNAMIC FOCUS COIL

For sharp focus applications up to 25kv accelerating potential, such as scan converter storage tubes and flat faced high resolution CRT's. Static and dynamic coils combined into a single gap to ease alignment and position. Gap in forward position for superior focus and best image-to-object ratio.



TYPES Y58-Y60-Y62-Y64 for 42°, 52°, 70°, & 90° Deflection Angles

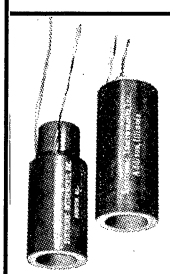
PRECISION STATOR YOKES for 1½" neck dia. CRT's.

High efficiency and accuracy achieved by stator type core which also provides exceptionally low astigmatism and residual magnetism. Push-pull or single-ended coils for time shared sweep displays, character displays and others. Request catalog sheet for full details.

TYPES Y68, Y70, Y72, Y74 for 42°, 52°, 70° & 90° Deflection Angles

FERRITE STATOR TYPE HIGH Q DEFLECTION YOKES for 1½" neck dia. CRT's

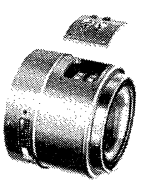
Applications: (a) high speed random positioning and alpha-numeric displays requiring fast settling and high speed strokes, and (b) high resolution resonant displays requiring high Q and high accuracy.



TYPES V21 & V22

VIDICON YOKES & FOCUS COILS for 1" Vidicons

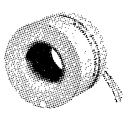
IN VOLUME PRODUCTION NOW. For both commercial and military applications. Engineering Service available. Special designs for all types of 1" vidicons including electrostatic focus magnetic deflection types. For full technical details request catalog page.



TYPE Y25-R Series Up to 52° and 70° Deflection Angles

COMPACT ROTATING COIL YOKES for 1½" neck dia. CRT's

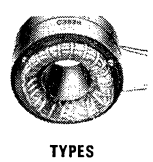
For Radar Plan Position Indicator and all other rotating coil applications. Versions available with dc off-centering coils. Complete in aluminum housing containing deflection coil, slip rings and brush assembly, drive gear and bearing for easy installation into any equipment design. Only 3¾" OD x 2 11/16" long. For technical details request catalog page.



TYPE Y65 Up to 70° Deflection Angle

ENCAPSULATED MINIATURE PRECISION YOKE for ⅞" or 1" neck dia. CRT's.

Push-pull and single-ended coils available in a wide range of inpedances for transistor drivers or vacuum tube circuits. Features electrically balanced windings with equal deflection sensitivities. Close angular tolerances of the display are achieved by precise construction. Epoxy encapsulated to withstand extreme environments. For full technical details, request catalog page.



TYPES C3287/C3528

MAGNETIC SCAN CONVERTER DEFLECTION YOKES

Stator Design for standard 1½ inch neck diameter scan converter storage tubes. High resolution, geometrical accuracy and sensitivity are combined to offer power savings, plus ultimate performance. A desirable short precision magnetic field is achieved by combining short overall length and small ears with the proper distribution, insertion and extreme care in construction. Magnetically shielded designs also available. Request catalog sheet for full details.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

More than 6,000 manufacturers of electronic components, materials, instruments, assemblies, systems and key services are listed in the Yellow Section. An identical Yellow Section appears in each of the three volumes of **eem,** listing addresses, phone numbers and sales managers' names. TWX numbers are also included where available. **Boldface** listings indicate that detailed information on the manufacturers' products is cataloged in the White Section of **eem. Boldface** listings also indicate that local sales offices or representatives are listed for that manufacturer.

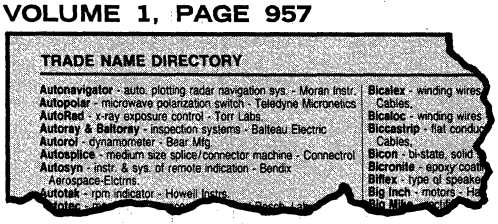
VOLUME 1, PAGE 957



TRADE NAME DIRECTORY

Autonavigator - auto. plotting radar navigation sys. - Moran Instr.
Autopolar - microwave polarization switch - Teledyne Micronetics
AutoRad - x-ray exposure control - Torr Labs.
Autoray & Baltoray - inspection systems - Balteau Electric
Autorol - dynamometer - Bear Mfg.
Autosplice - medium size splice/connector machine - Connectrol
Autosyn - instr. & sys. of remote indication - Bendix Aerospace-Elctrns.
Autotak - rpm indicator - Howell Instrs.
[illegible]
Bicalex - winding wires, Cables.
Bicaloc - winding wires,
Biccastrip - flat conduc[illegible] Cables.
Bicon - bi-state, solid
Bicronite - epoxy coati[illegible]
Biflex - type of speake[illegible]
Big Inch - motors - He[illegible]
Bio Mike - [illegible]

If you know only the trade name, brand name or trade mark of a product, you can locate it in **eem** by using the **Trade Name Directory.** This appears only in Volume 1, beginning on page 957 of the White Section. These pages can be identified by a vertical black band along the outside edge.

if you require additional assistance

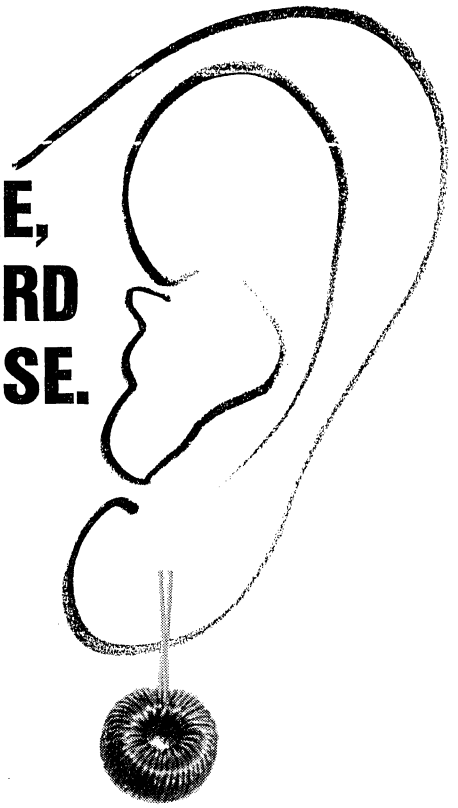
TOKIN, THE FERRITE CORE PEOPLE, WANT TO WHISPER A WORD ABOUT NOISE.



TOKIN SN Coils is the word—the best solution today to performance-noise problems . . . especially thyristor-originated noise.
TOKIN SN Coils are made with our own magnetic dust cores—latest development in a long line of dust-core products. The saturation magnetic flux density reads out to an impressive 15,000 gausses—four to five times that of ferrite cores.
TOKIN SN Coils' very small size allows for extra compact circuit design; heat resistance is good for continuous performance at up to 200°C.
TOKIN SN Coils completely cover the RF range with top permeability for HF.

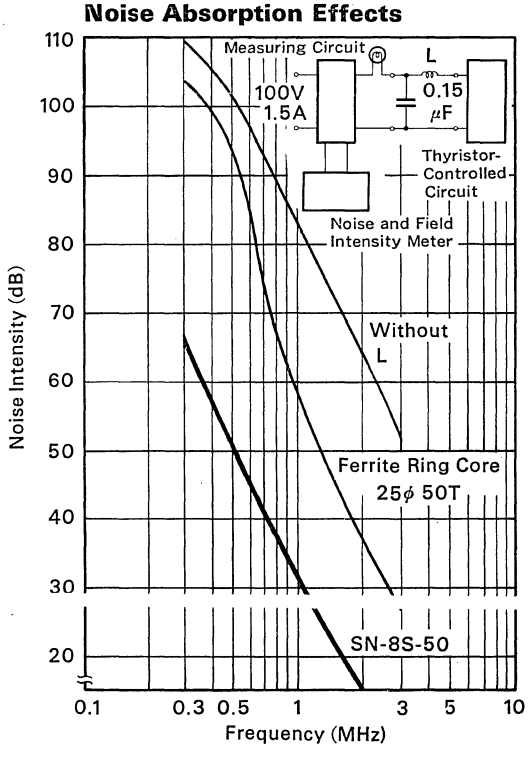
Standard SN Coils

Item / Type	Current capacity I (A)	Inductance L (μH)*	Dimensions (outside diameter x height) (mm)
SN-8S-30	2	26 or more	15ϕ x 7
SN-8S-40	2	50 or more	15ϕ x 7
SN-8S-50	2	72 or more	16ϕ x 8
SN-8D-30	2	45 or more	16ϕ x 13
SN-8D-40	2	80 or more	17ϕ x 14
SN-10-30	3	46 or more	20ϕ x 10
SN-10-40	3	82 or more	22ϕ x 11
[illegible]	[illegible]	[illegible]	[illegible]
SN-12-40	5	65 or more	24ϕ x 10
SN-12-50	5	100 or more	26ϕ x 12

* 100kHz 1mA.

We also manufacture, to order, large capacity SN coils (8A, 10A, 15A, 20A).

Noise Absorption Effects



Main Products: Ferrite Cores, Memory Cores, Memory Matrices, Ferrite Magnetostrictive Vibrators, Pulse Transformers, Permanent Magnets (Cast, Ferrite), Tape Wound Cores, Bobbin Cores, Magnetic Laminations, Fe-Co Alloys, Sendust Cores

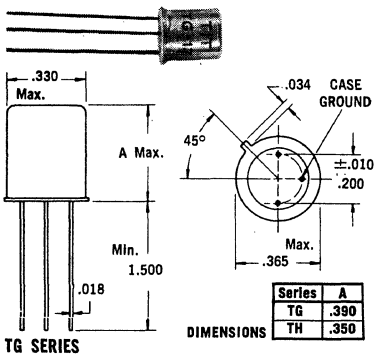
MINI-L HERMETICALLY SEALED R.F. INDUCTORS — TG, TH SERIES



Series	A
TG	.390
TH	.350

DIMENSIONS

- HERMETICALLY SEALED, HIGH "Q" INDUCTOR IN A TO-5 TRANSISTOR CONFIGURATION.
- LOW EXTERNAL MAGNETIC AND ELECTROSTATIC FIELD.
- AMBIENT TEMPERATURE RANGE: −55°C to +85°C.
- DIELECTRIC WITHSTANDING VOLTAGE: 100 volts rms.
- INSULATION RESISTANCE: 10,000 meg. ohms Min.

TG SERIES

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-T-27B, GRADE 4, CLASS R.
- FREQUENCY RANGE: 10 to 500 KHz.
- INDUCTANCE RANGE: 1 to 500 mh.
- INDUCTANCE TOLERANCES: ±5%.
- INDUCTANCE STABILITY: ±2% (−20°C to +85°).

TH SERIES

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-C-150305C, GRADE 1, CLASS O.
- FREQUENCY RANGE: 100 KHz to 10 KHz.
- INDUCTANCE RANGE: 10 to 1000.
- INDUCTANCE TOLERANCES: 10 uh through 33 uh ±10%, 39 uh through 130 uh ±5%, greater than and including 150 uh ±3%.
- INDUCTANCE STABILITY: ±2% (−20°C to +85°C).

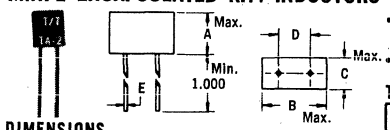
MINI-L ENCAPSULATED R.F. INDUCTORS — TA, TF, TB & TD SERIES



DIMENSIONS

Series	A	B	C	D	E	Max. Power
TA	.225	.210	.110	.100	.020	0.2 Watt
TB	.300	.280	.160	.200	.025	0.33 Watt
TD	.390	.390	.197	.200	.025	0.5 Watt
TF	.225	.210	.110	.100	.020	0.2 Watt

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-C-15305C, GRADE 1, CLASS B (−55°C to +125°C).
- DIELECTRIC WITHSTANDING VOLTAGE: 700 volts rms.
- RATED TEMPERATURE RISE: 35°C at an ambient temperature of 90°C.
- LEADS: Tinned Copper. Weldable leads available by special order.

TA SERIES

- MIN. "Q": 60 to 70.
- INDUCTANCE RANGE: 1 to 10 uh.
- FREQUENCY RANGE: 1 to 50 mcs.
- INDUCTANCE TOLERANCES: Less than 1.0 uh, ±10%. Greater than or equal to 1.0 uh, ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: +50 PPM/°C maximum.
- MAXIMUM POWER DISSIPATION: 0.2 watt.

TF SERIES

- MIN. "Q": 60 to 80.
- FREQUENCY RANGE: 20 to 300 mcs.
- INDUCTANCE RANGE: .01 to 1 uh.
- INDUCTANCE TOLERANCES: Less than 0.1 uh, ±20%. Greater than or equal to 0.1 uh, ±10%. Closer tolerances available by special request.
- INDUCTANCE TC: +200 PPM/°C maximum.
- MAXIMUM POWER DISSIPATION: 0.2 watt.

TD SERIES

- MIN. "Q": 40 to 80.
- INDUCTANCE RANGE: 100 to 10,000 uh.
- RECOMMENDED FREQUENCY RANGE: 50 kcs to 10 mcs.
- INDUCTANCE TOLERANCE: ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: From +60 PPM/°C, maximum to +300 PPM/°C maximum, depending upon inductance value.
- MAXIMUM POWER DISSIPATION: .50 watt.

TB SERIES

- MIN. "Q": 50 to 80.
- RECOMMENDED FREQUENCY RANGE: 50 kcs to 35 mcs.
- INDUCTANCE RANGE: 10 to 1,000 uh.
- INDUCTANCE TOLERANCE: ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: From +60 PPM/°C maximum to +300 PPM/°C maximum, depending upon inductance value.
- MAXIMUM POWER DISSIPATION: .33 watt.

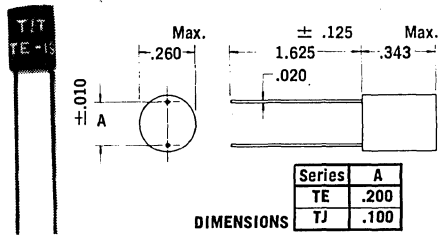
MINI-L ENCAPSULATED R.F. INDUCTORS — TE, & TJ SERIES



Series	A
TE	.200
TJ	.100

DIMENSIONS

- DESIGNED TO MEET MIL-C-15305C, GRADE 1, CLASS B (−55°C to +125°C).
- INDUCTANCE VALUES: 0.10 mh to 220.0 mh.
- FREQUENCY RANGE: 25 KHz to 2.5 MHz.
- DIELECTRIC WITHSTANDING VOLTAGE: 500 volts rms.
- RATED TEMPERATURE RISE: 35°C at an ambient temperature of 90°C.
- LEADS: Tinned Copper. Weldable leads available by special order.

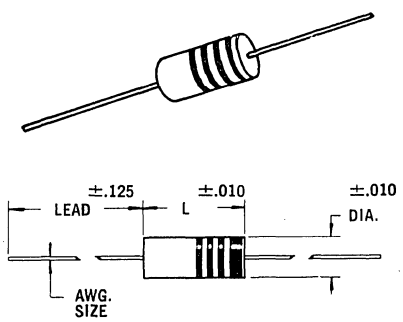
MINI-L SHIELDED R.F. INDUCTORS — SB, RA, RB, & RC SERIES



- DESIGNED TO MEET MIL-C-15305C, GRADE 1, CLASS B.
- EPOXY MOLDED FOR HIGH RELIABILITY. EXCELLENT RESISTANCE TO IMMERSION, MOISTURE RESISTANCE, VIBRATION AND SHOCK TESTS.
- OPERATING TEMPERATURE EXTREMES FROM −55°C TO 125°C (35°C RISE AT 90°C AMBIENT).
- OPERATION TO ALTITUDES OF 70,000 FEET.
- COLOR CODED PER MIL-C-15305C.
- TINNED COPPER LEADS. WELDABLE LEADS AVAILABLE UPON REQUEST.

Series	Inductance Range (uh)	Power Rating (W)	D	L	AWG Size
RB	.15-240	.25	.155	.375	22
*SB	.10-100000	.25	.157	.395 ±.020	22

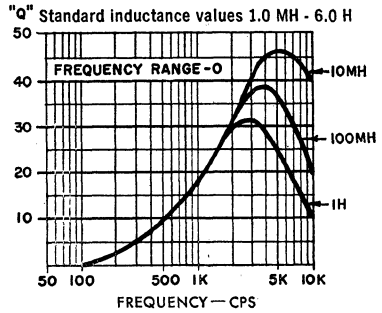
TORWICO ELECTRONICS — TOROIDAL INDUCTORS

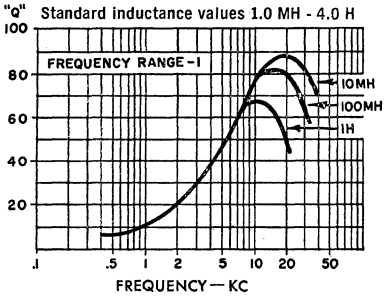
TWC Series

"Q" Standard inductance values 1.0 MH - 6.0 H



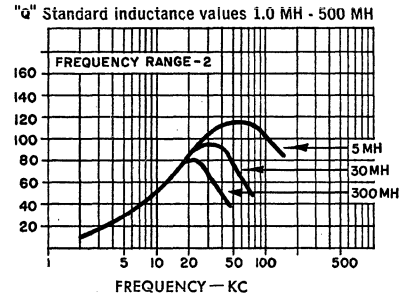
A. DC resistance (nominal) = 280 ohms/henry
B. DC current (ma) for 5% decrease in L= 135
C. Maximum AC current (ma) = $\frac{372}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 1.0 MH - 4.0 H

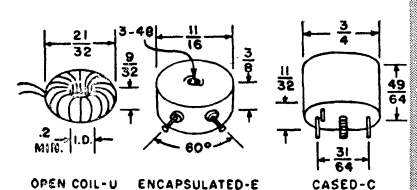


A. DC resistance (nominal) = 520 ohms/henry
B. DC current (ma) 5% decrease in L= 210
C. Maximum AC current (ma) = $\frac{424}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 1.0 MH - 500 MH

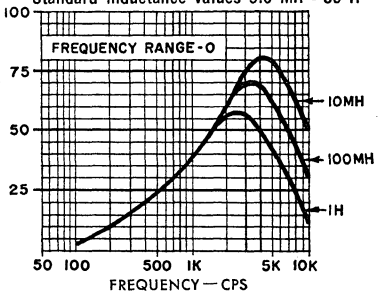


A. DC resistance (nominal) = 1100 ohms/henry
B. DC current (ma) for 5% decrease in L= 340
C. Maximum AC current (ma) = $\frac{453}{\sqrt{mh}}$ $\sqrt{mh}$



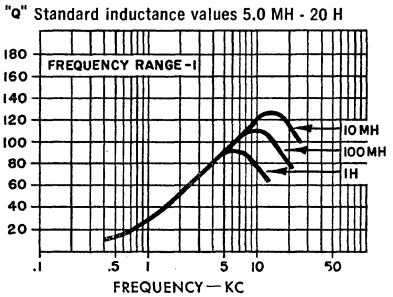
TWS Series

"Q" Standard inductance values 5.0 MH - 30 H



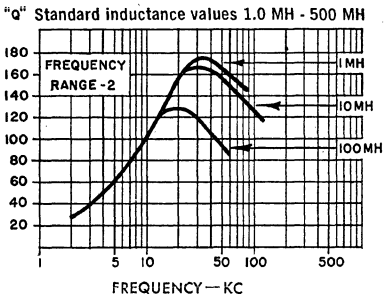
A. DC resistance (nominal) = 135 ohms/henry
B. DC current (ma) for 5% decrease in L= 320
C. Maximum AC current (ma) = $\frac{708}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 5.0 MH - 20 H

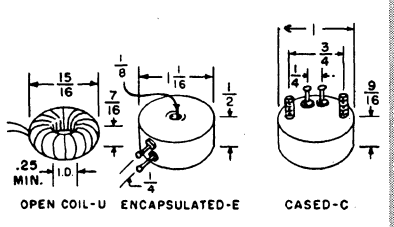


A. DC resistance (nominal) = 255 ohms/henry
B. DC current (ma) for 5% decrease in L= 380
C. Maximum AC current (ma) = $\frac{790}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 1.0 MH - 500 MH

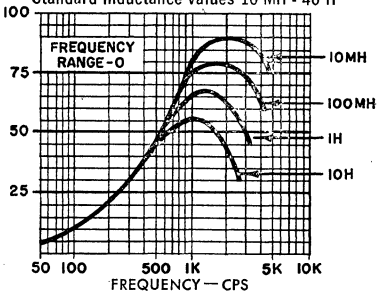


A. DC resistance (nominal) = 630 ohms/henry
B. DC current (ma) for 5% decrease in L= 420
C. Maximum AC current (ma) = $\frac{822}{\sqrt{mh}}$ $\sqrt{mh}$



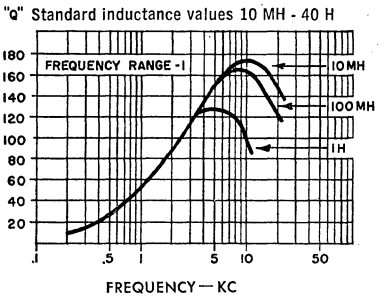
TWM Series

"Q" Standard inductance values 10 MH - 40 H



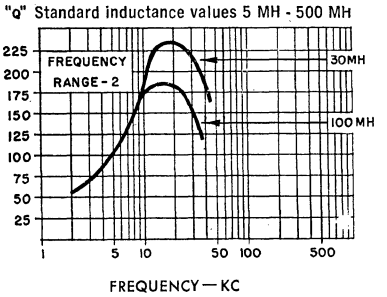
A. DC resistance (nominal) = 60 ohms/henry
B. DC current (ma) for 5% decrease in L = 500
C. Maximum AC current (ma) = $\frac{1300}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 10 MH - 40 H

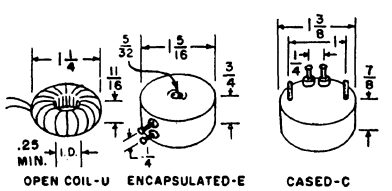


A. DC resistance (nominal) = 115 ohms/henry
B. DC current (ma) for 5% decrease in L = 550
C. Maximum AC current (ma) = $\frac{1415}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 5 MH - 500 MH



A. DC resistance (nominal) = 250 ohms/henry
B. DC current (ma) for 5% decrease in L= 880
C. Maximum AC current (ma) = $\frac{1548}{\sqrt{mh}}$ $\sqrt{mh}$



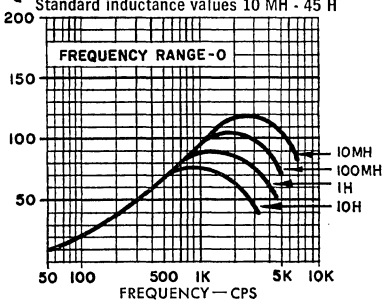
TORWICO ELECTRONICS INC. LAKEWOOD, N.J.

TORWICO ELECTRONICS

TOROIDAL INDUCTORS

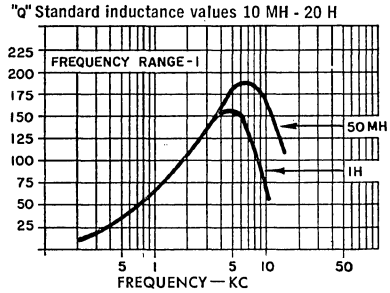
TWI Series

"Q" Standard inductance values 10 MH - 45 H

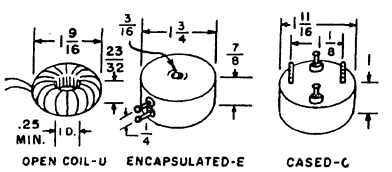


A. DC resistance (nominal) = 45 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{715}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{1500}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 10 MH - 20 H

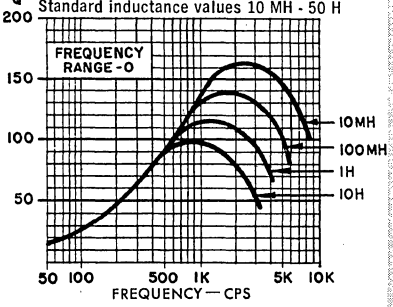


A. DC resistance (nominal) = 94 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{900}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{1644}{\sqrt{mh}}$ $\sqrt{mh}$



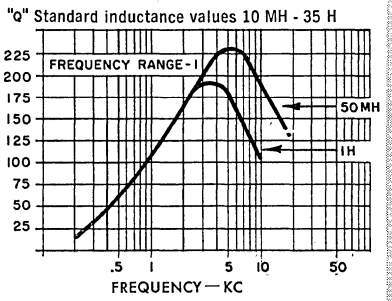
TWD Series

"Q" Standard inductance values 10 MH - 50 H

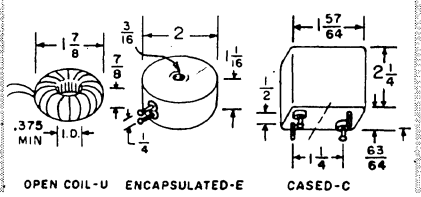


A. DC resistance (nominal) = 27 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{1100}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{2000}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 10 MH - 35 H

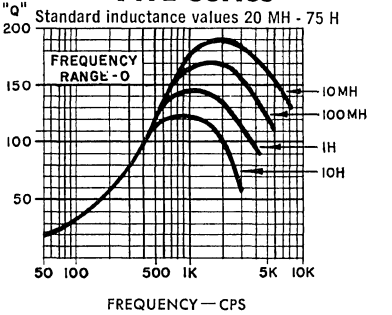


A. DC resistance (nominal) = 54 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{1200}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{2264}{\sqrt{mh}}$ $\sqrt{mh}$



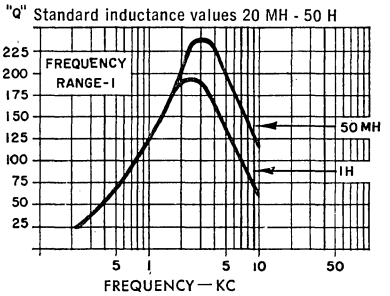
TWL Series

"Q" Standard inductance values 20 MH - 75 H

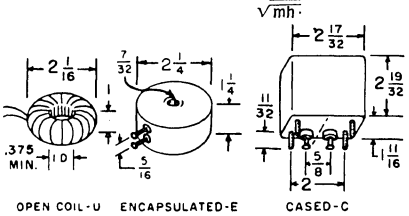


A. DC resistance (nominal) = 21 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{1450}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{3100}{\sqrt{mh}}$ $\sqrt{mh}$

"Q" Standard inductance values 20 MH - 50 H



A. DC resistance (nominal) = 35 ohms/henry
B. DC current (ma) for 5% decrease in L = $\frac{1700}{\sqrt{mh}}$
C. Maximum AC current (ma) = $\frac{3290}{\sqrt{mh}}$ $\sqrt{mh}$



HOW TO ORDER

Order these standard inductors by their part number.
Example: **TWC100MHOE**

TWC	100MH	0	E
(1)	(2)	(3)	(4)

(1) Size: TWC, TWS, TWM, TWI, TWD, TWL

(2) Inductance:

Use MH—for millihenry designation below 1.0 henry
H—for henries above 1.0 henry

(3) Frequency Range: 0, 1, 2

(4) Packaging: U—Open Coil E—Encapsulated C—Steel Cased

GENERAL SPECIFICATIONS

Tolerance—The tolerance on standard inductors is ± 1%

Test Level—Standard inductors are adjusted at 1.0 volts, 1000 cps

Maximum Voltage—The maximum voltage across standard inductors shall be 115 VRMS

Insulation Resistance—10,000 megohms minimum, except for open coil versions which shall be 1,000 megohms minimum

Standard Torwico Inductors are designed to meet the following MIL-T-27 requirements:
Open Coil—Grade 6, Class S, Life Expectancy X
Military Designation: TF6SX04ZZ

Encapsulated—Grade 5, Class S, Life Expectancy X
Military Designation: TF5SX04ZZ

Steel Cased—Grade 4, Class S, Life Expectancy X
Military Designation: TF4SX04YY

MITE SERIES ELECTRICALLY VARIABLE INDUCTORS

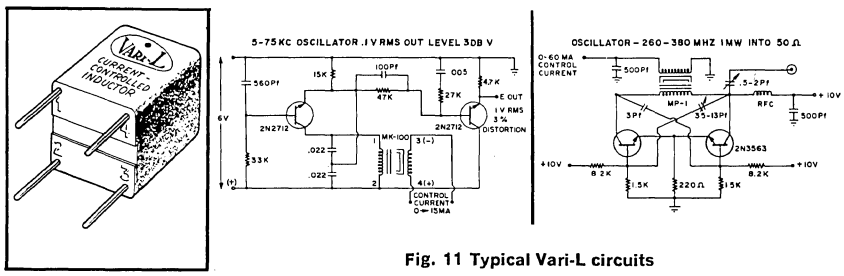

Fig. 11 Typical Vari-L circuits

The **Vari-L Inductor** consists of a high-Q coil wound on a ferromagnetic core, and an electromagnetic element for controlling its inductance. The coil is connected into an oscillator, amplifier or filter, along with suitable capacitance to establish the initial parameters; current in the control winding will then do the tuning. The rate of control can be slow for semi-fixed operation — or fast, up to several thousand Hz, for sweep or frequency modulation. The control current is usually in the milliampere range, or can be made higher to fit special applications.

The component is entirely solid-state, with no moving parts to get out of adjustment or wear out, so it can safely be located remote from the control point or potted as part of your own intricate sub-assembly.

Vari-L tuning has been in use for 15 years in numerous industrial instruments, and in critical military applications including outer space and oceanography. It is a natural for such sweep services as TV-alignment generators, spectrum analyzers, and panoramic receivers; but it is also chosen frequently because of its non-mechanical advantages such as remote control, sub-miniaturization, or automatic (closed-loop) tuning.

The **"MITE"** Series described below was brought out to keep step with the trend toward printed circuits and smaller equipment; but we also make larger units for high-power circuits or multi-function service.

We will quote promptly on your special requirements. Applicable bulletin: 167

(ADC) Bantam Jack Panels

Bantam Jack Panels are designed to satisfy the increasing demand for more compact patchfields in modern electronic and communication equipment. Bantam Jack Panels, with miniaturized jacks, provide twice the number of jacks in a standard size panel. They require only ½ the rack space previously used by conventional panels. The new panel assemblies weigh 65% less when compared to an assembly using an equivalent number of jacks on a conventional jack panel. ■ Bantam Jack Panels are compact, lightweight, and yet provide the same dependable service as the long established telephone types. This new design offers 96 jacks (48 pairs) in a 1¾ inch x 19 inch standard sized panel. The jacks on this panel are spaced to prevent the cross patching of adjacent circuits when using double plugs.

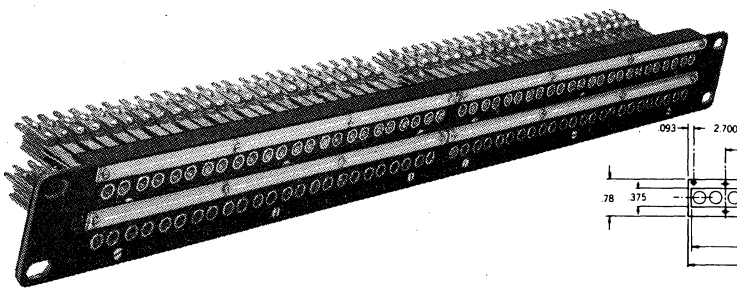
specifications

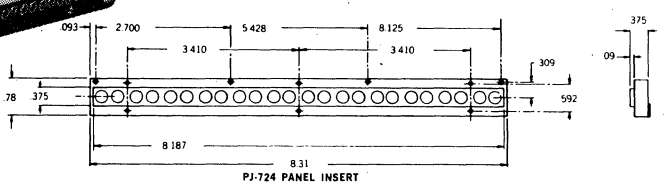
1. **Panel:** Aluminum alloy, extruded. Finished black anodized per Mil-A-8625A. Overall dimensions 1¾"x19"—Standard EIA mounting centers.
2. **Jack Mounting:** Four moulded plastic inserts, each provides for 24 jacks. Pairs of jacks on 5/16 inch centers. Double-row panel provides 96 jacks total. Blank inserts can be furnished where only single row of jacks is required.
3. **Designation Strip:** Extruded clear plastic.
4. Panel assemblies are available with a wide variety of two and three-conductor jacks. See listing of Bantam jacks for complete details.

PJ-731 Double row panel, assembly less jacks, holds 96 jacks.
PJ-737 Double row panel, with 48 pair (96 total) PJ-818 jacks.
PJ-739 Double row panel, with 48 pair (96 total) PJ-839 jacks.
PJ-724 Panel inserts, less jacks, 24 holes.
PJ-700 Panel inserts, blank (same as PJ-724 without holes).
PJ-736* Double row panel, with 104 PJ-818 jacks.
PJ-738* Double row panel, with 104 PJ-839 jacks.

*Panels with 104 jacks (26 per insert, jacks all on 5/16 inch centers) are available on special order.

Custom panel assemblies with up to 104 jacks are available on special order.

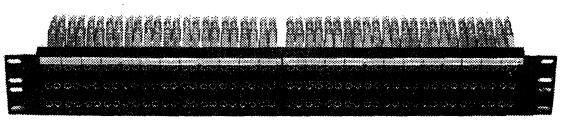




PJ-724 PANEL INSERT

Bantam Triple Row Jack Panel

Bantam Triple Row Jack Panels provides 144 jacks in a 2⅝ inch x 19 inch size panel. The specification and construction of this panel is the same as Bantam Double Row Panels except width of panel is one and one-half the standard panel size. Mounting centers conform to standard EIA rack spacing. Three rows of jacks with 48 jacks in each row. These three rows are particularly desirable for use in 2 wire and 4 wire VF Circuit applications where space can be saved by having three verticle jacks appear as a jack set. When needed number plates or labels to show row functions can be furnished on special order.



"BANTAM TRIPLE ROW JACK PANEL — 2⅝" WIDE"

BANTAM TRIPLE ROW JACK PANEL

PJ-732 Triple Row Panel Assembly, less jacks, holds 144 jacks
PJ-733 Triple Row Panel, with 144 PJ-818 Jacks
PJ-734 Triple Row Panel, with 144 PJ-839 Jacks
PJ-735 Triple Row Panel, with 96 PJ-839 Jacks (top and middle row)
48 PJ-838 Jacks (bottom row).

Bantam 2 + 1 Jack Panels

Bantam 2 + 1 Jack Panels are the newest development in the ADC line of Bantam components which offer the maximum in patching density. These unique three row panels feature three miniature jacks on a single frame, which effectively requires ⅓ less space than regular Bantam jacks. The Bantam 2+1 panels include 48 of these three conductor jacks, in a standard size 1¾ inch wide by 19 inch long panel. These panels were especially designed to provide vertically positioned jack sets such as the "Line", "Equipment" and "Monitor" jacks in a Voice Frequency Circuit. The Bantam 2 + 1 Jacks provided in these panels are available with solder type terminals and with wire wrap terminals. When required number plates or labels for identifying row functions can be provided on special order.

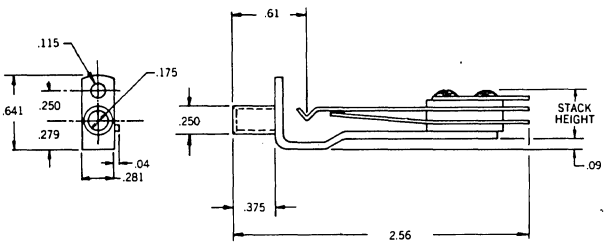
(ADC) Bantam Jacks

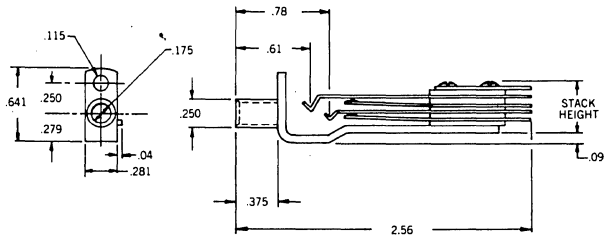
Bantam Jacks will meet the electrical, mechanical and environmental requirements of the military specification for long frame telephone jacks. Although reduced in size these jacks will provide the same reliable service equal to that expected from regular size telephone jacks. These jacks are available in a variety of two and three conductor types, with isolated circuit contacts as well as normalling contacts.

FOR COMPLETE LINE OF BANTAM LITES, SWITCHES, ACCESSORIES, SEE ADC COMMUNICATIONS COMPONENTS CATALOG.



2 CONDUCTOR JACK

3 CONDUCTOR JACK



SCHEMATIC DIAGRAM	PART NO.	STACK HEIGHT (Inches)

	PJ-838	35/64
	PJ-839	17/32
	PJ-841	43/64
	PJ-880	3/4

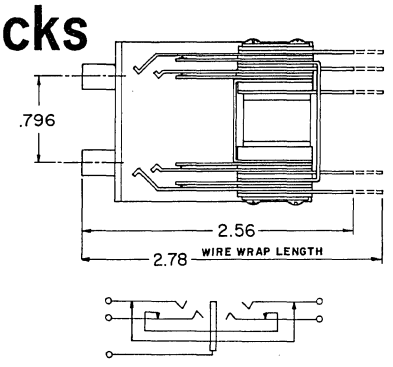
specifications

Frame: Steel, Cadmium plate with chromate conversion coating to withstand 50 hours of salt spray.
Springs: Nickel silver.
Contacts: W. E. #1 gold alloy, cross-bar contacts are welded to springs.
Insulation: Spacers, Phenolic Type PBE-P per MIL-P-3115B.
Bushing: Brass, silver soldered to frame. Finish same as frame.

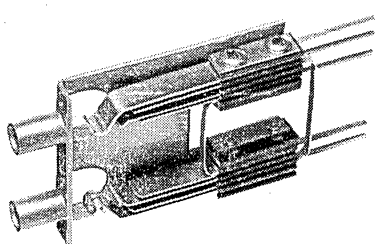
All of the above jacks are available on special order with Palladium cross-bar contacts.
If gold plating is required for all surfaces, jacks should be ordered as the PJ number with a "G" suffix. ADC uses .00005 gold per MIL-G-45204, TYPE II. The solder lugs are not tinned for gold plated jacks. Any requirements other than those described require special notation.

Bantam Twin Jacks

Bantam Twin Jacks are the miniature equivalent of the ADC PJ-482 or the WE 482A. These three conductor type jacks have normal contacts on both the tip and ring springs strapped, thereby reducing and simplifying wiring. The Bantam Twin Jacks are designed with sleeves on .796 inch centers and are made to mount in the ADC PJ-731 Double Row Panels and the PJ-732 Triple Row Panels. Bantam Twin Jacks are available with solder terminals and wire wrap terminals.



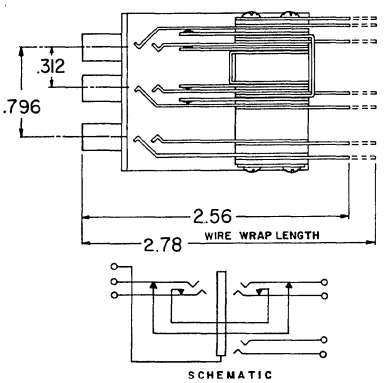
SCHEMATIC



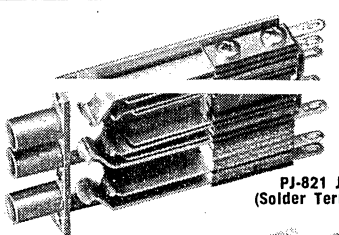
PJ-882 Bantam Twin Jack — Solder Terminals
PJ-882W Bantam Twin Jack — Wire Wrap Terminals

Bantam 2 + 1 Jacks

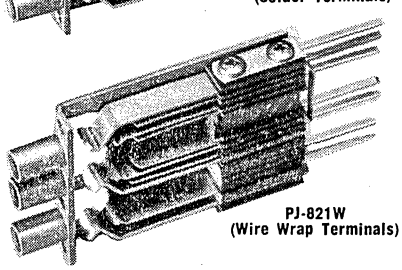
Bantam 2 + 1 Jacks offer almost unbelievable space saving advantages . . . Savings even greater than regular Bantam jacks. Bantam 2 + 1 Jacks literally permits tripling of the patching density of a 1¾ inch wide panel. This unique design features three jacks on a single frame. The jacks are three conductor types. Two of the jacks have normal contacts on both tip and ring springs. These normal contacts are strapped to simplify wiring. Ideally suited to VF Circuit applications where two of the jacks would function as "Line" and "Equipment" jacks and the third as a "Monitor" jack. Up to 48 Bantam 2 + 1 Jacks can be mounted on a 1¾ inch wide by 19 inch long panel. Bantam 2 + 1 Jacks are available with solder type terminals and with wire wrap terminals. These very remarkable miniature jacks are specifically designed to mount in the Bantam 2 + 1 Panel PJ-721.



SCHEMATIC



PJ-821 Jack (Solder Terminals)

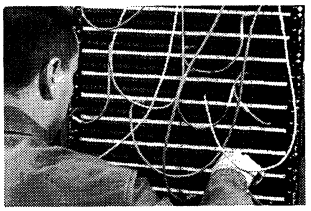


PJ-821W (Wire Wrap Terminals)

(ADC) Bantam Patch Cords

Bantam Patch Cords are plastic jacketed, shielded cords complete with molded-on plugs. The plugs are made with molded insulation between conductors. Bantam Patch Cords are available with single and double two and three conductor plugs. A cord strain relief feature is included in the plug construction.

Bantam plugs may be gold plated on special order per MIL-G-45204, Type II, .00005 inches thick.



specifications

Cord: Plastic jacketed, stranded copper conductors, braided shield. Jacket color — gray.

Plugs: Conductor parts are brass, finished to 32 microinch finish maximum.

Plug Insulation: Molded polystyrene.

Internal Connections: Soldered.

Plug Shell: Plastic, black, rigid thermoplastic.

NOTE 1: Length is measured from the rear of the plug shell to rear of plug shell on opposite end.

specifications

Cord: Plastic jacketed, stranded copper conductors, braided shield. Jacket color — gray.

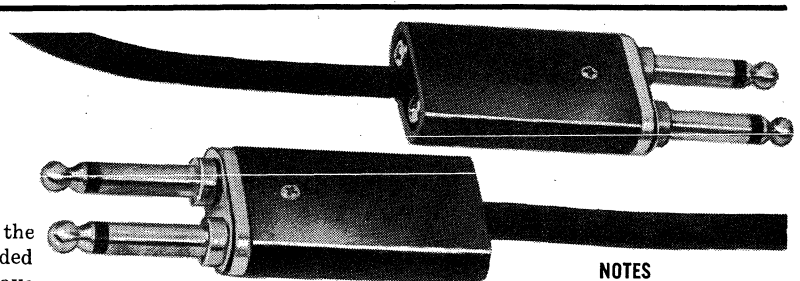
Plugs: Conductor parts are brass, finished to 32 microinch finish maximum.

Plug Insulation: Molded polystyrene.

Internal Connections: Soldered.

Plug Shell: Plastic, gray, flexible thermoplastic.

Patch Cords



ADC Patch Cords have become standards in the communications industry. The heavy Nylon braided jacket excels in abrasion resistance. All cords have been designed to give the ultimate combination of durability, flexibility and reliability. ADC has numerous combinations of special cord assemblies using virtually every plug combination required. You are invited to submit your requests or requirements for quotations.

PATCH CORD LENGTH	TOLERANCE
6 inch	+ .375" —.00"
1 foot	+ .75 " —.00"
2 feet	+1.125" —.00"
3 feet	+1.375" —.00"
4 feet	+1.625" —.00"
5 feet	+2.0 " —.00"
6 feet	+2.25 " —.00"
10 feet	+2.625" —.00"

NOTES

1. Patch cord lengths are measured from backs of plug shells.
2. When outer jacket colors other than noted are required add suffix:
   S — For Slate G — For Green
   R — For Red B — For Black
3. All cords and cord assemblies will withstand 500 V, 60 Hz PBT between all conductor. Cordage is designed to have minimum leakage resistance of 50 Megohms with 100 volts applied.

2 CONDUCTOR SHIELDED, CORD ASSEMBLIES

Length	Cord w/ PJ-1 Plugs	Cord w/ PJ-055B Plugs	Replacement Cords Only
6 inch	PJ-10½	PJ-50½	PJ-20½

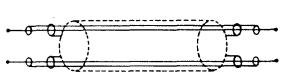
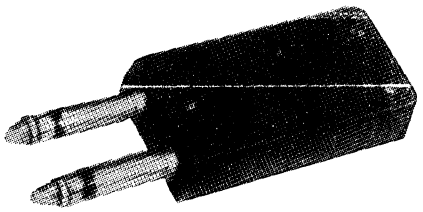
4 feet	PJ-174	PJ-94
5 feet	PJ-175	PJ-95
6 feet	PJ-176	PJ-96

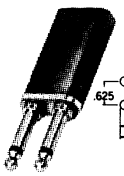


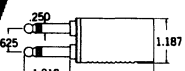
The PJ-90 and PJ-170 series cords provide four tinsel wire conductors, plus a shield common to both sleeves on the plugs. Standard color for these cords is black. They are also available in slate, green or red on special order. See Note 2.

(ADC) Plugs

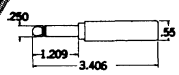


TWO CONDUCTOR

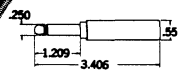




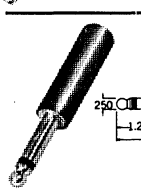
PJ-1 — Equivalent WE-241. Heavy duty die cast frame. Black phenolic shell. Has self-aligning plug sleeves on 5/8" centers for use with all standard jack panels. Two tip conductors, plus sleeve connection common to both sleeves.

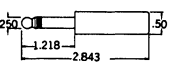


PJ-047R — Equivalent WE-347. Designed for use with tip and sleeve jacks. Molded insulation, red plastic handle, design and construction in accordance with MIL-P-642B specifications.

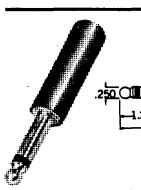


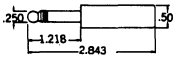
PJ-047B — Same as above except black plastic handle.



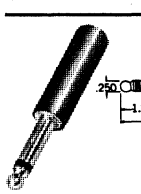


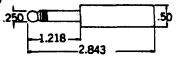
PJ-055B — Formerly ADC PJ-5, fits 1/4" phone jacks. Black plastic shell. Screw terminals, designed and manufactured in accordance with MIL-P-642B.



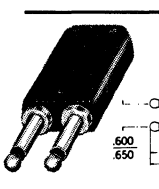


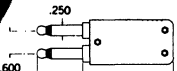
PJ-055M — Same as above except has metal handle, brass, nickel plated.



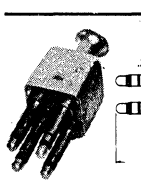


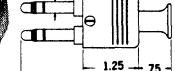
PJ-055R — Same as above except has red plastic handle.



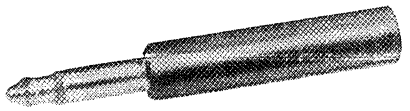


PJ-327 — Equivalent WE-327. Twin plug provides two electrically independent 2 conductor plugs in a black phenolic shell which is notched to indicate polarity. Self-aligning plug sleeves are on 5/8" centers. Designed and constructed in accordance with specification MIL-P-642B.

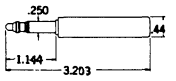




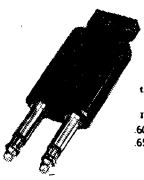
D7200 — Equivalent WE-315B. Four sleeves, self-aligning plug. Molded insulation. Brass shell notched for polarity is nickel plated and connected to plug sleeves to provide shielding for tip conductors. For use with four PJ-318 double jacks mounted on 5/8" centers. Five conductors total.

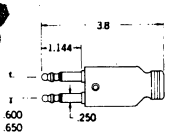


THREE CONDUCTOR

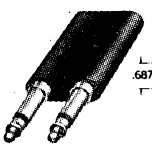


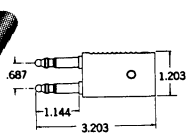
PJ-2 — Equivalent WE-291A. Designed for use with 1/4" diameter tip, ring and sleeve jacks. Especially designed cone-shaped tip to prevent momentary shorting of tip and ring conductors when used with ADC PJ-339, WE-239A or similar three circuit jacks.



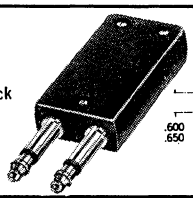


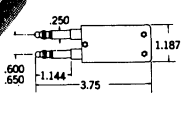
PJ-4 — Looping plug, dual three conductor type. Same conductor configuration as PJ-051 except has conductors wired internally, tip to tip, ring to ring and sleeve to sleeve. Black plastic shell.



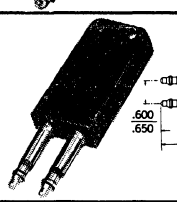


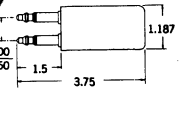
PJ-6 — Equivalent WE-213. Designed for applications requiring two separate 3 conductor circuits. Popularly used with operator's intercom/monitor headsets. Black shell notched for polarity identification. Self-aligning plug on 1 1/16" centers. (**Note:** Not intended for use with standard jack panels where jacks are mounted on 5/8" centers.)



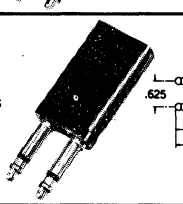


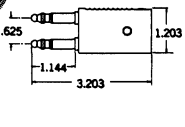
PJ-7 — Equivalent WE-425. Twin type plug with tip, ring and sleeve conductors on 5/8" centers for use with all standard jack panels. Designed to mate with three conductor jacks having 1/4" diameter sleeves. Molded insulation. Black phenolic shell is notched to indicate polarity.



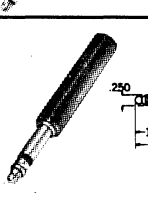


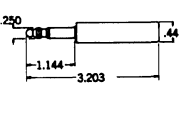
PJ-8 — Dual three conductor type with same conductor configuration as PJ-2, designed for non-shorting of tip and ring circuits when used with PJ-339, WE-239A or similar jacks. Black plastic handle notched to indicate polarity.



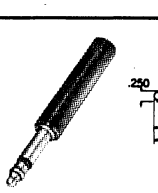


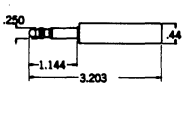
PJ-9 — Equivalent WE-338. Designed for applications requiring two separate 3 conductor circuits. Will mate with three-conductor jacks having 1/4" diameter sleeves. Molded insulation, black plastic handle notched to indicate polarity. Self-aligning plug sleeves on 5/8" centers. Has two separate cord entry holes and requires "Y" type cord or two separate cords.



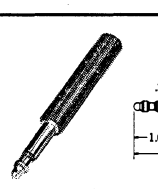


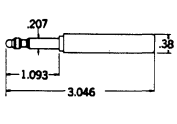
PJ-051R — Equivalent WE-310. Formerly ADC PJ-3. Designed for use with 1/4" tip, ring and sleeve jacks. Molded insulation, red plastic shell, three conductor. Is in accordance with MIL-P-642B.





PJ-051B — Same as above except black plastic handle.





PJ-309 — Equivalent WE-309. Three conductor type. Has .207 diameter sleeve (small diameter). Intended for use with ADC PJ-246, PJ-249 and similar three circuit jacks which have .210 I.D. sleeves. Molded insulation — red plastic handle. Designed and constructed per MIL-P-642B.

FOR COMPLETE LINE OF COAXIAL PLUGS, SEE ADC COMMUNICATIONS COMPONENTS CATALOG.

(ADC) Jacks

TELEPHONE TYPE

ADC is recognized as a leading supplier of long frame, telephone type jacks. As evidence of their outstanding quality, ADC jacks are used by the country's foremost manufacturers of communication equipment. The unique, ADC one-piece frame is strong, dimensionally stable and readily interchangeable both mechanically and electrically with commonly used jacks. Plating withstands 50-hour salt spray tests. W. E. #1 gold alloy contacts are welded to nickel silver springs. Lugs are hot tin dipped. Insulation is high grade phenolic.

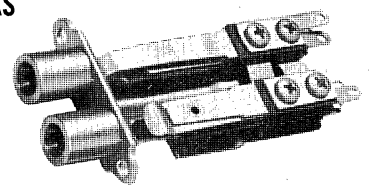
*For use with PJ-309 or other similar type plugs having .207" diameter sleeves.

**Caution — Because of Stack Height these "A" frame jacks cannot be installed on 5/8" centers. "C" Frame version if not listed can be furnished on special order.

TWIN JACKS



ADC Twin Jacks are essentially two jacks with a common mounting frame. Jack sleeves are on 5/8" centers for vertical mounting in standard jack panels. Normal springs are cross-connected or strapped. Jack sleeves are brass, nickel plated. Die formed springs are nickel silver. Frame and hardware are steel, cadmium-chromate plated to withstand 50 hours salt spray.

FOR COMPLETE LINE OF COAXIAL PLUGS, SEE ADC COMMUNICATIONS COMPONENTS CATALOG.

(ADC) Jack Panels

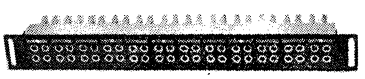
ADC offers the most complete assortment of jack panels available today. ADC panels are used in television and broadcasting stations, recording studios, industrial paging systems, and communication equipment of all kinds where there is a need to efficiently switch and distribute audio signals. Molded of solid phenolic, reinforced with steel to provide maximum rigidity and strength. Jacks are spaced to permit use of any standard double plug with 5/8" spacing. Mounting brackets and designation strips* furnished with each panel. All panels designed to fit standard 19" relay rack. Consult ADC for your standard and special jack panel requirements.

*The jack panels as illustrated are equipped with ADC standard designation strips as shown. PJ-30, PJ-35, PJ-36 and PJ-37 type panels can be supplied with the reinforcement strips drilled and tapped to accommodate the Western Electric equivalent designation strips (PJ-899A, PJ-899B, PJ-903A and PJ-903B). The suffix "A" added to the part number denotes panels which are modified to accommodate these alternate type designation strips. Designation strips are to be ordered separately.

SPECIFICATIONS

Panel: Molded, thermoset plastic per Mil-M-14F, Type CFG, black.
Mounting Brackets: PJ-31 and PJ-33: Die cast zinc, finished black lacquer. PJ-30, PJ-35, PJ-36, PJ-37: Steel, finished cadmium + chromate per Mil-F-14072 #M262, Type II.
Reinforcing Strips: PJ-31 and PJ-33: Steel, finished nickel plated. PJ-30, PJ-35, PJ-36, PJ-37: Steel, finished cadmium + chromate per Mil-F-14072 #M262, Type II.

PJ-30
Double Panel. Holds 52 jacks — requires 1¾" panel space. Double designation strip. Brackets for flush rack mounting. All jack mounting holes on 5/8" centers.



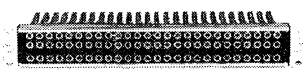
PJ-31
Double Panel. Holds 48 jacks. Holes are spaced to prevent patching adjacent circuits. Requires 2⅛" panel space.

PJ-33
Single Panel. Holds 24 jacks. Holes are spaced to prevent patching adjacent circuits. Requires 1¾" panel space.

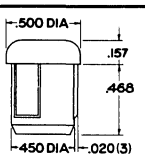
FOR LAMP SOCKET AND CAPS, SEE ADC COMMUNICATIONS COMPONENTS CATALOG.

PJ-35 Same as PJ-30, except has 7" standoff mounting brackets.

PJ-36
Single Panel. Holds 26 jacks — requires 1¾" panel space. Brackets for flush rack mounting. All jack mounting holes on 5/8" centers.



PJ-37
Triple - Row Panel. Holds 78 jacks. Requires 2⅝" panel space (1½" standard rack spaces). Provided with brackets for flush rack mounting and PJ-901 designation strips top and bottom.



HOLE PLUG
Molded of black polyethylene plastic. Fits all ADC standard jack panels. Made to plug unused jack mounting holes in jack panels. **PJ-29**

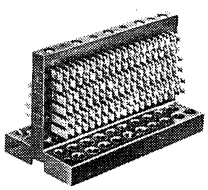
Molded Terminal Blocks 20 pin



Known for their ruggedness, ADC "Christmas Tree" Terminal Blocks have become standards in the Broadcast and Telecommunications Industries. The ADC 20-Pin Terminal Blocks are molded of durable, black, thermo-set plastic per Military specifications MIL-M-14F. Terminals are brass with a tin alloy plating for lasting solderability (see specifications below for details on solderability). The PJ-101 series blocks have terminals graduated in length for ease of wiring. The Figure 2 solderless terminals as furnished on the PJ-161 series blocks are designed to accommodate AMP No. 60197-1 Connectors as supplied by American Pamcor, Inc. or may be used as regular solder terminals. All Terminal Blocks are numbered along the top row for easy terminal identification.

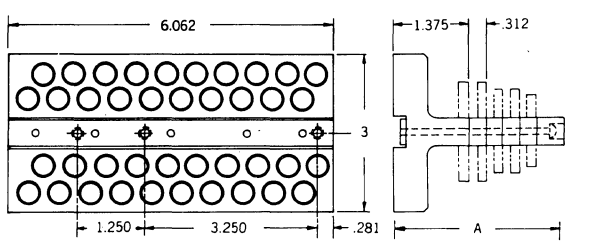


FIG. 1 Solder Type Mat'l. .040 Thick

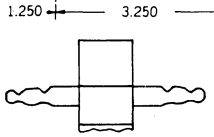

FIG. 2 Solderless or Solder Mat'l. .032 Thick

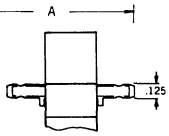

SPECIFICATIONS

Terminals: Brass, Tin alloy plated.

Insulated Strips and Base: Black Thermoset plastic per MIL-M-14F, Type CFG.

Mounting Strip: Steel, Cadmium-Chromate per MIL-F-14072, #M262, Type II.

Current Carrying Capacity: 5 Amperes.

Insulation Resistance: 1000 Megohms Min.

Dielectric Strength: 2500 V RMS 60 Hz. between terminals.

Solderability: Per MIL-STD-202C, Method 203A Initial: Excellent (over 95% coverage).
After 49 hours salt spray per MIL-STD-202C. Method 1013: good (90% coverage).
After 240 hours conditioning at +150°F and 95-98%. Relative Humidity: excellent.
After 90 days storage at room temperature: excellent.

FOR WRAP TERMINAL BLOCK OR 26-PIN BLOCKS, SEE COMPLETE ADC CATALOG.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

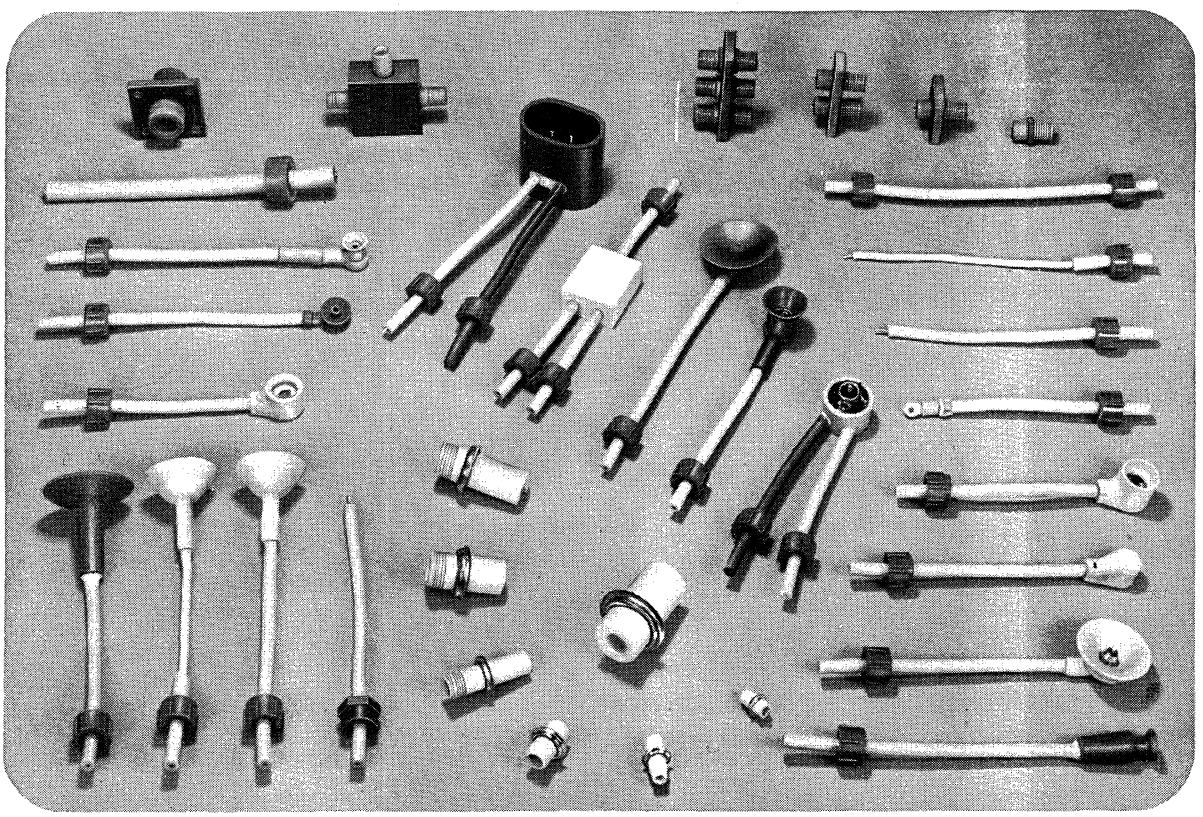
HIGH VOLTAGE LEAD ASSEMBLIES AND RECEPTACLES



The CAPITRON Division of AMP Incorporated is the leading manufacturer of high voltage, high altitude, high temperature lead assemblies and receptacles. Custom pre-engineered LGH*high voltage connector products incorporate the advantages of miniaturization and lightweight, and are ideal where reliability and peak performance are essential to the application. They are the result of continuing research and development activities in the connection of high voltage power supplies, modulators, pulse forming networks, high voltage transformers, magnetrons, klystrons, traveling wave tubes, and cathode ray tubes.

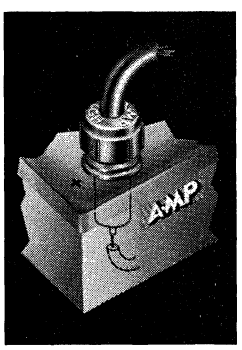
GENERAL FEATURES OF LGH COMPONENTS

- Lightweight, space saving, safe
- Wide temperature range: −55° C to +125° C (−67° F to +257° F)*
- Voltage ratings: to 50,000 volts DC†
- Easy to install—no tools needed
- Insulation: extruded silicone rubber
- Receptacles: ceramic or glass epoxy
- Quick disconnect
- High dielectric and mechanical strength
- Hermetically sealed and corona-resistant
- High altitude operation: up to 70,000 ft. without derating
- Meet applicable mil. specs. for shock and vibration resistance
- RFI shielding optional

*Higher temperature components up to +200°C (+392°F) on request

†Special designs to 200,000 volts DC on request

NOTE: See other CAPITRON High Voltage products under Catalog Sections 2100 and 4000.



Sizes and Ratings Available

TYPE	DC VOLTAGE Rating**	CURRENT RATING**
LGH ½	6,000	10 amps DC
LGH ½ L	12,000	10 amps DC
LGH 1	12,000	10 amps DC
LGH 1 L	25,000	10 amps DC
LGH 2	25,000	10 amps DC
LGH 3	35,000	10 amps DC
LGH 4	50,000	10 amps DC

**Peak AC and peak pulse voltage ratings will be somewhat less than DC ratings. Current rating is limited to 7.5 amps AC rms, 60 cycles.

Write on your letterhead for our LGH products catalog

CAPITRON DIVISION, AMP INCORPORATED

TWX: 510-657-4561 • PHONE: 717-367-1105.

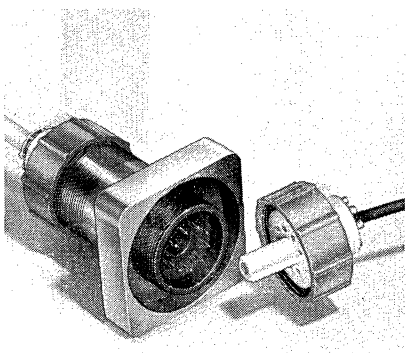
CAPITRON products and engineering assistance are available in Canada through AMP of Canada Ltd., Ontario, Canada ★Trademark of AMP Incorporated

AMP INCORPORATED

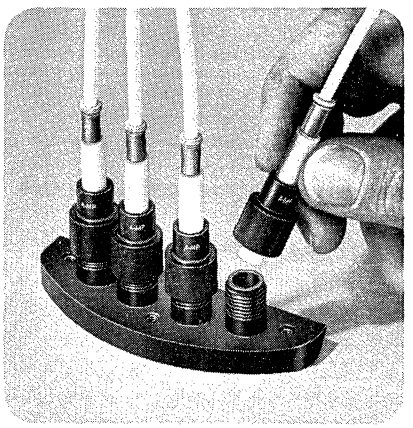
HERMETIC CONNECTORS UP TO 150,000 VOLTS D.C.

WJH* Connectors eliminate glass or ceramic insulators

10 PIN CONNECTOR

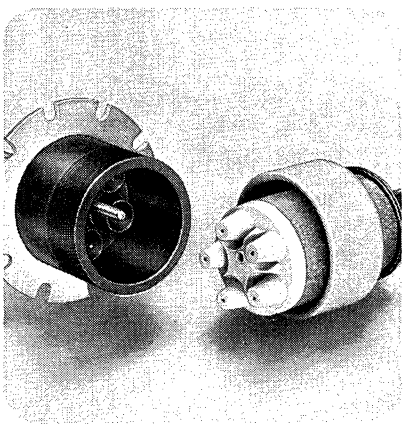


25,000 Volts D.C. center conductor and 9 low voltage pins



15,000 Volts D.C. Bulkhead Connector

5 PIN CONNECTOR



40,000 Volts D.C. Solder or "O" Ring Mounting

Features:

- Safe—no exposed high voltage parts
- Space saving—maximum performance from the minimum size and weight
- Color coded for easy identification
- Fast connect and disconnect
- Wide temperature range (–55°C to +125°C)
- Positive mating of lead into receptacle
- R F I shielding—optional
- Fungus, moisture, oil, and chemical resistant
- High altitude operation—up to 80,000 feet without voltage derating
- Excellent mechanical strength—resistant to vibration and shock
- High dielectric strength
- Preassembled—no tools required
- High reliability—operates under extreme environmental conditions
- Versatile—top access, splice, or bulkhead application
- Corona resistant—virtually unaffected by ozone or corona
- Radiation resistant
- Lead wire remains flexible from –62°C to +250°C
- Meets applicable military specifications
- Quick, easy installation

Suitable for:

- Industrial & Military Applications
- Power Supplies
- Radar
- Avionic Electronics
- CRT's
- Medical Electronics
- Laser
- Copying Machines
- Instrumentation
- Pulse Applications
- Oceanography

Let us design an assembly that meets or exceeds your requirements. We're the leading maker of customized connectors. Whatever your connection problem contact us today.

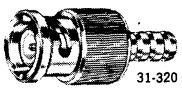
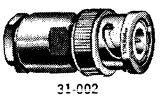
BNC RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL



31-320



31-002

BNC - Bayonet Coupled
Popular and Lightweight

Your choice of six different styles: Regular, Improved with Captivated Contacts and Improved in addition to the three "Crimp" versions described below.

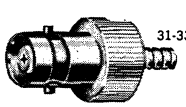
MIL-Crimp BNC's are recommended as the optimum BNC, giving optimum operating performance at low installed cost. Using standard crimping tools, these units can be assembled in a fraction of the time usually required for braid-clamp type connectors by eliminating critical assembly and soldering operations and reducing the parts to handle. Captivated center contacts prevent circuit discontinuity under environmental or mechanical stress. MIL-Crimps are weatherproof; their constant 50-ohm impedance provides excellent performance through X-band frequencies.

Quick-Crimp: gold-plated semi-captivated contacts, classed as weather proof. Heat shrink tubing for severe environmental conditions.

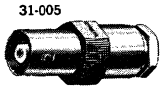
Original-Crimp: gold-plated contacts, classed as weatherproof. Each has a silicone rubber boot. For a complete listing of all BNC Connectors to the latest revision of MIL-C-39012/A, refer to your distributor or Amphenol.

ASTROplate®
Finish Available

Amphenol's exclusive, non-tarnish finish is available from stock on most popular rf connectors. **(See part numbers marked with ‡; others available on special order.)** ASTROplate® is corrosion and abrasion resistant. Mates safely with silver; is equally solderable. **To order: add suffix 1050 to part number.**



31-333



31-005

CHARACTERISTICS

ELECTRICAL: Impedance: unimproved BNC; non-constant; all others: 50 ohms. **Frequency range:** 0-10 GHz. **Voltage rating:** 500 volts peak. **Dielectric Withstanding Voltage:** 1500 volts rms. **SWR:** improved: 1.3; MIL-Crimps: 1.2 (solder), 1.3 per spec. **Other:** contact resistance: 2.1 mv; RF leakage: —55 db; insertion loss: .04 db; insulation resistance: 5000 megohms.

ENVIRONMENTAL: Thermal Limits: Teflon insulators: —67° to 390°F (—55° to 199°C); Rexolite insulators: —67° to 185°F (—55° to 85°C). **Weatherproof:** standards with clamp gaskets; MIL-Crimps with heat-shrink tubing. **Hermetic Seals:** pass helium leak test of 2×10^{-8} cc/sec. **Shock:** MIL-Std-202 method 202. **Vibration:** MIL-Std-202 method 204 (test cond. D). **Moisture Resistance:** MIL-Std-202 method 106. **Corrosion:** MIL-Std-202 method 101 (test cond. B). **Temperature Cycling:** MIL-Std-202 method 102 (test cond. D). **Altitude:** MIL-Std-202 method 105 (test cond. C).

MECHANICAL: Mating: BNC: 2-stud bayonet lock; TNC: 7/16-28 thread cplg. **Cable Affixment (Braid or Jacket):** standards: screw-thread nut and braid clamp: MIL-crimps: hex braid crimp. **Cable Affixment (Center Conductor):** MIL-Crimps: 4 indent crimp or solder; others: solder only. **Captivated Contact:** all MIL-Crimps; others: where specified. **Cable Retention:** standards: 20 to 50 lbs; crimps: 80 to 100 lbs.

MATERIAL: Contacts (Center): male: brass; female: beryllium copper or phosphor bronze (all MIL-Crimps). **Contacts (Outer):** MIL-Crimps: phosphor bronze; others: brass or beryllium copper where specified. **Other Metal Parts:** brass. **Plating:** center contacts, MIL-Crimps: .0001" gold over .0001" copper; all others: .0002" silver. **Insulators:** Teflon (all crimps); Rexolite; glass-Teflon (hermetically sealed). **Clamp Gaskets:** synthetic rubber; silicone rubber. **Heat-Shrink Tubing:** MIL-Crimps: Thermofit plastic. **Crimp Ferrule:** copper.

MILITARY SPECIFICATIONS: MIL-Crimps: MIL-C-23329A; Standard BNC: MIL-C-3608.

▲ To adapt connector for use with **RG-141/142-type** CUJAK cable, specify accessory adapter kit 31-885.
△ May be front or rear mounted using "S" mounting hole, "R" hole for rear mounting only.
‡ Non-tarnish Astroplate finish available. To order: add suffix 1050 to part number. Other numbers also available on special order from factory.
■ Gold plated captivated contact.
☐ To ground cable shield, specify Amphenol Accessory Lug 31-759.

TNC RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

Threaded Coupling RF Connectors — TNC

TNC's were developed by Amphenol for aircraft, missile and other applications in which extreme vibration may be encountered. The TNC threaded coupling mechanism eliminates "rock" under vibration — a characteristic of bayonet coupled connectors such as BNC that introduces noise into the system and causes erratic performance. Other than coupling, TNC's are dimentionally and electrically similar to BNC, and have a constant impedance of 50 ohms.

Their rugged mechanical construction makes them an excellent choice for applications requiring a high degree of vibration.

ASTROplate® Finish Available

Amphenol's exclusive, non-tarnish finish is available from stock on most popular rf connectors. **(See part numbers marked with ‡; others available on special order.)** ASTROplate® is corrosion and abrasion resistant. Mates safely with silver; is equally solderable. **To order: add suffix 1050 to part number.**

CHARACTERISTICS

MECHANICAL: Mating: 7/16-28 thread coupling.

ALL OTHERS: Similar to BNC

Notes: GC - Gold-plated Contact; PM - Polarized Male Contact; PF - Polarized Female Contact; BOC - Beryllium Outer Contact; SW - Holes for Safety Wiring; H - Hermetically Sealed; FM - Front Mounting; T - Teflon; GT - Glass Teflon; P - Plug; J - Jack.

UHF RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

Series UHF

Series UHF are low-cost, general purpose connectors for use in a wide variety of lower frequency applications (up to 300 mc) where constant impedance is not necessarily required. Available in small and large body sizes, they have a peak voltage rating of 500 volts.

While most UHF connectors have conventional solder-type cable affixment, Quick-Crimp UHF feature Amphenol's patented hex crimp design which permits faster, easier and more reliable assembly.

The 83-850 and 83-851 plugs eliminate one or both of two common soldering operations in assembly. The 83-850 has completely solderless braid and contact assembly; the 83-851 has solderless braid assembly.

CHARACTERISTICS

ELECTRICAL: Impedance: non-constant. **Frequency range:** 0-300 MHz. **Voltage rating:** 500v. peak.

ENVIRONMENTAL: Thermal limits: Teflon: —67°F to 390°F; Rexolite and polystyrene: —67°F to 185°F; mica-filled Bakelite: —67°F to 300°F. **Non-weatherproof,** except as noted.

MECHANICAL: Mating: 5/8-24 thrd. coupling (small body), 1-20 thrd. coupling (large body). **Cable affixment:** braid solder, Quick Crimp or Solderless.

MATERIAL: Contacts: male: brass; female: beryllium copper. **Bodies:** die cast zinc or brass. **Plating:** .0002" silver min. **Insulators:** Teflon, Rexolite, polystyrene or mica-filled Bakelite.

OTHER DATA: small and large body types do not intermate. UHF connectors ordered will be small size body unless large is specified.

ASTROplate® Finish Available

Amphenol's exclusive, new non-tarnish finish is available from Distributor stock on all of our most popular rf connectors. **(See part numbers marked with ‡; other numbers are available on special order).** ASTROplate® is corrosion, heat and abrasion resistant. Mates with silver without danger of galvanic reaction; has equal solderability to silver's. **To order: add suffix 1050 to part numbers indicated below.**

SERIES "C" RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

Series C

Constant 50-ohm impedance C series connectors are design-matched to 50-ohm cables. They may be used with 75-ohm cable, at lower frequencies (below 300 MHz) where the connector introduces no serious mismatch. Standard connectors have a peak voltage rating of 1500 volts and provide low SWR up to 10 GHz; 4000-volt units are also available with good performance up to 2 GHz. The improved cable clamp provides excellent cable grip and weatherproof seal with a minimum of cable indentation; it utilizes a "V" groove split silicone rubber gasket and peaked braid clam. Accessory Clamping Adapter Kits are available for metal jacketed cables (AK). For armored cables, see armor clamp (AC).

ASTROplate® finish available, add -1050 to part number.

CHARACTERISTICS

ELECTRICAL: Impedance: 50 ohm constant. **Frequency Range:** 0-10 GHz, 1,500 volt type; 0-2 GHx, 4,000 volt type. **Voltage Rating:** 1,500 volts peak—standard; 4,000 volts peak as noted. **Dielectric Withstanding Voltage:** 3,000 volts RMS, 1,500 volt type; 6,000 volts RMS, 4,000 volt type. **SWR:** 1.25.

ENVIRONMENTAL: Thermal Limits: —67° to 390°F (—55° to 199°C). **Weatherproof:** except as noted, all C Series connectors are Weatherproof. **Hermetic Seals:** pass helium leak test of 2×10^{-8} cc/sec. **Pressurized:** compression seal.

MECHANICAL: Mating: 2-stud bay net lock. **Cable Affixment:** Improved: screw-thread nut and braid clamp.

MATERIAL: Contacts: male: brass; female and outer: beryllium copper. **Other Metal Parts:** brass. **Plating:** .0002" silver min. **Insulators:** Teflon, glass-Teflon (herm. sealed). **Weatherproof Gaskets:** silicone rubber.

MILITARY SPECIFICATIONS: Meet applicable sections of MIL-C-3989.

TYPE "N" RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

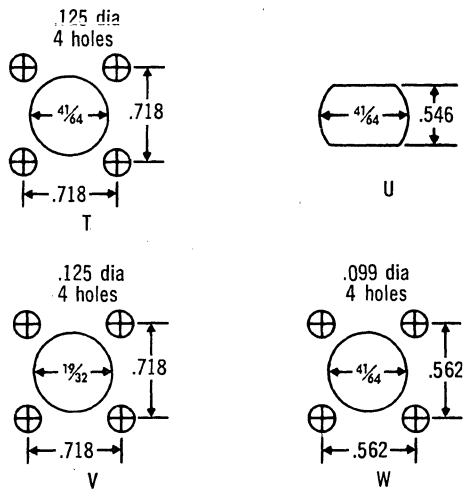
Series N

Medium-size, weatherproof, threaded coupling units that may be used in systems up to microwave. This series was the original microwave connector developed during World War II and SWR is consistently low across this broad frequency spectrum. Available in Regular, Improved and Improved/Captivated Contact constructions and have the MIL-Crimp/MIL-Clamp designs to MIL-C-39012. For further information, request Coaxial Connectors Catalog CC-7, or contact your distributor.

ASTROplate® Finish Available

Amphenol's exclusive, non-tarnish finish is available from stock on most popular rf connectors. **(See part numbers marked with ‡; others available on special order.)** ASTROplate® is corrosion and abrasion and heat resistant. Mates safely with silver; has equal solderability. **To order: add suffix 1050 to part number.**

MOUNTING HOLES



CHARACTERISTICS

ELECTRICAL: Impedance: as noted, 50 or 70 ohms. **Frequency Range:** 0-11 GHz. **Voltage Rating:** 1,500 volts peak. **Dielectric Withstanding Voltage:** 2,500 volts rms. **SWR:** MIL-Crimp/MIL-Clamp: 1-15 (solder) 1.35 per spec; others; 1.25. **Other:** contact resistance 1.0 mv, RF leakage —90db, insertion loss .15 db, insulation resistance 5,000 megohms.

ENVIRONMENTAL: Thermal Limits: Teflon: —67°F to 390°F (—55° to 199°C); Rexolite: —67°F to 185°F (—55° to 85°C). **Weatherproof:** all Series N with gaskets are weatherproof. **Hermetic Seals:** pass helium leak test of 2×10^{-8} cc/sec. **Pressurized:** compression seal. **Shock:** MIL-Std. 202 method 202. **Vibration:** MIL-Std. 202 method 204 (test cond. B). **Moisture Resistance:** MIL-Std. 202 method 106. **Corrosion:** MIL-Std. 202 method 101 (test cond. B). **Temperature:** MIL-Std. 202 method 102 (test cond. C). **Altitude:** MIL-Std. 202 method 105 (test cond. C).

MECHANICAL: Mating: 5/8-24 threaded coupling. **Cable Affixment (Braid or Jacket):** MIL-Crimp: hex crimp; all others: screw-thread nut and braid clamp. **Cable Affixment (Center Conductor):** MIL-Crimp/MIL-Clamp: 4 indent crimp, hex crimp or solder. All others: solder. **Captivated Contact:** all MIL-Crimp/MIL-Clamp; others, where specified. **Cable Retention:** MIL-Crimp/MIL-Clamp 90-120 lbs. (70 lb. per MIL-Spec). All others 30-70 lbs.

MATERIAL: Contacts: male: brass; female: MIL-Crimp/MIL-Clamp phosphor bronze; all others: beryllium copper; Outer: MIL-Crimp/MIL-Clamp. Improved phosphor bronze, all others: brass or phosphor bronze. **Other Metal Parts:** brass. **Plating:** center contacts, MIL-Crimp/MIL-Clamp: .0001" gold over .0001" copper, all other: .0002" silver. **Insulators:** Teflon (all MIL-Crimp/MIL-Clamp) Rexolite, glass-Teflon (herm. seal). **Weatherproof Gaskets:** silicone rubber (all MIL-Clamp) synthetic rubber. **Crimp Ferrule:** copper.

MILITARY SPECIFICATIONS: MIL-Crimp: MIL-C-39012A Category C. MIL-Clamp & UG-Clamp: MIL-C-39012A Category A. All others: MIL-C-71B where applicable.

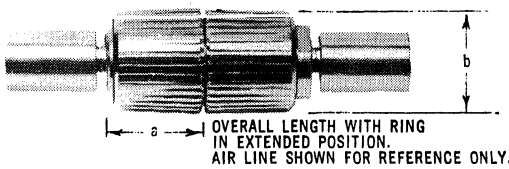
PRECISION RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

Series 131 Precision 7mm Connectors TWO DISTINCTLY DIFFERENT LINES

— APC-7 with sexless coupling

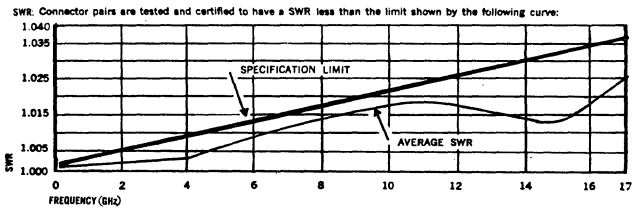


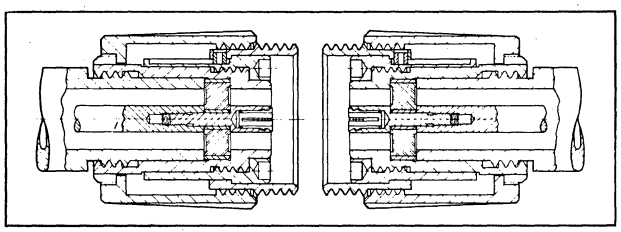
APC-7. Precision 50-ohm connector for use with 7mm (inner diameter of outer conductor) rigid air line and semi-rigid (ALJAK) coaxial cable.

Sexless coupling permits interconnection of any two APC-7's. Identical plane of electrical and mechanical contact permits accurate determination of the electrical length of a mated pair or of an air line assembly with a connector at each end. All components held captive.

Connectors packaged in pairs in protective wooden box; assembly instructions and certified SWR test report included with each pair.

Specially designed for microwave and precision test equipment — Component manufacturers now using APC-7 fittings include: Alford, Alfred, EG&G, Hewlett-Packard, Maury Microwave, Microlab/FXR, Narda, PRD, Rantec, and Weinschel Engineering.





APC-7 components. Both connectors are identical and completely sexless.

CHARACTERISTICS (TYPICAL)

ELECTRICAL (for mated pair): **Impedance:** 50 ohm ±0.1 ohms. **Frequency Range:** 0-18 GHz. **SWR:** 1.039 max. to 18 GHz. **Insertion loss (in db):** $< 7 \times 10^{-3} \sqrt{\text{Freq. GHz}}$ (example: 0.028 db at 16.0 GHz). **RF Leakage:** < signal inside coaxial line by ratio > 120 db▲. **Electrical length:** 0.723 ±0.001 inches (1.836 ±.00254 cm). **Contact Resistance:** inner: < 1.0 milliohm, outer: < 0.1 milliohm.

▲ RF leakage: Until satisfactory test methods are developed, the maximum frequency of measurement is limited to 6.0 GHz.

ENVIRONMENTAL: **Thermal Limits:** storage: −67° to 158°F (−55° to 70°C) operating: 55° to 91°F (13° to 33°C). **Humidity:** 20 to 80% RH. **Pressure:** 590 to 780 mm Hg. MECHANICAL: **Mating:** sexless, coplanar by means of threaded ring housed within coupling nut. **Life:** > 5000 connect/disconnect operations. MATERIAL: **Coupling Mechanism:** stainless steel. **Body:** gold plated beryllium copper. **Center Contact:** gold plated beryllium copper. **Bead Assembly:** Rexolite insulation.

For use with	APC-7 Maximum SWR for a mated pair	APC-7 (13/16" max. dia.) (b) Part No.	Lgth. (in.) (a)

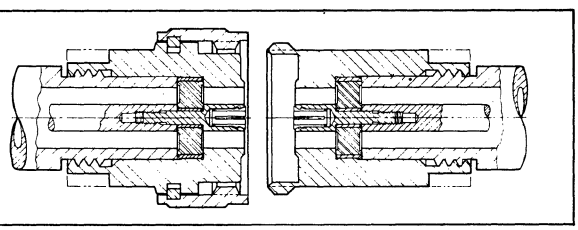
	1.15 to 12.4 GHz Clamp	131-1032	2 1/32

TOOL KIT 131-2025

For disassembly; assembly to air line. Contains collet extractor, spanner wrench, torque wrench & line wrench.



APC-7S components. Center contact, sexless; female threads on Jack; male coupling ring on Plug.

— APC-7S Economy Family WITH JACK AND PLUG COUPLING

APC-7S, the newest addition to Amphenol's expanding precision connector family was created to meet the need for an economical but equally reliable precision connector. Except for the coupling mechanism all other characteristics are identical to APC-7. Performance is equal, yet APC-7S costs almost two-thirds less than the original precision 7mm connector.

CHARACTERISTICS (Same as APC-7) except:)

MECHANICAL: Mating: 1/16-24 threaded coupling. APC-7S plus and jacks also mate with APC-7 connectors. **MATERIAL:** Same as APC-7 except: Coupling nut: nickel plated brass.

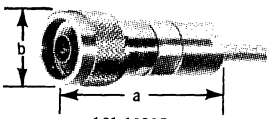
PRECISION N AND SMA RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

Series 131 Precision N Connectors — APC-N

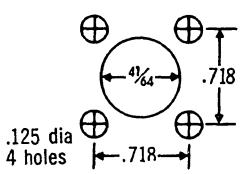


131-10005

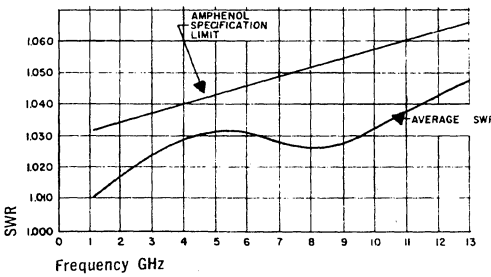
131-10006

131-10003

131-10004



APC-N, 50-ohm connectors. Use interchangeably with APC-7; mate with all other type N's. Their excellent electrical performance will make them an "industry standard" for future equipment. SWR for mated pairs: only 1.06 through 12 GHz; 1.08 through 18 GHz.



CHARACTERISTICS (TYPICAL)

ELECTRICAL (for mated pair APC-N connectors). **Impedance:** 50 ohm ±0.2 ohms. **Frequency Range:** 0-18 GHz. **SWR:** 1.08 max. to 18 GHz. **Insertion Loss (in db):** $< 3 \times 10^{-2} \sqrt{\text{Freq. GHz}}$. **RF Leakage:** < signal inside coaxial line by ratio > 90 db▲. **Contact Resistance:** inner: < 1.0 milliohm; outer: < 1.1 milliohm.

▲**RF Leakage:** Until satisfactory test methods are developed, the maximum frequency of measurement is limited to 6.0 GHz.

ENVIRONMENTAL: **Thermal Limits:** storage: −67 - 158°F (−55 - 70°C); operating: 55 - 91°F (13 - 33°C). **Humidity:** 20 to 80% RH. **Pressure:** 590 to 780 mm Hg.

MECHANICAL: **Mating:** 5/8-24 threaded coupling. Mating dimensions are MIL-C-39012 Class II nominal with tighter tolerances. The APC-N mates with all existing Type N connectors including MIL-C-71.

MATERIAL: **Body and Coupling Nut:** stainless steel. **Center Contacts:** gold plated beryllium copper. **Bead Assembly:** Rexolite Insulation.

SMA Sub-miniature Semi-precision Coaxial Connectors

500 MATING CYCLES AND STILL REPEATABLE PERFORMANCE

Amphenol's SMA connector is a semi-precision, sub-miniature (3mm), high frequency connector giving repeatable electrical performance from DC to 18 GHz, with exacting mechanical integrity and simplified low-cost assembly.

They are made of high strength, heat treated beryllium copper. Use of this alloy assures rugged mechanical performance, even though the "thin wall" design of the connector results in an interface mating cross-section area of only 0.00452 inch. The yield strength of the beryllium copper is three times that of stainless steel; use of this alloy also allows twice the coupling nut torque of other SMA designs. The "thin wall" design approach assures better compatibility with existing SMA designs, semi-rigid cable and the standard adapter connector specified by MIL-C-39012.

Electrical Performance Improved. Since the new connectors perform well mechanically, excellent electrical performance, even after 500 mating cycles, is assured. For example, the maximum SWR for a mated pair of Amphenol SMA solder type for 0.141 inch semi-rigid cable is 1.09 to 12.4 GHz and 1.13 through 18 GHz. This is below the limit of 1.05 plus 0.005f (GHz) as specified in MIL-C-39012 for SMA connectors.

Low Cost Assembly. All Amphenol SMA connectors can be assembled with a $12.50 tool kit. In addition, "factory assembled subassemblies" reduce the number of parts that have to be handled. The 0.141 inch semi-rigid Cujak cable solder connector which uses the cable as a contact and insulator has only one part; the solder and clamp type containing contact and insulator have four parts. The larger diameter flexible cable connectors such as RG-58, 223 — crimp type has three parts; clamp type five parts. Sub-miniature flexible cable such as RG-174, 188 and 195 — clamp connector has a unique patented design allowing for only three parts.

Wide Variety Available. For the popular 0.141 inch semi-rigid Cujak cable, solder and clamp types, straight and right angle plugs and jacks are available. For sub-miniature 0.085 inch semi-rigid Cujak, there is a complete line of solder type connectors. For flexible cables, both standard and sub-miniature, crimp and clamp type plugs and jacks are included plus a complete line of receptacles, including stripline, hermetic seal, P.C. mount, two-hole trim-line flange, and right angle. Between Series Adapters for BNC, TNC, APC-7 and Precision N connectors, along with a complete line of Within Series Adapters.

Cable Assemblies. Custom designed cable assemblies for semi-rigid 0.141 and 0.085 Cujak cable and all flexible coax cables fitted with SMA or any other RF connector can be supplied per customer requirements.

SMA Sub-miniature Semi-precision Coaxial Connectors (cont'd)

GENERAL CHARACTERISTICS

ELECTRICAL

Impedance	50 ohm
Frequency	.141″ and .085″ O.D. Copper jacket semi-rigid cable: 0-18 GHz Flexible cables: 0-12.4 GHz
Voltage Rating	RG-55, 58, 141, 142, 223, 303: 500 V RMS max. @ sea level RG-122, 174, 188, 316: 375 V RMS max. @ sea level
Dielectric Withstanding Voltage	RG-55 group: 1000 V RMS max. @ sea level RG-122 group: 750 V RMS max. @ sea level
SWR	.141″ O.D. Copper jacket cable: 1.05 + .005 f (GHz) RG-55 group: 1.15 + .01 f (GHz) RG-122 group: 1.15 + .02 f (GHz)
Contact Resistance	Center: 2.0 milliohms Body: 2.0 milliohms Braid to body: 0.5 milliohms
Insulation Resistance	5000 megohms
R.F. Leakage	60 dB minimum

ENVIRONMENTAL

Thermal Limits	−67° to 390°F (−55° to 199°C)
Weatherproof	Clamp type: with clamp gaskets Crimp type: with heat shrink tubing Solder type: with gaskets
Hermetic Seals	Pass Helium leak test of 10^{-5} cc/sec.
Shock	MIL-STD-202 method 202; acceleration: 50 G at 7 milliseconds
Vibration	MIL-STD-202 method 204 (test cond. D)
Moisture Resistance	MIL-STD-202 method 106 (high humidity meaturements do not apply)
Corrosion	MIL-STD-202 method 101 (test cond. B); 5% salt solution
Temperature Cycling	MIL-STD-202 method 102 (test cond. C)
Altitude	MIL-STD-202 method 105 (test cond. C); no corona at 70,000 ft. RG-55 group: 250 V RMS RG-122 group: 190 V RMS

MECHANICAL

Mating	¼-36 threaded coupling
Mating Torque	Recommended: 7-10 inch-pounds Non-destructive: 25 inch-pounds max.
Cable Affixment to Braid or Jacket	Clamp type: field serviceable with screw thread nut and braid clamp Crimp type: hex braid crimp Solder type: screw thread solder nut
Cable Affixment to Center Conductor	All types: solder only
Captivated Contact	Crimp type and clamp type for flexible cable
Cable Retention	Clamp type for RG-58, 141 = 40 lbs. min. for RG-55, 142, 223 = 60 lbs. min. for .141 copper jacket cable = 60 lbs. min. Crimp type for RG-58, 141, 303 = 60 lbs. min. for RG-55, 142, 223 = 80 lbs. min.
Cable Assembly	Instructions are packaged with each tool kit shipped

MATERIAL

Contacts, Bodies, Cplg. Nuts	Berryllium copper per QQ-C-530, heat treated per MIL-H-7199
Other Metal Parts	Half hard brass
Plating	Center Contacts, .0001 gold per MIL-C-45204 Type II, Class 2. Other metal parts gold plated and meet corrosion requirements of MIL-C-39012
Insulators	TFE Fluorocarbon per MIL-P-19468
Weatherproof Gaskets	Silicone rubber
Lockwashers	Phosphor bronze, internal tooth supplied with all bulkhead mounted connectors
Crimp Ferrules	Copper

TOOL KIT AND CABLE ASSEMBLIES

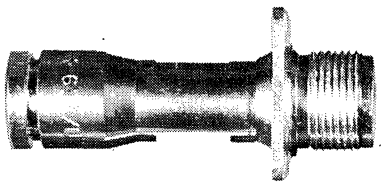
TOOL KIT P/N 901-2500. Contains recommended jacket and dielectric trim tools for precise cable preparation required to obtain the electrical performance specified. Accessory Tool P/N 901-2400 available for Cujak center conductor trimming.

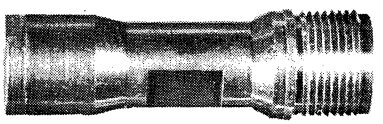
CABLE ASSEMBLIES. Custom semi-precision cable assemblies are available with .141″ and .085″ dia. semi-rigid Cujak cable fitted with SMA connectors. Contact factory with your specifications.

RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

Series HN





Amphenol HN Series are constant 50 ohm impedance connectors designed for high voltage applications. Connectors are weatherproof and are available in Regular, Improved and Improved/Captivated Contact constructions.

Amphenol's patented Captivated Contact Design prevents possible contact recession under temperature extremes. Contacts are fixed within the connector body by front and rear contact insulators that butt against metal body parts.

CHARACTERISTICS, TYPICAL

ELECTRICAL: Frequency range: 0 — 4GHz. **Voltage rating:** 1,500 volts peak; **dielectric withstanding voltage:** 5,000 volts rms. **SWR:** 1.3.

ENVIRONMENTAL: Thermal limits: Teflon insulation: —67° to 390°F (—55° to 199°C); Rexolite insulation: —67° to 185°F (—55° to 85°C). **Weatherproof:** all HN Series are weatherproof. **Hermetic seals:** pass helium lead test of 2×10^{-8} cc/sec. **Pressurized:** Compression seal.

MECHANICAL: Mating: ¾ —20 threaded coupling. **Cable affixment:** screw-thread nut and braid clamp.

MATERIALS: Contacts: male: brass; female: beryllium copper; outer: brass; **other metal parts:** brass. **Plating:** .0002" silver min. **Insulators:** Teflon, Rexolite, glass-Teflon (hermetic seal). **Weatherproof gaskets:** synthetic rubber; silicone rubber.

MILITARY SPECIFICATIONS: HN Connectors meet applicable sections of MIL-C-3643.

27 SERIES SUBMINAX RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

Series 27 — SUBMINAX with three types of low cost assembly

The original **quality** rf subminiature, designed for more critical electrical applications. These connectors are available in three types of cable affixment: **Radial Crimp,** a unique Amphenol low cost crimp design; **Quick Crimp,** a standard tex type crimp; and **Field Serviceable,** a design which is the easiest in the industry to assemble and contains the fewest parts. All have soldered centered contacts.

Two types of coupling mechanism. Specify push-on (snap-on) for frequent fast mating or screw-on for vibration type applications.

CHARACTERISTICS

ELECTRICAL: **Impedance:** 50 ohm, 75 ohm. **Frequency Range:** 0-10 GHz. **Voltage Rating:** 500 volts peak. **Dielectric Withstanding Voltage:** 1,500 volts rms. **SWR (50 ohm):** 1.2 (0-4 GHz); 1.5 (4-10 GHz); 1.3 (UG's) (0-6 GHz); 1.5 (UG's) (6-10 GHz). **Other:** multivolt drop 6 MV. insulation resistance 1,000 megohms.

ENVIRONMENTAL: **Thermal Limits:** −67° to 390°F (−55° to 199°C). **Weatherproof:** all 27 series are non-weatherproof, radial crimp have plastic boot or optional heat shrink tubing. **Hermetic Seals:** pass helium leakage test of 2 x 10^{-8} cc/sec. **Thermal Shock.** Mil. Std. 202 method 107. **Shock:** Mil. Std. 202 method 202. **Vibration:** Mil. Std. 202 method 204 (test cond. D). **Moisture Resistance:** Mil. Std. 202 method 106A. **Corrosion:** Mil. Std. 202 method 101 (test cond. B).

MECHANICAL: **Contacts:** radial crimp, not captivated; quick crimp, full captivated; field serviceable, semicaptivated. **Mating:** push-on (snap-on) and screw-on, (50 ohm have 10-32 threaded coupling; 75 ohms, 5/16-32). **Cable Affixment (Braid or Jacket):** radial crimp: Quick-Crimp (hex crimp); field serviceable clamp mechanism. **Cable Affixment (Center Conductor):** solder only. **Coupling Nut:** recommended torque (hex nuts); 50 inch-ounces. Axial pull-off force: Withstand up to 50 lbs.

MATERIAL: **Contacts:** male and outer (push-on): brass female: beryllium copper. **Other Metal Parts:** brass. **Plating (All Metal Parts):** .000050 gold over copper, (UG's .0001" gold over copper). **Insulators:** Teflon, Kel-F-Teflon, glass Teflon (hermetically sealed) as specified.

MILITARY SPECIFICATIONS: UG items fully comply with MIL-C-22557A.

NOTES:

Radial Crimp:

Connector is gently squeezed for a reliable mechanical and electrical connection. See "RC" in notes below.

Quick Crimp:

No need to comb braid; assembles faster than any other subminiature. Has captivated contact, termination stronger than cable itself. See "QC" in notes below.

Field Serviceable:

Needs no crimping tool. Has semi-captivated contact. UG connectors comply with MIL-C-22557A. See "FS" below.

CC = Captivated Contacts; HOC = Hooded Outer Contact; RM = Rear Mounted.

5116 SERIES SUBMINAX RF COAXIAL CONNECTORS

BUNKER RAMO AMPHENOL

Series 5116 — SUBMINAX with low cost QUICK CRIMP assembly

WITH TWO MATING STYLES — FULLY CAPTIVATED CONTACTS

Series 5116 combines good electrical performance with fast, economical cable assembly. Plugs and jacks, for example, have only four parts, including body assembly. Cable stripping is easier, with less critical dimensions. Ultra-reliable, gold-plated contacts are fully captivated, can be crimped or soldered. Extremely low cost of the crimping tool (Amphenol No. 227-911) makes field use of this connector series feasible.

Two types of coupling mechanism are available. Specify push-on (snap-on) for frequent fast mating, or screw-on for vibration-applications. Push-on will not mate with screw-on types; 50 ohm, 75 ohm and 95 ohm types mate only with like types.

ABBREVIATIONS:
Insulation: T — Teflon, gT — glass-Teflon.
Notes: W — Weatherproof, SMC — Shorting Male Contact, PC — Used on printed-circuit boards, H — Hermetically Sealed, MLC — Male Contact

CHARACTERISTICS

ELECTRICAL
Impedance: 50, 75 or 95 ohm.
Frequency range: 0-4 Gc.
Voltage: 500 v. peak.
High potential: 1500 v. rms. 60 cycles, 1 min.

ENVIRONMENTAL
Thermal limits: —67°F to 390°F.
Weatherproof: screw-on types.
Hermetic seals: pass helium leak test of 2 x 10^{-8} cc/sec.

MECHANICAL
Mating: push-on or screw-on.
Cable affixment: Quick-Crimp.

MATERIAL
Contacts: male: brass; female: beryllium copper.
Other metal parts: brass.
Contact plating: .0002" gold-over-silver min.
Other plating: .0002" silver min.
Insulators: Teflon or glass-Teflon.

RF COAXIAL BETWEEN SERIES ADAPTERS

AMPHENOL
THE BUNKER-RAMO CORPORATION

Adapters Between Series

Amphenol series-to-series adapters are of non-constant impedance, but designed so that inherent electrical discontinuities are minimal. They are built to the same precision tolerances as the rest of our coaxial line. For typical characteristics, see pages describing the connector series.

CHARACTERISTICS

ELECTRICAL: Impedance: non-constant. **Frequency:** per cable used. **Voltage:** per cable used.

ENVIRONMENTAL: Thermal Limits: Teflon: −67°F to 390°F; Rexolite: −67°F to 185°F; Kel-F: −67° to 390°F; mica-filled; Bakelite: −67°F to 300°F; polyethylene: −67°F to 185°F. **Weatherproof:** except as noted. **Hermetic Seals:** pass helium leakage test of 2 x 10^{-6} cc/sec. P = Pressurized; H = Hermetic Sealed.

MECHANICAL: Mating: per series.

MATERIAL: Contacts: male: brass; female: beryllium copper. **Other Metal Parts:** brass. **Plating:** .0002" silver min. **Insulators:** Teflon, Rexolite, Kel-F, mica-filled Bakelite, polyethylene or glass-Teflon, as specified.

MICROPHONE CONNECTORS

BUNKER RAMO AMPHENOL

NEW! Excellite© Microphone Plugs & Connectors

A low cost, dependable audio-type connector with latchlock coupling. Made of sturdy ABS molded plastic with lustrous nickel plating. Excellite connectors resist denting, chipping, peeling or tarnishing. They are available in cable plugs and panel receptacles with 3, 4 and 5 contacts.

Features

- **ECONOMICAL** — Lower initial procurement cost, less downtime for installation, rewiring, field repairs.
- **LIGHTWEIGHT** — Considerable weight savings over comparable die-cast zinc configurations.
- **WIRING** — Unitized inserts (shell, button and insert are all one assembly) are easily removed and feature screw-machined solder cup type contacts for quick, efficient termination.
- **POSITIVE GROUND** — In all Excellite latchlock-type connectors, contact #1 engages first for use as ground — eliminating chance of accidental electrical damage to solid-state equipment or microphones.
- **POLARIZATION** — Key on female connector, lock-in keying on male to prevent mismating.

SPECIFICATIONS

- **SHELL AND CABLE CLAMP** — Molded plateable grade ABS (acrylonitrile butadiene styrene) with nickel plate over copper finish.
- **INSERT DIELECTRIC** — Molded type 6 nylon.
- **CONTACTS** — Copper alloy, silver plated and chromate dipped. Screw machine design with solder cup termination.
- **CABLE RELIEF** — General purpose 40-60 durometer neoprene rubber.
- **CABLE CLAMP** — Cable clamp and gland accepts commonly used .250" to 0.313" diameter cable.
- **ELECTRICAL CHARACTERISTICS**

	3 Contact	4 Contact	5 Contact
Voltage	133 V (RMS)	133V (RMS)	133V (RMS)
Current	15 A.	10 A.	7.5 A

- **TEMPERATURE RATING** — −20°F to 160°F
- **DIELECTRIC WITHSTANDING VOLTAGE** — 1400 V at 60 Hz for one minute between any two contacts or between any contact and connector shell.

Also available in nickel plating. Substitute N for C in part number.

75 Series Single Contact

Standard type used on microphones, amplifiers, speakers, transmitters, etc. Brass machined shells with chrome finish. Threaded coupling and unique button contact permits plugs to be converted to jacks by removal of coupling ring. Receptacles mount in .385" holes when grounding. .500" holes for ungrounded two circuit operation. Spring cord protection for ¼" cable.

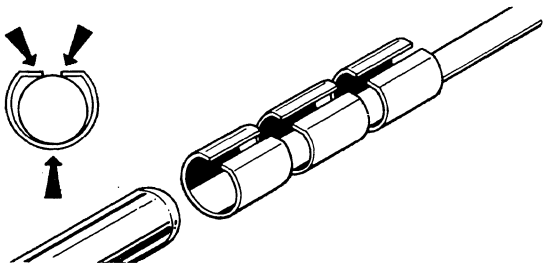
MICROPHONE CONNECTORS

BUNKER RAMO AMPHENOL

91 Series Miniature Connectors



These miniature audio/electronic cable to panel connectors are available with up to 12 contacts in straight or right angle plug styles. Approximately 33% smaller than Amphenol's standard 91 Series coupling ring connectors, these miniatures are intermateable with some types of imported European electronic equipment. They provide high density, low cost, top quality interconnections for many modern equipment requirements.

Screw-Lock Coupling Style

SPECIFICATIONS

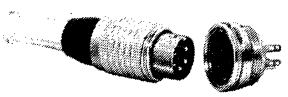
Current Rating: 3 amps per contact

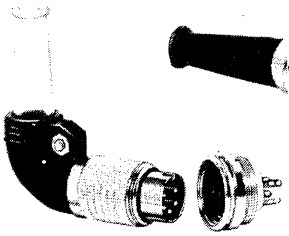
Voltage Rating: 2, 3, 4, 5, 6, & 7 contacts — 120V 12 contact — 60V

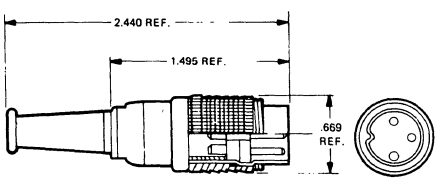
Dielectric: Black polycarbonate

Contacts: Pin — Silver plated brass Socket—Silver plated phosphor bronze

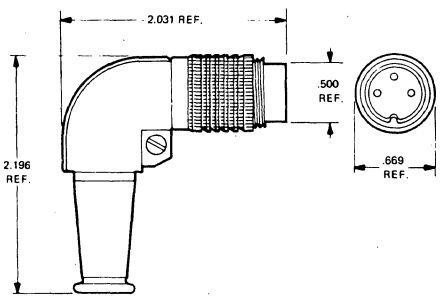
Wire Size: 20 ga.







STRAIGHT PLUG



RIGHT ANGLE PLUG

** Military version available with silver plated contacts and, where applicable, stainless steel mounting plate. Add suffix "M" to catalog number. Example: 77-MIP-8TM.*

 # Bottom mounted, requires 1¼" chassis holes;

Printed Circuit Sockets

Standard socket series 77MIP and 78S of eight or more contacts for mounting directly to printed circuit boards. Luballoy contact tails are ⅛" long and mount through 1/16" diameter holes.

TO ORDER

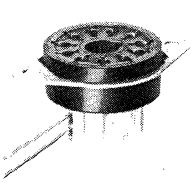
Add suffix -W-0125 to part number, i.e. 77MIP(X)-W-0125 or 78S(X)-W-0125.

Wire Wrap Sockets

Standard socket series 77MIP and 78S of eight contacts or more have ½" long contact tails for wire wrap termination. Standard contacts are .016" thick, rated 3 amps for 22 ga. wire. Heavy duty contacts are .025" thick, rated 7.5 amps, for 16 ga. wire.

TO ORDER

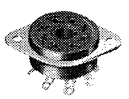
Add suffix -W-0500 to part number, i.e. 77MIP(X)-W-0500 or 78S(X)-W-0500 for standard contact. Add -W-0525 for heavy duty contact.



Compact "MIP" Sockets

Similar to standard MIP, but smaller. 1⅛" mounting hole. Two .136" screw holes on 1 7/16" centers. 8 contacts only. Phosphor bronze contacts.

*88-8	Octal, Black Phenolic
*88-8T	Octal Mica Filled Phenolic
*88-8TM	Octal Mica Filled Phenolic with silver plated contacts and stainless steel mounting plate
88-8X	Loctal Black Phenolic



Saddle Type Octal

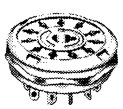
Octal socket with 4 ground lugs for below chassis mounting and 2 9/64" holes on 1.312" centers for above chassis mounting. Black phenolic dielectric.

168-001	Wrap around contacts, Brass
*168-015	Tuning fork contacts, Luballoy

* Also available with printed circuit or wire wrap terminals

Steatite Magnal Socket

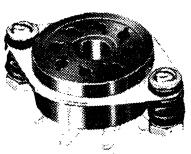
49-SS11L	11 contacts for TV or CRT. Retainer ring mounted in 1 5/8" chassis hole. 1 1/16" pin circle



Floating MIP Sockets

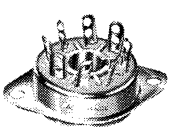
For vibration-free operation.

77-MIP-8FK	Octal. Complete with 4 rubber grommets, 2 mounting screws, nuts and washers.
77-3K	Kit for making any "MIP" into floating socket. 4 grommets, 2 mounting screws, nuts and washers. MIP screw holes must be enlarged to ¼" diameter.
77-MIP-8F	Socket only. Same as 77-MIP-8, but with ¼" mounting holes.



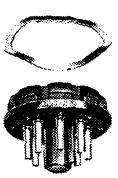
MIP, Cloverleaf Contacts

59-103	Octal. Same dimensions as standard MIP. Mica-filled phenolic, stainless steel mounting plate, cloverleaf contacts hot tinned dipped.



Plugs*

Phenolic bodies, nickel plated brass contacts. Polarized to prevent mismating. Mate with tube sockets shown on this page.



CP TYPE
Use with plug caps or mount on panel with retainer ring. Same grooves as 78S tube sockets.

REPLACEMENT TYPE
Removable plate.

SPEAKER
For cable mounting only.

Lamp Socket

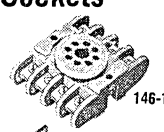
For medium base prefocused lamps. 1000 watts. 110/250 volts, UL approved.

98-8	Phenolic, to 450°F.
98-1	Steatite, to 1800°F.

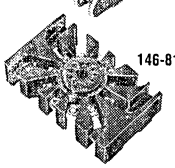
Relay Sockets/Industrial Tube Sockets

Heavy duty octal socket with barrier-protected screw type terminals. 1250 V RMS at 5 Amps. Two .156 mtg. holes on 1.688 centers. Molded one piece melamine construction.

Top Mounting		Bottom Mounting
146-103	No Tie Points	146-203
146-104	With 4 Tie Points	146-204



146-103



146-817

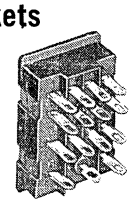
146-817 (11 contacts) — Melamine dielectric, phosphor bronze contacts with solderless reversible screw terminals. 600 V (RMS) at 10 Amps. Two .156 mtg. holes on 4.187 centers. May be gang mounted.
59-106 (14 contacts) — Mica-filled dielectric, phosphor bronze contacts.
59-470 (20 contacts) — Diallyl phthalate with beryllium copper contacts.

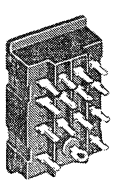
59-470

59-106

Rectangular Relay Sockets

Economical 14 contact socket for popular 4 pole, double throw general purpose relays. Available in solder eyelet termination with panel mounting clip or dip solder terminations for PC board mounting. Cadmium plated brass contacts in molded phenolic dielectric rated 7½ amps at 600 volts.



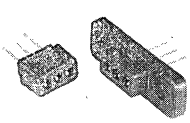


59-133 Solder eyelet contacts
59-134 Printed circuit contacts

SCR Sockets

Three contact receptacle designed to accept General Electric Company's C106 SCR (Silicone controlled rectifier). Nickel silver contacts. Black nylon insulator. Voltage rating: 500 volts (RMS). Current rating: 5 Amps. Contact spacing: .200" centers. Mating engagement depth: .160" min. Contact length: Approximately .323" x .020" square. Contact tails designed for wire wrap or printed circuit board mounting.

77-115	Press fit style without flange. To fit rectangular panel or chassis cut dimensions .335 ±.005" x .1625 ±.0015".
77-116	Molded mounting flange has two .125" diameter mounting holes on .625" centers. Assembly fits out .325" x .200".



Heavy Duty Side Mount Socket

For 4 contact industrial tubes.

NOTE — Bottom Cover 146-910 may also be used with 146-109 and 146-110 sockets.

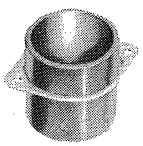
CONNECTORS AND HARDWARE

BUNKER RAMO **AMPHENOL**

Duodecal & Diheptal Sockets

For TV and CRT tubes. Removable socket cap and body of molded phenolic. 2000 V (RMS) at 10 Amps.

Part No.	Description
59-402	Duodecal socket for a max. of 12 equally spaced pins on a circle diam. of 1.063″.
59-415	Diheptal sockets for a max. of 14 equally spaced pins on a circle diam. of 1.750″. **Small—for 2.050″ D. Tube Base.**
59-417	Diheptal sockets for a max. of 14 equally spaced pins on a circle diam. of 1.750″. **Medium—for 2.250″ D. Tube Base.**



High Voltage Sockets

For rectifiers, power supplies and other high voltage uses. Steel mounting plate.

Part No.	Contacts	Dielectric	For Tube Diam.	Mounting Information	
146-101	8	Melamine	1.377″ Max.	2 .136″ dia. holes on 2.031″ centers	1.150″ cutout
77A-4T	4	Phenolic	1.156″	2 5/32″ dia. holes on 1 7/8″ centers	1½″ cutout

Grid Cap

63-1	For tube grid caps, ¼″ to ½″ diameter.

Tube Shields

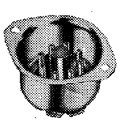
Cadmium plated steel with internal spring holds tube securely.

	Miniature Tube	Maximum Tube Length
5-401	7 Pin	1 3/16
5-402	7 Pin	1¾
5-405	9 Pin	1½
5-408	9 Pin	1 15/16
5-409	9 Pin	2⅜

Recessing Shells

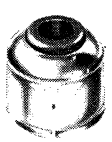
For use with 78S, 86CP, 60, 61 and 160 Series plugs and sockets.

23-1S	Aluminum. Raise or recess 1 3/16″. 1¾″ mounting hole, uses 3 No. 6 screws.
61-61	Cadmium plated steel. Recesses unit 1 3/16″. Mounts in 1 7/16″ hole. Two 5/32″ mounting holes on 1¾″ centers.



Caps

Thermoplastic



Rubber Grommet

Side Outlet Rubber Grommet

Cable Clamp

Makes inexpensive cable connectors of standard sockets, plugs and receptacles such as 78, 60, 61, 86 and 160 Series. For applications requiring frequent mating and unmating use 3-858 or 3-859 with molded finger grip.

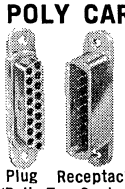
BUNKER RAMO AMPHENOL

223 Series Tiny Tim® Connectors

5 TO 33 CONTACTS
POLY CARBONATE OR NYLON CONSTRUCTION



Plug Receptacle
(Relia-Tac Contacts Illustrated)

Exceptional interconnections for circuit modules, either potted-in or surface mounted, and can also be used as micro-miniature rack-and-panel, cable-to-cable, and cable-to-panel connectors.

The positive mating is the result of the snap latch engagement locking device molded into the connector body. Contact identification numbers are also molded in.

Trapezoidal mating faces are used for polarization. Guide pins provide keying. Contact spacing is .100" on centers on each row.

SPECIFICATIONS

Temperature Range:
−55°C to +125°C
Current Rating:
3 amps (Wire-Form contacts).
5 amps (all other contacts).
Voltage Rating:
1500 VAC (RMS) at sea level.
375 VAC (RMS) at 70,000 ft.
Dielectric:
Polycarbonate resin. (Nylon also available).

Insert Style
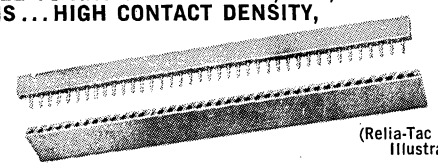
1—Plug (Lexan)
2—Receptacle (Lexan)
(Includes Hardware)
Number of Contacts 052, 104
Connector Class N—Non-environmental

NOTE: Order Contacts Separately
Use Wire-Form pin contacts for plugs, socket contacts for receptacles.
Use Relia-Tac pin contacts for receptacles, socket contacts for plugs.

221 Series Strip Connectors

ADAPTABLE TO ANY SHAPE: STACK, CUT, CUT AND STACK, USE AS IS... HIGH CONTACT DENSITY,



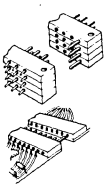
(Relia-Tac Contacts Illustrated)

AMPHENOL Strip Connectors are highly reliable, low cost micro-miniatures with great application versatility. They are furnished in 4" and 6" lengths, but you can cut and stack them to whatever configuration you need to satisfy your various application requirements.

If you want, AMPHENOL can do it all for you promptly and economically — cut the connectors to the length you want, make mounting holes, cut leads to length, and crimp, or solder them to the contacts.

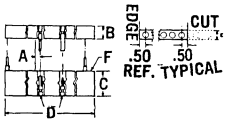
Strip connectors use Poke-Home contacts and perform superbly. Where keying is desired, guide pins are inserted in two or more plug strip contact holes.

Because Strip connectors are injection molded, special configurations can be produced quickly and inexpensively.



Strips can be used in stacked arrangement. Should be stacked parallel only.

PC board application using strip connectors.



RELIA-TAC CONTACT OR WIRE-FORM CONTACT
CUSTOM LENGTH
Number of holes multiplied by contact center dimension equals approximate length of strip.

Description	A Contact Centers	B	C	D	E	F Contact Positions
6" Plug Strip	.100	—	.456	6.00	.105	60
6" Receptacle Strip	.100	.230	—	6.00	.105	60
4" Plug Strip	.075	—	.456	4.00	.105	53
4" Receptacle Strip	.075	.230	—	4.00	.105	53
4" Plug Strip	.050	—	.281	4.00	.075	80
4" Receptacle Strip	.050	.218	—	4.00	.075	80

Ordering Information

Standard and custom lengths.

Series Designation 221 - 1 5 02

Contact Centers
1—.100 in.
2—.075 in.
3—.050 in. (only Nylon)

Insert Style
1—Plug, polycarbonate
2—Receptacle, polycarbonate
5—Plug, Nylon
6—Receptacle, Nylon

Number of Contact Holes needed: from 02 to 60 on .100 centers (standard 6" strip contains 60 holes); from 02 to 53 on .075 centers (standard 4" strip contains 53 holes); from 02 to 80 on .050 centers (standard 4" strip contains 80 holes).
Note: Must use 2 digits.

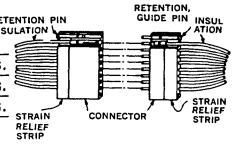
Note: Order contacts separately. Use Wire-Form pin contacts for plugs; socket contacts for receptacles. Use Relia-Tac pin contacts for receptacles; socket contacts for plugs.

Strain Relief Strips Protect Wire

AMPHENOL has a solution to the problem of excessive flexing that breaks wire strands in cable-terminated applications. Strain relief strips are available to encase and protect the wire in the crimp area at the rear of the strips. Molded in black Nylon 6/6 material, the strips can be ordered to match any Amphenol strip connector. Held in place by retention pins, which can also be used as a guide pin.

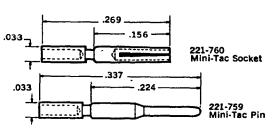
Ordering Information

221-9160—for use with strip connectors on .100 ctrs.
221-9253—for use with strip connectors on .075 ctrs.
221-9380—for use with strip connectors on .050 ctrs.



Mini-Tac Contacts

(Sub-miniature Relia-Tac contacts for .050" center mini-strip connectors only).
Current Rating: 3 Amps.
Wire Size: 26 to 32 ga. stranded wire.



Poke-Home® Guide Pins

Poke-Home guide pins when seated in plug inserts serve functions of polarizing, keying or connector alignment. They can be used in conjunction with either Relia-Tac or Wire Form contacts. Contact factory for information.

Cable receptacle shell, plug insert

Premium Performance For Every Design Budget

AMPHENOL Ultra-Mite connectors are a complete line of non-environmental (Class N) and environmental (Class P) connectors at prices that fit into every design budget. The connectors are available as straight plugs and square flange, single hole mounting and cable receptacles. Either plug or socket contact inserts may be selected for any of the four available shell styles. High density contact arrangements offer 7, 19, 31 and 61 contacts.

The standard Ultra-Mite insert material is an exceptional low cost plastic capable of withstanding temperature constants of up to 325°F Also available in nylon upon request. No-scoop construction, another quality feature, prevents damage to pin contacts in a connector when the mating connector is wiped across its face, as in blind mating connections.

- **Lowest cost** complete High-Density Miniature connector family available.
- High performance-potted constructions meet and exceed MIL-C-26482.
- Completely subminiaturized connectors with high contact density — 61 contacts in a size 18 shell.
- Size 22 Poke-Home contacts
- Lightweight — about 25% that of standard connectors with the same number of contacts.
- All Class "P" receptacles have dynamic O-Ring shell seal.
- Bayonet lock — 3 pin spring loaded coupling ring for quick disconnect.
- Crimp contact terminations.
- 5 key polarization.
- Cable clamps for strain relief.
- Connector identification molded in front and back.
- Natural recess in rear of connector for potting.

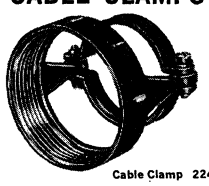
Contacts

Ultra-Tac contacts are recommended for best service. Relia-Tac contacts may also be used. See listing on next page for contact specifications.

HARDWARE ACCESSORIES — CABLE CLAMPS

Cable clamps support conductors extending from plugs and receptacles and prevent twisting or pulling of the contact terminations. To order cable clamps, specify the part number of the cable clamp which corresponds to the connector shell size. For example, the correct cable clamp for a 224-16N18-61S02 plug is 224-552-18.*



Cable Clamp 224-552-00

Shell Size

POTTING

On "P" connectors, to seal the back of the connectors, potting compound is injected into the back of the shell and allowed to cure. It forms a chemical bond to the inner and outer walls of the connector, to the back of the insert, around the contact terminations and well out along the leads.

Not only is a back shell eliminated, but also the cable clamp. The contact terminations are completely and individually protected by the resilient mass which surrounds them and resists transmittal of vibration to the terminations. The potted assembly is moisture proof and resistant to contaminants.

Ordering Information

CONNECTOR PART NUMBER

To order the 224 Series Ultra-Mite connectors you want, put together the part numbers as illustrated in the following example. All connector part numbers are without cable clamps and potting forms. Order hardware accessories separately.

Plug connectors accept socket contacts only. Receptacle connectors accept pin contacts only. Relia-Tac and Ultra-Tac contacts are not intermateable.

Superior Performance at Low Cost

AMPHENOL Mighty-Mite connectors are low cost, highly reliable micro-miniature connectors designed to serve an exceptionally wide range of cable-to-cable and cable-to-chassis applications.

Mighty-Mite connectors are available as straight plugs, single hole mounting, square flange, and cable receptacles in both standard and environmental constructions. Standard connectors are molded of one-piece, rugged polycarbonate or nylon resin. Polysulfone constructions are available for applications involving higher temperatures (up to 325°F) and where repeated contact insertions are required.

220 Series Contacts

FOR 220, 221, 222, 223, 224 SERIES CONNECTOR

Ultra-Tac Contacts

Top quality micro-miniature contacts. The socket contacts are hooded to resist test prod damage.

Relia-Tac Contacts

Durable, customer-proven contacts.

Part Number	Description
220-P02 (Pin) 220-S02 (Socket)	Standard, See specifications below
220-844-02 (Pin) 220-845-02 (Socket)	Same as above, except heavy gold plating and inspection hole in crimp area

Wire Form Contacts

The unique 4-member spring design of the pin exerts self-equalizing force on socket wall, reducing contact resistance. Standard crimp type contacts incorporate gold clad copper alloy wire members in copper sleeves; gold plate finish.

Pin Tail Contacts

Pin Tail Relia-Tac contacts may be used for mounting connectors directly to printed circuit boards. Can be provided with right angle bend. They cannot be used in 224 Series connectors.

Solder Cup Contacts

Can be soldered to leads before insertion or, with proper heat sink, after contacts are assembled.

* Constant to a minimum of 100 cycles of insertion and withdrawal.

Ordering Information

Minimum order quantity is 100 pieces.
Contacts can be supplied on reels for use in semi-automatic crimp machines. Contact factory.

NOTE: Except for the Wire-Form design, all socket contacts are completely shrouded within the plug inserts for optimum protection against damage. Pin contacts are normally exposed when assembled into receptacle inserts. Wire-Form contact pins are to be used in plug inserts and socket contacts in receptacles.

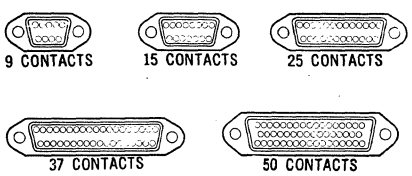
Poke Home & Hard Dielectric | High Density | Encapsulated | Fixed Contact | Power & Coax | Solderless Wrap

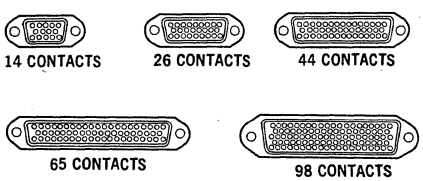
A complete line of versatile connectors offering 9 to 98 contacts in a choice of arrangements and dielectrics. Cable housings are available for cable-to-panel or cable-to-cable applications, and several locking devices are offered. These lightweight, miniature connectors are ideal for computers, telecommunications, instrumentation and avionics systems not requiring environmental capability.

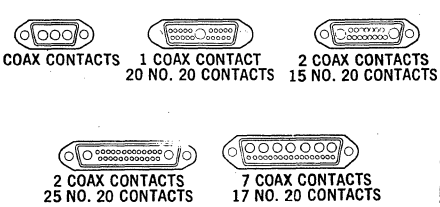
Contact Arrangements

FOR ORIGINAL POKE HOME, HARD DIELECTRIC, FIXED CONTACT, SOLDERLESS WRAP AND ENCAPSULATED CONTACT



FOR HIGH DENSITY LINE ONLY





Additional insert configurations are available. Refer to factory for information.

SPECIFICATIONS

ORIGINAL POKE HOME & ENCAPSULATED CONTACT
Temperature Range: −55°C to +125°C.
Current Rating: 7.5 Amps.
Voltage Rating: 500 VAC (RMS) at sea level.
150 VAC (RMS) at 90,000 ft.
Dielectric: Zytel 101 nylon per Mil-P-20693.
Shells: Cadmium-plated cold-rolled steel with clear chromate finish per QQP-416A, Type I. Gold iridite finish available on request per QQP416A, Type II.
Contacts: Crimp Type — .00002″ min. gold over copper plated silnic bronze. Solder type — .00002″ min. gold over copper plated brass.
Wire Size: Solder: Up to #20; crimp #20, #22 and #24 AWG.

HARD DIELECTRIC
Temperature Range: −55°C to +175°C.
Current Rating: 7.5 Amps max. (#20 size contacts).
Voltage Rating: 500 VAC (RMS) at sea level.
150 VAC (RMS) at 90,000 ft.
Dielectric: Diallyl phthalate glass-filled per Mil-M-19833, Type GDI-30.
Shells: Same as above.
Contacts: Crimp-type — leaded copper with .00002″ min. gold over copper flash plating per Mil-G-45204, Type II. Solder type — brass or silnic bronze with .00002″ min. gold over copper flash plating per Mil-G-45204, Type II.
Wire Size: Accepts #20 AWG wire max.

FIXED CONTACTS and POWER & COAX.
Temperature Range: −55°C to +125°C.
Current Rating: 7.5 Amps.
Voltage Rating: 500 VAC (RMS) at sea level.
125 VAC (RMS) at 70,000 ft.
Dielectric: Glass-filled nylon.
Shells: Same as above.
Contacts: Power; Screw machine type — .00002″ min. gold over copper plated brass. Punch press type — Stamped from phosphor bronze and plated .00002″ gold over copper flash. Wire wrap type — .00002″ min. gold over copper plated brass. .500″ Lg. x .025″ Sq. Coax.; #1 Shielded contacts are gold plated.
Wire Size: Up to #20 wire.

HIGH DENSITY
Temperature Range: −55°C to +125°C.
Current Rating: 3.0 Amps.
Voltage Rating: 500 VAC (RMS) at sea level.
75 VAC (RMS) at 70,000 ft.
Dielectric: Glass-filled nylon.
Shells: See above.
Contacts: Pins—leaded copper with .00002″ min. gold over copper flash plating. Sockets—phosphor bronze with .00002″ min. gold over copper flash plating.
Wire Size: #24, #26, #28 AWG.

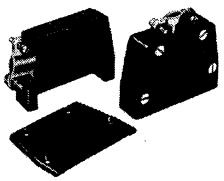
MIN RAC CONNECTORS

BUNKER RAMO AMPHENOL

17 Series Min Rac Accessories

Plastic Backshell

A versatile accessory for all Min Rac connectors. Protects connector terminations and provides cable strain relief. Unique removable side panel allows attachment even after cable has been terminated. Can easily be removed for servicing in field. Deep recess accepts all connector styles, even encapsulated and power and coax lines. Interchangeable insert and cable clamp allows choice of top or side cable entry. Made of glass-filled nylon with cadmium plated steel clamp.



Metal Cable Housing

Used to adapt connector for cable to panel or cable to cable applications. Easily attached to connector by two screws. Available in clear chromate or gold iridite finish to match connector shells.

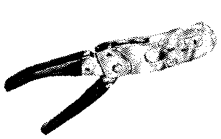
357-300-7	17-1195		

No. 357-552 — Hand Crimp Tool for Coax Connectors

Cycle-controlled hexagon crimp action for reliable termination of outer ferrule of coax contacts. Used for 17-1130 and 17-1132 coax contacts, with RG 178/U cable. (357-100 or 357-104 crimp tool required to terminate center conductor of coax cables.)



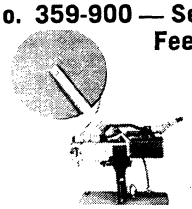
No. 357-553 — Hand Crimp Tool

Same as above except for 17-1112 and 17-1113 coax contacts used with RG 195/U cable.

No. 359-400 — Manual Feed, Pneumatic Crimp Tool

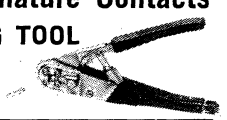
4-indent Cycle-Controlled crimping tool. Consult factory for correct settings, nest bushings and accessories.

No. 359-900 — Semi-Automatic Feed Crimp Tool



4-indent cycle-controlled crimping. Contacts supplied on carrier strips wound on reel for fast, easy crimping. Consult factory for available contacts and accessories.

NO. 357-104 — HAND CRIMPING TOOL



Miniature step adjustable. Requires contact locator, see below.

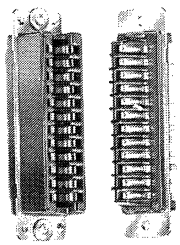
BLUE RIBBON® CONNECTORS

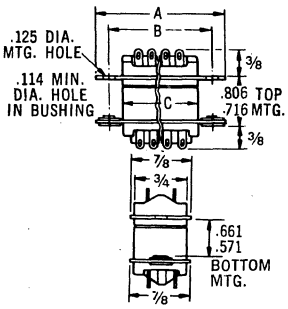
BUNKER RAMO AMPHENOL

26 Series Blue Ribbon Connectors

Barrier Polarization

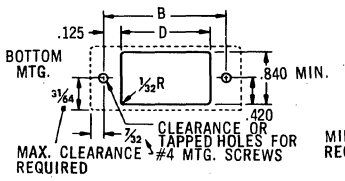


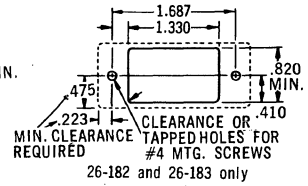
26-4200-24S 26-4100-24P



Tapered design of plug body provides pre-alignment of mating contacts. Dielectric barriers between contacts vary in thickness by minute dimensions to provide polarization. Float bushings allow a float of up to .02 in each direction, facilitating the blind mating common in rack and panel applications. Requires simple rectangular panel cutout.

The eight contact size is also available with a molded key and keyway for polarization. Catalog numbers, 26-182 plug and 26-183 receptacle.





26-182 and 26-183 only

Contacts	Plugs	Mating Receptacles	DIMENSIONS A	B	C	D

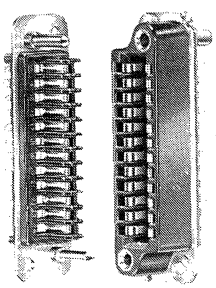
8	26-182	26-183	—	—	—	—

SPECIFICATIONS (Exceed requirements of SCL-6020A)

Current Capacity — 5 Amps per contact
Voltage Rating — 750 volts D.C. at sea level.
300 volts D.C. at 60,000 feet
Operating Temperature — −55°C to +125°C
−67°F to +257°F
Contact Plating — .00002″ gold over copper base
Maximum Wire Size — 16 gauge

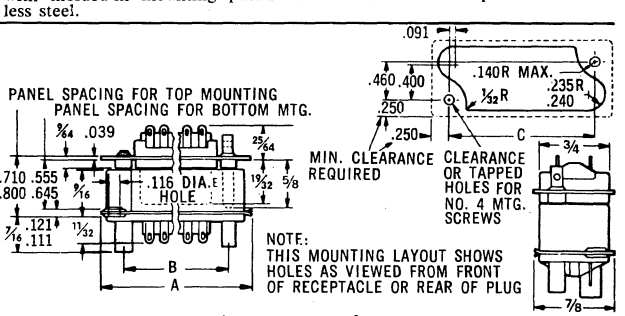
Plugs and receptacles are molded of high impact diallyl phthalate dielectric with molded-in mounting plates of corrosion resistant passivated stainless steel.

Pin Polarization



26-190-24 26-159-24

Sturdy guide pins pre-align connectors before contact engagement. Pins are of dissimilar size to avoid reverse mating. Float bushings on receptacle allow a float in all directions of .02″ to minimize the need for close mounting dimensions and to assist in blind matings. Rated 5 amperes, 750V DC at sea level; 300V DC at 60,000 feet.



Contacts	Plug	Receptacle	DIMENSIONS A	B	C
16	26-159-16	26-190-16	2.442	1.842	2.024

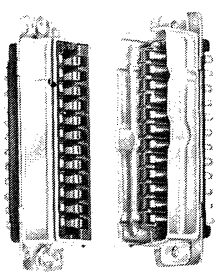
32	26-159-32	26-190-32	3.798	3.202	3.384

Keyed Shells



26-4201-24P 26-4101-24S

Similar to barrier polarization type, but with keyed aluminum shells to provide a large assortment of alternate positions. Mounting plates are stainless steel and receptacle includes float bushings which allow a float of .02 in all directions. Rated 5 amperes, 800 V DC at sea level; 300 V DC at 70,000 feet.

BLUE RIBBON® CONNECTORS

BUNKER RAMO AMPHENOL

26 Series Cable to Panel and Cable to Cable Types

- **Low Withdrawal Force**
- **Secure Spring Latch**
- **Low Insertion Force**
- **Alternate Positions**
- **Provisions for Safety Wiring**

Cable-to-Panel Blue Ribbon Connectors include a straight plug, right angle plug, and panel receptacle. The plug is equipped with a spring tension swivel latch to insure mating, even in vibration applications. Provision for safety wiring provides additional reliability.

The nickel plated brass shells are notched to provide keying for alternate positions. The large number of alternate positions available is effectively doubled since the plug and receptacles are available with either a male or a female insert. Add P to the catalog number for a male insert; S for a female insert.

LOW PROFILE HOOD

All of the advantages of ribbon contacts apply to Micro Ribbon Connectors. This includes the self-cleaning, self-wiping action of the contacts and extremely low insertion and withdrawal forces. Dielectric is improved diallyl phthalate with high impact strength and low moisture absorbency characteristics. Trapezoidal shells provide polarization, and are made of zinc plated brass with a clear chromate conversion seal. Small size makes the Amphenol Micro Ribbon Connector ideal for high density miniature modules as well as rack and panel applications. Connectors may be top or bottom mounted. Rated 700V DC at sea level; 200 VDC at 70,000 feet.

Rack and Panel and Module Applications. Receptacle mounting plate includes float bushings to allow a float of .020 in each direction. This facilitates blind mating and minimizes the need for critical mounting dimensions.

Cable-To-Panel Application. Panel receptacles are equipped with sturdy spring latches which are guided and retained by cutouts in the plug's flanges. Receptacles must be top mounted. Cable entry at top side, as desired.

SPECIFICATIONS

(Meets requirements of SCL-6020A)

Current Capacity — 5 amps per contact.

Voltage Rating — 700 volts D.C. at sea level.
200 volts D.C. at 70,000 ft.

Operating Temperature — −55°C to +105°C
−67°F to +221°F

Wire Sizes — Solid — 22 gauge max.
Stranded — 24 gauge max.

Contacts — .000030" gold plated over copper flash on cadmium copper base.

Dielectric — Diallyl phthalate per Mil-M-14F Type MDG

Shells — Zinc plated brass with clear chromate coating, trapezoidal shape for polarization. Gold iridescent chromate finish also available.

RACK AND PANEL CONNECTORS

BUNKER RAMO AMPHENOL

126 Series Miniature Rack and Panel Connectors

Heavy duty, reliable, time proven connectors. Dielectric is of melamine. Contacts are gold over silver plated. Voltage rating of types 1 and 2 is 700V RMS between contacts and 600V RMS between contacts and ground with a current rating of 17 amperes. Voltage rating of types 3 and 4 is 600V RMS with a current rating of 7½ amperes.

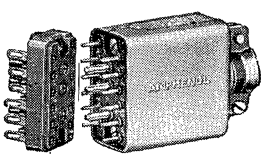
126 Series Rectangular Rack & Panel with Shells For Cable Connections



Rated a full 900V RMS, contacts are gold, over silver. Four contact configurations are available with 3 contact sizes. Contact size 12 is rated 23 amperes; size No. 16 is rated 13 amperes; size 20 is 7½ amperes. Dielectric is mica filled phenolic. Aluminum housing with mechanical strain relief is available for cable applications. Gold over silver plated contacts.

Military Version

A family of miniature connectors which meets MIL-C-8384.

SPECIFICATIONS

Current Rating: 7.5 amps.
Voltage Rating: 500V A.C. (RMS).
Temperature Range: −55°C to +125°C.
Dielectric: Molded epoxy type thermo-set plastic.
Pin Contacts: Brass alloy with gold over nickel plating.
Socket Contacts: Beryllium copper with gold over silver plating.
Guide Hardware: Gold-plated brass with 4-40 thread.
Wire Size: 18AWG solid - 20AWG stranded.

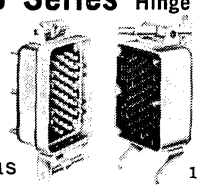
115 Series Hinge Action Mating



115-31S

115-30P

Amphenol 115 Series connectors accommodate 50 or 100 No. 16 wires and are nominally rated at 750 volts RMS 60CPS at sea level.

The vise action of the screw lock provides the leverage for easy attaching and disengaging of the plug. The two-piece inserts have molded-in numbers to facilitate wiring and checking of circuits.

PRINTED CIRCUIT CONNECTORS

BUNKER RAMO AMPHENOL

133 Series Board Adapters

These plugs mount directly to the printed circuit board and eliminate wear on board circuits, a valued feature where frequent mating and unmating is required. Ideal for mating non-standard boards with receptacles.

Standard contact plating is .00002" gold over copper, .00001", .00003", .00005", and .00010" gold plating available on special order. Contact resistance is 30 millivolts or less.

The contacts are on .156" centers for mating with the 143 Series receptacles.

The 133 Series plug when used with the 143 receptacle, is polarized by removing a contact. Contact removal and the marking of the connector is performed by your AiD, or at the Amphenol factory.

143 Series Receptacles

MATES WITH .054 - .071 PC BOARDS OR 133 SERIES PLUGS

Tuning fork contact design assures uniform and firm contact action, even with PC boards at extremes of thicknesses.

Standard contact plating is .00002" gold over copper; .00001", .00003", .00005", and .00010" gold plate is available on special order.

For boards of non-standard thickness, or where frequency of insertion and withdrawal will exceed 500 cycles, it is recommended that the 143 Series receptacle be used with the 133 Series plug. Contacts are on .156" centers. All sizes are available with a choice of contact tails. Polarizing key replaces a contact.

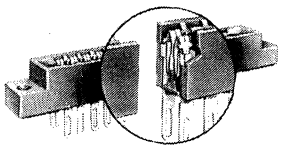
PRINTED CIRCUIT CONNECTORS

BUNKER RAMO AMPHENOL

225 Series Printed Circuit Receptacles

BIFURCATED BELLOWS CONTACT PRINTED CIRCUIT CONNECTORS QUALIFIED TO MIL-C-21097C
LOW MILLIVOLT DROP • NEGLIGIBLE PC CIRCUITRY WEAR

Amphenol gold-plated RIBBON contacts — with their smooth glide mating action — incur practically no wear on fragile printed circuitry. Ribbon contacts are bifurcated (slit), to guarantee at least two points of electrical contact, even with an irregular shaped printed circuit board. The double spring tension of the ribbon contact, and large mating surface, provides consistent low contact resistance, with corresponding low millivolt drop.



.156" CENTERS

Bifurcated ribbon contacts are on .156" centers and will accept PC boards of .054" to .071" thickness.

DIALLYL PHTHALATE

One piece, flame resistant, glass filled diallyl phthalate. Chamfered throat opening assists in guiding PC boards to a perfect engagement.

MIL-C-21097C

Amphenol 225 Series PC Connectors represent the most comprehensive connector line designed and qualified to MIL-C-21097B.

POLARIZATION

Molded keying slots between contacts accept polarizing key without loss of contact positioning. One nylon key is supplied with each commercial connector.

CONTACT ROWS

225 Series PC Connectors are available with two rows of separate independent contacts, or one row of contacts with back-up springs provided for proper mating tension. The 43 position size connector is therefore available with either 43 or 86 contacts. Double sided contacts with single tails are also available in 6 through 36 sizes. See configuration 5 on next page.

TERMINATION

A wide variety of contact tails permit 225 Series Printed Circuit Connectors to be terminated by soldering, or by crimping, of either Poke-Home or taper pin contacts. Wire wrappable terminations are also available.

SPECIFICATIONS

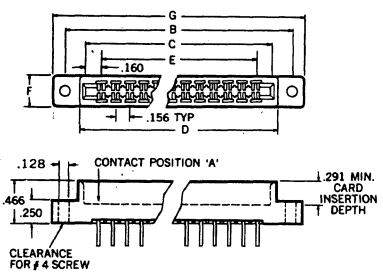
Operating voltage: 600 VAC (RMS) at sea level — 150 VAC (RMS) at 70,000 feet
Current rating: 5 amperes continuous
Test Voltage Between Adjacent Contacts: 1800 VAC (RMS) at sea level — 450 VAC (RMS) at 70,000 feet
Insulation Resistance: 5,000 megohms minimum

Contact Resistance	
Crimp and taper pin terminated	— 35 millivolts max. at rated current
Solder terminated	— 30 millivolts max. at rated current
Contact Retention	
Solder terminated	— 5 pounds axial load min.
Crimp terminated	— 10 pounds axial load min.
Taper pin	— 15 pounds axial load min.

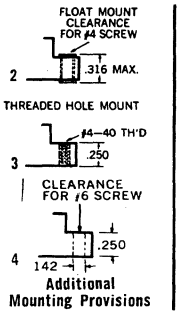
Dielectric material: Glass fiber reinforced diallyl phthalate — Type SGDF per MIL-M-14
Contact material: Beryllium copper, or phosphor bronze (see below)
Contact plating — .00003" min. gold over copper, or .00005" min. gold over copper.

Solder Termination — Standard

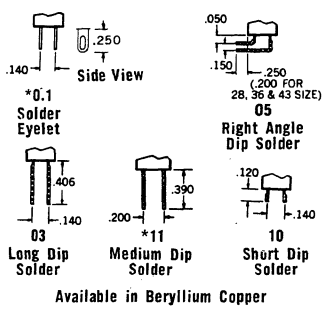
AMPHENOL 225 Series Printed Circuit Connectors with solder terminations provide full flexibility of termination with eight different tail styles — three straight plug-in terminations (.140" and .200" grid), one right angle plug-in termination, and four eyelet terminations.



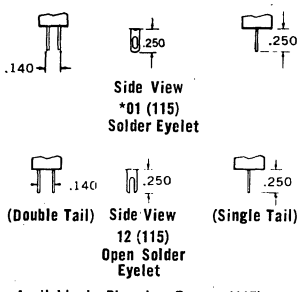
Mounting Provision 1



Additional Mounting Provisions

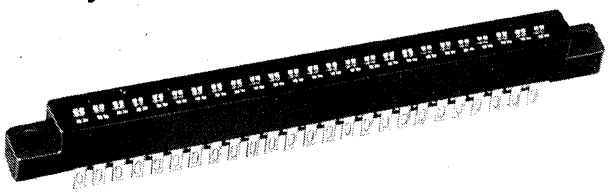


Available in Beryllium Copper



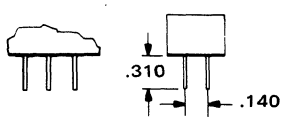
Available in Phosphor Bronze (115)

Economy Solder Terminations - (117 Deviation)

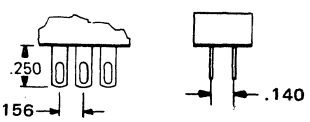


These low cost connectors are similar to the standard 225 Series but with an economical phenolic dielectric and .00002" min. gold plating on the contacts. They are available in 6 through 43 positions with either solder eyelet or dip solder tails. Contacts are .156" on center, with .140" row spacing, and may be arranged in two rows for two-sided circuit boards or in a single row with back-up springs for single-sided boards.

TAIL STYLES



04 - Dip Solder



Eyelet Type
01 - Solder Termination

SPECIFICATIONS

Operating Voltage: 600VAC (RMS) at sea level — 150VAC (RMS) at 70,000 ft.
Current Rating: 5 amps
Dielectric Material: Electrical Grade Phenolic, Black
Insulation Resistance: 5,000 megohms minimum
Contact Material: Copper alloy with .000020" gold over copper
Contact Resistance: 30 millivolts maximum at rated current
Board Thickness: .054 to .071"

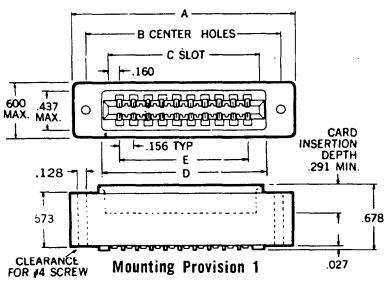
PRINTED CIRCUIT CONNECTORS

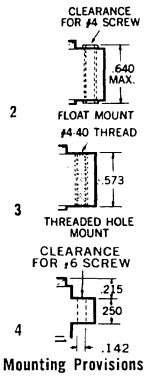
BUNKER RAMO AMPHENOL

Taper Pin Termination

AMPHENOL 225 Series Printed Circuit Connectors with taper pin terminations provide flexibility of assembly procedure and ease of circuit modification and repair.

Two arrangement options are available: two rows of contacts for independent opposing circuits or a single row of contacts for single circuits. Single row connectors use separate back-up springs to assure firm mating.





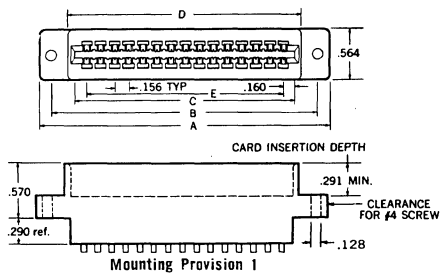
TAPER PIN TYPE CONTACT

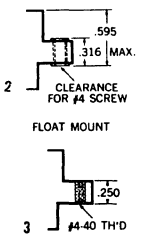
Tail style 00 accepts #53 pins. Available in beryllium copper only.

Crimp- Poke-Home Termination

AMPHENOL 225 Series Printed Circuit Connectors with Poke-Home contacts offer both the economy of crimp termination and the flexibility of removable contacts — an unbeatable combination.

Two arrangement options are available: two rows of contacts for independent opposing circuits or a single row of contacts for single circuits. Single row connectors use separate back-up springs to assure firm mating.





CRIMP POKE-HOME TYPE CONTACT

Tail style 00 available in beryllium copper only.

Approximate Dimensions For Solder, Crimp and Taper Pin Terminations

Number of Contact Positions	A	B	C	D	E	F	G
6	1.832	1.532	1.100	1.230	.780	.343	1.844
10	2.456	2.156	1.723	1.854	1.404	.343	2.468

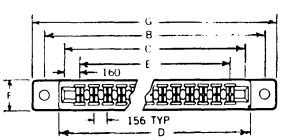
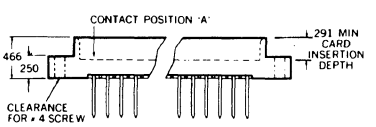
* 25 position available only in double row solder termination.





POLARIZING KEYS

225-559
Over contact key must be ordered separately

225-594
Between contact key. One included for each connector. Packed separately in bulk.

Ordering Information

To order the specific 225 Series connector you want, put together the part number as per the following example:

SERIES NUMBER 225-

225-20631-101 (115)

TERMINATION CLASS

Digit	Termination
2	Solder
3	Taper Pin
4	Poke-Home

CONTACT POSITIONS

Digit Group	No. of Contacts
06	6 or 12
10	10 or 20
15	15 or 30
18	18 or 36
22	22 or 44
25*	25 or 50
28	28 or 56
36	36 or 72
43	43 or 86

*Avail. in Solder only.

CRIMP CONTACT ORDERING INFORMATION

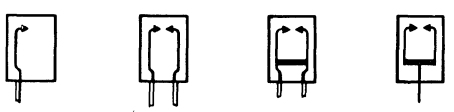
Crimp contacts are available in standard beryllium copper with .000030″ gold plating either in bulk or on reels.

Loose contacts—Order part number 225-605-06

Reel contacts (2400 contacts on reel) Order part number 225-605-52400

CONTACT CONFIGURATION

Digit	Solder Type	Poke-Home Type	Taper Pin Type
0	—	Insert less contacts.	—
1	Single row connector with back-up springs.	Insert plus loose contacts for one row plus back-up springs.	Single row connector with back-up springs.
2	Two rows of independent contacts.	Insert plus loose contacts for two rows.	Two rows of independent contacts.
3	Two rows of bridged contacts with two tails.	—	—
5**	Two rows of bridged contacts with one tail.	—	—



1 2 3 5**

** Available in Phosphor Bronze only

DEVIATIONS

(115) Deviation is Phosphor Bronze contact material. Available only in solder eyelet.

(117) Economy version with Phenolic dielectric and .00002″ gold plating.

POLARIZATION (Optional

If factory insertion of polarizing key is desired, add position of key as suffix here. Key will be inserted to right of contact position shown. Example: 225-20631-10103 (115). Key to right of contact #3.

TAIL STYLE

Digit Group	Style
00	Taper Pin or Crimp
01	Eyelet Solder
03	Straight Dip Solder
04	Straight Dip Solder (economy version only)
05	Right Angle Dip
10	Short Dip Solder
11	Military Dip Solder
12	Open Eyelet Solder

CONTACT PLATING

Digit	Plating
1	.000030″ gold over copper (Industrial)
2	.000050″ gold over copper (MIL-C-21097)
4	.000020″ gold over copper (economy version)

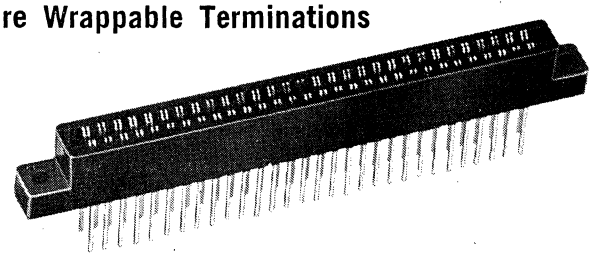
MOUNTING PROVISIONS

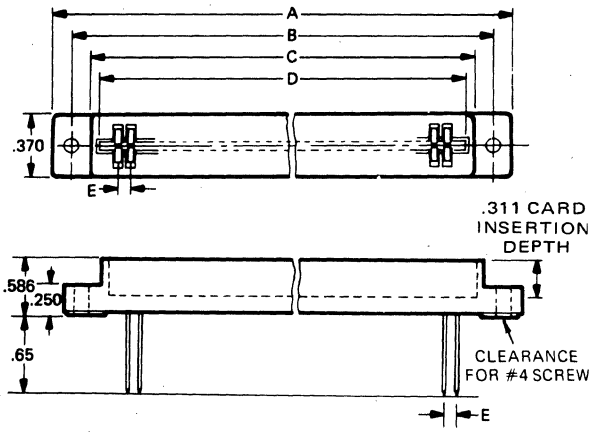
Digit	Provisions
1	.128″ clearance holes
2	Float busings for #4 screws
3	Threaded bushings (4-40)
4	.142″ clearance holes (solder type)
4	.250 mounting ears (taper pin)

PRINTED CIRCUIT CONNECTORS

BUNKER RAMO AMPHENOL

225 Series Printed Circuit Connectors
Wire Wrappable Terminations





ALL DIMENSIONS REFERENCE ONLY

AMPHENOL 225 Series Printed Circuit Connectors with wire wrappable terminations provide an economical and reliable connector for either automatic or hand wire wrapping applications.

Bifurcated bellows contacts on .100 x .200, or .125 x .250 grid spacings provide for smooth positive, two-point mating action no matter how irregular the board surface. These connectors are available in 22-, 30-, 43-, and 50-position models with either grid spacing.

Contact plating is .000030 minimum gold over copper. This along with the new high grade industrial material designed into these connectors combine to provide an economical answer to your needs for wire wrappable connectors.

SPECIFICATIONS

Operating Voltage: 600VAC (RMS) at sea level — 150VAC (RMS) at 70,000 ft.
Current Rating: 5 amps
Dielectric Material: Electrical Grade Phenolic, Black
Insulation Resisance: 5,000 megohms minimum
Contact Material: Phosphor bronze plated .000030" gold over copper
Contact Resistance: 30 millivolts maximum at rated current
Board Thickness: .054" to .071"

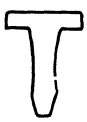
Polarizing Keys

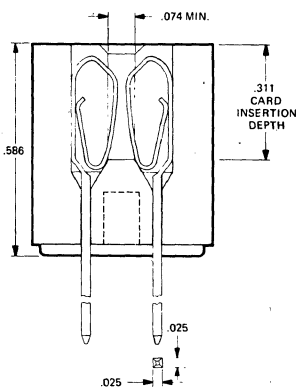


225-645

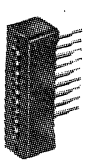
Over contact key can be used with 225 Series wire-wrappable connectors on .100" and .125" centers.

225-594

Between contact key may be used with .125" center wire-wrappable connectors.



64 Series Micro-Edge® Edge Board Receptacles



Micro-Edge contacts will not set. The Micro-Edge will accept even warped boards with firm contact action. Contacts are rounded and will not scrape or injure delicate circuits.

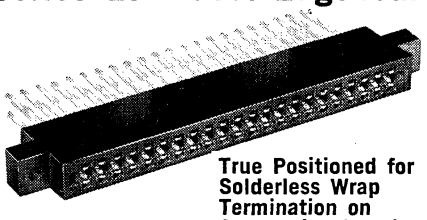
PRINTED CIRCUIT CONNECTORS

BUNKER RAMO AMPHENOL

261 Series Low Cost Edgeboard Connectors



True Positioned for Solderless Wrap Termination on Automatic Wrapping Machines

High Performance at Reasonable Cost

These high-performance edgeboard connectors provide dual readout of double-sided printed circuit boards. The pre-loaded cantilever type contacts are assembled into the dielectric with precise spacing to permit automatic solderless wrap termination. The phosphor bronze contacts have a minimum of 50 micro-inches of gold at the contacting surface. This results in extremely low contact resistance and permits over 500 insertion and withdrawal cycles without loss of continuity or significant increase in resistance.

An Extensive Line

- 15 to 43 positions providing up to 86 contacts
- Choice of .100", .125", .150", .156" or .200" spacing
- Choice of tail sizes: .025" sq., .035" sq., or .035" x .050".

Electrical Characteristics

.150" on Center	6.0	5.5	400 V RMS	2500 V RMS
.156" on Center	7.5	5.0	400 V RMS	2500 V RMS
.200" on Center	7.5	4.5	500 V RMS	4500 V RMS

SPECIFICATIONS

Block Material: Medium impact, electrical grade phenolic.

Contact Material: Grade A Phosphor Bronze with 50 micro-inches minimum thickness of gold on contacting surfaces.

Keying: Available on .200, .156 and .150 centers. On .125 and .100 centers key replaces one pair of contacts.

Tail length: Sufficient for three wire wraps plus space for bussing or PC board next to block. (See dimension G.)

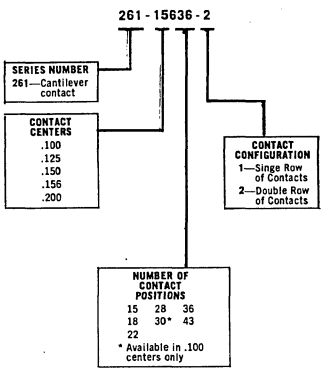
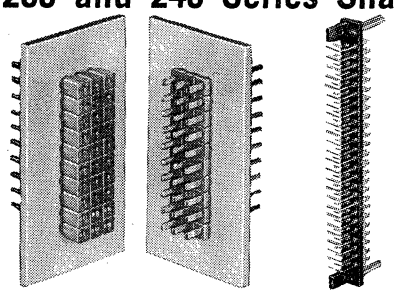
Ordering Information



230 and 240 Series Snap-Wrap® and Mini-Wrap® Connectors



Simple Modular Construction

Permits Any Configuration Designed

Snap-Wrap (230 Series) and Mini-Wrap (240 Series) connectors are based on a modular design concept which permits AMPHENOL to accommodate practically any configuration as a standard product. Design your own interconnection system using AMPHENOL's building block concept.

The base plate, available in various finishes, can be shaped, formed, notched, or have any kind of cutouts or mounting holes you need to fit your space and components. Holes may be punched (or omitted) in many configurations, including either military or commercial patterns with spacing of .200" x .200", .150" x .150", .150" x .075", .125" x .125", .100" x .100" or .100" x .050".

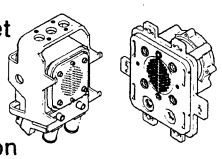
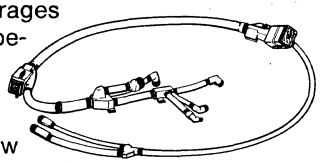
BUNKER RAMO AMPHENOL

SAMS puts it all together

When the link-up of an electronic or electrical system is your problem, SAMS is the answer. If the solution is not one of the literally thousands of standard connectors and connection systems already offered by Amphenol, then SAMS (Space and Missile Systems) Division delivers a custom-designed interconnection system specifically to meet your needs.



SAMS is dedicated to the design and integration of specialized interconnection systems. To work with you toward that end, SAMS provides a rapid-action, problem-solving team of specialists. The SAMS team quickly involves itself in the solution of your problem and in the manufacture of the highest quality interconnection systems available to industry today.



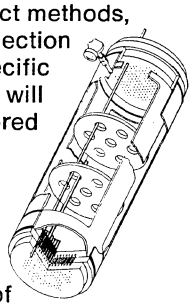
Every SAMS engineer averages more than a decade of experience in complex interconnect systems design. All are dedicated to the constant exploration of new materials and processes for both function and reliability in end-product use.

Vigorous investigation of new ways to make connectors perform more effectively

SPECIAL PURPOSE CONNECTORS
NUCLEAR PENETRATION ASSEMBLIES

BUNKER RAMO AMPHENOL

is a primary concern at SAMS. The result is new approaches to disconnect methods, contact design and interconnection assembly. Whatever your specific environment, the SAMS team will produce a better system tailored to meet your needs exactly.



Close customer relationships and in-depth service have facilitated efficiency and discovery at SAMS. Our wide experience and long record of achievement in virtually all aerospace programs has contributed significantly to this important service capability. Your project or program stands to benefit from the expertise developed through our involvement with programs in other industries.

Whether your needs dictate special connectors and cable assemblies, or complex interconnection systems . . . whether your industry is aerospace, shipbuilding or nuclear power generation . . . your best connection is SAMS!

CONNECTOR SELECTION GUIDE

BUNKER RAMO AMPHENOL

Amphenol provides superior environmental connectors

They offer the following design features in common:

MONOBLOCK CONSTRUCTION — Eliminates air voids and protects against degrading moisture and altitude conditions. Made with materials developed specifically for environmental connectors.

LIGHTWEIGHT — Shells are made of aluminum; inserts and grommets are made of strong lightweight dielectric.

HIGH DENSITY — AMPHENOL research and design has developed high density contacts in environmental connectors, using a dielectric retention system.

COMPLETE ENVIRONMENTAL SEALING — Wire grommet seals, resilient interfacial seals and peripheral "O" ring shell seals provide ultra-reliable environmental seals.

POKE-HOME® CONTACTS — AMPHENOL pin and socket contacts are front release and rear insertion. They provide easy servicing without disassembling the connector or disturbing adjacent contacts. Gold plating provides better contact surface and keeps contacts oxidation-free.

TOOLS — AMPHENOL designed (and M.S.) tools, for each type of connector, are available. Both hand tools and semi-automatic types.

Amphenol provides superior AN/MS connectors

MS connectors conform to Military Specification 5015 and are intermateable and interchangeable wtih AMPHENOL's AN connectors. AMPHENOL has been manufacturing reliable, high quality AN/MS standard circular connectors for over 35 years. Much of the research and development of these connectors has come from AMPHENOL, including diallyl phthalate, a resin that has near perfect dimensional stability, high arc resistance, and maintains high insulation resistance under both hiumidity and thermal stress. This is the dielectric material used in standard connector inserts, except for R construction connectors. These use resilient neoprene which is MIL approved and provides an environmental seal that exceeds MIL-C-5015 requirements.

SELECTOR GUIDE

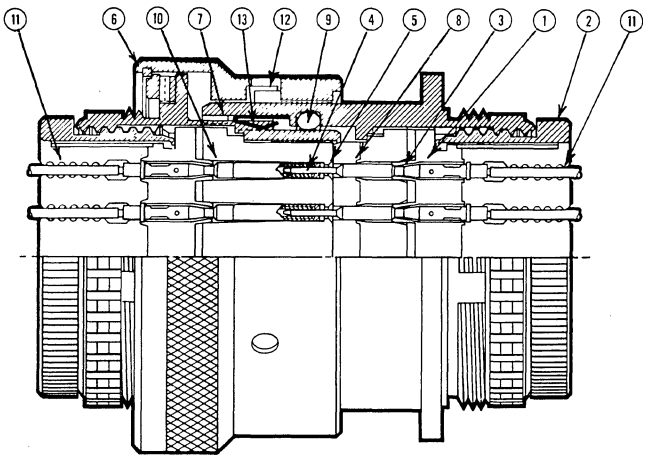
Page	Series	Meets/Exceeds MIL-Spec	Description	Contacts	Pressure Proof	Max. Temp.	Mates With
SUB-MINIATURE CIRCULAR							
2	348	MIL-C-81511 (Tri-Service)	Environmental, high contact density, "No-scoop" general purpose sub-miniature, O.D. finish, silicone rubber inserts, polymer retention disc.	3 to 155 Crimp	Yes	392°F	348 series
12	115	Does not apply	Subminiature MS type, tough highly reliable, Wt. less than ½ ounce, shells nickel-plated brass or stainless steel.	2 or 4 Pin-molded in Socket held with C washers	Depends on appli-cation	500°F 1000°F	115 series
MINIATURE CIRCULAR							
5	48	MIL-C-26500 (USAF) MIL-C-38300	Miniature, environmental, threaded and bayonet coupling. Black anodized finish. Silicone rubber dielectric.	3 to 61 Crimp/ Poke-Home®	Yes	392°F	48 series
9	67	MIL-C-5015	Miniature, environmental, Bayonet, gray anodized finish, Diallyl phthalate dielectric.	3 to 48 solder cup	Yes	257°F	67 series
13	165	MIL-C-19572	Miniature AN/MS, Pressure & Waterproof, bayonet. Diallyl phthalate dielectric.	5 to 24 solder cup	Yes	257°F	165, 182 series
13	182	Does not apply	Miniature AN/MS hermetic.	5 to 24 solder cup	Yes	392°F	165 series
STANDARD CIRCULAR							
15	270	Does not apply	Supersonic connector, impervious to fuels and solvents, fireproof polymer inserts, lightweight, "No-scoop".	3 to 19 Crimp/ Poke-Home®	No	500°F	270 series
17	246	MIL-C-5015E	MS type with crimp removable contacts. Environmental, fluid & damage resistant.	1 to 48 Crimp/ Poke-Home®	Yes	257°F	246, & all MIL-C-5015
17	208	MIL-C-5015E	MS type, Crimp Poke-Home contacts. High temp., fluid resistant.	2 to 37 Crimp/ Poke-Home®	Yes	347°F	208, & all MIL-C-5015
17	238	MIL-C-5015E	MS type, Crimp Poke-Home contacts. High temp. flame resistant.	2 to 37 Crimp/ Poke-Home®	Yes	2000°F	238 & all MIL-C-5015
16	69	MIL-C-5015	Environmental, threaded coupling. O.D. finish, neoprene dielectric.	2 to 37 Crimp/ Poke-Home®	Yes	257°F	69, all MS, 89, 172 series
18	MS-A	MIL-C-5015	Solid back shell, Threaded coupling, O.D. finish, Diallyl phthalate dielectric.	1 to 52 solder cup	No	257°F	All MS, 69, 89, 172 series
18	MS-B	MIL-C-5015	Solid back shell, Threaded coupling, O.D. finish, Diallyl phthalate dielectric.	1 to 52 solder cup	No	257°F	All MS, 69, 89, 172 series
18	MS-E	MIL-C-5015	Environmental. Threaded coupling, O.D. finish, Neoprene rubber dielectric.	1 to 48 solder cup	Yes	257°F	All MS, 69, 89, 172 series
18	MS-R	MIL-C-5015	Environmental, Lightweight Threaded coupling, O.D. finish, Neoprene rubber dielectric.	1 to 48 solder cup	Yes	257°F	All MS, 69, 89, 172 series
24	89	Does not apply	Submersible, threaded coupling, clear or O.D. cadmium finish. Diallyl phthalate dielectric.	2 to 52 solder cup	Yes	257°F	All MS, 69, 89, 172 series
RACK AND PANEL							
25	217	MIL-C-26518 (USAF) MIL-C-38300	Miniature, high environmental rectangular. Spring-loaded front or rear panel mount.	18 to 102 Crimp/ Poke-Home®	Yes	500°F	217 series
27	94	Does not apply	Rectangular available with standard Poke-Home or shielded contacts.	15 to 63 Crimp or solder cup	Yes	257°F	94 series
28	213	Does not apply	Completely environmental monoblock ARINC. Die-cast aluminum shell, O.D. finish, silicone rubber inserts, Standard and High Temp.	57 & 67 Crimp/ Poke-Home®	Yes	257°F	213 series, intermateable with all 404 ARINC connectors

HIGH DENSITY CONNECTORS

BUNKER RAMO AMPHENOL

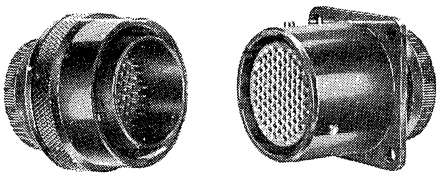
Amphenol ASTRO/348® MIL-C-81511* High Density Connectors

DESIGN FEATURES



1 Molded One-Piece Contact Retention Disc.
2 Captivated Rear-Locking Nut.
3 Individual Contact Risers.
4 Anti-Scoop Recessed Pin Contacts (in receptacle).
5 Closed Entry Socket Insert and Contacts.
6 Captivated Triple Bayonet Coupling System.
7 5 Key Polarization
8 Interfacial Mating Seal
9 Dynamic "O" Ring Peripheral Shell Ring.
10 Monoblock Construction—Inserts Bonded to Shells.
11 Self-Sealing Rear Grommets.
12 Visual Mating Indicator.
13 Shell to Shell Grounding Fingers.

50% No-Scoop construction cross-section is illustrated



Even if a plug with pin contacts and a receptacle with pin contacts are inadvertantly mated, 100% No-Scoop Astro/348 connectors offer full protection: .090 separates the two contact sides.

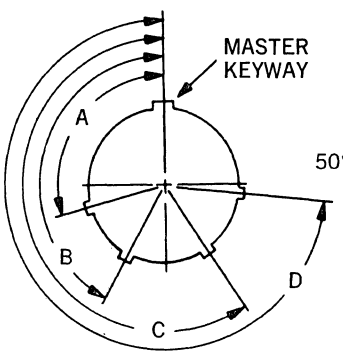
In the 100% No-Scoop connectors it has been possible to completely ring the interior of the plug with grounding fingers for improved EMI protection.

"3X" identifies the 100% No-Scoop construction in the How To Order information, page 3. "4X" is the standard Astro/348 construction. When pin contacts are used in the receptacle only (by usage, 80% of the time) these connectors are also No-Scoop.

Because "3X" and "4X" connectors have different shell position keying there is no possibility of intermating the two constructions.

"Order "3X" 100% No-Scoop when you have possible blind-mating or critical systems applications. Order "4X" (referred to in MIL-C-81511 as series 20) every other time.

NORMAL



Amphenol designed out the costly space-wasters in removable-contact connectors when we invented Astro/348. Problem-causing metal retention clips for each contact are gone. Instead, a single one-piece molded dielectric retention system locks Poke-Home contacts in place. Originally designed as a high density subminiature, Astro/348 turned out to be the best high density miniature and standard connector ever made. It packs more contacts of every size into standard shells than any other design. MIL-C-81511 has established the standard connector family for the next decade.

FOR EXAMPLE

Here's what Astro/348 in a size **18 shell** can give you:

Astro/348	Closest Alternative
85 #23-22 Contacts	67 #22M Contacts
37 #20 Contacts	32 #20 Contacts
19 #16 Contacts	11 #16 Contacts
18 #12 Contacts	None Available

All at less cost, and in less space, for each circuit carried.

LARGER ON THE INSIDE

The single-piece retention disc gives other excellent advantages in addition to density. Dielectric wall thicknesses in the sub-miniature #23-22 contact arrangements **are equal to standard miniatures.** With greater contact density, #20's, #16's and #12's provide dielectric separation comparable to standard miniature and power connectors.

FIGHT SCOOPING

Scooping means that pin contacts in a connector can be damaged when the mating shell is accidentally wiped across the pin connector face. Astro/348 is available in two constructions: Series 1 and Series 2. Series 2 (50% No-Scoop) means that scooping is impossible when the pin contacts are in the receptacle shell (this is normal usage). In Series 1 (100% No-Scoop) constructions, scooping is impossible whether the pin contacts are in the plug or the receptacle.

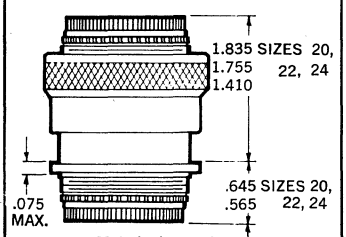
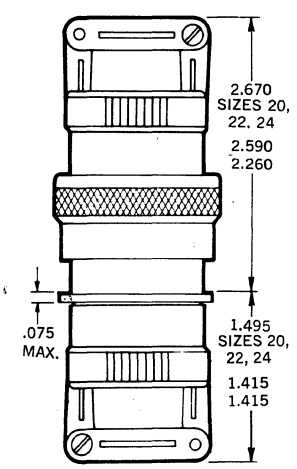
Mated Connectors Dimensions (inches)



Mated Plug and Square Flange Receptacle



Mated Plug and Square Flange Receptacle with Cable Supports

Grounding Fingers

Shell-to-shell grounding is established by beryllium spring fingers permanently fixed to the series 2 receptacle shell and the series 1 plug shell. These spring fingers are spaced 16 to the inch (exception: fingers omitted in keyways of series 2 receptacles). Grounding fingers make contact .090 prior to contact engagement.

Hardware Availability: Straight cable clamps, dummy receptacles, caps and chain assemblies & "J" type adapters are available for all shell sizes.

Tools for contact crimping, insertion and removal are available.

†Consult factory for availability.

High density points the way to the standard connector family for the next decade.

Shown are the high density insert arrangements now tooled for MIL-C-81511 Astro/348 connectors. This picture of availability illustrates the growth of Amphenol's new standard connector family. Comparisons are invited against other Military Standard connector lines through all contact sizes for engineering design, density of contacts, and cost per circuit.

How to order:

ASTRO/348 CONNECTORS

To get the specific Astro/348 connector you want, put together the part number as per the following example.

348 - 4 0 E 18 - 85 S 1 (200)

SERIES DESIGNATION

TYPE†
4-MIL-C-81511 — Series 2 (50% No-Scroop)
3-MIL-C-81511 — Series 1 (100% No-Scoop)

SHELL STYLE
0—Square Flange Receptacle
1—Cable Receptacle
3—Single Hole Mtg. Receptacle
5—Solder Flange Receptacle (Hermetic only)
6—Straight Plug

CLASS
E—Environmental
H—Hermetic

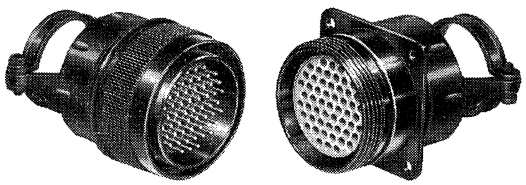
MINIATURE CIRCULAR CONNECTORS

BUNKER RAMO AMPHENOL

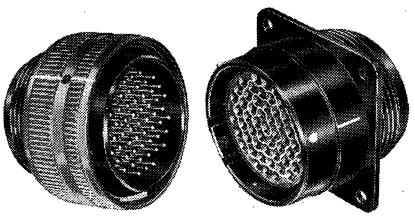
48 Series High-Reliability, Environment-Resistant Connectors

MIL-C-26500 PERFORMANCE

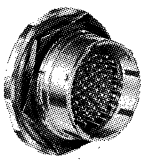


48 Series Regular

MIL-C-38300 PERFORMANCE



48 Series Ultra-Mate®



Hermetically Sealed Receptacle

SIGNIFICANT ADVANCE IN STATE-OF-THE-ART

On the ground or in space, wherever there is a requirement for superior environmental protection, high reliability, and minimum weight and bulk, 48 Series miniature environment-resistant connectors are the answer.

In developing this series, Amphenol faced the problem of satisfying reliability, logistics, and present and anticipated environmental requirements for connector usage. To solve the problem, Amphenol had to generate advanced design concepts, formulate materials specifically for connector usage, and work out new production techniques. The resulting connectors exceed the stringent requirements of MIL-C-26500 (USAF) and MIL-C-38300 (USAF) for performance and reliability.

FULL PERFORMANCE IN EXTREME ENVIRONMENTS

Advance materials technology and complete environmental sealing enable these remarkable connectors to:

- Operate continuously at 200°C (392°F)
- Withstand thermal shock cycling from −55°C (−67°F) to 260°C (500°F)
- Support 1500V RMS from sea level to 350,000 ft., mated
- Maintain environmental and electrical integrity during and after 0 to 2000 CPS vibration during exposure to 200°C (392°F) and −55°C (−67°F)
- Withstand physical shock of 100 gravity units
- Resist corrosion, ozone, sand and dust

ULTRA-MATE CLOSED ENTRY AND FRONT SERVICING

Ultra-Mate connectors are identical to the other connectors in the 48 Series, but the socket inserts have a hard face of glass-filled epoxy. They are the first to combine the positive reliability of closed entry with the speed and convenience of front servicing. In addition, the MIL-C-26636 contacts are tamper proof. Wrong-size contacts or oversize test prods cannot be inserted in the hard dielectric contact entryways on

OUTSTANDING DESIGN FEATURES

Complete Environmental Sealing — 48 Series connectors are fully sealed against extreme environmental conditions.

Amphenol-developed, silicone rubber dielectric provides resilience and unsurpassed resistance to tear, compression set, fluids and high temperatures.

When the connectors are mated, insert faces compress to form a resilient dielectric seal around each individual contact. A continuous barrier on the periphery of the socket insert mates with a recess around the pin insert to form an additional compression seal. A dynamic "O" ring seal between mated shells constitutes still another barrier to dirt and moisture, and protects the integrity of the face seals. Together with monoblock construction, this puts void-free, continuous dielectric around each contact through the entire connector length.

Monoblock construction, with bonded interfaces between the dielectric components (insert, anti-deflection disc, and grommet) eliminates air voids and protects connectors from degrading moisture and altitude conditions. A pressurizing seal around each contact at the major O.D. prevents the passage of air or moisture through the contact hole, and triple sealing riser design at each wire hole in the grommet seals each individual wire.

Go/No-Go Reliability — When an Ultra-Mate connector is mated, you can be sure there is proper contact. The socket contacts are closely surrounded by hard dielectric with a chamfered entry to guide in the pins accurately. However, if the pins are bent, the hard dielectric presents a closed entry and prevents mating.

Light Weight and High Contact Density — Connector shells are impact-extruded aluminum forgings with a high strength-to-weight ratio. The insert arrangement is designed for the maximum number of contacts within the area available.

Poke-Home Contacts — Poke-home contacts (front release, rear insertable) provide for easy servicing of connector circuits without disassembling the connector from its mounting, or disturbing adjacent contacts. MIL-C-26636 contacts are crimped quickly, consistently, and reliably with either hand or power tools. They have high electrical conductivity, present a smooth configuration, and completely protect electrical contact pressure-members from environmental and handling damage. The contacts come in sizes 20, 16, 12 and shielded, with rhodium-over-silver plating. (Other platings such as gold are available; write factory for details.)

How to Order:

Amphenol Numbers

To get the specific 48 Series connector you want, put together the part number as per the following typical example.

48 – 0 6 R 22 – 55 P 6 – (102)

SERIES DESIGNATION	COUPLING TYPE	SHELL STYLE	ENVIRONMENTAL CLASS	SHELL SIZE	NUMBER OF CONTACTS	CONTACT STYLE	Alternate Shell Positions	DEVIATIONS
48—	0—Threaded 1—Bayonet	0—Square Flange Receptacle 3—Single Hole Mounting Receptacle ¶ 5—Solder Flange Mounting Receptacle (Hermetic only) ¶ 6—Straight Plug	R—Meets MIL-C-26500 (USAF) Hard Socket Insert *C—Meets MIL-C-38300 (USAF)* H—Hermetically Sealed ¶ G—Grounding F—Fluid Resistant	8, 10, 12, 14, 16, 18, 20, 22, 24	2, 3, 4, 5, 7, 8, 10, 11, 12, 14, 15, 16, 19, 24, 25, 28, 31, 32, 39, 41, 43, 55, 57, or 61	P—Pin S—Socket	6, 7, 8, 9, 10 as per table on page 5	(100) Connector for Potting (102) Connector Less Cable Support (105) Connector Less Contacts (106) Connector Less Contacts and Less Cable Support (108) Hermetic Receptacle with Solder Cup Contact (135) Gold Iridite Finish on Shell — 48-XXGXX-XX(135) *(145) MIL-C-38300 Resilient Insert "P" contact only

See Table of available inserts
¶Hermetics are available in receptacle shell style "X3" (MS24265) and "X5" (MS27034).
*The 48 Series part numbers for Ultra-Mate connectors (MIL-C-38300) are 48-XXCXX-XXSX and 48-XXRXX-XXPX(145). MIL-C-38300 connectors are furnished without cable clamp. If a cable support is desired, it must be ordered separately.

Military Standard Part Numbers

You can use MS as well as Amphenol part numbers in ordering 48 Series connectors. The MS part numbers for MIL-C-26500 connectors are worked out on the basis shown in the table below. Whether you order by the MS or the 48 Series number, all qualified connectors are shipped with the MS marking.

The part numbers for MIL-C-38300 connectors start off with the identification M38300/ and take the form M38300/XXXX-XX. To determine the specific M numbers, refer to military specification MIL-C-38300.

¶Hermetics are available in receptacle shell style (MS24265) and (MS27034).
†Contact nearest Amphenol sales office for availability.

Poke-Home Contacts and Tool Applications

CONTACTS — When you order 48 Series connectors with contacts, the contact package contains enough contacts to complete the insert arrangement and have at least 2 spares left. The package also includes enough sealing plugs for at least 15% of the contacts in the insert, in any case a minimum of 3 sealing plugs. To provide proper sealing, insert unwired contacts and sealing plugs in all unused holes. (Use a #12 contact for a #1 shielded hole.) To order contacts and sealing plugs separately use the part numbers in the table below. Contacts may also be ordered in reels for use with automatic crimping tools.

TOOLS — Note that various tools are available for crimping, inserting, and removing each size contact.

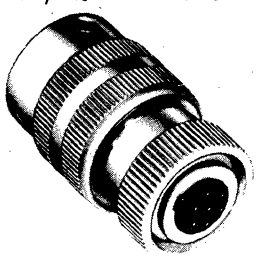
STANDARD CIRCULAR CONNECTORS

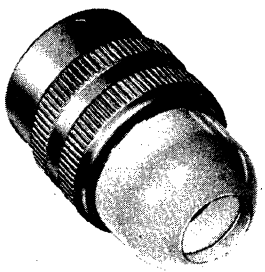
BUNKER RAMO AMPHENOL

67 Series MinniE® Environment Resistant Connectors

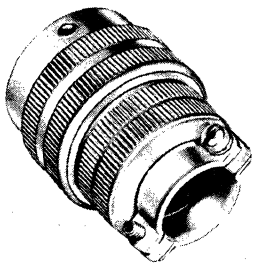
Miniature, Quick-Disconnect, Bayonet-Lock Connectors



E
With unitized grommet for individual use seal



P
Includes potting mold



C
Vise action with two screw strain relief

Environmentally Sealed

- Choice of unitized back end grommet or provision for potting. Both exceed moisture resistance requirements of MIL-C-5015.
- Face seal gasket has individual barriers to isolate each contact.
- No derating for altitude is required up to 70,000 feet if the sealed connectors are mated.
- Sealed connectors take 1500 V RMS at 70,000 feet.
- Vibration resistance per Method 204, MIL-STD-202A is 10 to 2,000 cps at 20 G's.
- Temperature cycling range per MIL-C-5015 is −67°F to
- +257°F.

Lightweight and Convenient

- Flattened incline angle of bayonet slots makes mating easier.
- Clamp and grommet combine to form a unitized seal for ease of assembly and maintenance.
- Connectors convert easily from E style to P style and vice versa.
- Yellow ring on receptacle shell gives visual indication of connector engagement.
- Weight is about half that of standard connectors with same number of contacts.
- Eighteen different insert configurations are available.
- Alternate insert positions are available.

Efficient and Long-Lasting

- Spring-loaded coupling ring provides positive locking action in bayonet slot and a constant compensating force to counteract compression set of resilient face seal.
- Stainless steel bayonet slots and pins reduce wear and friction. Three-pin bayonet coupling minimizes rocking action of the mated plug and receptacle.
- Hooded female contacts resist test prod damage.
- Hard insert dielectric and resilient face seal on pin inserts positively retain contacts so there is no possibility of their being pushed out of the insert.

Hermetically Sealed

Hermetically sealed 67 Series connectors are available in two shell styles — hex nut mounted receptacles. Each shell style is available in 11 different insert configurations with up to 48 contacts.

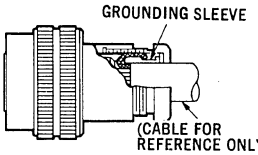
Shielded contact: 7.5 amps.

All inserts listed here are available for all shell styles and classes except hermetics. Inserts available in hermetically sealed receptacles are indicated by an asterisk. (The first two digits of the insert number show the shell size; the 3rd and 4th digits are a code for the insert configuration.)

R.F.I. Shielded Connectors



Special internal hardware enables these 67-06J style connectors to have the braid of a shielded cable terminated within the connector backshell. Alodine plated per Amphenol Specification 617 Type "C", the shell has a conductive finish and acts as a continuation of the cable braid.

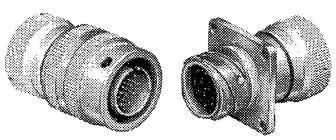
The following R.F.I. Shielded connectors are now in production:

67-5009 Size 18 shell with 24 #20 pin contacts
67-5011 Size 20 shell with 37 #20 pin contacts

These two connectors are also available with crimp Poke-Home contacts in the same insert configurations.

The mating receptacles are standard except for the Alodine finish. This can be obtained by ordering deviation (113). For other 67 Series connectors with R.F.I. shielding, consult factory.

67-906 and 67-907 Poke-Home MinniE Connectors



Removable Poke-Home crimp contacts are available in the 67-906 receptacle and 67-907 plug. They use standard 67 Series hardware (67-00E receptacle 67-06E plug, size 14) to take 12 #20 contacts and oversize contact pockets to accept larger diameter wire. The front insert is neoprene and the contact retention disc is nylon.

SUBMINIATURE CONNECTORS

BUNKER RAMO AMPHENOL

115 Series Multi-Purpose Subminiature Connectors

Whenever lightweight, rugged, high-reliability connectors are needed to withstand very high temperatures, severe vibration and corrosion, 115 Series subminiatures are the connectors to consider.

Tiny and Tough Standard Version

Designed to stand up under grueling conditions, 115 Series 2- and 4-contact connectors are subminiature in size but "big" in performance. Most of the connectors in this series weigh less than ½ ounce and, when mated, are less than 1¼ inch long. Yet their current rating is 7.5 amps and their voltage rating is 1500 V (RMS). In the standard version, they have an operating range of −65°F to 500°F.

Fuel-resistant Viton "B" face seals, flame-retardant diallyl phthalate inserts, and corrosion-resistant rhodium over silver plated contacts enable these connectors to work well even under adverse conditions. When hermetic sealing is required use the 115-5040 receptacle. When waterproofing is necessary, any of the 115 Series subminiature connectors can be potted.

Pin contacts are molded in, and socket contacts are held in place with "C" washers. The inserts are held in the shells by spinning and/or bonding. Alternate insert positions are available.

The 115-5050 plug features a foolproof coupling ring locking mechanism that keeps the connector fully mated even under extreme vibration. It also features contacts which can be quickly crimped with the MS 3191 tool, Amphenol No. 294-1166 with special positioners. Insertion and removal tools are not needed for the contacts.

1000°F High-Temperature Version

In addition to the many advantages offered by the standard version, the 115 Series high-temperature version provides for exceptionally high ranges of temperature. With stainless steel shells, contacts and hardware and with inserts of Amphenol ceramic, 115 Series high-temperature plugs serve excellently in temperatures up to 1000°F or more.

A Representative Selection of Connector Availability

Consult factory for particular applications

115-5061 Plug	.562 Hex. x 1.300	115-5037	Like 115-5059-1 but smaller & lighter.

STANDARD CIRCULAR CONNECTORS

BUNKER RAMO AMPHENOL

165 Series Miniature MS-Type Connectors

COMPACT AND CONVENIENT

Connectors in the 165 Series are only about one-third the size and weight of standard MS connectors with the same number of contacts.

Bayonet coupling provides quick disconnect.

WIDELY APPLICABLE

Eight different insert configurations and five different shell styles in two sizes — large and small — provide enough variations for a wide range of applications.

Plugs and cable receptacles are available with either a built-in cable clamp to provide positive strain relief or with provision for potting. On all connectors, alternate insert positions are available for gang mounting.

WEATHERPROOF AND PRESSURE PROOF

When mated, 165 Series connectors are pressure proof and completely waterproof. The connectors using female inserts feature a sandwich construction with the insert spun into a cartridge; the connectors are factory sealed to prevent leakage. O-ring seals are used in both plugs and receptacles. They meet the exacting pressure seal requirements of MIL-C-5015, Class C construction.

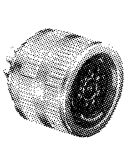
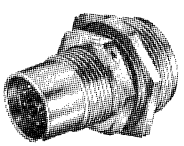
Connectors with Shielded Contact and Ground Shield

- Important in aircraft and instrumentation applications, for example, fuel gaging.
- Shield continuity was recently upgraded by additon of heat treated beryllium copper finger pressure members to the socket shield.
- Available in a number of shell styles, including potting construction plug and cable receptacle, plugs with spring-loaded coupling ring, and square flange receptacle.
- Available also in combination of environmentally sealed and cable clamp construction.
- Two different insert configurations

  Eight #20 contacts, 1 shielded contact

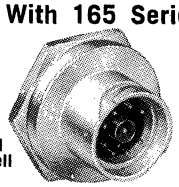
  Nineteen #20 contacts, 1 shielded contact



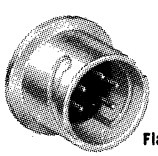


182 Series Hermetic Miniature MS-Type Connectors

Mate With 165 Series



Type 2 Threaded Back Shell



Type 1 Solder Flange Shell

HIGHLY RELIABLE

The 182 Series features a rugged compression seal which is extremely strong and highly resistant to thermal shock; it also has very high insulation resistance. To assure strictest adherence to requirements, 182 Series receptacles are tested by mass spectrometer at the maximum sensitivity of the instrument.

WIDELY APPLICABLE

Like 165 Series connectors, 182 Series receptacles come in two sizes — large and small — and are available in most 165 Series insert configurations. There are two shell styles — Type I, Solder Flange, and Type II, Threaded Back Shell, with and without O ring. There are two types of contacts available: solder pocket, and flat and pierced. Alternate insert positions (shown at right) allow for gang mounting.

THERMOCOUPLE CONTACTS (FOR BOTH 165 AND 182 SERIES)

Special Thermocouple contact inserts are available for use in 165 and 182 Series connectors. Consult your Amphenol Sales Representative for any you may require.

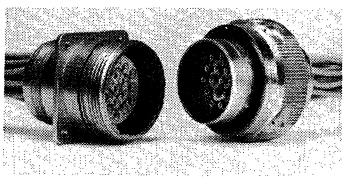
ENVIRONMENTAL RESISTANT CONNECTORS

BUNKER RAMO **AMPHENOL**

Super270® A NEW generation electrical connector

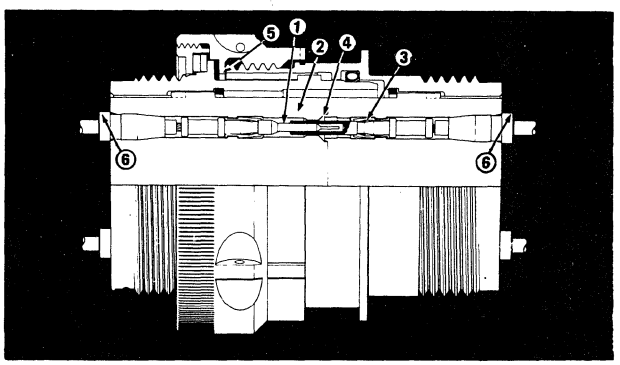


Amphenol's 270 Series radically deviates from conventional design concepts. This connector is able to withstand temperatures from −65°F to 500°F, remain environmentally sealed at the connector mating interface and wire sealing areas, and is impervious to jet fuels, oil, and solvent used in aircraft.

This performance is achieved by using new materials, new monoblock inserts with no bonded interfaces along the entire length of the contacts, and a new method of rear wire sealing.

The polymer molding compound is unaffected when subjected to 500°F constant temperature, is fungus resistant, and with regard to fire resistance is self-extinguishing.

Size 20 contacts are machined from high strength chromium copper, while the larger size contacts are leaded copper. The contact bodies are rhodium plated to withstand the temperatures. Shells are impact extruded 2014-T6 Aluminum Alloy with tensile strength between 400°F and 500°F. The gold anodized finish resists corrosion and is light weight. Wire seals and shell seal are made of a teflon material which maintains environmental integrity at 500°F.



1. SHROUDED PIN CONTACTS: eliminates pin bending in small diameter contacts.

2. NO SCOOP CAPABILITIES: socket contacts and pin insert face are recessed.

3. CONTACT RETENTION CLIP: shrouded within a hard dielectric precludes overstressing during removal cycle & eliminates misalignment.

4. LEAD-IN CHAMFER: positive contact alignment. Contacts misaligned as much as .039 inch from true position can be mated.

5. METAL-TO-METAL BOTTOMING: when the connectors are in a mated condition. Interfacial compression is provided by an assist spring. Prevents degradation to the connector.

6. WIRE SEALS: assembled and locked in place individually allowing contact servicing without disturbing adjacent contacts or wire seals.

7. SELF LOCKING COUPLING RING DESIGN: The connector plug can be supplied with a threaded coupling ring which incorporates a locking device. Intended to eliminate the use of safety wiring.

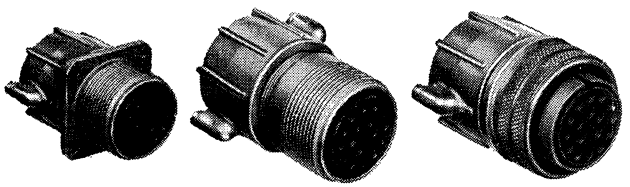
STANDARD CIRCULAR CONNECTORS

BUNKER RAMO AMPHENOL

69 Series Connectors
R Type, Poke-Home Contacts



69-0R 69-1R 69-6R

The Ideal Environmental Connectors for Industrial and Commercial Applications

Of exclusive Amphenol design, these connectors offer all the lightweight, environment-resistant features of MIL-C-5015, Class R, plus the exceptional versatility of Poke-Home contacts. These connectors are interchangeable and intermatable with standard MS types.

Quick, Reliable, Versatile Poke-Home Contacts

With AMPHENOL-developed Poke-Home contacts, assembly is simple, quick, and reliable — up to 4 times as fast as soldering with far more consistent reliability. Connector installation is far easier, too, especially in tight spots, because contact terminations can be made where convenient, then the wired contacts inserted in the connector. Circuit rearrangement or repair is exceptionally convenient because only contacts affected need to be removed — not the connector. And all that is needed for removal and insertion is a simple tool.

Outstanding Environmental Resistance

Altitude-Immersion — 69 Series connectors surpass requirements of MIL-C-5015. After being entirely immersed in water and altitude-cycled to 70,000 feet for 30 minutes, they meet MIL-C-5015 dielectric withstanding voltages while still in water, and have a minimum insulation resistance of 100 megohms.

Moisture Resistance — Under 20-day moisture condensation testing per Class "R" procedure of MIL-C-5015, 69 Series connectors meet every test requirement; insulation resistance at conclusion of test is 100 megohms minimum.

Corrosion Resistance — Resistant to Salt spray per MIL-STD-202, Method 101, Condition B.

Sand and Dust Resistance — 69 Series connectors perform reliably after exposure to sand and dust velocities of 200 feet per minute for 6 hours per MIL-E-5772, Condition B.

Fluid Immersion — Unmated 69 Series connectors meet all MIL-C-5015 requirements after immersion in hydraulic fluid and aviation oil for 20 hours.

All-Around Reliability — In all other mechanical and electrical features such as durability, resistance to shock and vibration, temperature range, voltage ratings, insulation resistance and other requirements, 69 Series connectors fully conform to the "R" requirements of MIL-C-5015.

Dimensions (inches)

To order a 69 Series wall receptacle wtihout a cable clamp put the prefix 69-0R in front of the desired insert number and the suffix (100) after it. For example, 69-0R12S-35(100). To get the same insert in a cable receptacle without a cable clamp, use the prefix 69-1R instead of 69-0R and order 69-1R12S-35(100). To get the same insert in a straight plug without cable clamp, use the prefix 69-6R. To order the same inserts in a shell with a cable clamp, use the suffix (317) instead of (100).

How to Order: To get the specific 69 Series connector you want, put together the part number as per the following example.

69 6R 16S-8 S Y (100)

SERIES NUMBER	SHELL TYPE 0R—Wall Receptacle 1R—Cable Receptacle 6R—Straight Plug	INSERT NUMBER Same as MS	CONTACT Same as MS	ALTERNATE INSERT POSITION Same as MS	(100)—Complete with contacts (101)—Connector less contacts (137)—With cable clamp and contacts (138)—With cable clamp less contacts

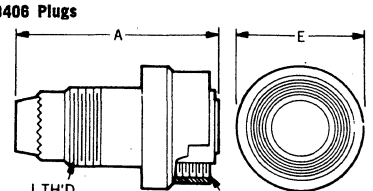
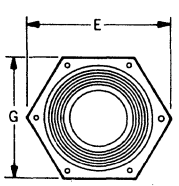
Class K, R, T and D

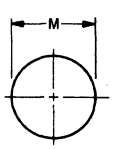
3406 Plugs



Class K, R, T and D



Class K



PANEL CUT-OUT

How to Order:

To get the specific connector you want, put together the part number as per the following example. For the military part number, use the letters MS as the series designation. For the Amphenol part number, use 208, 238, or 246 as applicable.

246 - 3406 R 28 - 21 P W 101

SERIES
MS—Military Standard
246—General Purpose Environmental
238—2000° Flame Resistant
208—High Temperature Fluid Resistant

SHELL STYLE
3400—Wall Receptacle
3401—Cable Receptacle*
3402—Box Mounting Receptacle*†
3406—Straight Plug

CLASS
R—General Purpose Environmental (MS or 246 only)
K—2000°F Flame and Fluid Resistant (MS or 238 only)
T—High Temperature 200°C (208 or 238 only)
D—High Temperature 175°C Fluid Resistant (208 only)

DEVIATIONS
101—Connector less contacts

INSERT POSITION
Blank for normal position MIL-C-5015E

CONTACT TYPE
P—Pin S—Socket

INSERT CONFIGURATION
Per MIL-C-5015E
See above for available inserts.

Note: Cable clamps and accessory hardware are ordered separately or by Amphenol deviation.
*Not available in 238 Series Class K. †Contact factory for availability.

NOMENCLATURE

The MS prefix (for example, MS3100) in a connector part number indicates an approved connector under the curent military specification, MIL-C-5015.

A 97 prefix indicates that the connector is an exclusive Amphenol design of A or B construction, probably a connector with special purpose contacts and a variation from MS requirements or one for which no MS part number has yet been assigned.

The 246 or 69 are intermateable and interchangeable with standard MS types and offer improved "R" performance over MIL-C-5015 requirements.

Interchangeability of MS and AN Connectors. In accordance with MIL-C-5015, "Connectors bearing an MS part number may replace an AN marked connector of any modification marking if all other identifying symbols are identical." However, if a contract requires use of connectors with the formerly approved AN marking, they are still available from Amphenol.

FINISHES

The standard finish is cadmium plate with olive drab chromate conversion coating. This finish has excellent conductivity.

Shell finish 639 is a clear cadmium plate and is ideal for commercial applications.

INSERTS

The dielectric material used in inserts for A and B constructions is diallyl phthalate. It has near perfect dimensional stability, high arc resistance, and maintains high insulation resistance under both humidity and thermal stress.

Insert material in R construction connectors is MIL approved neoprene. This resilient insert material provides an environmentally sealed connector that exceeds MIL-C-5015 performance.

CONTACTS

Standard — MS contacts under MIL-C-5015 are silver plated and have pretinned solder pockets. Amphenol also offers as optional a superior gold plating process for MS contacts.

How to Order:

EXAMPLE: To get a straight plug with 35 contacts in a size 28 shell with black anodized finish and contacts to accept taper pins, order 97-3106A 28-15S(432) (608).

See page 18 for E & R constructions.

MS 3101 A 28-21 S Y (847) (639)

SERIES NUMBER
MS—Military Standard for A, B, E, & R construction
97 Like MS, but AMPHENOL exclusive design for A & B construction

SHELL TYPE
3100—Wall Receptacle
3101—Cable Receptacle
3102—Box Receptacle
3106—Straight Plug
3107—Quick Disconnect Plug
3108—Angle Plug

SHELL CONSTRUCTION
A—Solid
B—Split
R—Environment resistant
E—Environment resistant
Omitted in ordering construction for potting.

INSERT NUMBER — Consists of

SHELL SIZE
8S, 10SL, 12S, 12, 14S, 14, 16S, 16, 18, 20, 22, 24, 28, 32, 36, 40,
(Size is "A" thread in 16ths)

CONFIGURATIONS
Code numbers (from 1 up) for insert configurations.
Note: Code numbers are specific for each shell size. The same code number represents different configurations in different shell sizes.

SHELL FINISH
Omit for standard finish
(604)—Anodized with bichromate seal
(608)—Black anodized
(639)—Clear cadmium plate

DEVIATION FROM STANDARD
Omit this suffix if standard construction desired
(02) —High -temperature silicone compound } **Insert Materials**
(04) —High-temperature phoenolic (400°F) } **Insert Materials**
(23) —High-temperature silicone compound } **Insert Materials**
(115)—Small Flange Receptacle
(231)—Small Flange Receptacle, pressurized
(258)—Connector furnished with protective caps assembled to both ends.
(288)—Connector furnished with protective cap on mating end.
(426)—Gold over silver plating on contacts.
(432)—Taper pin terminal contacts.
(438)—Construction for potting.
(496)—High temperature construction.
(847)—Contacts plated .0001" min. gold over copper, marked with date of manufacture.

ALTERNATE INSERT POSITION
Omit for standard position.
W, X, Y, or Z for alternate positions, depending on insert.

PANEL OPENING

This complete line of "E" and "R" environment resistant connectors satisfies aircraft and missile requirements as well as most applications calling for sealed components. The difference in the two types is that the "E" type has an integral MS type cable clamp as part of the connector back shell.

The "E" type meets or exceeds the "E" requirements of MIL-C-5015. Contacts and resilient inserts are factory preassembled in the shell. The integral MS type cable clamp provides extra strain relief.

The "R" type meets or exceeds both the "E" and "R" requirements of MIL-C-5015. Construction of the grommet and back shell assembly provides a great measure of wire support, eliminating the need for a cable clamp in most applications. This design also results in a size and weight reduction.

BUNKER RAMO AMPHENOL

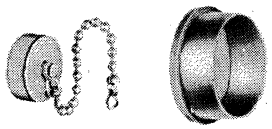
Caps - 97 Series



Two types of protective caps are available for use with MS Connectors:

Cap & Chain — For use when MS Connectors are not in use. The 9760 is made of aluminum with an olive drab chromate conversion seal and is available for either receptacles or plugs. To order the cap less chain, add the suffix G to the catalog number.

Disposable Dust Caps — Expendable polyethylene dust caps provide added protection to precision built MS Connectors during storage or shipment or completed apparatus.

Automatic Ordering — A disposable cap may be ordered with any MS Connector by adding the suffix (288) to the catalog number of the connector.

Thermocouples - 97 Series

For MS Connectors

Designed to provide a disconnect in thermocouple circuits without the introduction of dissimilar metals.

There are six thermocouple insert configurations. Each of these utilizes an equal number of iron and constantan contacts. However, any MS Connector with size 16 contacts may be ordered with any of the contacts listed at right. For ease in wiring, each thermocouple contact is color coded on the solder cup end of the contact.

Contacts	Description	Color Code
Alumel	94% Nickel, 2.5% Manganese, 2% Aluminum, 1% Silicone, .5% Iron	Orange
Constantan	45% to 60% Copper, 40% to 55% Nickel, 0 to 1.4% Manganese, .1% Iron	Red
Copper	87.5% to 90% Copper, 1.8% to 2.2% Lead, .1% Iron, .5% Nickel, .5% Normal Impurities and balance Zinc	Yellow
Iron	84.4% Iron, 2% Sulphur, .4% Silicone, 2% Carbon, 3.6% Manganese, .6% Phosphor, .1% Copper, .9% Tin	White
Chromel	90% Nickel, 10% Chromium	Green

MS Fittings Cable Clamps, Adapters

AN3057 Cable Clamp — Standard cable clamp, threads onto all MS Connectors with threaded back shell. Provides reliable sturdy support. Illustration does not show one rubber and two fiber washers which seat clamp to connector.

AUTOMATIC ORDERING — By adding deviation number (559) to the MS catalog number, the correct AN3057 cable clamp will be shipped with the MS Connector.

Basic 9767-X — Identical to AN3057 cable clamp, but the rubber washer and one of the two fiber washers are replaced with a rubber boot. Recommended for applications in which cable is subject to considerable flexing.

9767-X-X Weatherproof Cable Clamp—Same as BASIC 9767-X above with addition fo AN3055 reducing adapter. The inside of the AN3055 is tapered to the same dimensions of the front end of the rubber boot —thus providing a weatherproof seal.

AN3055 Reducing Adapter — Permits smaller cable clamps to be used with MS Connectors.

AN3420 Bushing — Rubber bushing designed specifically for MS3057A Cable Clamp. Protects wire bundle and unjacketed cable from possible damage by a cable clamp. Can also be used for a reducing bushing.

MS3057A Cable Clamp — For rubber covered cable or wires protected by tubing. Both clamping halves float so cable is always centered, affording maximum strain relief. With unjacketed cable or wire bundles without tubing, use corresponding AN3420 Bushing.

Common MS Deviations

MS Connectors are available with minor deviations from standard. Deviations are ordered by adding the deviation suffix to the MS part number. Deviation numbers always appear in parenthesis.

(288) Includes 97-121 dust cap for mating end.

(417) Plugs only, type W washer cemented.

(426) Minimum of .00002" gold over .0002/.0003" silver on contacts. Use 97 prefix instead of MS.

(432) No. 16 contact. For use with AMP No. 53 taper pin. Use 97 prefix instead of MS.

(559) AN 3057 cable clamp included with connector.

(639) Cadmium plate finish wtih clear chromate conversion seal. Use 97 prefix instead of MS.

(866) Contacts with minimum of .00002" gold over. 0002/.0003" silver with tinned solder cups.

MS Potting

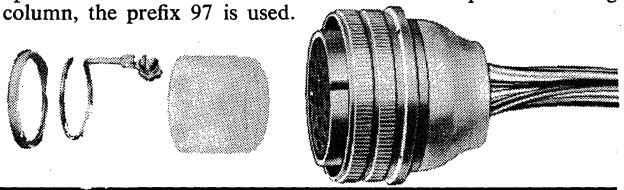
MS Connectors for potting are available in all connector styles except the MS3102. The back shell of the connector is removed and replaced with a potting mold retainer ring No. 9755-270-XX. (XX indicates connector size.) This describes the basic (438) construction.

ORDERING INFORMATION

Since the solid or split back shell is removed from the connector shell prior to potting, the A and the B is dropped from the part number of an MS potted connector.

For example: 97-3106-18-11P (596) or 97-3101-14S-4P (438)

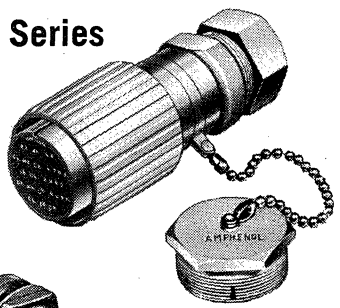
Since the potting construction does not fall under Military Specifications unless so indicated under the special marking column, the prefix 97 is used.



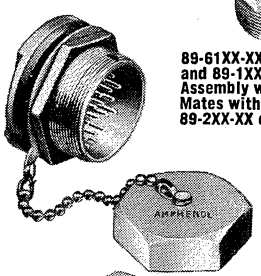
SUBMERSION-PROOF CONNECTORS

BUNKER RAMO AMPHENOL

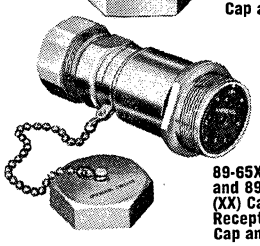
89 Series



89-61XX-XX (XX) and 89-1XX-XX (XX) Plug Assembly with Cap and Chain. Mates with 89-2XX-XX or 89-5XX-XX.



89-62XX-XX and 89-2XX-XX Panel Receptacle with Cap and Chain.



89-65XX-XX (XX) and 89-5XX-XX (XX) Cable Receptacle with Cap and Chain.

Connectors used in Ground Support Equipment must be rugged and reliable — and easy to handle under all conditions. Fully meeting these particulars, AMPHENOL's popular 89 Series GSE connectors are used in many top missile projects. In fact, nearly every basic industry around the world depends on these heavy duty connectors. The growing list includes agriculture, mining, transportation, petroleum, marine, construction, and basic metals production. In short, they're a must wherever a rugged, completely waterproof electrical connection is required.

GSE connectors are completely waterproof and provide dependable service even when submerged in mud, ice or water. An internal rubber gasket in the cable clamp adapter, a type "W" washer at the mating faces and another washer used with panel mounting receptacles provide assured protection. Shells and cable clamp adapters are machined from top quality aluminum bar stock to achieve far greater strength than is possible to obtain with die cast methods.

For rough weather handling, coupling rings are extra-long and heavily grooved. Flats are conveniently located for field-servicing with standard open-end wrenches. Caps and chains are standard on all connectors.

AMPHENOL GSE connectors are available in a large number of standard MS inserts. They are interchangeable with AN/MS connectors with the same shell size and insert arrangement. Connectors exceed the water immersion requirements of MIL-C-12520. Inserts conform to MIL-C-5015.

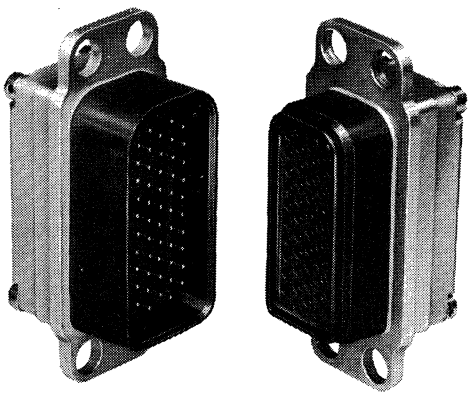
RACK AND PANEL CONNECTORS

BUNKER RAMO AMPHENOL

217 Series Miniature Environment Resistant Connectors

This connector offers AMPHENOL's Ultra-Mate® design and uses Poke-Home® contacts.



FEATURES:

- Two Versions.
  1. Both mating faces silicone rubber, Mil-C-26518
  2. Hard dielectric face on plug. Mil-C-38300
- Complete inter-mateability of both with receptacle
- Mono-block construction provides complete environmental sealing
- Cannot mate without assured electrical contact
- Lightweight, high-strength, impact-extruded aluminum shells
- Maximum number of contacts within area available
- Poke-Home contacts can be inserted or removed without disassembling connector or disturbing adjacent contacts
- Both versions have desirable front release contacts.
- Contacts can be quickly crimped with hand or power tools
- Completely protects contact pressure-members from environmental or handling damage
- Connectors are mated under tension by dual spring-loadad mounting assemblies and fixed bushings.
- Either plug or receptacle may be spring loaded
- Receptacle mounts on panel, front or rear

RECTANGULAR CONNECTORS

BUNKER RAMO AMPHENOL

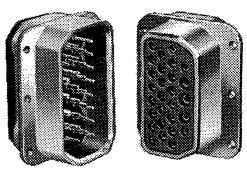
94 Series Poke-Home Rectangular Connectors

Offers both standard and/or shielded contacts

FEATURES:

- Both solder and crimp type available
- All shielded contacts are solder type
- Solder pockets recessed in dielectric body; protective sleeving unnecessary
- Female contacts are hooded
- Shells are aluminum, cadmium plated, chromate treated
- Crimp contacts are silnic bronze, gold-over-silver plating
- Solder contacts: pin are "half-hard" brass, socket are brass alloy, both gold-over-silver plating
- Hard insert, fibre filled diallyl phthalate Resilient insert, silicone rubber

Ordering Information Connectors with Both Standard and Shielded Contacts



AMPHENOL Part Number		Number of Contacts			Dimensions (Inches)

DEVIATIONS (Use no more than one suffix on any one part number)

To order crimp contacts, add the suffix -1 to the standard part number

To order connectors for use with hood and cable clamp assemblies*, add one of the following suffixes, as applicable, to the standard part number:

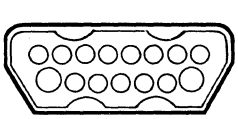
-11 With solder contacts but less hood and clamp assembly
-12 With crimp contacts but less hood and clamp assembly
-13 With solder contacts with hood and clamp assembly
-14 With crimp contacts with hood and clamp assembly
-23 With solder contacts and cable clamp mounting assembly 94-520
-24 With crimp contacts and cable clamp mounting assembly 94-520

*Note: When cable clamps are used, the center tapped hole on the flange of the connector must be drilled out.

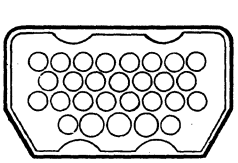
To order connectors for use with RG-195/U cable, add one of the following suffixes, as applicable, to the standard part number:

-25 Solder contacts
-26 Crimp contacts
-27 Solder contacts but less hood and cable clamp assembly
-28 Crimp contacts but less hood and cable clamp assembly
-29 Solder contacts with hood and cable clamp assembly
-30 Crimp contacts with hood and cable clamp assembly
-31 Solder contacts and cable clamp mounting assembly 94-520
-32 Crimp contacts and cable clamp mounting assembly 94-520

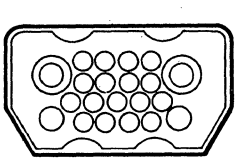
Insert Arrangements (Face View)



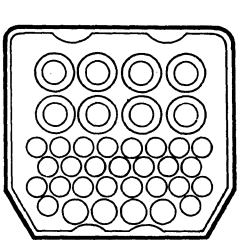
94-11320 and 94-21320



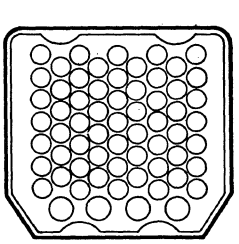
94-32530 and 94-42530



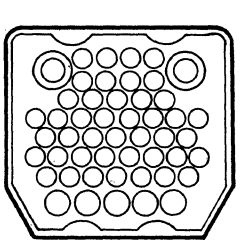
94-31722 and 94-41722



94-52548 and 94-62548



94-55940 and 94-65940



94-54352 and 94-64352

HERMETICS

Wide Variety

AMPHENOL offers 5 different series of hermetic receptacles, each with a number of receptacles of different types, sizes, and contact configurations.

High Strength Compression-Glass Seals

Glass has tremendous instrinsic strength and can take great stress if its surface weakness is counteracted. This is done by prestressing. The glass preform is put into the steel shell and the assembly heated until the glass flows. It is then cooled and, in effect, the glass is cast within the shell. However, the glass hardens first, then the metal. The metal shrinks into the glass and prestresses it. This gives the glass great strength.

Because the steel and glass have different coefficients of expansion the seal remains strong and tight over a wide temperature range. Because most AMPHENOL hermetic receptacles use a single glass insulator for all the contacts in the receptacle (instead of a separate bead for each contact), AMPHENOL hermetics are unusually strong and leak-proof. Depending on insert size and mounting, they can withstand pressures up to 500 psi or more.

Less than .01 Micron Leakage Rate

AMPHENOL guarantees less than .01 micron cubic foot leakage per hour on its 48 Series hermetic receptacles. This performance is 100 times as good as the industry standard of 1 micron cubit foot per hour. On most of its other series hermetics, AMPHENOL guarantees less than .1 micron cubic foot per hour — 10 times as good as the standard.

AMPHENOL hermetic receptacles maintain their high performance under extremes of temperature, humidity, pressure, thermal and physical shock, vibration, and corrosive atmospheres.

Immediate Delivery

AMPHENOL maintains large shelf stocks of the most popular types and sizes of hermetic receptacles and can fill most orders right away.

Hermetics available as shown

Hermetic	Mates With	No. of Shell Sizes Available	No. of Contacts Available	Insert Arrangements Available

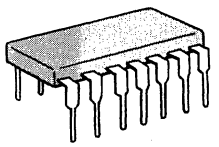
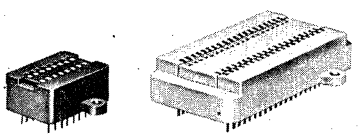
SOCKET SOLUTIONS ...PLUS!

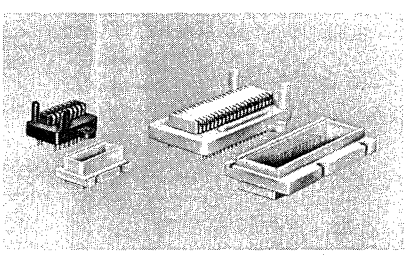
BARNES has the largest selection of sockets for I.C., MSI, LSI and Transistors in the industry... PLUS the world's most complete line of carriers / contactors and breadboards!





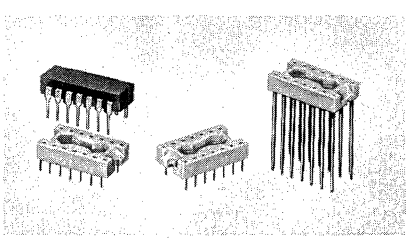
DIP SOCKETS...

For testing, aging, burn-in and breadboarding. Features easy loading, long, reliable life with no lead deformation.



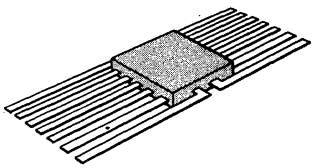
DIP CARRIERS/CONTACTORS...

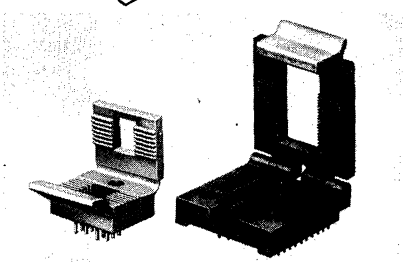
For device protection during shipment, testing and manual or automatic handling. Provides uniform geometry and polarization protection for all package sizes and types.



DIP PRODUCTION SOCKETS...

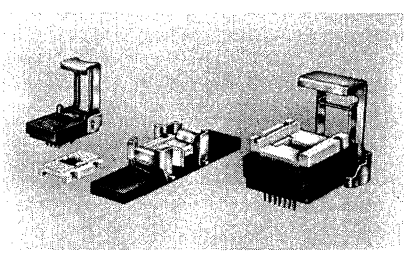
For high density production mounting of I.C.'s. Features low body profile, available in wire-wrap or solder tab terminals, temperatures to 150°C.





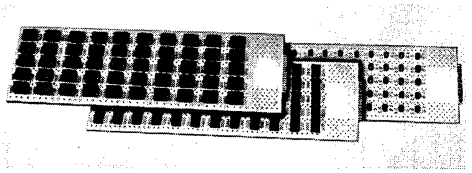
FLAT PACK SOCKETS...

For testing, aging, burn-in, breadboarding and production mounting. Features fast, one-hand loading and unloading, and positive lead separation with no deformation.



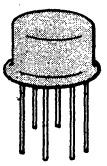
FLAT PACK CARRIERS/CONTACTORS...

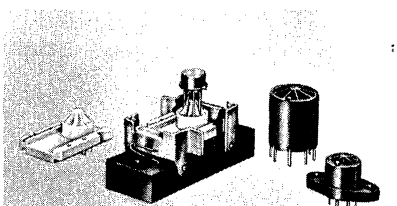
For device protection during shipment, testing and manual or automatic handling. Provides uniform geometry and polarization protection for all package sizes and types.



BREADBOARDS...

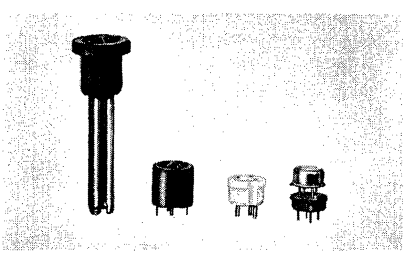
For high temperature circuit design, environmental testing, aging and burn-in for Dual-in-Line, Flat Pack and TO style I.C. packages. Available with 5 to 75 device positions per board with card receptacle edge connector.





TO SOCKETS, CARRIERS/CONTACTORS...

For testing, aging, burn-in and breadboarding ... and for device protection during shipment, testing and handling for all sizes and pin configurations.



TRANSISTOR SOCKETS...

For testing, aging, burn-in, breadboarding and production mounting. Features easy insertion, excellent electrical characteristics and low profile for high density production mounting, as well as wide temperature range capability.

For more information about socket solutions plus the world's most complete line of carriers, contactors and breadboards, write for a comprehensive BARNES catalog.

barnes CORPORATION

LANSDOWNE, PA. 19050 ■ 215/MA 2-1525
TWX: 510/669-9977

BARNES' complete line also includes Spring Sockets, Op-Amp Sockets, Modular Test Sockets, Relay Sockets, TH-037 Test Handler Series, Universal Mating Connector System

BERG ELECTRONICS, INC.

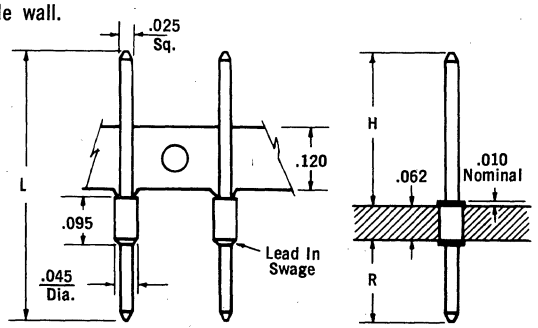
.025" SQUARE POSTS FOR DISCONNECT AND WIRE-WRAPPING APPLICATIONS

BergPost™ .025" SQ. PIN AND FERRULE ASSEMBLIES

The BergPost system provides a fast, reliable method for setting .025" square pins in circuitboards.

BergPost .025" square posts are designed for staking in .049" ± .002" holes spaced .100" by .100" minimum grid. The BergPost itself is a solder-bonded pin and ferrule assembly manufactured from rolled, square wire with four smooth, flat sides. They are ideal for wire-wrapping because perpendicularity, corner radii and post's end shape are within usually recommended specifications.

BergPost ferrules are designed for staking in 1/16" board. They are smoothly tapered to pass through pre-drilled circuit boards without damaging the board or its foil on either side. The ferrule expands into the hole wall when staked to securely retain post without damage to hole wall.



MATERIALS: Post: rolled phosphor bronze, ¾ hard. Ferrule and Carrying Strip: Pre-solder coated brass.

PART NUMBERS: for BergPost assemblies 12,500 per reel.

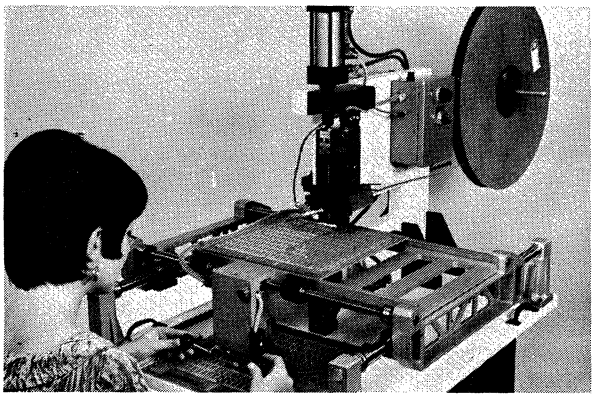
FLIP-DIP™ IC Mounting

BergPost assemblies can be used in a variety of specialized configurations for IC mounting. The FLIP-DIP™ method is a low-cost interconnection with free access to IC legs for soldering and wrapped-wire terminations. **For complete details and specifications contact your local Berg Sales Engineer or request catalog section #105.**



BergPost pantograph machine stakes up to 3,500 posts per hour. A numerically-controlled version inserts and stakes up to 10,000 per hour.

BergPin™ ALTERNATE DESIGN ALLOWS GREATER CIRCUIT PATH AREA BETWEEN HOLES....

The BergPin terminals require only .032" ± .003" holes on .100" centers for applications that preclude drilling the .049" hole needed for BergPost assemblies. The .025" square pins are held in plain brass ferrules on a reeled carrier strip.

The pins have a star-like deformation near the bottom. When the BergPin staker removes a pin from its ferrule and inserts it into a circuitboard, the rays of the star bite into the board and retain the pin. Subsequent flow soldering completes the electrical and mechanical bond. High-rate staking machines and tooling produce the same high quality of pin alignment and perpendicularity as with the BergPost design.

CRIMP-TO-WIRE RECEPTACLE TO MATE WITH .025" SQUARE POSTS

BERG Pv™ and Mini-Pv RECEPTACLES FEATURE DUAL-METAL DESIGN

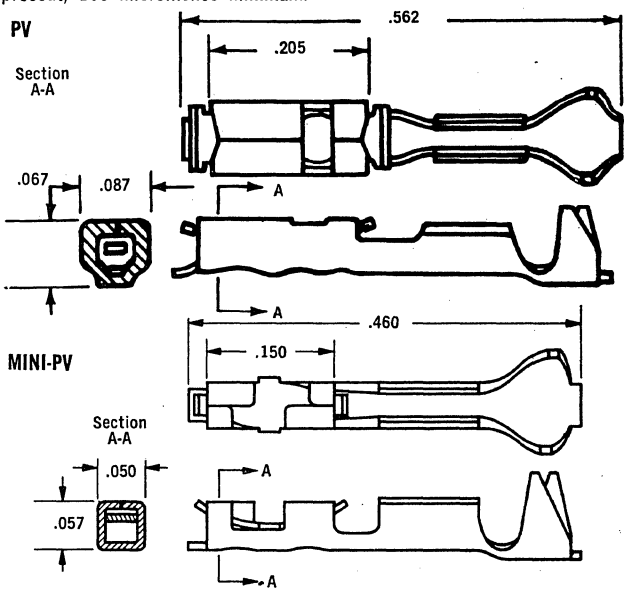
BERG PV RECEPTACLE

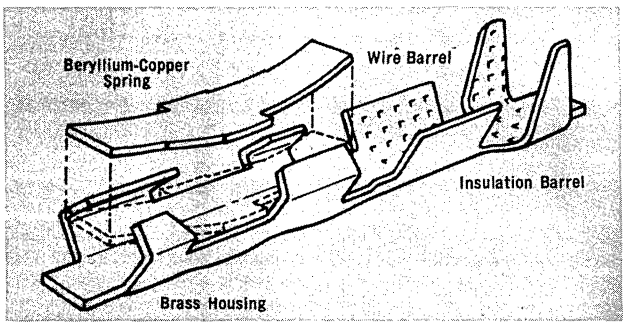
Two-part design of a disconnect for .025" sq. posts eliminates compromises in materials selection to provide optimum physical and electrical properties. Separate spring element applies a repeatable normal force to the male post for maximum multiple-cycle life. For .125" grid or greater.

MINI-PV RECEPTACLE

This smaller version of the PV is designed for interconnection with .025" sq. posts on .100" grid spacing. The Mini-PV receptacle is of similar two-piece design for lasting retention after repeated disconnects.

Choice of BERGgold gold plating, 40 or 75 microinches thick over 50 microinches nickel plating, or BERGflo 60-40 electro-deposited solder precoat, 100 microinches minimum.





APPLICATION TOOLING

Sturdy hand tool duplicates the quality of crimp obtained with the bench machine. The tool features a positive ratchet that does not release until full crimping pressure is applied to a terminal.

Bench machine rate: 1500 terminations per hour.

Note: A stackable version of the Mini-Pv is available for terminating two connectors to a single post.

For complete details and specifications contact your local Berg Sales Engineer or request catalog sections #101 and #102.

BERG ELECTRONICS, INC.

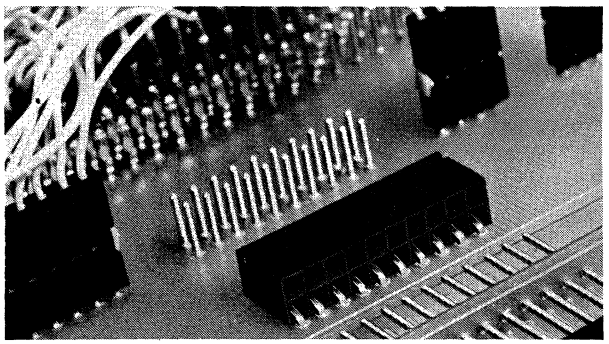
CARD CONNECTORS AND MULTIPLE CONTACT HOUSINGS FOR .025" SQUARE POSTS

BERG Pv™ Card Connectors

MATE WITH .025" SQ. POSTS ON .100" OR .150" GRID

The PV Card Connector features low contact resistance, high-retention qualities, and exceptional cycle life. Adaptable to both horizontal and vertical mounting, these connectors utilize the same dual-metal contact design used in Berg PV terminals.

Berg Card Connectors are available in single- or double-row configurations. For example, the Card Connector for .100" spacing accepts 8 through 55 terminations in a single-row mounting or up to 110 in double-row. Housings for .150" accept 8 through 40 terminations in a single row or 16 through 80 in double-row.



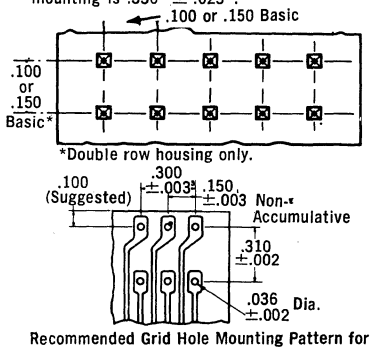
CONNECTOR ASSEMBLIES

All BergPost pins on true center of basic dimension within .012" dia.

1. Card connector to mate to .025" ± .001" square or round BergPost pins.
2. Suggested BergPost pin length for card connector mounting is .330" ± .025".

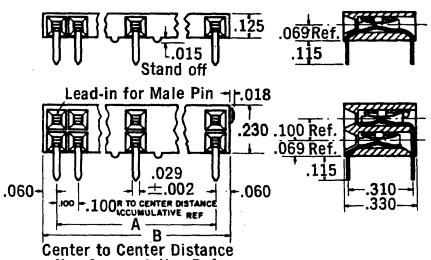
MATERIALS

Housing—Choice of Diallyl Phthalate (Green) or Phenolic (Black). Terminal body—¼-hard brass, plated 40 micro-inches gold over nickel. Terminal spring—Beryllium copper #25, heat-treated and gold-plated.



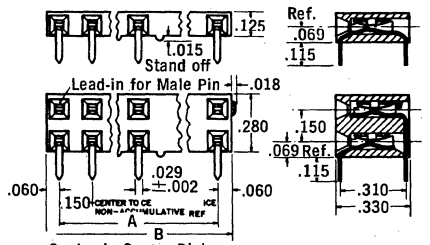
Recommended Grid Hole Mounting Pattern for PC Boards

CONNECTOR SPACING — .100" SPACING



Center to Center Distance Non-Accumulative Ref.

CONNECTOR ASSEMBLIES — .150" SPACING



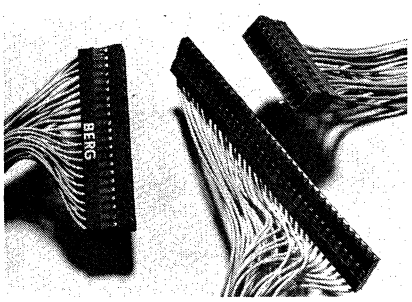
Center to Center Distance Non-Accumulative Ref.

For complete details and specifications contact your local Berg Sales Engineer or request catalog section #112.

BERG Latch Housings MATE WITH .025" SQUARE POSTS

For Mini-PV connections, Berg offers a specialized latch housing. This connector allows simultaneous termination of as many as 72 Mini-PV terminated conductors and is available in customized versions upon request. The latch housing features a lock-tab terminal-retaining device which permits easy loading and provides positive retention of terminal in housing. Available in single- or double-row configurations for .100" center-to-center spacing.

Additional designs are available for mating BergPost terminals on .125" and .150" grids with Mini-PV and PV receptacles.



For complete details and specifications contact your local Berg Sales Engineer or request catalog sections #101 and #102.

SPECIAL CONNECTORS FOR SHIELDED AND UNSHIELDED, ROUND CONDUCTOR CABLES

Berg supplies terminated flat cable assemblies using PV or Mini-PV receptacles and precision molded housings. Berg's automated stripping and crimping equipment is designed for shielded cable with conductor spacing of .050", .100" and .125". Unshielded, round-wire flat cables with conductor spacing of .050", .075", .100" and .125" are also being terminated.

Cable assemblies can be supplied to customer specifications, or where volume warrants, Berg can give OEM's their own in-house cable capability.

BERG ELECTRONICS, INC.

MODULAR INTERCONNECTION OF CIRCUIT BOARDS, LOGIC CARDS, SUBSTRATES, ETC.

BergLok™ MODULAR INTERCONNECTION BLOCKS

A simple, reliable way to mount replaceable daughter-board modules in electronic assemblies.

BergLok Connector Blocks provide a vertical mounting system for logic cards, ceramic substrates, printed circuit cards, and the like. They give you complete "pluggability" of modules using any conventional PC board, 1/16" thick.

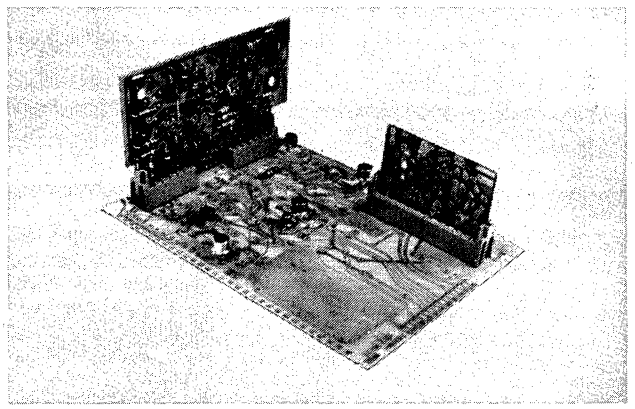
BergLok Connector Blocks can be mounted in any position on the mother board, permitting maximum flexibility in design and assembly. They resist impact, shock, vibration — without need for supplementary support devices.

A. Spring contacts with solder tab or wire-wrapping tails are supplied pre-assembled in blocks. Crimp-to-wire contacts and semi-automatic crimping machines can be supplied for customer assembly.

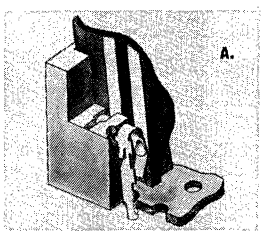
B. Blocks have snap-lock base to anchor connectors firmly in mother board prior to wave soldering. No tools or fixtures needed.

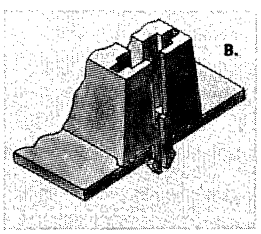
C. End-block latches lock daughter boards firmly in place during handling and shipping. Yet boards are readily removed for servicing or replacement.

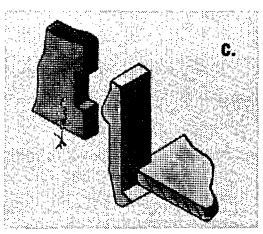
D. Each block position will accept contacts for mating with either single- or double-sided daughter boards. In double-sided blocks, daughter boards can be removed without opposing contacts touching.

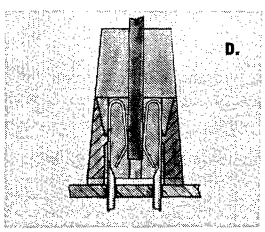


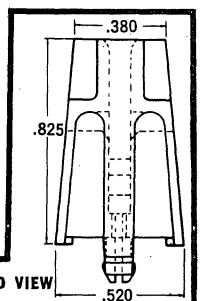
You can specify BergLok Connector Blocks, as 4-, 6-, or 8-position end blocks or as 6-position center blocks. Additional center blocks can be added to provide an unlimited number of contact positions. Standard center-to-center spacing .200".











ORDERING DATA (All blocks utilize terminal No. 47787)

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

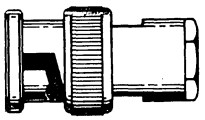
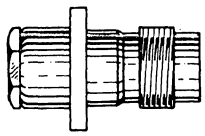
Broadest line of RF CONNECTORS on the market



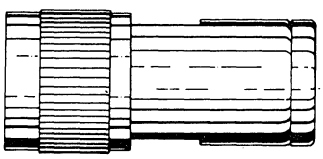
BNC Square Cut: 60 second cable assembly; weatherproof; small and lightweight with quick disconnect bayonet-lock coupling. BNC uses small cables, operates to peak load of 500 volts. Manufactured in accordance with MIL-C-3608A.

Cable	RG55B, 223	RG58	RG59, 62, 71	RG122	RG174
Plug	30220-9	30220-2	30220-4	30220-11	30220-13
Cable Jack	30516-5	30516-1	30516-3	30516-7	30516-9
S.H.Mt.Jack	30517-5	30517-1	30517-3	30517-7	30517-9



TNC Square Cut: A screw thread adaptation of BNC Square Cut. Assembly electrical and mechanical features are identical to the improved BNC Square Cut series and, except for threaded sleeve, are manufactured in accordance with MIL-C-3608A.

Cable	RG55B, 223	RG58	RG59, 62, 71	RG122	RG174
Plug	8280-5	8280-1	8280-3	8280-7	8280-9
Cable Jack	8281-5	8281-1	8281-3	8281-7	8281-9
S.H.Mt.Jack	8282-5	8282-1	8282-3	8282-7	8282-9



N Square Cut: A line of low voltage, constant impedence connectors (50 ohms) designed for quick cable assembly on small and medium size RF cable. They have a peak rating of 1,000 volts and are weatherproof.

Cable	RG55B, 233	RG58	RG59, 62, 71	RG8, 213	RG9, 214
Plug	33072-5	33072-1	33072-3	30533-1	30533-3

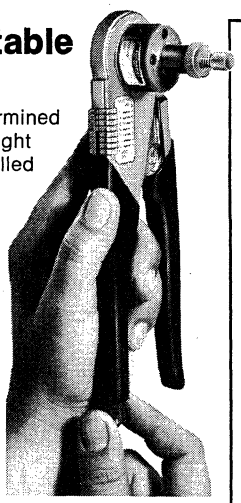
Part numbers shown above (partial listing only) are suitable for most connector applications. All are available for fast delivery from Bendix stock. Bendix provides *one source* for all your RF connector requirements, including custom engineering and special finishes. Call or write for complete Catalog: Microwave Devices Division, The Bendix Corporation, Hurricane Road, Franklin, Indiana 46131. Phone (317) 736-6136.

Bendix Electronics

BUCHANAN

Headquarters for universal crimping tools

Step-adjustable crimp tool

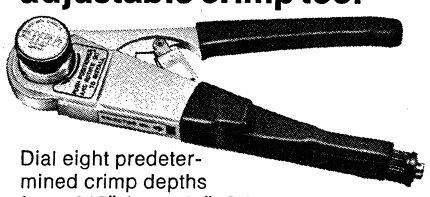


Dial seven pre-determined crimp depths with eight indent, cycle-controlled tool. Direct reading indicator.

Crimps MS pin and socket contacts sizes 12, 16, 20 and 22 to wire sizes #12 thru #26 AWG with or without turret head assemblies as shown on MS3191. **MS3191-4. LISTED UNDER QPL MIL-T-22520 CLASS I.**

Infinitely adjustable crimp tool also available. Eight indent, cycle-controlled tool crimps depths from .025" to .075". Direct reading indicator. Crimps contacts #12 and smaller. Meets performance requirements of MIL-T-22520.

Miniature Step-adjustable crimp tool

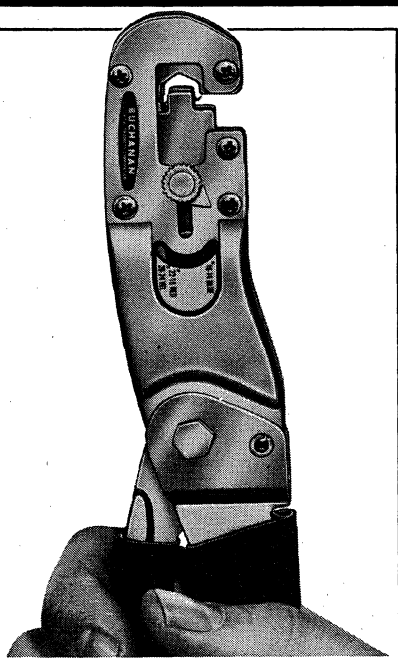


Dial eight predetermined crimp depths from .015" thru .043". Crimps micro-miniature contacts #20 and smaller to wire sizes #20 AWG and smaller with or without positioners. Selection of MS positioners available. Eight indent, cycle-controlled tool. **MS3198-1. LISTED UNDER QPL MIL-T-22520 CLASS I.**

Miniature infinitely adjustable tool also available for contacts #20 and smaller. Crimps depth values from .015" thru .043". Meets performance requirements of MIL-T-22520.

Manual Feed Tool

Pneumatic; cycle-controlled; portable or bench mounted with foot pedal. Crimps contacts #8 thru #22. Weighs less than 5 lbs. **LISTED UNDER QPL MIL-T-22520 CLASS II.**



C-Frame Tools

Lighter, easier to operate, compact yet strong. In-line die system; cycle controlled.

CT Tools. Crimp MS 25036 terminal lugs, MS 25181 splices and other fittings. Dial for size selector knob.

CTS Standard size, Cat. #11545, for fittings 12-10 thru 26-24. Meets performance requirements of MIL-T-22910.

CTM Miniature, Cat. #11707, for sizes 16-14 thru 26-24. **MS90413-1 (AS). LISTED UNDER QPL MIL-T-22910 CLASS I.**

•

CH Tools. Hex dies for use on RF connectors and shielded terminating ferrules.

CHS Standard Size. Pop-in die. **M22910/7-1. LISTED UNDER QPL MIL-T-22910 CLASS I.**

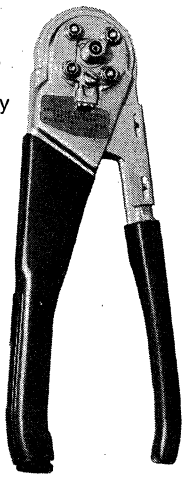
CHM Miniature. Fixed die. **MS 90487. LISTED UNDER QPL MIL-T-22910 CLASS I.**

CHM pop-in die also available. Meets performance requirements of MIL-T-22910.

•

CD Tools. Special dies for special custom applications. Standard size (CDS) and miniature size (CDM). C-frame or closed frame models.

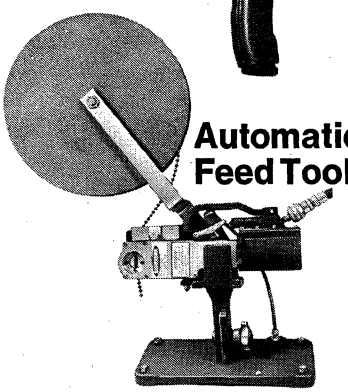
Positioner controlled crimp tool



MIL standard 4-indent, cycle-controlled tool crimps most proprietary and mil spec contacts #12 thru #22. **MS 3191-A. LISTED UNDER QPL MIL-T-22520 CLASS I.**

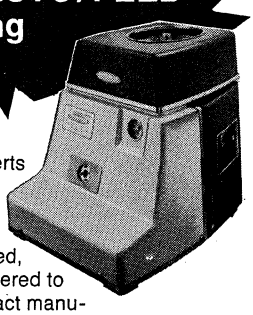
Miniature positioner controlled tool also available. Crimps most contacts #20 and smaller. Ideal for confined areas. 6¾" long; 10 ounces.

Automatic Feed Tool



Four-indent tool automatically feeds contacts from disposable carriers (protects contacts from damage). Crimps as fast as operator inserts wires. Bench unit holds 2,000 or more contacts. For portable application, carriers in self-positioning, "see-thru" magazines hold up to 102 contacts. Crimps contacts #12 thru #22. **LISTED UNDER QPL MIL-T-22520 CLASS II.**

NEW! AUTO/FEED Crimping System



VIBRAPAK™ inserts hold up to 4000 pin and socket contacts. Can be loaded, labeled, sealed, and delivered to you by any contact manufacturer you choose. Provides you with a built-in positive lot control and contact identification system. BUCHANAN® AUTO/FEED system crimps contact sizes 16 thru 22. Accommodates most contacts covered by MIL-C39029, MIL-C23216, MIL-C26636. Meets performance requirements of MIL-T-22520.

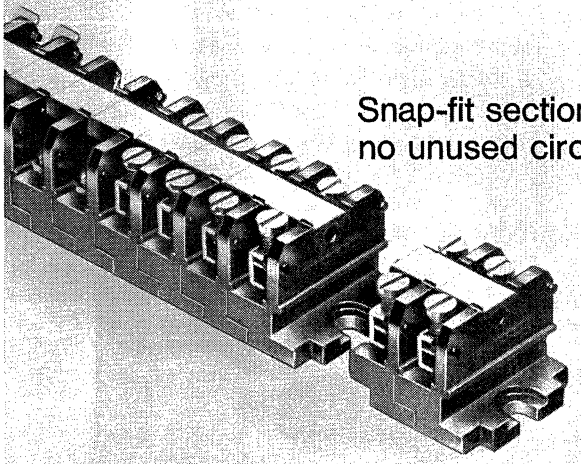
4 most sought-after terminal block features:

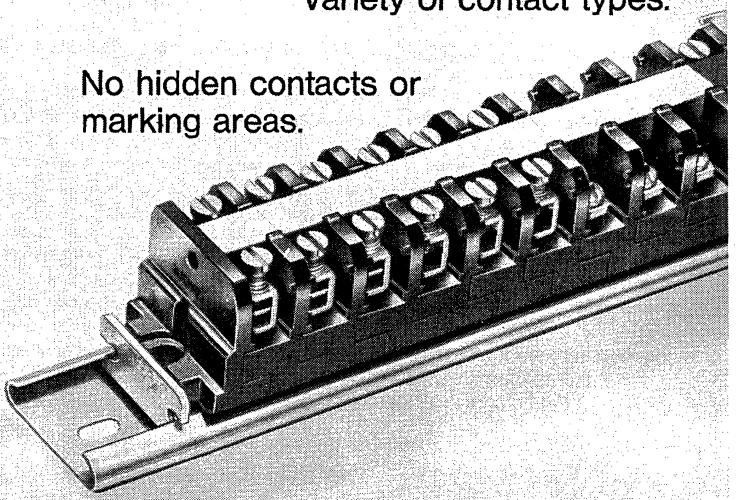


Snap-fit sections...
no unused circuits.

Variety of contact types.

No hidden contacts or
marking areas.

Direct or Channel
mounting.



Only **BUCHANAN** has them all!

Only Buchanan gives you the 4 most sought-after features in its terminal blocks—features that put more profit in your designs.

Assembly is fast because blocks are packaged in preassembled snap-fit sections. Clearly visible marking areas and contacts make wiring and marking fast and simple. Four different contact types meet the requirements of any application. You even have a choice of flat base or dovetail base. Bonus: New BUCHANAN® nylon and polypropylene blocks are designed to allow more circuits per foot than comparable competitive blocks.

To get all the profit-building facts, write today for new catalog. 1065 Floral Avenue, Union, New Jersey 07083 • (201) 289-8200 Telex 13-8214

CINCH

PRINTED CIRCUIT EDGE CONNECTORS

PRECISION MILITARY AND COMMERCIAL PRINTED CIRCUIT BOARD EDGE CONNECTORS

These Cinch printed circuit connectors are designed for minimum printed circuit card wear, low insertion force and positive contact with the printed circuit board. Insulation is glass-filled diallyl phthalate, type SDG-F per MIL-M-14. Contacts are of phosphor bronze with a minimum of 30 micro-inches thickness gold plate. Units with solder tab or dip solder terminations utilize bifurcated contacts permitting two flexing surfaces instead of one for positive contact. Bifurcated contacts are especially recommended for added conact reliability where vibration or printed circuit board irragularities would otherwise cause trouble. Types meeting Military Specification MIL-C-21097B are also available as indicated. These connectors have beryllium copper contacts with 50 micro-inches gold finish.

ELECTRICAL SPECIFICATIONS

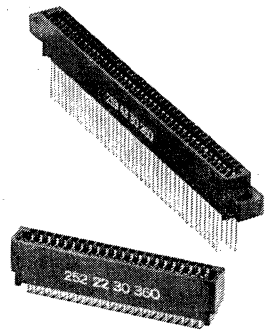
VOLTAGE RATING (AC RMS, adj. terminals): 830 (Sea Level); 300 (3.4 Hg, 50,000 Feet); 200 (1.3 Hg, 70,000 Feet); CURRENT: 5.0 Amps; CONTACT RESISTANCE: .005 Ohms at Rated Current; INSULATION RESISTANCE: 5000 Megohms.

ENVIRONMENTAL SPECIFICATIONS (Per MIL-C-21097 and MIL-STD-202, latest versions.)

SHOCK: 3 blows of 50G, Method 202B; TEMPERATURE CYCLING: 5 continuous cycles per Method 107B, Test Condition B; Beryllium copper, —65°C to 125°C; Phosphor bronze, —65°C to 105°C; SALT SPRAY: 48 hrs. per Method 101B, Condition B; VIBRATION: Per Method 204A, Condition B for bifurcated contacts; Method 201A for non-bifurcated contacts; HUMIDITY: Per Method 103B, Condition B.

CINCH

PRECISION DOUBLE READ-OUT PRINTED CIRCUIT BOARD EDGE CONNECTORS WITH 0.100 INCH CENTERS



This new connector series features a unique bifurcated cantilever contact construction that provides a simple, dependable design capable of handling 1/16" thick printed circuit boards. These contacts are pre-loaded against an insulator stop to provide gap uniformity and assure rapid build-up of force to the PC board. This design combines minimum insertion force with maximum contact pressure.

Contacts are fabricated from grade A phosphor bronze, selectively gold plated with 30 micro-inches of gold over 50 micro-inches of nickel in the contacting area and 10 micro-inches minimum gold on the remainder of the contact, per MIL-C-45204, Type II. Insulation is glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CINCH

D-SUBMINIATURE CONNECTORS†

The Cinch D Subminiature Connectors are designed for applications where space and weight are prime considerations. These high contact density connectors are especially well-suited for aircraft, missile and ground support installations. Although designed essentially for rack-and-panel installations, D series connectors may be adapted for cable attachment by means of accessory junction shells with integral clamps.

In addition to the original D series with two-piece insulators, Cinch offers Golden D and MARK III ROYAL D connectors utilizing monobloc insulators. The Golden D connector is available with either crimp-type, snap-in, removable contacts or standard solder pot contacts. MARK III ROYAL D connectors have the "Little Caesar" rear release contact assembly. Contacts are inserted by hand and extracted at the rear of the connector with a simple plastic tool. The "Little Caesar" contact assembly was selected by the National Aerospace Standards Committee for vital programs demanding great operational reliability.

All D Subminiature connectors will inter-mate if insert arrangements correspond. These connectors are designed to meet or exceed most of the requirements of MIL-C-8384 Rev. B.

Combination layouts are supplied with unfilled coaxial and/or HV contact cavities. Coaxial and HV contacts must be ordered separately, and may be used interchangeably in any of the layouts listed. HV contacts accommodate wire sizes up to #20. Coaxial contacts (with crimp or solder type terminations) and HV contacts are snap-in and removable. Solder type coaxial and HV contacts have captivated center contacts.

Royal D, Mark III and Golden D, Mark II contacts use crimp tool MS-3191-1. Extraction tool 599-11-11-150 is used with each Royal D, Mark III commercial connectors; insertion-extraction tool 599-11-11-165 is used with each military connector.
For detailed test data and technical information see Cinch Catalog CM-46.

TYPE	DESCRIPTION	COMMON NAME	INSULATOR TYPE	CONTACT TERMINATION
D*MA	D connectors for the most critical applications. Monobloc insulators and "Little Caesar" contact assemblies Military version meets MIL-C-24308.	Mark III ROYAL D	Monobloc diallyl, thalate, GD-1-30F	Crimp insert by hand, remove with small tool.
D*M	D connectors with monobloc insulator for more critical application requirements.	Golden D, Mark I	Monobloc, diallyl phthalate, SDG	Solder pot Solder pot with coaxial
		Golden D, Mark I Combination	Monobloc, diallyl phthalate, SDG	and/or HV
D*SM	D connectors with crimp, snap-in contacts in monobloc insulators for quick assembly in more critical applications.	Golden D, Mark II	Monobloc, diallyl phthalate, MDG	Crimp, snap-in removable
D*	Original D connectors with two-piece insulators.	Original D	Two-piece, zytel	Solder pot
DATA-PHONE	Same as D*	—	Diallyl phthalate, GDI-30	Same as D*

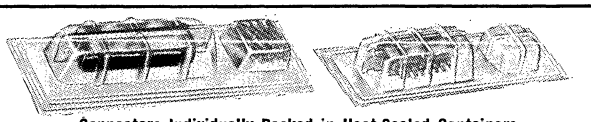
SOCKET WITH COMBINATION LAYOUT IN SHELL WITH FLOAT MOUNTSt



Connectors Individually Packed in Heat-Sealed Containers to Assure Extended Shelf Life

To protect D-Subminiature connectors from contamination and other corrosive elements in the air, Cinch individually packs each connector in heat-sealed polyvinyl-chloride containers (as shown) with an inert gas, oxygen-free atmosphere. This assures every customer of extended shelf life. A separate compartment is also provided in each container for the loose crimp-type contacts supplied with the Golden D, Mark II and Mark III connector.

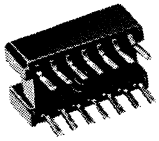
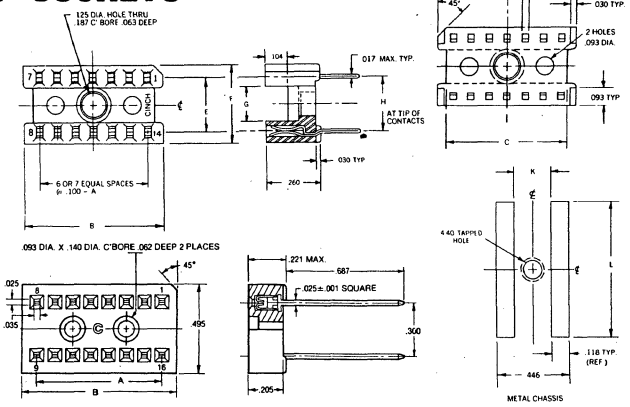
PRECISION DIP SOCKETS

PRECISION DIP SOCKETS



Cinch IC sockets are ideal for testing and prototype purposes as well as production applications. Convenient and dependable, these sockets prevent the possibility of damage to leads and hermetic seals. These sockets combine high contact retention with low contact resistance and high environmental stability.



DIP SOLDER TAILS

MATERIALS: INSULATORS: GP Black Phenolic per MIL-M-14, type CFG; Diallyl Phthalate per MIL-M-14, type SDG; CONTACTS: Beryllium copper, gold or electro-tin plating.

ELECTRICAL SPECIFICATIONS

CURRENT RATING: 1.0 amp; CONTACT RESISTANCE: 6 milliohms (at 1 amp); CAPACITANCE PER MIL-STD-202: Method 305 at 100 KHz bet. contacts: 0.33 pfd avg. (phenolic), 0.28 pfd avg. (diallyl phthalate), bet. opposing contacts: 0.12 pfd avg. (phenolic), 0.10 pfd. avg. (diallyl phthalate); WITHSTANDING VOLTAGE BET. ADJ. CONTACTS: 1800 VRMS; INSULATION RESISTANCE: 1.0×10^4 meg. min. (phenolic), 2.0×10^6 meg. min. (diallyl phthalate).

MECHANICAL SPECIFICATIONS

VIBRATION: Per MIL-STD-202C, Condition D. Method 204A, 10-2000 C.P.S. at 20 G's or .060" double amplitude. No continuity interruptions of 1 micro-second or longer. No damage to contact or insulator. No disengagement of DIP module from the socket; SHOCK: Per MIL-STD-202C, Method 2028/3 blows in each of 3 mutually perpendicular planes. Shock level of 150 G's. No continuity interruptions of 1 microsecond or longer. No damage to contact or insulator. No disengagement of DIP module from the socket; Temperature Range: Phenolic: −65° to 150°C.

WIRE WRAP TAILS

MATERIALS: INSULATORS: Glass Nylon −65° to 125°C; CONTACTS: Solid .025 phosphor bronze wire wrap post with sharp (.003 max. radius) corners. (Gold or electro-tin plated).

ELECTRICAL SPECIFICATIONS: CURRENT RATING: 1 amp; CONTACT RESISTANCE: 6 milliohms; INSULATION RESISTANCE: 1×10^6 Meg.; WITHSTANDING VOLTAGE: 1000 volts A.C. rms; INTERLEAD CAPACITANCE: 0.40 pf at 1 mhz.

MECHANICAL SPECIFICATIONS: CONTACT SEPARATION FORCE: Min. 4 oz., Max. 1 oz.; Min. CONTACT SEPARATION FORCE AFTER 100 CYCLES: 1 oz.

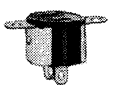
"JONES" PLUGS and SOCKETS — 300 SERIES

In addition to the 300 series listed here, Jones Connectors are available in higher ratings.

400 Series: 1200V, 15 amps
2400 Series: 1700V, 15 amps
500 Series: 3KV, 25 amps

For information on these connectors and additional data on the units listed here, contact any Cinch Electronics District Office, or your Cinch Distributor, who has these items in stock for immediate delivery.

P-302-CCT



S-302-AB

ELECTRICAL SPECIFICATIONS

All connector ratings are based on a continuously mated condition. "Rated Voltage" is ⅓ of Voltage Breakdown.

Rated Voltage ..... 730 Volts rms. Contact Resistance .... .016 Ohms max.

Under most normal operating conditions where not all contacts are carrying substantially full rated current, maximum current per contact is rated at 10 amperes. The Jones 300 series plugs and sockets are recognized under the Component Program of Underwriters' Laboratories, Inc. In accordance with UL Standard #498, the Underwriters' Laboratories ratings are derived from the condition whereby all contacts are carrying "rated" current simultaneously. The resultant ratings are as follows:

Rated Current	Rated Wattage
(2-12 contacts) ..... 7.5 amperes	(2-12 contacts) .....1875 watts
(15-33 contacts) ..... 4.5 amperes	(15-33 contacts) .....1125 watts

MECHANICAL SPECIFICATIONS

INSULATOR: Molded phenolic;; CONTACTS: Phosphor bronze, cadmium plated; HOUSING: Formed metal, black wrinkle finish.

TERMINAL BLOCKS and ACCESSORIES

The Jones barrier terminal blocks are made of molded phenolic. Eyelets and screws are nickel-plated brass and terminals are hot solder dipped brass. Fibre or phenolic marker strips are available for all barrier blocks. Barrier blocks are available in standard terminal configurations as shown. Optional terminals are available as indicated by the Y, W, or ¾ W suffix on the part numbers in the charts.

2-140

2-172-W

2-164¾-W

2-164-Y

The standard terminal block with binder head screws can be used for wire or special terminal attachment.
¾ W terminals are available for solder attachment of wires on one side of the terminal block. W terminals are available for solder connection of wires to both sides of the terminal block. (Available as standard on 172 series; special order on others.) Y terminals are available for solder connection of wires underneath the terminal block.

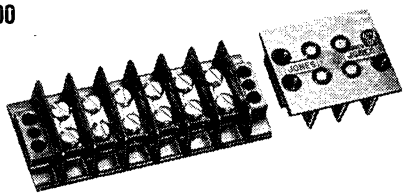
SERIES 500



The new 500 series Jones Barrier Terminal Blocks are designed for applications where electrical and mechanical performance requirements are especially critical. Bottoms are closed so that insulating strips are not required. Knockouts are molded into the base so that Y terminals can be accommodated if desired. A top-mounted marker strip can be furnished as described on page 16.

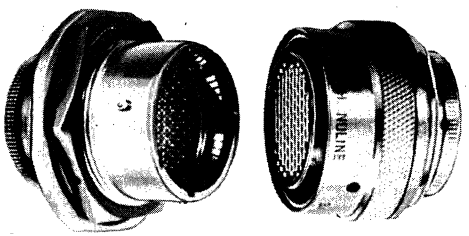
CINCH-NULINE

THE SINGLE SOURCE FOR ALL ROUND CONNECTOR NEEDS

MIL-C-81511 SUBMINIATURE CYLINDRICAL CONNECTORS



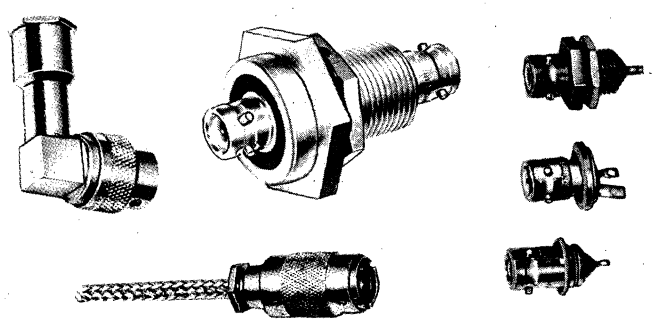
Cinch-Nuline "Astro/348®" connectors represent the highest state-of-the-art in round connectors. They have 0.085" contact centers with dielectric separation of 0.021", and the dielectric has a one-piece retention system that eliminates metal construction. Other important features include scoop-proof mating, grounding prior to electrical contact, removable crimp contacts, and extreme environment stability. Available are shell sizes for contact configurations of 4, 12, 37, 55, and 85 contacts, five receptacle styles, and standardized accessories including uniquely designed, strain relieving "J" Adapters. Request Catalog Number CN-5.

MIL-C-26500 & MIL-C-38300 CYLINDRICAL CONNECTORS

Cinch-Nuline "Omega®" and "Golden Omega®", the connectors with more hours in the air than any other cylindrical, are available in shell sizes 10 through 22, with any contact style and insert configuration. Available, too, with G-Type conductive shells and lanyard release assemblies. These Cinch-Nuline round connectors operate continuously at 200°C, and withstand violent thermal shock and high G vibration. They resist corrosion, ozone, sand, and dust. Request Catalog Number CN-3.

® Registered TM, Bunker-Ramo Corporation

MIL-C-25516 MINIATURE ENVIRONMENTAL-RESISTANT COAXIAL CONNECTORS



Cinch-Nuline 1200 Series Connectors are environmentally and hermetically sealed connectors for single conductor coaxial and unshielded cables. The 1200 Series is specifically designed for critical liquid quantity measurement systems and other high impedance and RF applications requiring high vibration resistance and maximum reliability. 1200 Series connectors are available in a wide range of configurations in both solder and crimp type terminal designs. Request Catalog Number CN-7.

CONCORD ELECTRONICS CORPORATION

DEPT. JE

37 GREAT JONES STREET NEW YORK, N.Y. 10012 (212) 777-6571 · TWX 710-581-4930

CONNECTOR CORPORATION

6025 N. KEYSTONE AVENUE • CHICAGO, ILLINOIS 60646 • TELEPHONE: 312, 539-3108

For many years the electronic industry has relied on the wide range of products, engineering services and consistent production quality of Connector Corporation.

A limited cross section of Connector Corporation's line is illustrated. Your specific requirement can be exactly met and mass produced with good delivery. Many items can be supplied with leads attached and color coded, offering production savings for your assembly. Special items can be designed or developed at relatively low cost. Just let us know what you need.

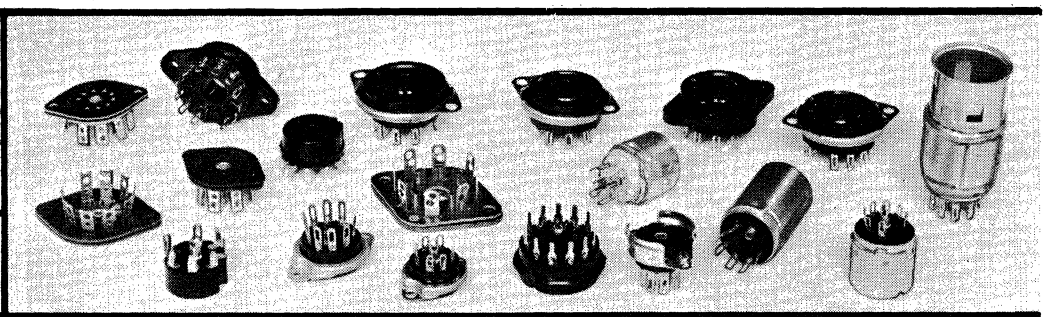
Products are available in a wide range of insulations and contact materials:

Insulations include: general purpose or mica-filled low loss Phenolic, glass filled alkyd, polypropolene, ceramic,etc., in molded versions. Laminated types include XP, XXP, XXXP Phenolics, X2B Hard Rubber, Glass Epoxy, Glass alkyd.

Contacts and Platings include: High tensile brass, phosphor bronze or beryllium copper with cadmium, electro tin, silver, hot tin dipped, silver-gold flash, gold plating, etc.

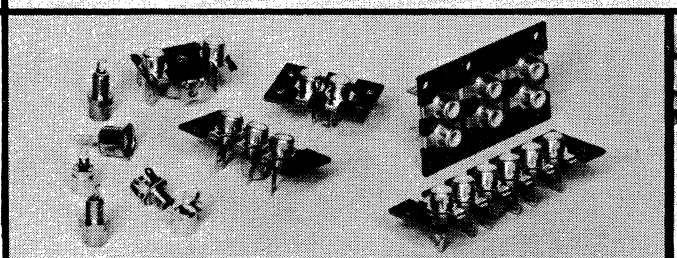
TUBE SOCKETS

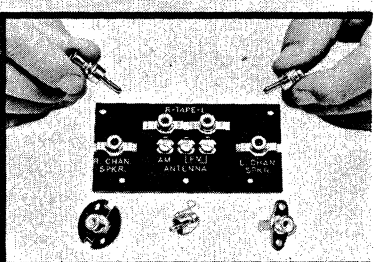
Most standard and many special molded & ceramic configurations available as well as laminated socket types. Fixed or collapsible types of shielding are available.



MULTI PURPOSE PHONO CONNECTORS

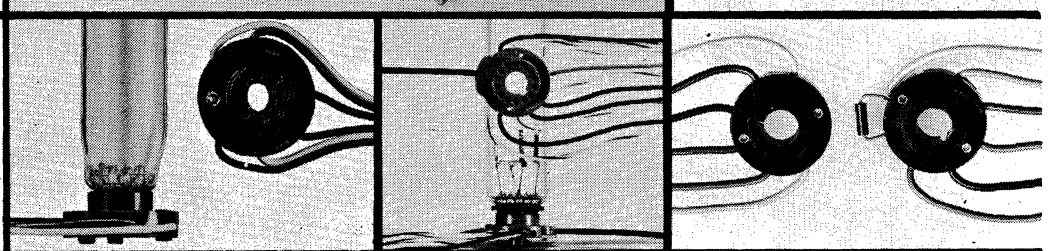
Sockets available in multiples up to 12 per section. Broad line of individual male and female types in a variety of mountings. Highly reliable for dependable repeated use.





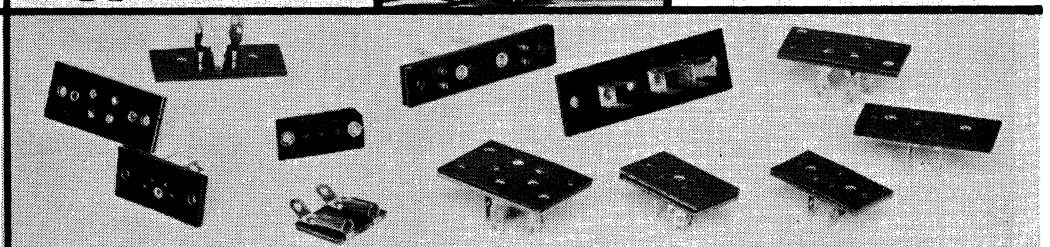
KINESCOPE SOCKET ASSEMBLIES

Include: Miniature Di Heptal Socket for 90° color tubes, 110° Eightar CRT sockets, miniature types for JEDEC E7-91, B7-247 basing (HEPTAL). Many special configurations and types may be furnished in quantity lots.



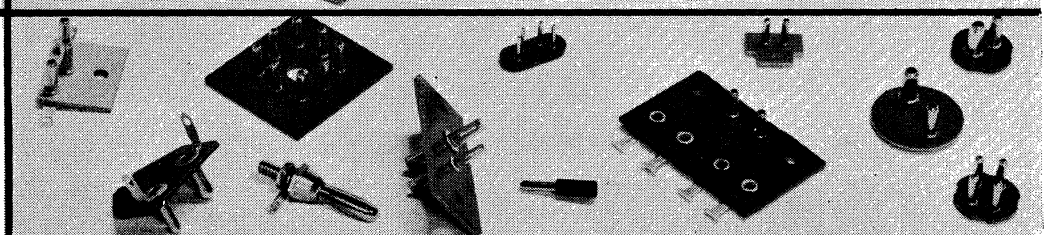
RECEPTACLES

Numerous varieties. Available in molded or laminated construction. Reliable contacts offer positive electrical and mechanical mating.



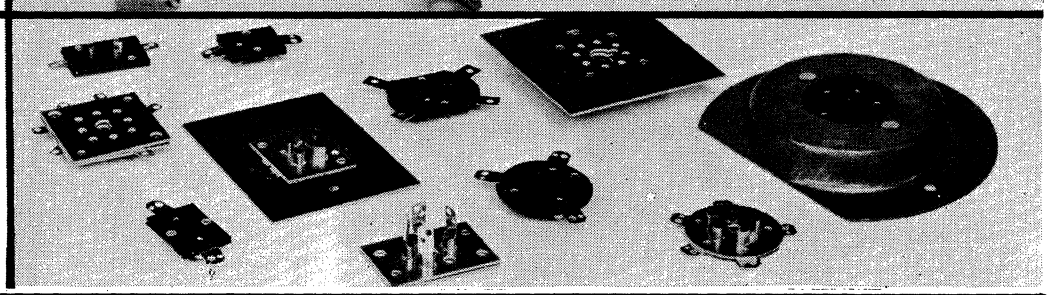
PLUGS

Numerous types available, with molded or laminated phenolic insulations. Leads may be supplied to specification.



BATTERY SOCKETS

Complete line for commercial & military batteries. Custom designed to your requirements.



CONNECTOR CORPORATION

6025 N. KEYSTONE AVENUE • CHICAGO, ILLINOIS 60646 • TELEPHONE: 312, 539-3108

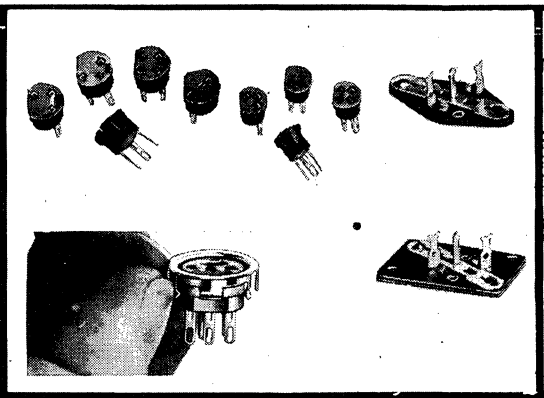
TRANSISTOR AND NUVISTOR SOCKETS

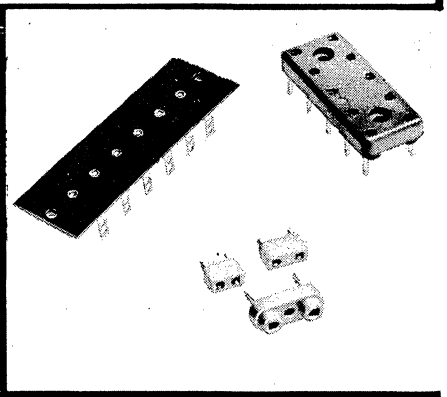
Available to mate with 3-pin, in-line transistors, and also with 3 and 4-pin transistors of any configuration on .200 or .100 dia. pin circle.

Miniature positive contact MIL quality nuvistor sockets for high quality military and commercial equipment.

CRYSTAL SOCKETS

Accommodate single & multiple crystals. Include both p.c. and conventional solder lug versions for crystals with .486, .273 and .192 pin centers and with .050 or .040 pin diameters. Also available to MIL Specs.



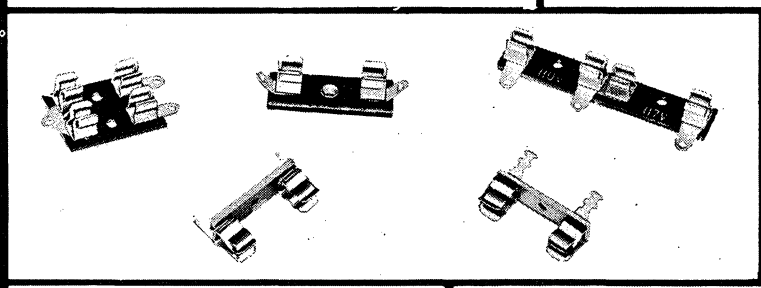


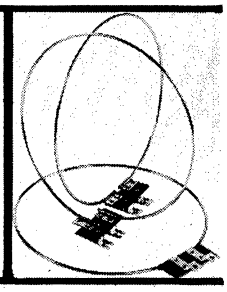
FUSE HOLDERS

Positive grip open type. Features: easy solderability, and versatility of construction which permit multiples or variations to your spec at reasonable cost.

UHF TV ANTENNAE

Attaches easily. Can be rotated in many different planes for optimum performance. Long life, trouble-free operation.



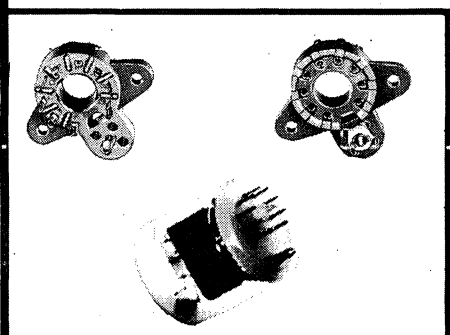


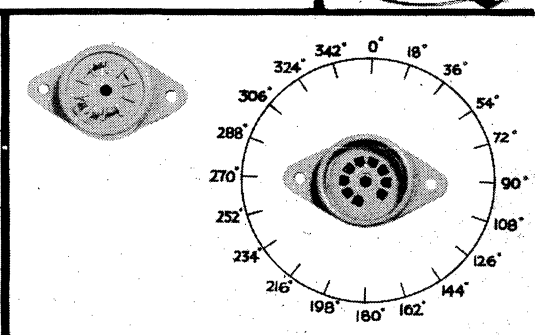
TRANSMITTER TUBE SOCKETS

Low loss at very high frequencies available. Vented to provide maximum cooling of tube base and anode contact area by convection. Voltage breakdown characteristics are enhanced by appropriate barriers between contact positions where indicated.

HIGH VOLTAGE TUBE SOCKETS

Designed for application with use of appropriate insulating materials and spacings.



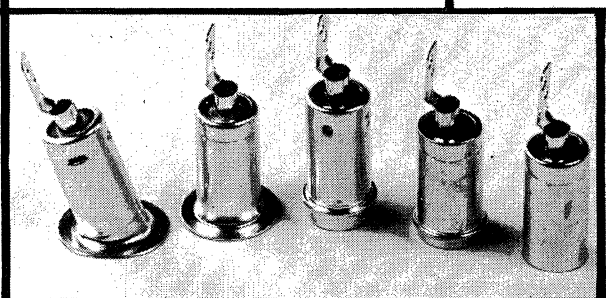


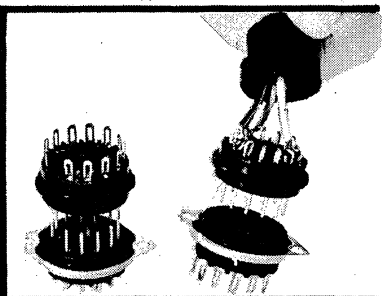
RF COAXIAL ANTENNA CONNECTORS

For auto receivers & similar applications. Rugged construction. Excellent contact resistance and retention.

MULTI-PIN MALE/FEMALE CONNECTORS

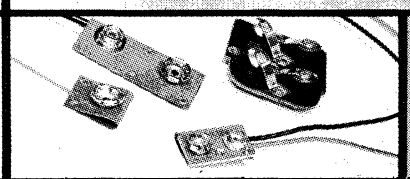
Provide quick reliable connect and disconnect for cable assemblies. Insert and extract easily, yet have reliable contact retention and resistance.

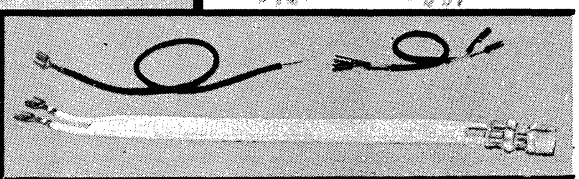




BATTERY CONNECTORS AND WIRE ASSEMBLIES

Snap-on and positive contact types available with wired leads if desired. Wire assemblies furnished to your specifications as to type of wire, length and termination attachments.

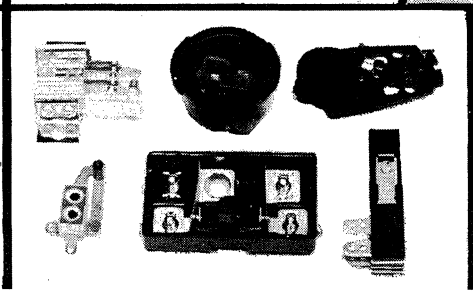


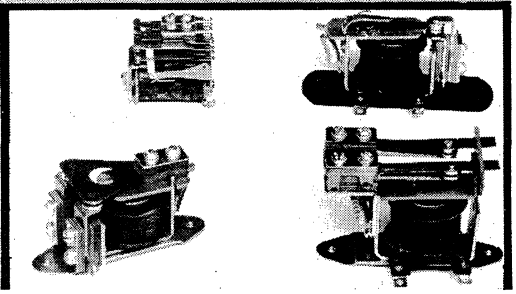


SEALECTRIC

SEALECTRIC SWITCHES AND RELAYS

For standard & special applications, send us your requirements.



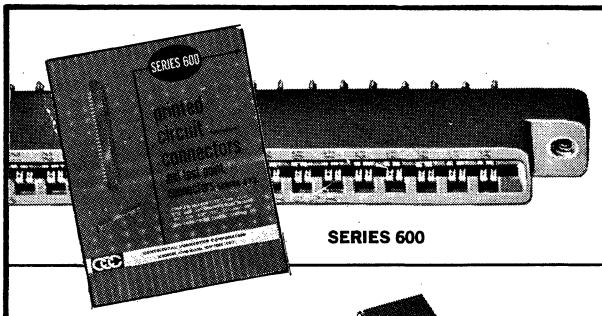


Precision Electronic Connectors

PRINTED CIRCUIT CONNECTORS*

Provide positive, space-saving connections between printed circuitry and conventional wiring through PC boards, tape cables or "plug" mounted subassemblies. Feature Continental's patented "Bellowform" contacts; glass-filled Diallyl Phthalate, Plaskon Alkyd, mineral filled Melamine moldings. Receptacles accommodate 1/32", 3/64", 1/16", 3/32" or 1/8" board thickness, single and dual readouts on .050", .075" .100", .125", .150", .156" and .200" centers.

*Patent No. 2,875,425

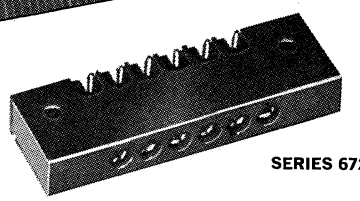


SERIES 600

PC BOARD RECEPTACLE

Card edge printed circuit connectors 1/32", 3/64", 1/16", 3/32" and 1/8" printed circuit boards. Available in wide range of sizes, single and dual readout contact construction...up to 210 terminals.

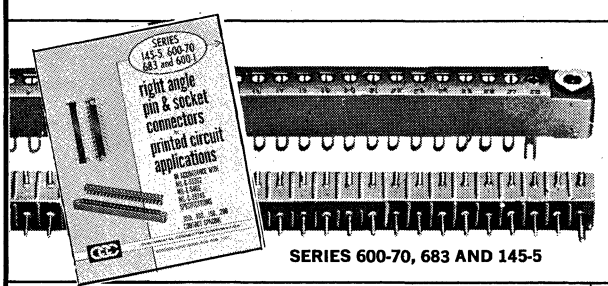
Also available with .025" and .045" square solderless-wrap terminations.



SERIES 672

PC TEST POINT

Provide conveniently located test points to check printed circuitry. Available with 4, 5, 6, 8, 10, 11, 20, 21, 28, 30, 42 and 63 contacts which grip and hold securely a standard .080" test probe. Connectors have recessed and floating pin terminals mounted at right angle to the test socket. Pins dip solder to printed circuit board.



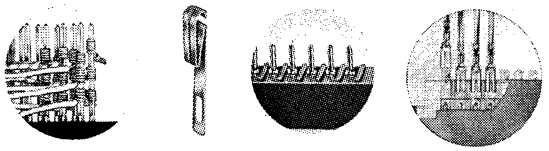
SERIES 600-70, 683 AND 145-5

PC RIGHT ANGLE PIN AND SOCKET

MEET MIL-E-5400, MIL-C-55302, MIL-C-28748 SPECIFICATIONS

Provide additional flexibility in printed circuit system design. Mating parts have set of solder cups on socket and set of right angle pins on plug which mounts and dip solders to the printed circuit board. Wide variety of configurations, contact sizes, moldings and mounting styles are available.

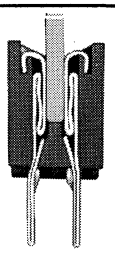
MOST PC CONNECTORS AVAILABLE IN THESE WIRING STYLES

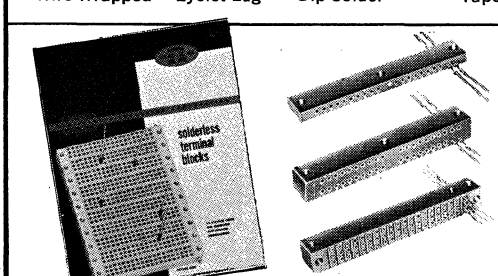


Wire-Wrapped | Eyelet Lug | Dip Solder | Taper Tab

EXCLUSIVE PATENTED "BELLOWFORM" CONTACT

Coil spring action grip clasps printed circuit board firmly over 100% of the contact area. Contact permits use of undersized or oversized board tolerances while maintaining low contact resistance. It "rides" with the printed circuit board under extreme vibration conditions or misalignment.





TERMINAL BLOCKS

SERIES 145-58, 145-50 AND 145-48. Precision reamed, solderless taper pin receptacles in single, dual and triple row construction, molded-in for highest durability. Available in any combination of feedthru individual or shorting terminals. Internal bus between any combination of terminals eliminates external wiring. Mounting holes for stacking, right angle and perpendicular mounting. Molding is glass filled Dially Phthalate (MIL-P-19833, Type GDI-30).

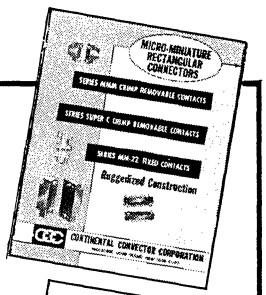
CONTINENTAL

CONTINENTAL CONNECTOR CORPORATION • 34-63 56th STREET

for Commercial & Military Applications

PLUG & SOCKET CONNECTORS for every requirement.

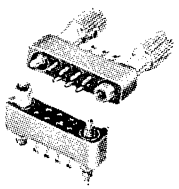
A complete line of high-reliability connectors for computer, missile, aircraft, communications and other critical applications. In addition to standard specifications, these connectors can be supplied with such optional accessories as aluminum hoods, protective shells, polarizing screwlocks*, and solder filled contacts. Various molding compounds are also available. *Patent No. 2,746,022



MICRO-MINIATURE

5 TO 104 CONTACTS. Ruggedized to withstand shock and vibration extremes. Meet MIL-C-8384 specs. Available with guide pins and sockets, polarizing screwlocks, cable brackets, hoods and glass filled Diallyl Phthalate molding.

Breakdown Voltage (sea level), 2000V. RMS • Current Rating, 3A • Min. Creepage Bet. Contacts, .070″ • Min. Air Space Bet. Contacts, .040″ • Contacts, center-to-center 3/32″ • Pin Diameter, .030″ • Solder Cup, #22 AWG wire.

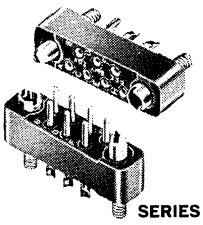


SERIES MM22 FIXED CONTACTS AND SERIES MMM CRIMP REMOVABLE CONTACTS

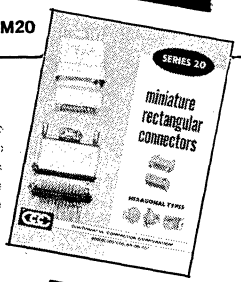
SUBMINIATURE

5 TO 104 CONTACTS. Meet or exceed applicable paragraphs of MIL-C-5015 and MIL-C-8384. Optional features include guide pins and sockets, polarizing screwlocks, protective shells and aluminum hoods. Glass-filled Diallyl Phthalate molding.

Breakdown Voltage (sea level), 2000V. RMS • Current, 5A. Cont., 7.5A max. • Min. Creepage Bet. Contacts, .078″ • Min. Air Space Bet. Contacts, .045″ • Contacts, center-to-center, 1/8″ • Pin Diameter, .040″ • Solder Cup, #20 AWG wire.



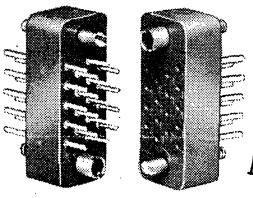
SERIES SM20



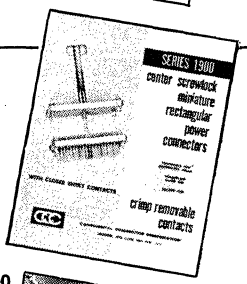
MINIATURE

4 TO 104 CONTACTS. A larger size, also available with guide pins and sockets, polarizing screwlocks, aluminum hoods, protective shells, and various molding compounds. Can be supplied with similar specifications in hexagonal types with 1, 4, 5, 7, 9 and 10 contacts.

Breakdown Voltage (sea level), 3000V. RMS • Current Rating, 5A. cont., 7.5A. max. • Min. Creepage Bet. Contacts, 1/8″ • Min. Air Space Bet. Contacts, .070″ • Contacts, center-to-center, .150″ • Pin Diameter, .040″ • Solder Cup, #20 AWG wire.



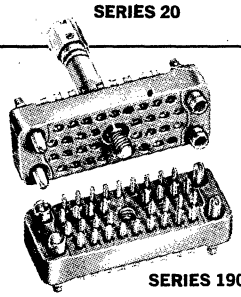
SERIES 20



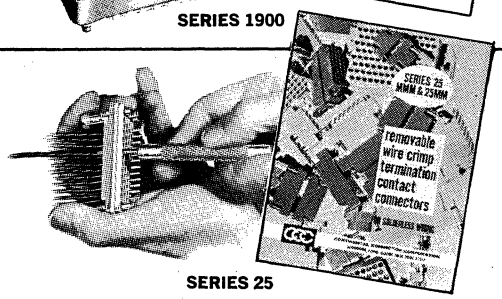
CENTER SCREWLOCK

34, 50, 78, 104, 152 CONTACTS. Double lead thread action screwlock, stainless steel side channels and closed entry contacts for maximum reliability. 152 removable contacts Series 2500152 and 10-contact and 22-contact types, for #20 AWG wire also available.

Breakdown Voltage (sea level), 3000V. RMS • Current Rating, 10A. cont., 13A. max. • Pin Diameter, .062″ • Min. Creepage Bet. Contacts, .110″ • Min. Air Space Bet. Contacts, .050″ • Contacts, center-to-center, .150″ • Solder Cup (also solderless-wrap and taper pin), #16 AWG wire.



SERIES 1900



MINIATURE AND MICROMINIATURE WITH CRIMP REMOVABLE CONTACTS

Miniature rectangular rack and panel connectors with removable crimp termination contacts. Available with 7, 9, 14, 18, 20, 26, 34, 50, 66, 75, and 104 contacts. For solderless wiring. Insertion, removal and crimping tools available. Conform to MIL-C-22857 specifications. Also in Microminiature Sizes: 50, 100, 200 Contacts. Series 25MM.

SERIES 25

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

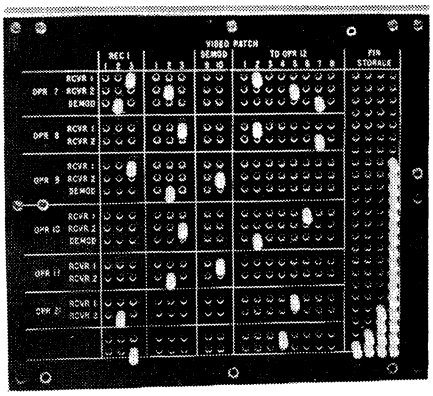
CO-ORD SWITCH

A DIVISION OF LVC INDUSTRIES INC.

102-48 43rd AVE., CORONA, N. Y. 11368 • TEL: 212-899-5588

MATRIX PROGRAM BOARDS



CO-ORD Matrix Program Boards are composed of 2 to 8 decks of contacts that are bussed on .250 centers. The contact rows of one deck are usually oriented perpendicular to the rows of adjacent deck(s) so as to obtain switching crosspoints. Electrical connections of the bussed contact rows are effected by inserting shorting pins at the desired crosspoints; "CO-AX", phone plug type pins are available for networks which require component insertion (Diodes, resistors, etc.). Single board matrices of up to 11,000 crosspoints are available in standard or special arrangements. Bussed and isolated contacts can be had alone or in combination. Panels may be screened, engraved, or fitted with pre-punched templates for rapid program changing.

U. S. Patent No. 3,349,361

APPLICATIONS

- Computer memories
- Cordless patch panels
- Function generators (Analog/Digital)
- Power distributors
- Thermocouple signal selectors
- Circuit/Component test programmers
- Lighting systems (Special effects)
- Variable sequence selectors
- Variable diode matrices
- Code generators
- Traffic control panels
- Decade switches
- Vending machine control
- Numeric controlled machinery
- Data channeling and logging
- Communications distributors

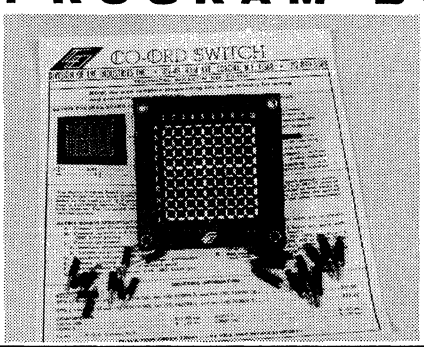
FEATURES

- Closed entry contacts
- High mechanical environment capacity
- Low interlead capacitance
- Attractive and uncluttered
- Compact package
- Standard sizes available
- Permits insertion of components into network without soldering
- Wide variety of switching combinations

SPECIFICATIONS

- Contact Resistance
  - a Total Pin Resistance: .004 OHM MAX.
  - b Volume Resistivity of Strip: .003 OHM/IN
- Breakdown Voltage: 1000 VRMS MIN.
- Current Capacity: 5 AMPS Continuous
- Materials:
  - a Plastic Parts: Black Phenolic XXX
  - b Flexible Contacts: Heat Treated Beryllium Copper
  - c Terminals: Brass
  - d Finishes: Gold, Silver or Nickel

PROGRAM BOARD KITS



KIT BPS-1 consists of a 10 x 10 matrix board similar to #63014-1, below. 10 shorting pins and 10 "CO-AX" diode pins with 1N270's installed $27.00

KIT BPS-2 is the same as BPS-1 but without diodes $22.25

10 x 10 matrix board	$17.00 ea.
Shorting pin	.12 ea.
Diode pin w/1N270	.99 ea.
Diode pin w/o diode	.51 ea.

AVAILABLE FROM STOCK

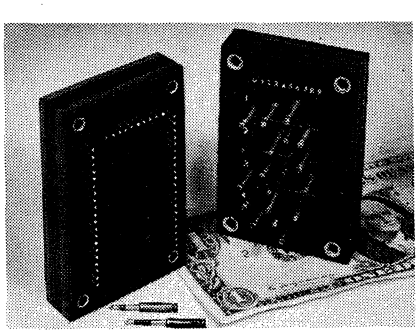
MINIATURE PROGRAM BOARD

.100 and .125 inch Center Line

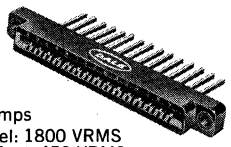


These Matrix Program Boards are designed to meet the increased technological requirements for miniaturization in electronic systems and equipment. They have all the same features of the larger matrices and can be supplied in from 2 to 4 decks of bussed contacts. Single matrix boards of up to 2500 crosspoints can be furnished in one solid unit, with rugged Shorting and CO-AX (diode) pins available for programming functions. A standard 2 deck matrix measures .315 inches thick from the front to rear panel; program pins are .280 inches long by .063 inches in diameter. Termination of the bussed contacts are to .040 diameter pin terminals, which allow the matrix to be plugged into mating female receptacles or connected to directly by wave, dip, or hard soldering. Contact resistance is only .005 ohms per crosspoint; breakdown voltage 600 VRMS; current capacity 3 amps continuous.

See Our BLOC-LITE Lighting Devices • Section 2400

DALE® for Optimum Value in Connectors

SERIES EBT 156

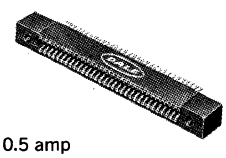


PHYSICAL and ELECTRICAL
Number of Contacts: 8, 10, 12, 15, 18 or 22
Contact Spacing: .156"
Board Thickness: .054" to .070"
Board Slot Depth: .330" **Current Rating:** 5 amps
Test Voltage between Contacts: At Sea Level: 1800 VRMS
At 70,000 feet: 450 VRMS
Insulation Resistance: 5000 meg. min.
Contact Resistance: 30 millivolts max. at rated current

COMPONENT MATERIAL
Body: Glass-filled phenolic per MIL-M-14, Type MFH, black
Contacts: Nickel silver per QQ-C-585, alloy 770, spring temper. Gold flash optional.
Polarizing Key: Glass-filled nylon
Optional Threaded Mounting Insert: Nickel plated brass. (Type Y)
Optional Floating Mounting Bushing: Cadmium plated brass. (Type Z)

APPLICATION For use with 1/16" printed circuit boards requiring an edgeboard type connector on .156" centers.

SERIES EBTL 050



PHYSICAL and ELECTRICAL
Number of Contacts: 8, 16, 20, 25, 32, 50 or 64 per side
Contact Spacing: .050"
Board Thickness: Size 1 = .027"-.035"
Size 2 = .056"-.068"
Board Slot Depth: .200" **Current Rating:** 0.5 amp
Test Voltage between Contacts: At Sea Level: 1200 VRMS
At 50,000 feet: 675 VRMS
Insulation Resistance: 5000 meg. min.
Contact Resistance: 10 millivolts max. at rated current

COMPONENT MATERIAL
Body: Glass-filled phenolic per MIL-M-14, Type MFH, black
Contact Backer Strips: Epoxy glass laminate per MIL-P-18177, Type GEE, black
Contacts: Beryllium copper per QQ-C-533, alloy 172. Gold plate per MIL-G-45204.
Polarizing Key: Polycarbonate

APPLICATION For use with 1/32" and 1/16" printed circuit boards in integrated thin film, and semiconductor circuitry with .050" contact spacing.

SERIES EB 7

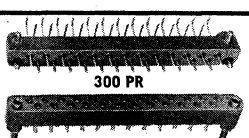
PHYSICAL and ELECTRICAL (Featuring Bifurcated Bellow Contacts)
Number of Contacts:
Single Row (Single Readout)—6, 10, 15, 18 and 22
Double Row (Double Readout)—12, 20, 30, 36 and 44
Contact Spacing: .156" **Board Thickness:** .054" to .070"
Board Insertion Depth:
Single Readout Contact—.300"
Double Readout Contact—.260"

Current Rating: 5 amps
Test Voltage between Contacts: At Sea Level: 1800 VRMS
At 70,000 feet: 450 VRMS
Insulation Resistance: 5000 meg. min.
Contact Resistance: 30 millivolts max. at rated current

COMPONENT MATERIAL
Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green
Contacts: Phosphor Bronze per QQ-B-750 with .000030 min. gold plated
Polarizing Key: Nylon
Optional Threaded Mounting Insert: Brass, nickel plated
Optional Floating Mounting Bushing: Brass, cadmium plated

APPLICATION For use with 1/16" printed circuit boards requiring an edgeboard type connector on .156" centers.

SERIES 300

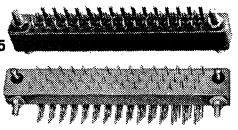


PHYSICAL and ELECTRICAL
Number of Contacts: 7, 15, 19 and 25
Contact Spacing: 0.250", staggered rows provide a .125" grid.
Contact Gauge: #20 AWG
Minimum Creepage Path between Contacts: 5/32"
Minimum Air Space between Contacts: 7/64" **Current Rating:** 7.5 amps
Breakdown Voltage: At Sea Level: 3600 VRMS
At 70,000 feet: 975 VRMS

COMPONENT MATERIAL
Contact Pin: Phosphor Bronze
Contact Socket: Phosphor Bronze
Contact Plating: Gold Plated
Guide Pins: Stainless steel, passivated
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other body material supplied upon request.

APPLICATION Where permanent mounting of male connector to printed circuit board is required with mating female connector available.

SERIES 303

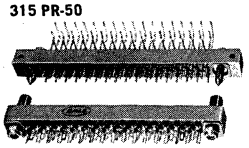


PHYSICAL and ELECTRICAL
Number of Contacts: 45
Contact Gauge: #22 AWG
Minimum Creepage between Contacts: 1/16"
Minimum Air Space between Contacts: 1/64"
Contacts, Center to Center: .050"
Voltage Breakdown, Contact to Contact and Contact to Ground:
At Sea Level: 1200 VRMS • At 70,000 feet: 325 VRMS
Current Rating: 3 amps

COMPONENT MATERIAL
Contact: Phosphor Bronze, Gold Plated
Contact Plating: Gold Plated
Studs, Pilot Pins, Washers, Nuts: Corrosion-resistant steel, passivated
Standard Body: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30F, green

APPLICATION For use in equipment requiring printed circuit connectors of the dip solder type with mating female connector.

SERIES 315

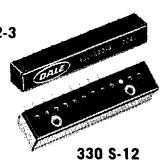


PHYSICAL and ELECTRICAL
Number of Contacts: 50
Contact Termination: Male contacts available in right angle dip solder, or solder cup termination
Contact Spacing: 0.200", staggered rows provide a 0.100" grid
Contact Gauge: #20 AWG
Minimum Creepage Path between Contacts: 7/64"
Minimum Air Space between Contacts: 1/16"
Current Rating: 7.5 amps
Breakdown Voltage, Contact to Contact: At Sea Level: 2500 VRMS
At 70,000 feet: 600 VRMS

COMPONENT MATERIAL
Contact Pin: Phosphor Bronze, Gold Plated
Contact (closed entry) Socket: Phosphor Bronze, Gold Plated
Guides and Hardware: Stainless steel, passivated
Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green

APPLICATION Designed for dip solder printed circuit applications requiring 50 contacts. Also available with solder cup termination for rack and panel applications.

SERIES 330

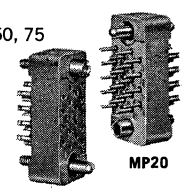


PHYSICAL and ELECTRICAL
Number of Contacts: 12
Contact Spring: .150"
Contact Size: .040" dia.
Minimum Creepage Path between Contacts: 7/64"
Minimum Air Space between Contacts: 7/64"
Current Rating: 7.5 amps
Breakdown Voltage: At Sea Level: 2500 VRMS
At 70,000 feet: 600 VRMS

COMPONENT MATERIAL
Contact Pin: Phosphor Bronze, Gold Plated
Contact Socket: Phosphor Bronze, Gold Plated
Eyelets: Brass, Cadmium Plated
Body: Phenolic, CFG (black)

APPLICATION Where permanent mounting of male connector to a printed circuit board is required with mating female connector available. Polarization available.

SERIES M20



PHYSICAL and ELECTRICAL
Number of Contacts: 7, 9, 14, 18, 20, 26, 34, 41, 50, 75
Contact Spacing: 0.150"
Contact Gauge: #20 AWG
Minimum Creepage Path between Contacts: 1/8"
Minimum Air Space between Contacts: 3/32"
Current Rating: 7.5 amps
Breakdown Voltage: At Sea Level: 3000 VRMS
At 70,000 feet: 675 VRMS

COMPONENT MATERIAL
Contact Pin: Brass
Contact Socket: Phosphor Bronze (beryllium copper also available).
Contact Plating: Gold Plated
Screwlocks: Stainless steel
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other materials available on request.
Guides: Stainless steel

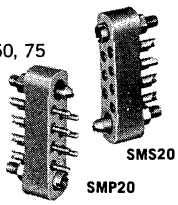
APPLICATIONS For use in instrumentation, avionics, communications, missiles, guidance systems, computers, portable equipment and test equipment.

DALE® for Optimum Value in Connectors

SERIES SM20

PHYSICAL and ELECTRICAL

Number of Contacts: 5, 7, 11, 14, 20, 26, 34, 42, 50, 75
Contact Spacing: 0.125"
Contact Gauge: #20 AWG
Minimum Creepage Path between Contacts: 5/64"
Minimum Air Space between Contacts: 3/64"
Current Rating: 7.5 amps
Breakdown Voltage: At Sea Level: 2000 VRMS
At 70,000 feet: 500 VRMS



SMS20

SMP20

COMPONENT MATERIAL

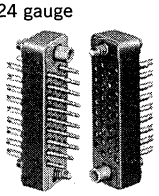
Contact Pin: Brass
Contact Socket: Phosphor Bronze. Beryllium copper also available.
Contact Plating: Gold Plated
Guides: Stainless steel, passivated
Screwlocks: Stainless steel, passivated
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other body material supplied upon request.

APPLICATIONS For use wherever space is at a premium and a high quality connector is required in avionics, automation, communications, controls, instrumentation, missiles, computers and guidance systems.

SERIES MM22 and MM24

PHYSICAL and ELECTRICAL

Number of Contacts: 5, 7, 9, 11, 14, 20, 26, 29, 34 and 44
Contact Spacing: 3/32"
Contact Gauge: MM22 Series = 22 gauge. • MM24 = 24 gauge
Minimum Creepage Path between contacts: 5/64"
Minimum Air Space between contacts: 3/64"
Current Rating: MM22 Series = 5 amps
MM24 Series = 3 amps
Breakdown Voltage: At Sea Level: 2000 VRMS
At 70,000 feet: 500 VRMS

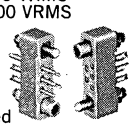


MMP22-34SL

MMS22-34SL

COMPONENT MATERIAL

Contact Pin: Phosphor Bronze
Contact Socket: Phosphor Bronze
Contact Plating: Gold Plated
Screwlocks: Stainless steel, passivated
Guides: Brass, gold plated
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other body material supplied upon request.



MMP22-5 MMS22-5

APPLICATIONS Especially suited for use in airborne, instrumentation and portable equipment applications or wherever the following requirements must be met: Minimum space and weight without sacrifice of performance, high quality materials, long service life, high vibration and shock resistance, and positive locking.

SERIES PJ

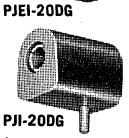
PHYSICAL and ELECTRICAL

Current Rating: 7.5 amps
Socket Contact Engages: 0.080" dia. probe

PJEI-20DG

COMPONENT MATERIAL

Standard Body: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30F, green.
Pin Contacts: Brass
Socket Contacts: Phosphor Bronze
Contact Plating: Gold Plated



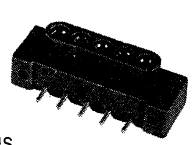
PJI-20DG

APPLICATION Printed circuit checkout and testing.

MODEL 500 SR5

PHYSICAL and ELECTRICAL

Number of Contacts: 5
Contact Spacing: 0.150"
Contact: Accepts .080" dia. probe
Current Rating: 5 amps
Breakdown Voltage: At Sea Level: 3000 VRMS
At 70,000 feet: 676 VRMS



COMPONENT MATERIAL

Contact Socket: Phosphor Bronze
Contact Plating: Gold Plated
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other materials available upon request.

APPLICATION Permanent or semi-permanent test points for checkout and testing of printed circuits.

For complete information, write or phone:
DALE ELECTRONICS, INC.

PHONE: 605-665-9301

SERIES QX32

PHYSICAL and ELECTRICAL

Minimum Creepage between Contacts: 9/64"
Minimum Air Space between Contacts: 7/64"
All male contacts are .093" in diameter. Current ratings vary only because some solder cups are made for #12 AWG and others for #16 AWG.

QX32S-1

QX32P

Voltage Breakdown Contact to Contact (#12 AWG solder cup): At Sea Level: 3300 VRMS
At 70,000 feet: 712 VRMS
Current Rating: 23 amps #12 AWG • 13 amps #16 AWG
Voltage Breakdown Contact to Contact (#16 AWG solder cup): At Sea Level: 3600 VRMS • At 70,000 feet: 750 VRMS

QX32S

COMPONENT MATERIAL

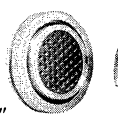
Closed Entry Socket Contacts: Phosphor Bronze*, Gold Plated
Inserts and Hardware: Stainless steel, passivated*
"O" Ring: Synthetic rubber **Boot:** Neoprene
Body Material: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30F, green. Consult factory for other materials.
For use with QX32S, a shorting plug to ground static electricity is available. Contact factory for details.
*Contact factory. Beryllium copper can be specified to ordinance drawing 10182288.

APPLICATION Used in the firing system of missiles.

SERIES 400 and 401

PHYSICAL and ELECTRICAL

Voltage Breakdown, contact to contact:
At Sea Level: 2000 VRMS
At 70,000 feet: 500 VRMS
Minimum Creepage Path between Contacts: 5/64"
Minimum Air Space between Contacts: 3/32"
Contacts, center to center: .150"

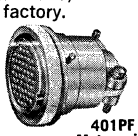


400PF

400RM

COMPONENT MATERIAL

Molded Body: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30F, green. For other materials, contact factory.
Hood: Aluminum, anodized (on 401PF)
Shells, Mounting Nut and Coupling Nut: Aluminum, clear anodized.
Contact Pins: Brass, Gold Plated
Contact Socket: Phosphor Bronze, Gold Plated
Lock Ring: Brass, cadmium plated
Retaining Ring: Stainless steel **Protective Cap:** Polyvinyl



401PF
Mates with Series 400RM

APPLICATION Series 400: For use in equipment requiring a 41, 51 or 55 pin sealed connector, with a mating non-sealed female connector. **Series 401:** For identical applications where hood is required. Mates with Series 400RM connectors.

SERIES S20

COMPONENT MATERIAL

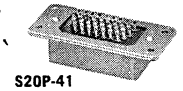
Molded Body: Orlon-filled diallyl phthalate per MIL-M-14F, Type SDI-5 (blue), furnished as standard.
Contact Pin: Brass, Gold Plated
Contact Socket: 4 tine beryllium copper, gold plated
Coaxial Insulator: Teflon
Coaxial Socket Body: Brass, silver plating standard. Gold also available.
Coaxial Socket Contact: Beryllium copper, gold plated
Shell and Retaining Plate: Aluminum, cadmium plated and gold iridited

Coaxial Contacts are for use with Adapter No. 2710-10 by Cannon or No. 5988 by Greymar and fit RG 188/U cable.

S20P-41 and S20S-41

PHYSICAL and ELECTRICAL

Minimum Creepage Path between Contacts: 1/8"
Minimum Air Space between Contacts: 1/16"
Contacts, center to center: 3/32"
Ambient Temperature Range: −67° F to +250° F
Approximate Weight: S20S-41 = 1.5 oz.
S20P-41 = 1.0 oz.



S20P-41

S20S-41

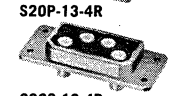
Voltage Breakdown, contact to contact: At Sea Level: 2500 VRMS
At 70,000 feet: 600 VRMS
Current Rating: 10 amps

S20P-13-4R and S20S-13-4R

PHYSICAL CHARACTERISTICS

Minimum Creepage Path between Contacts: 7/64"
Minimum Air Space between Contacts: 1/16"
Contacts, center to center: .150"
Ambient Temperature Range: −67° F to +250° F
Approximate Weight: S20P-13-4R = 1.8 oz.
S20S-13-4R = 1.3 oz.

S20P-13-4R



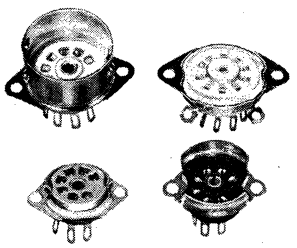
S20S-13-4R

Eby™

BINDING POSTS, CONNECTORS, SOCKETS

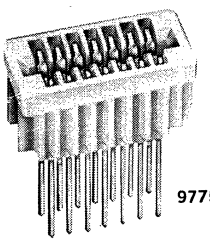
custom connecting devices...

SOCKETS



7, 8 and 9-Pin Miniature Sockets. To MIL-S-12883A or commercial requirements. Contacts: brass, phosphor-bronze or beryllium-copper, with various finishes. Mica-filled, general purpose phenolic or ceramic. Top mount, bottom mount, split-saddle or shield base versions. 4 ground lugs available in bottom mount version. Various mounting centers.

P.C. CARD EDGE CONNECTOR



9775-89

Miniature Card-Edge Connector designed for automatic solderless wrap connections.

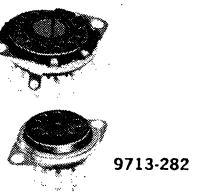
Specifications:

Housing: Glass filled nylon.

Contacts: Beryllium-copper, gold over nickel-plated, on 0.100 centers, 0.025 square tails.

Accepts a 0.062 thick P.C. board.

SOCKETS



9878-1

9713-282

Compactron Socket, #9878-1. Accommodates any Compactron tube. Top or bottom mount saddle. 4 ground lugs on bottom mount optional. 1 5/16" centers. Mica-filled or general purpose phenolic.

10-Pin Socket, #9713-282. Accepts new 10-Pin tube. Top or bottom mount. 4 ground lugs on bottom mount optional. Mica-filled or general purpose phenolic.

SOCKETS

119 Series

9718 Series

119 Connector. 1 to 5 contacts. 7/8" mounting centers.

9718 Series. Up to 12 contacts. 1 5/16" mounting centers. Many combinations available without tooling.

(Mating plugs available for all models)

UNIVERSAL BINDING POSTS

9738-19 9766-150-1 7186

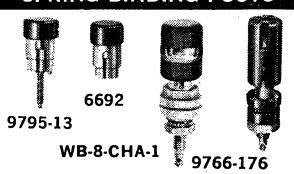
Multi-type. Accepts banana plug. "D" insulators for keyed mounting. Non-removable tops. Red or black phenolic.

#9738-19 — Rated 30 amps at 1000V. Nickel-plated brass.

#9766-150-1 — Miniature. Extends only 51/64" from panel when closed. Max. dia., 17/32". Gold flash on nickel-plated brass.

Twin Assemblies, #7186. Boss insulates posts from panel. 7/8" mounting centers. 6-32 molded-in stud. 1/2" dia. non-removable tops. Brass and phenolic.

SPRING BINDING POSTS



6692

9795-13

WB-8-CHA-1

9766-176

Quick connections. D-shaped hole for uniform tension across wire. Accepts phono-tip. Threaded stem and dowel optional. Nickel-plated brass. Red or black phenolic caps.

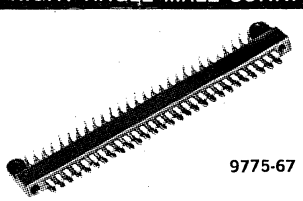
#9795-13 — with stem and dowel.

#6692 — without stem or dowel.

#WB-8-CHA-1 — To Signal Corps spec. U 106/U. Watertight. Can also be produced to MIL-P55149/8.

#9766-176 — Miniature, watertight. Meets MIL-P-55149/7 Max. dia. 0.40". High impact strength nylon plastic body.

RIGHT ANGLE MALE CONN.



9775-67

Designed primarily for terminating printed circuit boards into wire-wrap plates on military air-borne and ship board electronic equipment, this header also has numerous commercial applications.

Specifications:

Insulator: Diallyl phthalate.

Contacts: Brass, gold over nickel-plated, on 0.100 square grid.

Available in 34, 40 and 50 contact configurations.

TRANSISTOR SOCKETS

9866-13-6 9866-13-4

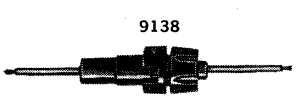
Designed for JEDEC series transistors. One-piece integral saddle design. Speedy assembly with rivets or #2 screws. Contacts are silver-plated beryllium copper with gold flash. Mica-filled phenolic sockets meet MIL-M-14 MFE specs.

POWER TRANSISTOR SOCKET

9866-15-1

For to -3 power transistors. Special design permits **complete** electrical isolation of base connection. 1-piece molded construction of high impact Bakelite.

FUSE HOLDER

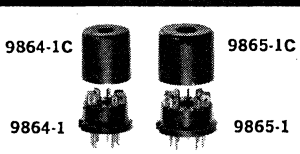


9138

Heavy-duty Holder. Housing, #9138. Cap, #9137. Solder or crimp-type contacts. General purpose phenolic.

Springs according to type of fuse. Assembled or unassembled. Can also be supplied in thermoplastic nylon.

ADAPTORS



9864-1C 9865-1C

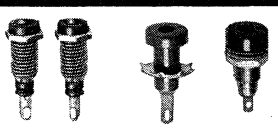
9864-1 9865-1

Converts any 7 or 9-Pin miniature socket into a connector. Brass cadmium contacts, mica-filled or general purpose phenolic.

7-Pin Socket, #9864-1
Cap, #9864-1C

9-Pin-Socket, #9865-1
Cap, #9865-1C

TIP JACKS



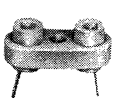
9768-17 7115 9768-13

Metal Jack, #9768-17. Beryllium-copper contacts. Nylon insulator in wide range of colors.

Molded Jack, #7115. Red or black general purpose.

Metal Jack, #9768-13. Brass body. Phosphor-bronze contacts. Cap in red or black phenolic. Locking nut and insulation washer available.

SOCKETS



9748-1

Crystal Socket (TS0205C01), #9748-1. Glazed Steatite per JAN-1-10. Meets MIL-S-12883A. Contacts: phosphor-bronze or beryllium copper, silver-plated. Also available in black general purpose and mica-filled low loss.

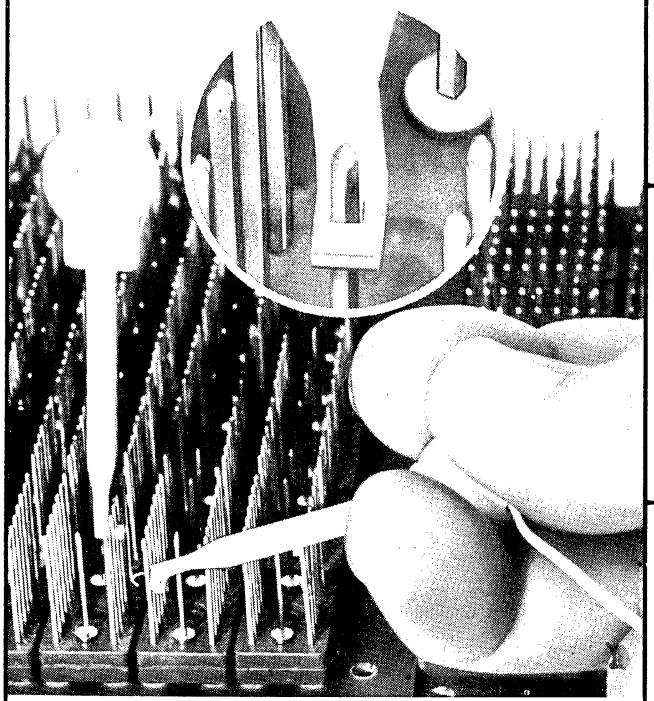
EARNED LEADERSHIP IN THE ELECTRONICS INDUSTRY THROUGH RELIABLE, QUALITY PRODUCTS

E-Z-HOOK® THE IMPOSSIBLE HOOKER



Now, jumper or test your Wire-Wrap* circuits easily and instantly with E-Z-HOOK connectors. Miniature reliable clip with spring action insures secure connection, making miniature hook-ups short-free and efficient. Saves time, cuts cost.

E-Z-HOOK "Hypo-Action" slides vertically onto Wire Wrap pins or hooks on laterally. Features beryllium copper, gold plated conductor with insulated durable Nylon body to point of contact.

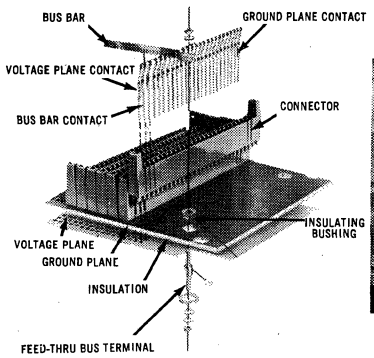
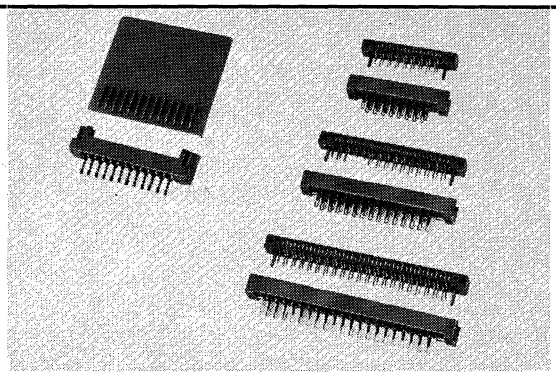
Total Connector Capability from the Innovator:



METAL PLATE BACK PANEL CONNECTORS AND WIRING SERVICE

The metal plate connecting system is the modern day method for mounting and interconnecting electronic components. Most dramatically used in the computer equipment field, this packaging system provides a high density system compatible with automatic wiring methods. The metal plate system is modular in concept and Elco has a wide assortment of standard parts we'll assemble and wire to your particular needs.

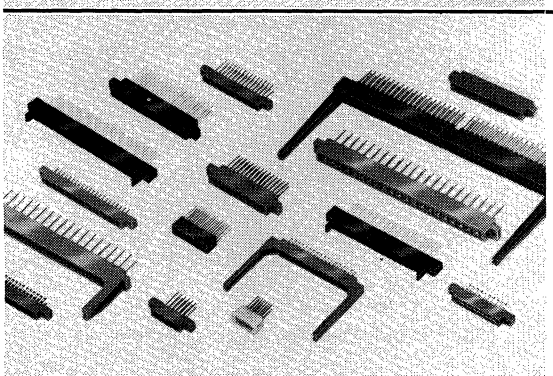
Request Catalogue MPR



METAL-TO-METAL PRINTED CIRCUIT CONNECTORS MINIATURE AND SUBMINIATURE

Three specifications (MIL-E-5400, MIL-E-8189, and MIL-T-21200) require two-piece metal-to-metal printed circuit connectors in airborne equipment. VARICON™ connectors are metal-to-metal and provide a multitude of options: contact spacings of .050", .075", .100", .156" and .200"; terminals for wire wrap, crimp, solder, and taper tab; connector sizes from 2 to 152 contacts.

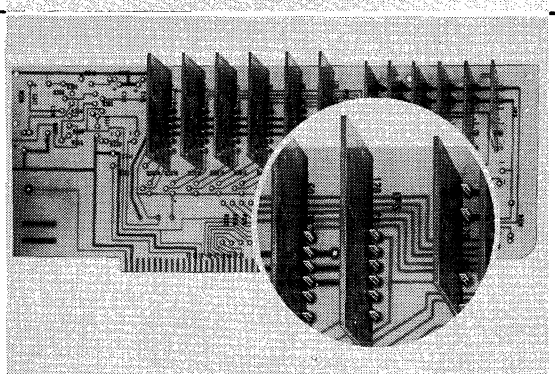
Request Catalogue PCR



CARD-EDGE PRINTED CIRCUIT CONNECTORS

Card-edge connectors mate directly with the printed circuit card, and are available in a wide range of sizes (4 to 100 contacts), configurations, and contact spacings (.100", .125", .150", .156", and .200"). Optional means for terminating include wire wrap, solder, and taper tab. Other options include: connectors with or without card guides; various mounting provisions — threaded inserts, floating eyelets, force fit hubs, and standard mounting holes.

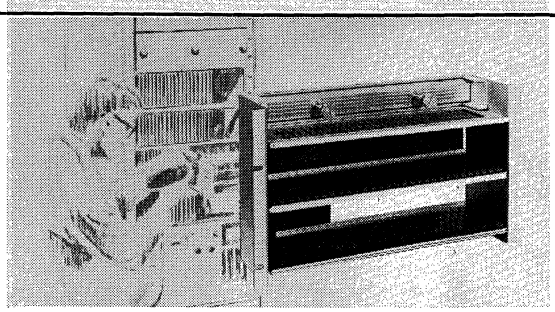
Request Catalogue CER



BOARD-TO-BOARD PRINTED CIRCUIT CONNECTORS

Make your connections with a total system (the Elco system). Whether your p.c. boards are perpendicular, parallel, or even tandem to each other, we have the right type, connector size, and contact spacing (.100", .125", .150", .156", and .200"). Each and every type uses, exclusively, the VARICON™ contact, a two-piece (metal-to-metal) contact complying fully with the latest revision of MIL-E-5400, MIL-E-8189, and MIL-T-21200.

Request Catalogue BBR



PRINTED CIRCUIT CARD ENCLOSURES

The Elco VARIPAK® II enclosure is a highly versatile device for packaging printed circuit cards and connectors. Made of rugged aluminum, the Varipak can be used in storage cabinets, pull-out drawers, and even as the framework for small instrument panels. The Varipak's construction allows air flow throughout the unit, aiding in longer component life. There are 32 standard sizes available with basic parts stocked at all authorized Elco distributors.

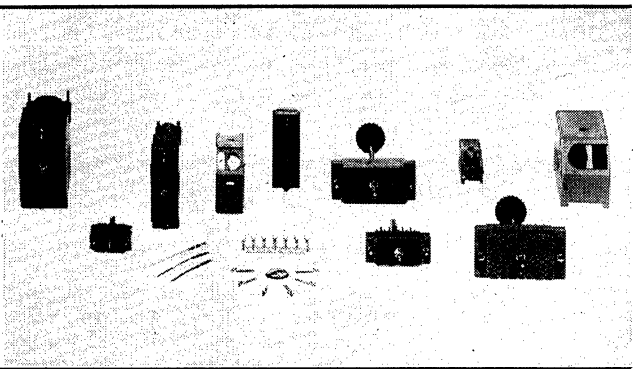
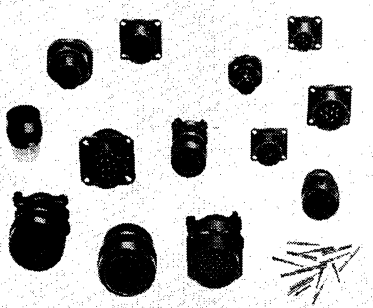
RECTANGULAR RACK AND PANEL CONNECTORS



Elco's full line of rack-and-panel and I/O (input/output) connectors come in a wide choice of styles. With standard, miniature, and even modular styles you can have from 2 up to 140 VARICON™ contacts, or practically any size in between. We've just created a family of high-density connectors (.100″ and .125″ spacing) engineered for high reliability (including military) as well as controlled-environment applications.

Request Catalogue RPR

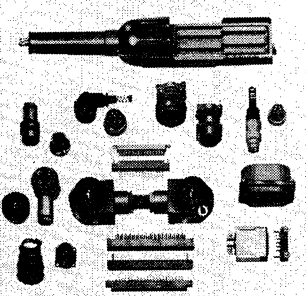
MIL-C-26482 MIL-C-26500 CIRCULAR CONNECTORS



Elco supplies both MIL-C-26482 (Navy) and MIL-C-26500 (USAF) circular connectors. MIL-C-26482 environment-resisting, quick-disconnect connectors are equipped with solder or crimp contacts; available in a choice of nine shell sizes with 3 to 61 contacts. MIL-C-26500 connectors are designed to be essentially voidless in order to withstand environmental extremes encountered by missiles and space vehicles. Equipped with crimp contacts, the connectors are available in nine shell sizes with 2 to 61 contacts.

Request Catalogue CCR

MILITARY SPECIFICATION CONNECTORS



Elco manufactures a full line of connectors designed to and meeting strict military system specifications. Connector types are: MIL-C-21097 and MIL-C-55302 printed circuit connectors; MIL-C-12520, MIL-C-26482, MIL-C-26500, MIL-C-55181, MIL-C-55243, and U-344/345 power connectors; MIL-C-10544, MIL-C-55074, and MIL-C-55116 communications connectors; MIL-C-23216 and MIL-C-26636 contacts.

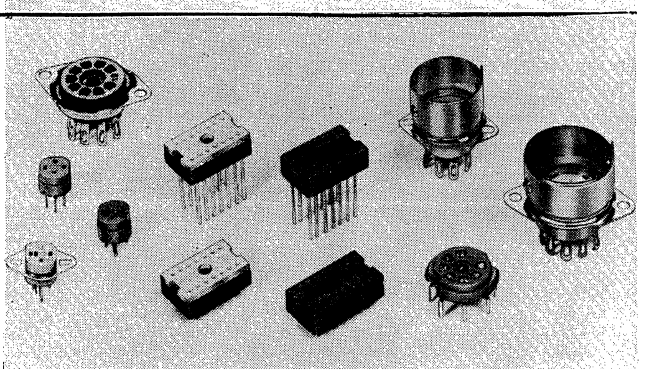
DIP TRANSISTOR AND TUBE SOCKETS



DIP, transistor, and tube sockets; all manufactured by Elco and all exhibiting the high quality expected of an Elco product. State-of-the-art design, stringent raw material control, and advanced manufacturing techniques all contribute to the exceptional performance of Elco high-reliability sockets. See our catalogue for 14- and 16-pin DIP sockets, 7- and 9-pin tube sockets, transistor sockets, relay sockets, and crystal sockets.

Request Catalogue CSR

CONNECTOR INSTALLATION TOOLS

Elco provides all of the necessary equipment to install their connectors. Our automatic and manual contact staking tools firmly affix the contact to the printed circuit card, producing exceptional electrical as well as mechanical contact. Our automatic and manual crimping tools join contact to wire by mechanically deforming the contact around both the conductor and the insulation of the wire. All installation tools are engineered to provide long, efficient service.

EMC Standard/Custom Wire Wrap* Panels

WITH *Nurl-Loc*® LOW-PROFILE TERMINALS

EMC's new Wire-Wrap* packaging panels utilize high-density, non-warping glass epoxy board and low-profile Nurl-Loc terminals (patent pending). The board below is available in a space-saving 1/16" thickness, as well as 3/32" and 1/8" . . . in a standard or custom configuration. Other choices include 30 to 352 positions, edgeboard finger patterns, power and ground planes, in many combinations. Below right is the new EMC Universal Wire-Wrap* panel, for all standard IC's with 14 to 40 leads . . . with 9 to 54 parallel rows (in convenient groups) on .300" centers . . . all 100-grid spacing.

EDGE-PAC™ CONNECTOR BACK-PANELS

EDGE-PAC back-panels are printed circuit edge card connectors mounted on 1/8 inch thick epoxy glass board back-panels. This provides a rigid assembly which is designed for the interconnections to be made economically by automatic point-to-point wiring. The connectors accept 1/16 inch thick PC boards and are designed to provide any number of contacts without additional tooling. In short, we can provide any number of contacts without the expense of specials.

The use of glass epoxy G-10 material as the back-panel allows wiring to be etched on the panel. Voltage and ground planes or additional interconnecting wires are easily provided according to customer specifications.

Unique design of connector provides completely closed entry to protect the preloaded contacts from damage. Standard and custom sizes available with gold plated contacts for corrosion protection.

EDGE-PAC™ SPECIFICATIONS

Contact Material:	Phosphor bronze per QQB750 Composition A
Contact Plating:	10 to 20 microinches of gold over 30 to 150 microinches of nickel (standard)
Contact Resistance:	6 milliohms maximum
Current Rating:	5 amperes maximum
Withdrawal Force:	2 to 8 ounces per contact pair
Insulator Material:	Glass filled Polycarbonate (flame-retardant)
Insulation Resistance:	5,000 Megohms minimum
P. C. Card Size:	.062 (±.007) thick
Contact Retention:	8 pounds minimum
Operating Temperature:	−65°C to 125°C

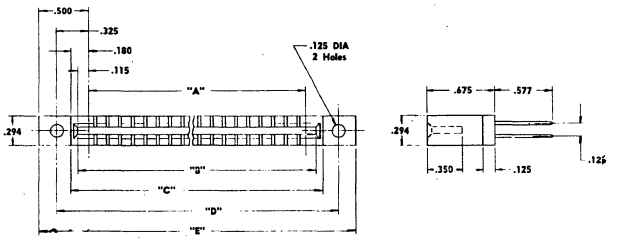
EDGE-PAC™ PRINTED CIRCUIT CONNECTORS

The EDGE-PAC connectors used on the EDGE-PAC back-panels can also be provided as discrete edge card connectors for individual 1/16 inch PC boards. The connectors are provided with .025 inch square tails for automatic point-to-point wiring. All connectors have dual-readout, preloaded, bifurcated contacts with a closed entry to protect the contacts from damage.

The design permits supplying any number of dual readout contacts in the connector that the designer needs without special tooling expense. In effect, the designer can select the number of contacts he actually needs rather than being bound by a connector manufacturer's arbitrary standards.

Contacts are gold plated over nickel plating on phosphor bronze for corrosion resistance. A polarization key can be provided without the loss of any contacts.

EDGE-PAC™ CONNECTOR DIMENSIONS



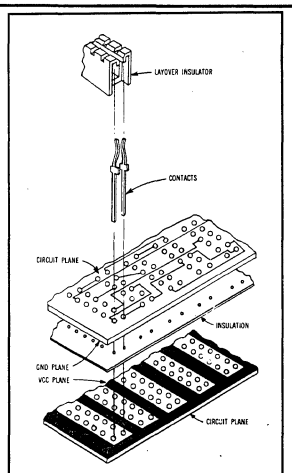
A = Number of Contacts Minus One Times .125
B = A + .230
C = A + .360
D = A + .650
E = A +1.000

ELFAB MULTI-PAC™ PROCESS

MULTI-PAC is a process designed to produce a multi-layer back panel at a very low cost. It will permit a drastic reduction or possibly complete elimination of automatic point-to-point wiring, at a great cost saving. It can be made a part of either the EDGE-PAC back-panels or the DIP-PAC socket boards.

Discrete printed circuit boards are used. Two or more are stacked and the DIP-PAC or EDGE-PAC contacts are pressed into plated-thru holes in the boards. The contacts serve two functions: to mechanically fasten the boards together and to make the electrical connections between the printed wire layers. Great savings are realized because no problems are encountered with adhesive bonding and circuit hole registration. Manufacturing is as simple as making a conventional two sided board.

The greatest savings are realized by the reduction or eliminating of the need for wrapping wire. Savings of as much as 80% of the wiring costs can be achieved with the MULTI-PAC process.



DIP-PAC™ DUAL-IN-LINE I. C. PACKAGING BOARDS

The ELFAB DIP-PAC System offers the ultimate in dual-in-line I.C. packaging density, flexibility, and reliability. The I. C. is inserted upside down, with leads pointing up. This overcomes the difficulties usually associated with standard I. C. sockets, where the lead may be bent and miss going in the socket causing a misconnection which is very difficult and time-consuming to locate. With DIP-PAC, production time and trouble-shooting are reduced to the bare minimum.

Better contact with the I. C. lead is made than with the standard socket. Mixtures of 14, 16, 24, 36, and 40 lead I. C.'s can be inserted in the standard boards. Custom lay-out of boards is easily accomplished without expensive tooling. Ground and voltage planes are provided as standard. Actually an I. C. with any number of leads can be easily accommodated without modification to the standard boards.

I. C.'s are spaced on .400 inch centers allowing a 25% more dense packaging than conventional sockets. Wiring tails are accurately positioned to permit automatic point-to-point wiring. Standard board sizes are shown in table below.

No. of Sockets	14 Lead Part Number	16 Lead Part Number	Length Inches	Width Inches	No. of 1/0 Connections
30	1014-DPI-30	1016-DPI-30	2.675	6.875	42

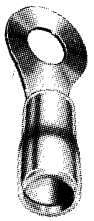
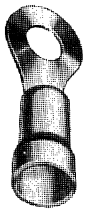
WIRING DEVICES FOR EVERY NEED

TERMINALS & SPLICES

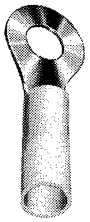
- Wire Ranges: #26 thru 1000 MCM, Loose Piece. Mounted on Tape or in Continuous Strips in #26 thru 10 sizes
- Tongue Types: Ring, Rectangular, Spade, Flanged Spade, Hook and Slotted Ring
- Approvals: Terminals are Covered by UL., CSA and Military Specifications, where Applicable



AVIKRIMP® — Tin-plated brass sleeve strengthens barrel. Color coded Nylon insulating sleeve adds more wire protection. Operating temperatures: continuous duty— —40°F to 250°F, intermittent duty — to 350°F. WIRE RANGE: #26-10

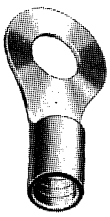


INSULKRIMP® — PVC insulation sleeve permanently attached to butted seam barrel (#22-10) or brazed seam barrel (#8-2). Operating temperatures: continuous duty— —40°F to 167°F, intermittent — to 300°F. WIRE RANGE: #22-2

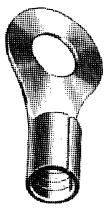


NYLAKRIMP™ — Ideal for larger wire applications involving temperature extremes and vibration. Rigid, overhanging Nylon insulating sleeve covers silver-brazed barrel. Withstands continuous duty temperatures from —60°F to 250°F. WIRE RANGE: #8-4/0

VIBRAKRIMP® — Made for excessive vibration applications. Seamless tin-plated brass sleeve covers basic KRIMPTITE barrel. Its overhang prevents wire flex. Single crimp terminates wire. WIRE RANGE: #22-10



VERSAKRIMP™ — Has silver brazed barrel. Seam will not open under stress or wire pull. Crimps using many types of tooling. Ideal for solid or stranded wires. WIRE RANGE: #22-4/0 Seamless barrel in Wire Sizes 250 MCM to 1000 MCM.



KRIMPTITE® — One piece, non-insulated design. Ideal general purpose terminal for uses where special features are unnecessary. Full length barrel makes crimping easy. WIRE RANGE: #26-10

BUTT SPLICE — Accepts stripped wires from each end. Wires "butt" in center. A crimp at each end provides secure connection. Available in insulated and non-insulated styles. WIRE RANGE: #22-4/0

PARALLEL SPLICE — Stripped wires insert from each end and lie side - by - side. Single crimp in center forms a secure connection. Available in insulated and non-insulated styles. WIRE RANGE: #22-4/0

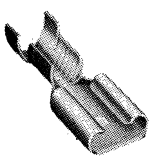
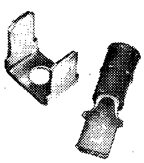
QUICK CONNECTS

- Female Receptacles and Male Tabs



PDQ™ quick connect receptacle terminals handle 26-12 AWG wires and .110 x .020, .110 x .032, .187 x .020 and .250 x .032 inch male tabs. Insulated or non-insulated barrels. Available loose piece, on tape or continuous strip. Meet N.E.M.A. and U.L. standards.

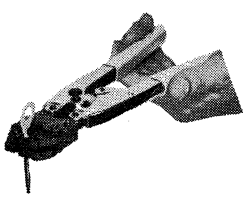


Male tab terminals and single or twin tab lugs fit PDQ receptacle terminals perfectly. Lugs have standard 180°, 90°, 45° angles. Custom angles available. Single, dual or custom mounting holes. Tabs are .250 thru .110 inches wide.

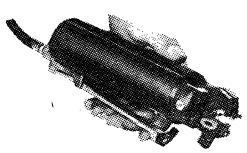
SEND FOR CATALOG PDQ-1

CRIMPING TOOLS

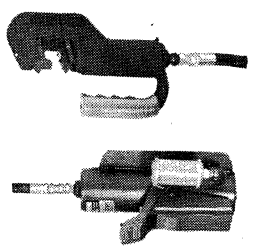
- Hand Operated and Semi-automatic . . . Matched-to-terminal Designs . . Free 30-day Evaluation Trials



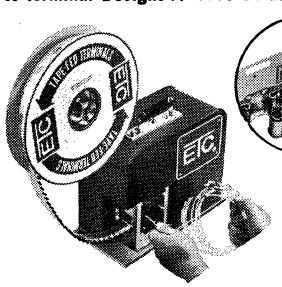
RATCHET HAND TOOLS — Special ratchet mechanism won't allow terminal to be released until fully crimped. Handles terminals and splices from #26 thru #10 AWG.

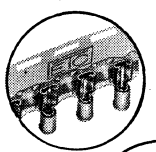


PORTABLE AIR TOOLS — 27 oz. AT-200 hand tool uses standard air pressure to crimp #26 thru #6 AWG terminals and splices. Bench adapter accessories available.

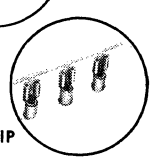


AIR-HYDRAULIC TOOL — Compact PUTT-PUMP™ operates on standard air pressure to crimp #8 thru #1/0 wires. ELECTRIC-HYDRAULIC RAPID-PUMP™ crimps #8 thru #4/0 wires.





TAPE



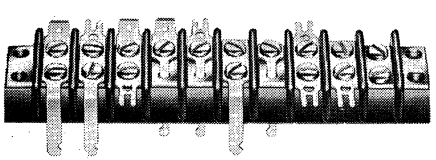
STRIP

AUTOMATIC FEED TAPE AND STRIP PRESSES — Terminals are loaded into crimping dies automatically. Cycled for up to 3,600 terminations per hour. Crimps #26 thru #10 AWG sizes. Air and electrically operated models.

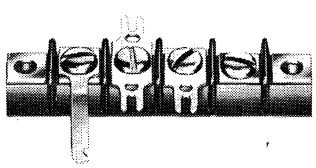
SEND FOR CATALOG CT-2 and CATALOG Z-100.

TERMINAL BLOCKS

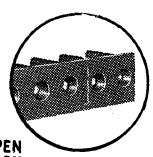
- Closed Back . . . Open Back . . . Military Blocks



CLOSED BACK

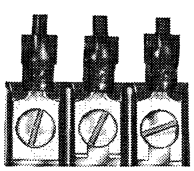


TWIN SCREW — Choose closed back design with molded-in plates and protected mounting holes. Or open back design. Rated 5 to 30 amps. Complete selection of lugs and hardware.



OPEN BACK

SINGLE SCREW — These blocks weigh less and occupy less space. Same design features as their twin screw counterparts. 5 to 30 amp. rating. Full selection of lugs and hardware.



TERMINAL BLOCK TERMINALS — Match-fitting to blocks assures reliability in sizes 26 thru 10 AWG. Spade, Flanged Spade and Rectangular tongues are 3/16", 13/64", 21/64" or 27/64" wide.

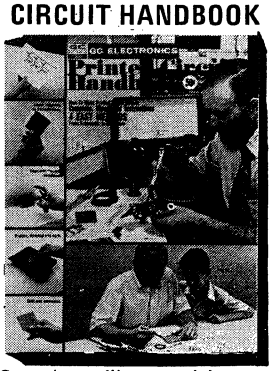
PRINTED CIRCUIT HANDBOOK



Complete, illustrated instructions of how to make printed circuit boards. Show four easy methods...from schematic to assembly; including the new "B" neg. drafting system.

...we wrote the book on it.

PRODUCT DIVERSIFICATION — Over 10,000 electronic products are manufactured, using the latest in machinery, in our 350,000 square-foot plant in Rockford, Illinois, and warehoused in Los Angeles and New York. Electronic chemicals, hardware, tools, service aids, test equipment, antennas, phono drives, chassis punches, and audio accessories are only a few of the products numbered in GC-Electrocraft product line.

RESEARCH AND DEVELOPMENT — GC's complete facilities, highly trained and skilled personnel enable us to develop and manufacture the ultimate in precision component parts. New products are developed and introduced regularly, many just to meet industry's specifications.

GC ELECTROCRAFT COMPONENTS ARE QUALITY PRODUCTS — designed, engineered and manufactured to meet the most exacting standards. GC Electronics' over 40 years of experience in the electronics industry is your assurance of satisfaction.

EXACT SPECIFICATIONS — Electrocraft components are manufactured to meet rigid standards as well as government material product specifications. GC regularly supplies hundreds of items to Federal Stock Numbers.

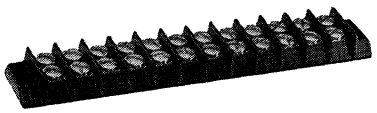
TERMINAL BOARDS

CR151 TYPE D ONE-PIECE BOARDS

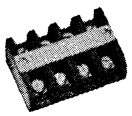


Eight terminal types.
Three board width — 7/8 in., 1 1/8 in., 1 5/16 in.

Boards rated 15, 20, and 30 amperes with breakdown voltages of 3600, 4800, and 7500 volts, respectively.
15-amp boards available in increments of 1 through 36 points; 20-amp boards in 1 through 30 points; 30-amp boards in 1-24 points.
Terminals on 15-amp boards accept through size #14 wire; 20-amp boards through size #12 wire; 30-amp boards through size #10 wire.
Choice of marked or unmarked boards or six types of marking strips.

Write for Bulletin GEA-7317

CR151 TYPE B ONE-PIECE BOARDS



Rated 30-amperes, 600-volts for control circuits.
Available with 4-, 6-, and 12-points.
Screw, captive saddle-clamp, or screw terminals on one side, clamp terminals on the other.
Terminals accept wires through size #10.
Write-on marking strips, 15/32-in. wide, provided with boards.

CR2960 ONE-PIECE BOARDS

Control circuit boards rated 20-amperes at 600-volts; available with 4- and 6-points.

Power circuit boards rated 50-, 100-, and 150-amperes at 600-volts; available with 3 points per board.

All types have screw terminals.

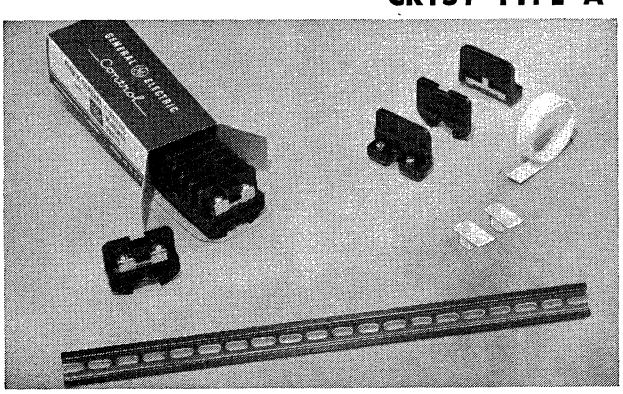
CR151 TYPE C SECTIONAL BOARDS

Can be mounted directly on panel (top) or in a channel (bottom) which is then mounted on panel.

Small CR151 Type C terminal boards provide two-way mounting and assembly flexibility. When the board has been assembled, you can mount it directly on a panel or you can assemble blocks in molded channels on applications where maximum flexibility is required. Blocks can be added after initial installation to meet increased requirements in control circuits.

These terminal boards can be ordered in three ways: 1) as individual blocks, 2) as factory-assembled blocks without channel, 3) as factory-assembled blocks in mounting channel based on specification.
Complete line of components for customer assembly.
Choice of three 25-amp terminal types and two 50-amp terminal types.
Both boards meet IEEE switchgear standards for 750 volts.
Screw terminals accept 5/16 in. ring or spade connectors, #22 - #12 wire.
25-amp box terminals accept #18 - #8 wire; 50-amp box terminals accept #10 - #4 wire.
25-amp box clamp terminals accept #22 - #10 wire; 50-amp clamp box terminals #14 - #4 wire.
Interlocking construction . . . blocks slide together.
25-amp blocks are 1 in. high, 1 1/8 in. wide; 50-amp blocks are 1 7/16 in. high, 1 1/2 in. wide.
Easy addition of blocks provides expansion flexibility.
Panel or channel mounting.
Factory-assembled forms for direct mounting in 2 through 12 point sections for 25-amp forms and 2 through 6 for 50-amp forms; for channel mounting, 2 through 99 points.
Choice of painted surface or separate marking strip.

CR151 TYPE A SECTIONAL BOARDS

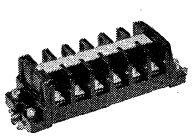


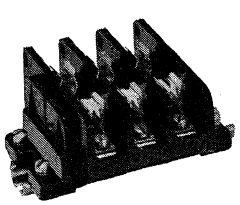
Components for customer assembly

From three basic components, you can build custom boards to meet most terminal board requirements:
- Mounting track — in lengths from 3 1/2 to 48 inches.
- Terminal blocks — ten types are available.
- Mounting assembly kit — contains two end blocks, one standard size barrier, two nylon guide inserts, and one 16-inch marking strip.

Additional blocks or blocks with different terminals can be added to existing boards.
Ten types of terminal blocks available.
Blocks rated 25-, 50-, 125-amperes.
30-amp fuse blocks, 15-amp isolating switch blocks offered.
25-amp forms accept #16 through #10 wire; 50-amp forms accept #14 through #4 wire; 125-amp forms accept #14 through #0 wire.
Adaptor kit available for installing overload relays.
Fanning strip accessory holds wires for fast, easy connection.
Marking strip can be marked with pencil or ink; can be cut to any length required.

Factory-assembled boards





74 standard factory-assembled boards with two through 36 points are available to meet most applications. All terminals on any one board are of the same type, and all boards are complete with marking strip ready for panel mounting.

For complete information contact your nearby GE Sales Office, or write to General Electric Co., Section 998-80. Schenectady, N. Y. 12305.

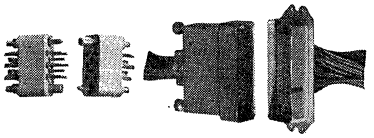
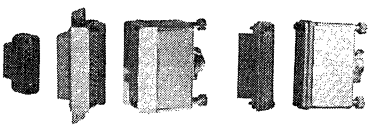
RECTANGULAR, RACK AND PANEL CONNECTORS



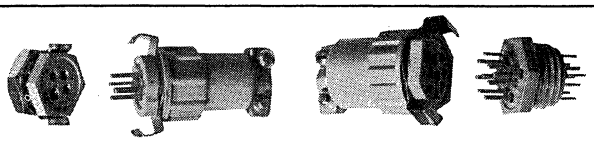
GM Series and XGM Series, Miniature Rectangular

Number of Contacts. 7, 8, 9, 14, 18, 20, 21, 26, 34, 41, 50.
Contacts. Rated 7.5 amps, copper alloy, gold plated.
Terminations. Solder cup accepts 20 AWG wire.
Insulator. Glass filled DAP, SDG-F.
Polarization. Guides or rotating threadlocks as desired.
Hoods & Shells. Available all size connectors. Hoods have both top and side cable opening.
Underwriters' Laboratory Approved.



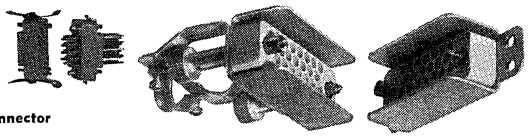
GMCT Series, Miniature, Rectangular Removable Contact

Number of Contacts. 14, 18, 20, 26, 34, 66, 75, 104.
Removable Contacts. Rated 13 amps and 7.5 amps, copper alloy, gold plated.
Contact Terminations. Solder crimp and wire wrap, accepts 14 to 30 AWG wire.
Insulator. Glass filled DAP, SDG-F.
Polarization. Guides or rotating threadlocks as desired.
Hoods & Shells. Available all size connectors, hoods have both top and side cable opening.
Underwriters' Laboratory Approved.



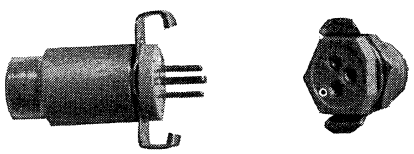
GH Series, Miniature Hexagonal

Number of Contacts. 4, 5, 7, 9, 10
Contacts. Rated 7.5 amps, copper alloy, gold plated.
Terminations. Solder cup accepts 20 AWG wire, dip solder. .025 dia. for PC board mounting.
Insulator. Glass filled DAP, SDG-F.
Polarization. Body design permits proper engagement only.
Hoods. Plastic and aluminum, with and without strain relief.
Accessories. Vibration locks, mounting nuts, and washers.



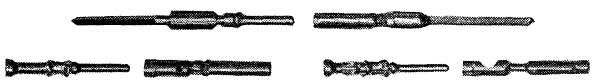
GCT Series, Economy Removable Contact Connector

Number of Contacts. 14, 20, 26, 34, 50, 75, 104.
Removable Contacts. Rated 13 amps and 7.5 amps, copper alloy, gold plated.
Contact Terminations. Solder crimp and wire wrap, accepts 14 through 30 AWG wire.
Insulator. Glass filled Phenolic, flame retardant.
Polarization. Guides and rotating threadlocks as desired.
Shells. Plug shells and receptacle shell bracket for all sizes.
Strain Relief. Open style strain relief for all sizes.



MGH Series, Subminiature Hexagonal

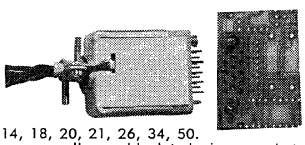
Body. 5/16 hexagonal glass DAP, SDG-F. Mated pair including hood, under one inch in length.
Contacts. Three only, gold plated copper alloy, solder cup accepts up to 22 AWG wire, 5 amps current rating.
Polarization. Oversized pin allows proper engagement only.
Hoods. Aluminum hood may be used on either plug or receptacle.
Accessories. Vibration locks, and mounting nuts.



Contacts, Removable Solder, Crimp, Wire Wrap

Removable contacts are for use with GMCT and GCT series connector bodies. Contacts are machined copper alloy, gold plate over copper flash. Crimp and solder styles are sized to accept from 14 to 30 AWG wire. Wire wrap terminations are .045 and .025 square. Crimp and solder styles are available in both. .062 and .040 pin diameters. Wire Wrap only .062 dia.
Contacts may be purchased on reels of 2,000 for automatic installation. Contact installation and crimping tools available from stock.

PRINTED CIRCUIT CONNECTORS

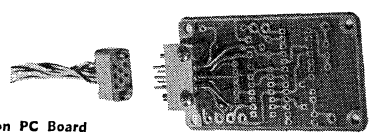


GM Series, Perpendicularly Mounted on PC Board

Number of Contacts. 7, 8, 9, 14, 18, 20, 21, 26, 34, 50.
Contacts. Rated 5 amps max., copper alloy, gold plated pin or socket type.
Termination. Dip solder .025 dia., 4/32, 5/32, and 6/32 long.
Insulator. Glass filled DAP, SDG-F.
Guides and Threadlocks. Used for polarization and mechanical mounting of connector to PC board.
Hoods. Available for all sizes of mating cable connector.
Mating Connector. Select from GM or GCT series.
Underwriters' Laboratory Approved.

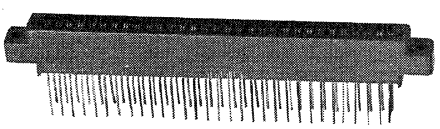
PCSD Series, Double Row, Card Receptacle .156 Centers, Solder Type

Number of Contacts. 15/30, 18/36, 22/44.
PC Board Thickness. .054 through .071.
Contacts. Bellows, gold plated phosphor bronze, 5 amps rating.
Insulator. Glass filled DAP, SDG-F.
Polarization. Between contacts.
Mounting. Clearance hole, bushing, or threaded inserts.



GMPL Series, Parallelly Mounted on PC Board

Number of Contacts. 8, 10, 16, 19, 37.
Contacts. Rated 5 amps max., copper alloy, gold plated, pin type.
Termination. Dip solder .040 and .025 dia.
Insulator. Glass filled, DAP, SDG-F.
Guides and Threadlocks. Used for polarization.
Mounting. Holes in connector body allow for fastener mounting to PC board.
Hoods. Available for all sizes of mating cable connector.
Mating Connector. Must be socket, select from GM or GMCT Series.

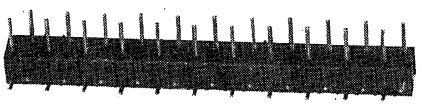


PCWD Series, Double Row, Card Receptacle .100 Centers, Wire Wrap, .025 Square

Number of Contacts. 22/44, 30/60, 43/86.
Contacts. Bellows type, gold plated phosphor bronze, 5 amps current rating.
PC Board Thickness. .054 through .071.
Insulator. Glass filled DAP, SDG-F.
Polarization. In contact.

GTC Series, Test Point Connector

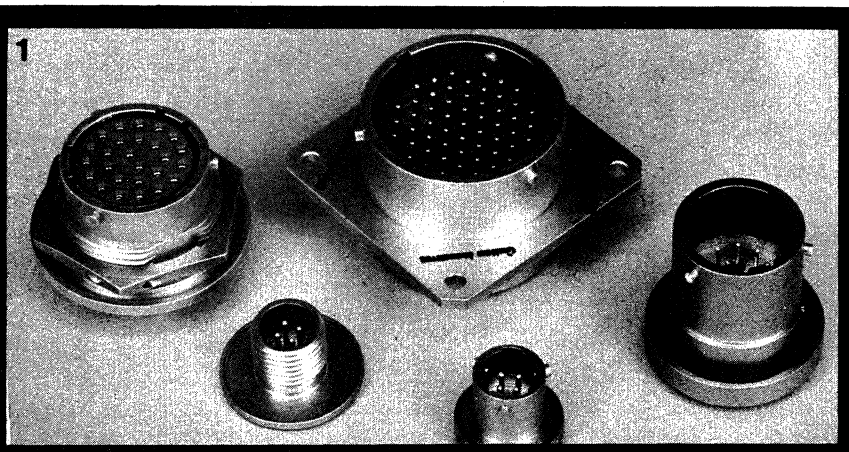
Number of Contacts. 8 and 16.
Socket Contact. Accepts .080 dia. probe, .030 dia. termination, 5 amps max. rating, copper alloy, gold plated.
Insulator. Glass filled DAP, SDG-F, .156 hole centers.
Mounting. Holes in connector body allow for fastener mounting to PC board.
Mil-Specification. Per Mil-C-39024.



GRP Series, Board Joiner

Number of Contacts. 10 and 22.
Pin Contact. .040 dia., bronze alloy, gold plate, rated 7.5 amps, .156 centers.
Insulator. Phenolic, MFE.

FREE 1971 HANDBOOK OF STANDARD CONNECTORS AVAILABLE UPON REQUEST.



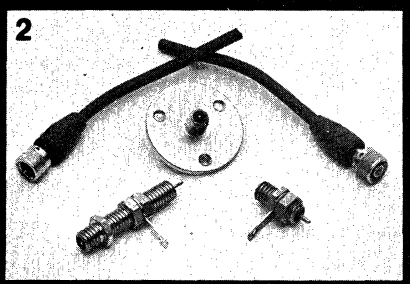
Glass to Metal Hermetically Sealed Connectors Headers and Feed-Thru terminals

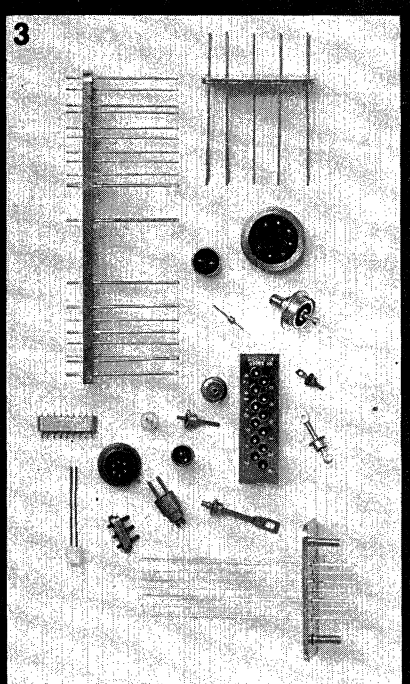
The Glass Technology division of GULTON INDUSTRIES offers a broad line of connectors, headers and feed-thru terminals for both commercial and aerospace applications. Geared for specials as well as standards, basic designs are available with stainless or cold rolled steel shells; weld, solder, box or flange mount styles; or in custom configurations to meet individual requirements.

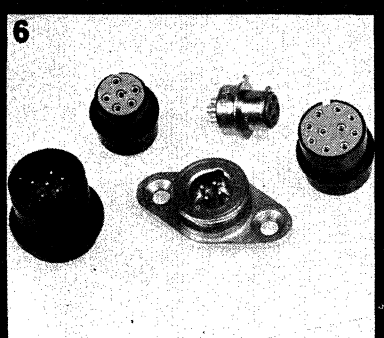
Typical Specifications:
Leak rate: 1.2 × 10^{-10}cc Helium/sec.
Vibration: 0-2,000 cps @ 100 g's rms
Operating range: —420°F to +800°F
Pressure range: to 40,000 psi
Insulation resistance: 1 × 10^{12} ohms @ 300°F

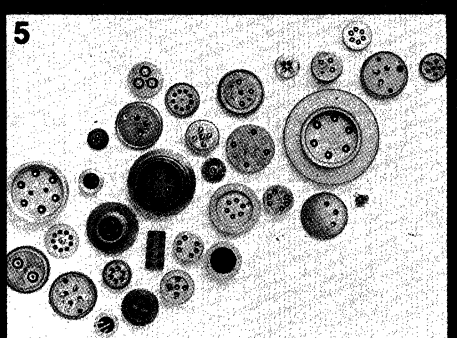
1. Hermetically sealed Military style connectors — MIL-C-26482, -26500, -26955, -38999, and -5015E.
2. Low noise co-axial cable assemblies and connectors.
3. Special custom hermetically sealed headers and terminals.
4. Microcircuit chip cases and packages.
5. Custom High Pressure, High Temperature, Weldable, Stainless Steel Headers.
6. Manifold component mounting connectors.

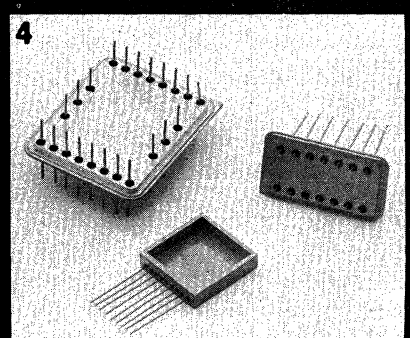
Gulton
GLASS TECHNOLOGY DIVISION
822 Production Place, Newport Beach, Calif. 92660 (714) 642-0163 TWX 910-596-1352











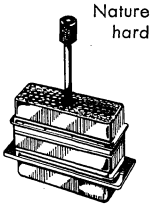
If you've got interconnection problems, we've got interconnection solutions.

And we've got solutions in any area, for any situation. Military or commercial. Miniature or subminiature. Rectangular or round. Complex circuits, tight space, critical environment.

We can do it. And still give you the greatest contact and mounting density available in an electrical connector. Or unparalleled interconnect capability with our flat flexible continuous and etched cable.

Hughes. We're problem solvers.

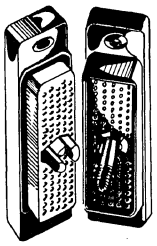
MINIATURE D-SERIES



Nature gives armadillos hard shell protection. We give it to our D series connectors. Stainless steel armor to keep 'em foolproof. They align perfectly. Fully environmental. 5 sizes.

- High density miniature using 20 gauge contacts.
- "Wrap-around" stainless steel shell for maximum protection in a minimum profile.
- Flanged or unflanged configuration.
- Contact arrangements of 18, 38, 66, 90, and 138 contacts.
- One-piece diallyl phthalate body.
- Silicone seals.
- Proven PolarHex center jackscrew.
- Available in non-environmental, environmental, and potting versions.

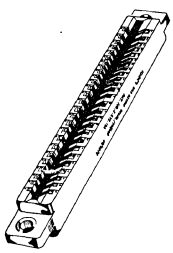
SUBMINIATURE WSS-SERIES



The way we make subminiatures, they're more subminiature. More fully packed. Same contact size and spacing, only we get 110 contacts to the inch.

- Highest contact density available — 110 size 22 contacts per square inch.
- Glass-filled diallyl phthalate bodies.
- Proven PolarHex center jackscrew coupling mechanism.
- Contact arrangement of 38, 88, 108, 132, and 244 contacts.
- Intermates with Hughes hardshell W-Series connectors.
- Available in non-environmental, environmental, and potting versions.

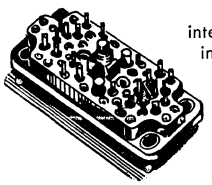
PRINTED CIRCUIT CONNECTORS



Miniature and subminiature printed circuit connectors in 10 sizes with 10 to 96 contacts. We're good at the numbers game.

- Withstand vibration, shock, and warping without losing electrical continuity.
- Bifurcated dual-socket contacts.
- 50 mil, 100 mil and 156 mil centers.
- Contact arrangements of 10, 20, 30, 40, and 50 positions, double readout (EPC submin. version).
- Contact arrangements of 15, 20, 30, 43, 48, and 68 positions, dbl. readout (EMS miniature, 100 mil ctrs; ERS miniature 156 mil ctrs).
- Bussing characteristics.
- Through or threaded mounting inserts available.
- PC board keying capabilities.

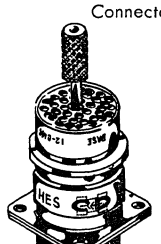
UNIVERSAL URS-SERIES



You decide what goes where. The crimp removable contacts are interchangeable in either body. The big difference at Hughes is the positive way they get together. The PolarHex way.

- Pin and/or socket contacts in the same body.
- Proven PolarHex center jackscrew.
- Glass-filled diallyl phthalate body.
- Standard contacts and coax contacts in same body.
- 12 available configurations with up to a maximum of 321 contacts in a variety of combinations of #16, #18 and #20 gauge contacts and coax (or #8 gauge) contacts.

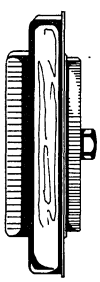
SUBMINIATURE BULLS-EYE SERIES



We invented the Bulls-Eye™ Connector and created a reputation as circular subminiature specialists. Shows you what a little concentration can do: 102 contacts in a #18 shell.

- Highest contact density in a circular subminiature with no decrease in contact spacing — 50% to 200% higher density than comparable connectors.
- Mounts in standard MS cutouts.
- Proven PolarHex center jackscrew.
- Lightweight stainless steel shell; diallyl phthalate body.
- Standard MS configurations. But with differences in contact density: Six shell sizes/contact density arrangements: 8/14, 10/30, 12/48, 14/66, 16/72 and 18/102.
- Cable or flanged configurations.
- Crimp snap-in size 22 contacts.
- Available in non-environmental, environmental, and potting versions.

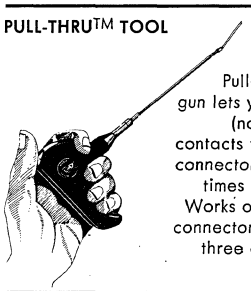
SUBMINIATURE FILTER CONNECTORS



Filter pin connectors in both rectangular and circular subminiatures. Nobody else guarantees a 100,000 to 1 reduction of RF energy.

- High contact density — 110 size 22 crimp removable contacts/sq. in.
- Complete RFI protection.
- Glass-filled diallyl phthalate bodies.
- Proven PolarHex center jackscrew.
- Contact arrangements of 38, 88, 108, 132, and 244 contacts.
- Working voltage: 200 vdc (25° & 85°C) 150 vdc (—55° & 125°C) Dielectric Withstanding Voltage (Hi-Pot): 500 vdc (for 5 sec, 50 ma max charging current). Feed-Thru Current: 3.0 amp. RF Current: 0.25 amp max. Insul. Resist.: 10,000 megohms, min. (After 2 min electrification at 200 vdc, 1 megohm current limiting resistor.); Capacitance: 1750 pf, nominal. Atten., min.: 40 db @ 100 MHz, 50 db @ 200 MHz to 10 GHz.

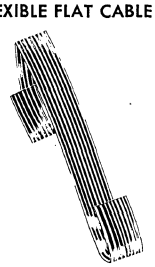
PULL-THRU™ TOOL



New Pull-Thru™ gun lets you pull (not push) contacts through connectors. Four times as fast. Works on many connectors. With three contact sizes.

- Covers three contact sizes: 16, 20, and 22 gauges.
- Permits desired contact cavity to be loaded from front face of connector.
- Grasps the contact body . . . not the wire — eliminating damage during insertion.
- Positive contact alignment through seals and block.
- Can use wire sizes equal in diam. to rear of the contact.
- Allows connector wiring at least four times faster than with conventional tools.

FLEXIBLE FLAT CABLE



Contour Cable™ happened here first: Flat, flexible, etched circuits. Flat, flexible continuous cable. Custom cable/harness assemblies.

- Continuous cable in similar or varied cross sections—with uniform or non-uniform spacing, varying insulation thickness, with different insulation materials on the two sides.
- Flat flexible etched circuits ideal for conductor system requiring circuits with 3-dimensional routing in a flat medium, or when point-to-point wiring must exhibit simple or complex flexibility in a flat plan — or both.
- We meet your specifications — just consult our application engineers.

HIRAM JONES

Teflon† Insulated * Press-Type * Terminals and Test Jacks

TEFLON†

(TFE-FLUOROCARBON) per MIL-P-19468 has outstanding mechanical and electrical properties over a wide range of frequencies and temperatures (−100°C to +250°C), extreme chemical inertness, high heat resistance, zero water absorption and complete anti-hesiveness which make it a superior insulation.

TERMINALS

MATERIAL: Half-hard Brass per QQ-B-626, Comp 22.
FINISH: Standard plating is Gold per MIL-G-45204. Other finishes supplied on request.

INSTALLATION TOOLS

Tools are available for all HIRAM JONES components. Specify Part Number and prefix "S." Example: S-602 Assembly Tool.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

More than 6,000 manufacturers of electronic components, materials, instruments, assemblies, systems and key services are listed in the Yellow Section. An identical Yellow Section appears in each of the three volumes of **eem**, listing addresses, phone numbers and sales managers' names. TWX numbers are also included where available. **Boldface** listings indicate that detailed information on the manufacturers' products is cataloged in the White Section of **eem. Boldface** listings also indicate that local sales offices or representatives are listed for that manufacturer.

Connector Selection Guide

This Guide is designed to help you select the proper connector series and the appropriate catalog from which to specify your connector. Determine your basic application requirement: Rectangular Rack/Panel, Circular, Microminiature, or Special Application Connectors. Go to one of these four headings in the chart. Below each heading are several blocks listing the various connector series. (If a MIL Spec connector is required, turn to the back side of this Guide for the applicable catalog.) Check these requirements with the data on the right side (dark shaded area) of each block. Write for the proper catalog for detailed product data and ordering information.

CANNON PLUGS

CONNECTORS

E. F. JOHNSON COMPANY®

Johnson offers a complete line of polyamide insulated connectors to meet most military and commercial applications. Included are: subminiatures for printed circuit applications; insulated solderless tip and banana plugs; tip and banana jacks; tip jack and sleeve assemblies; metal-clad and "rapid-mount" tip jacks; dual banana plugs and "6-way" binding posts. Designed to operate throughout an extremely wide temperature range and under conditions of high relative humidity. Voltage breakdowns available up to 11,000 volts on some types. Polyamide housings available in six colors per Federal Standard 595 (10 colors available where indicated).

For price and ordering information call the nearest E. F. Johnson sales representative or the E. F. Johnson factory listed in the yellow pages of this volume.

Free Electrical Circuit Hardware Catalog
10-page catalog gives specific information on complete line. Send request on your letterhead to: E. F. Johnson Co., 1923 10th Avenue S.W., Waseca, Minn. 56093.

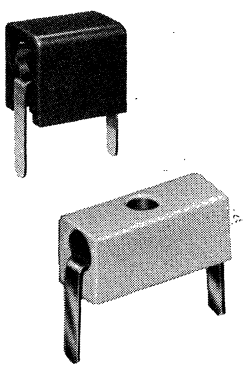
PATCHCORD STACKING PLUGS

Developed for custom patchcord assembly and replacement of damaged molded patchcord plugs. Allows assembly of patchcords with any length and color. Used with standard 0.144" diameter rubber or extra-flexible polyvinyl insulated wire. Plug body precision machined brass with 0.0002" nickel plating. Polyamide housing available in 6 colors. Operating temperature range −55°C. to +105°C.

Stacking Standard Banana Plug
Cat. No. 108-1080-001 (15 amps)

Stacking .080 Standard Tip Plug
Cat. No. 105-1200-001 (10 amps)

Engineering kits containing material to assemble 30 patchcords in six colors available from stocking distributors.



NEW HORIZONTAL JACK

Accepts 0.080" dia. tip plug in either end. Silver-plated and Iridited beryllium-copper formed contact. Two common terminals. Approximately one half size of standard Tip Jack. Channel on underside for air-flow cooling during solder operation. Current rating: 5 amps.

Cat. No. 105-1100-001 (10 colors)

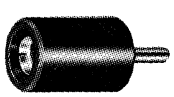
HORIZONTAL JACK

(U. S. Patent No. 3,208,027)

Accepts .080" dia. tip plug in either end, or from top or bottom! Cross-hole also accepts hook-type oscilloscope probe. Channel on underside for airflow cooling during solder operation. Silver-plated and Iridited beryllium-copper formed contact. Two common terminals. Current rating: 5 amps.

Cat. No. 105-0750-001 (10 colors)

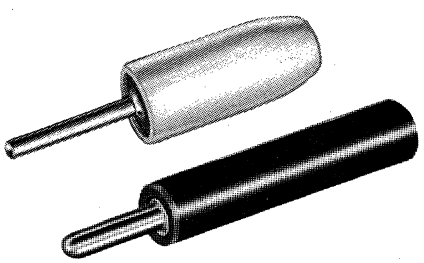
Note: Available as specials in production quantities without cross-hole or with gold flash.



VERTICAL JACK

Mounts through single .052" hole, min. mounting area. Accepts .080" dia. tip plug. Silver-plated, machined beryllium-copper contact. Current rating: 5 amps.

Cat. No. 105-0850-001 (6 colors)



SOLDERLESS TIP PLUG

Completely insulated, molded sleeve. Recessed metal head. All metal parts are nickel-plated brass. Designed for solderless connection of up to 16 gauge stranded wire. Fits all standard tip jacks. Current rating: 10 amps.

Cat. No. 105-0300-001 (10 colors)

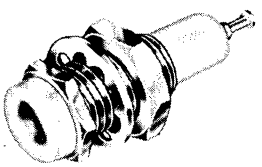
SUB-MINIATURE TIP PLUG

For use with miniature jacks. .080" dia. tip. Nickel-plated machined brass body, solder lead connection. Current rating: 5 amps.

Cat. No. 105-0770-001 (6 colors)

METAL-CLAD (MILITARY) TIP JACKS

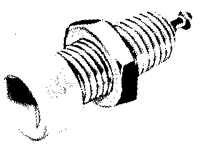
For military use or demanding industrial applications. Will withstand severe environmental temperature, vibration and salt spray conditions. Complies with MS-16108, Rev. F. of MIL-STD-242A and MIL-C-39024/10. Closed entry contact design prohibits entry of tip plug .085" or larger — prevents accidental contact damage by careless probe insertion. Heavy nickel-plated brass jacket. Gold-plated beryllium-copper contact spring greatly exceeds minimum insertion/withdrawal cycle requirements of MS-16108. Current rating: 5 amps. Peak withstanding voltage: 8,000 volts DC. Capacity to ⅛" panel: 3.8 pF. ¼"-32 nut and lock washer furnished. Terminal Style: "A." (Terminal Style "C" per MS-16108 available on special order in production quantities.) Brass solder terminal is gold-plated. **Cat. No. 105-0200-200** (10 colors)



DELUXE TIP JACK

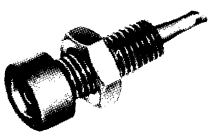
(U. S. Patent No. 2,704,357)

Molded body with recessed closed entry design contact. Silver-plated beryllium-copper contact spring. Brass solder terminal is hot tin dipped. Current rating: 10 amps. Peak withstanding voltage: 11,000 volts. Capacity to ⅛" panel: 2 pF. ¼"-32 nut furnished. **Cat. No. 105-0600-001** (10 colors)



STANDARD TIP JACK

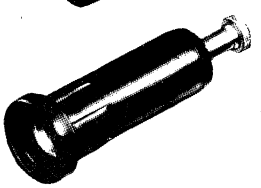
Molded body with recessed, cadmium-plated formed phosphor bronze contact. Current rating: 10 amps. Peak withstanding voltage: 9,000 volts. Capacity to ⅛" panels: 2 pF. ¼"-32 nut furnished. **Cat. No. 105-0800-001** (10 colors)



RIB-LOC® PRESS-IN TIP JACKS

RIB-LOC tip jacks install by pressing into proper size chassis hole. Accept .080" tip plug in recessed, closed-entry type contact that rejects plugs .085" or larger. Silver-plated beryllium-copper contact spring. Brass solder terminal silver-plated and Iridited. Current rating: 10 amps. Peak withstanding voltage: 5,000 volts. Capacity to ⅛" panel: 1.4 pF nominal.

Cat. No. 105-1040-001 (10 colors)



MINIATURE BANANA PLUGS

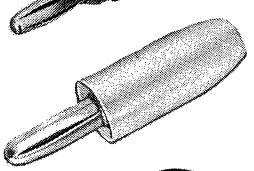
Extremely small insulated banana plugs with precision machined phosphor bronze body, nickel-plated. One-piece springs are beryllium-copper, nickel-plated, .120" dia. Polyamide sleeve. Current rating: 5 amps.

Cat. No. 108-1000-001 (6 colors)

SOLDERLESS BANANA PLUGS

Compact, high voltage insulated plug for a wide variety of applications. Designed for fast, solderless connection of up to 16 gauge standard wire. Body and pin are constructed of one-piece, nickel-plated brass with high grade nickel-silver springs. Polyamide sleeve. Current rating: 15 amps.

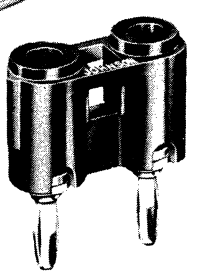
Cat. No. 108-0300-001 (10 colors)



DUAL BANANA PLUGS

Extremely versatile dual banana plug available for either solderless or set screw connection. Molded body incorporates polarity indication and strain relief hole for wire leads. Springs are high quality nickel-silver — bodies are nickel plated. Accurately machined brass studs extend full length of pins for extra strength. Peak withstanding voltage: 10,000 volts. Capacity plug to plug: 1.3 pF. Current rating: 15 amps. **Cat. No. 108-0200-001** (solderless)

Cat. No. 108-0250-001 (with set screws) (6 colors)



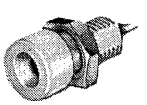
NEW MINIATURE BANANA JACK

Internal .104" hole accepts miniature banana plug 108-1000-001 with .120" dia. plug. Precision machined brass, nickel-plated. Copper terminal is preplated .00004" tin, hot-tin-dipped beyond solder area. **Cat. No. 108-1021-001**

BANANA JACK

Completely insulated polyamide body with cadmium-plated insert. Accommodates banana plugs of nominal .175" diameter. Peak withstanding voltage: 10,000 volts DC. Capacity to 1/16" panel: 2.4 pF nominal. Mounts in 21/64" diameter circular, "D," or double flat hole (¼" across flats). Single nut furnished for mounting — no other mounting hardware needed.

Cat. No. 108-0900-001 (10 colors)



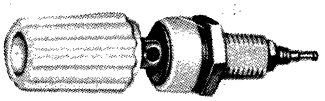
CONNECTORS

E. F. JOHNSON COMPANY

BINDING POSTS

New miniature binding post. Rated at 15 amps, thumb nut to terminal, 5 amps. Jack to terminal. Peak withstanding voltage: 5,000 volts. Capacitance to 1/8" panel; 3 pF. Mounts in 17/64" diameter circular hole; "D" or double flat hole — .219" across flats. Equipped with single 1/4"-32 nut for fast mounting. The 200 series accepts .080 tip plug; 400 series accepts .120 miniature banana plug 108-1000-001.

Cat. No. 111-0200-001 (6 colors)
Cat. No. 111-0400-001



Rated at 15 amps. Peak withstanding voltage: 8,000 volts. Capacitance to 1/8" panel: 3.3 pF. Mounts in 21/64" diameter circular hole; "D" or double flat hole — 1/4" across flats. Single 5/16"-32 mounting nut furnished — no other hardware required.

Cat. No. 111-0100-001 (10 colors)

COAXIAL CONNECTORS

The JCM connector is a semi-precision, miniature (3mm) connector giving repeatable electrical performance from DC to 3 GHz. At a fraction of the price of MIL-C-39012B SMA connectors, the JCM offers full mating compatibility with SMA types.

The bright gold finish is more dense and twice as hard as ordinary gold. The non-galling finish is 40% more resistant to wear and abrasion. Plating is 98.5 to 99.5% pure gold with a Knoop hardness of 120-140.

Cable clamp JCM plugs and jacks consist of 5 or fewer parts which are easily assembled. Only one set of stripping dimensions is required for all cables from 0.070 to 0.220" overall diameter.

Beryllium-copper contacts assure superior spring qualities and lowest contact resistance.

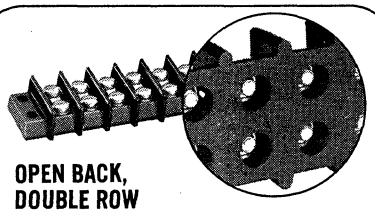
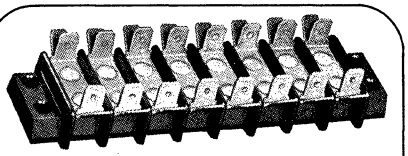
Kulka TERMINAL BLOCKS



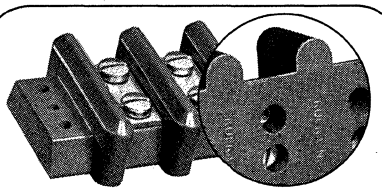
OPEN BACK, DOUBLE ROW

Current range: Up to 30 Amps.
Rated voltage: 1600 Volts RMS.*
Wire sizes: AWG #22 to 12.
Terminations: 1 thru 26.
Materials: General Purpose Phenolic unless otherwise specified.
Hardware: Multiple variations available.



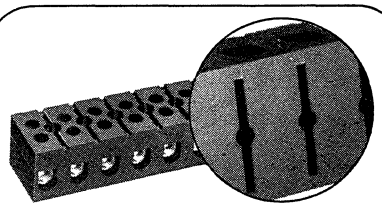
"KLIPTITE" (PUSH-ON TERMINALS) SINGLE AND DOUBLE ROW

Current range: Up to 70 Amps.
Rated voltage: 5000 Volts RMS.*
Wire sizes: AWG #22 to 12.
Terminations: 1 thru 26.
Materials: General Purpose Phenolic unless otherwise specified.
Hardware: "Kliptite" in multiple variations available.



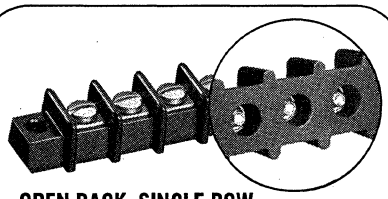
HEAVY DUTY OPEN BACK DOUBLE ROW

Current range: Up to 90 Amps.
Rated voltage: 2100 Volts RMS.*
Wire sizes: AWG #6 to 2.
Terminations: 1 thru 12.
Materials: General Purpose Phenolic unless otherwise specified.
Hardware: Multiple variations available.



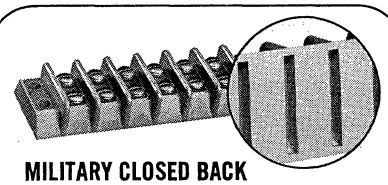
TUBULAR SCREW, DEAD FRONT

Current range: 85 Amps.
Rated voltage: 3500 Volts RMS.*
Wire sizes: AWG #16 to 6.
Terminations: 2 thru 12.
Materials: General Purpose Phenolic unless otherwise specified.
Hardware: Screw type.



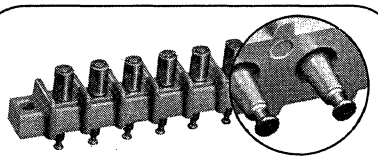
OPEN BACK, SINGLE ROW

Current range: Up to 30 Amps.
Rated voltage: 1600 Volts RMS.*
Wire sizes: AWG #20 to 12.
Terminations: 1 thru 23.
Materials: General Purpose Phenolic unless otherwise specified.
Hardware: Multiple variations available.



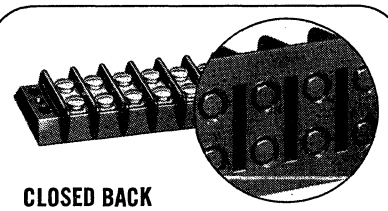
MILITARY CLOSED BACK (MOLDED IN TERMINALS) SINGLE AND DOUBLE ROW

Current range: Up to 30 Amps.
Rated voltage: 1000 Volts RMS.*
Wire sizes: AWG #22 to 10.
Terminations: 1 thru 28.
Materials: Military Grade.
Hardware: Multiple variations available.



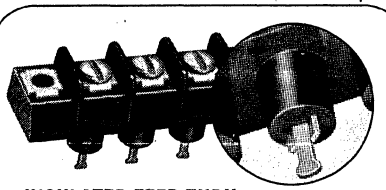
STUD AND FEED-THRU TURRET SINGLE AND DOUBLE ROW

Current range: Up to 30 Amps.
Rated voltage: 2100 Volts RMS.*
Wire sizes: AWG #22 to 2.
Terminations: 1 thru 26.
Materials: General Purpose Phenolic unless otherwise specified.
Hardware: Multiple variations available.



CLOSED BACK SINGLE AND DOUBLE ROW

Current range: Up to 30 Amps.
Rated voltage: 3300 Volts RMS.*
Wire sizes: AWG #22 to 12.
Terminations: 1 thru 30.
Materials: General Purpose Phenolic.
Hardware: Multiple variations available.

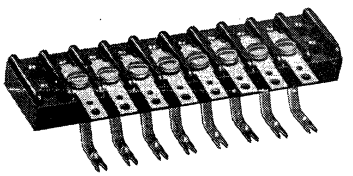


INSULATED FEED-THRU TURRET SINGLE ROW

Current range: 20 Amps.
Rated voltage: 1100 Volts RMS.*
Wire sizes: AWG #16 to 14.
Terminations: 1 thru 25.
Materials: General Purpose Phenolic unless otherwise specified.
Hardware: Multiple variations available.

PRE-MOUNTED MARKER AND INSULATOR STRIP

Kulka offers any type of marker strip or insulator strip pre-mounted on the back of each board. Pre-mounting simplifies assembly and inventory control; and the cost is the same as blocks and strips sold separately.



PROTOTYPE SERVICE

Kulka provides personal design assistance to help solve unique application problems. Where appropriate, Kulka also prepares prototypes of special terminal boards for customers' use and evaluation.

CATALOG AND DESIGN MANUAL

Kulka's catalog contains drawings, dimensions and application criteria presented in conjunction with data on related components and overall terminal block configurations. (Send for your copy today.)

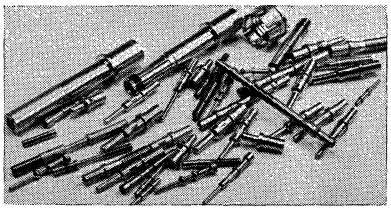
KULKA DISTRIBUTORS ARE LOCATED THROUGHOUT THE U.S. AND CANADA

Joining of Individual Circuits



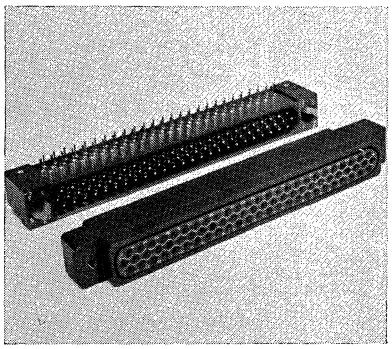
We make contacts to customer specifications and to Military specifications. Our socket retention design is the most reliable in existence (patents pending).

Contacts Started Our Business:

- Designs to meet:
  Long Life and operation in a wide spectrum of environmental conditions.
  Contact Qualifications
  Mil-C-26636 Mil-C-83723
  Mil-C-23216 Mil-C-38999
  Mil-C-39029
- Contact Resistance:
  Due to the large contact area of the Micro Electronics socket design, contact resistance is well within the specification requirements. This allows connectors to handle extremely low level signals with no distortion.
- Insertion/Withdrawal:
  Contacts can be designed to produce less than 2 oz. withdrawal or if greater than spec. values are needed we can go as high as the application requires. Life cycles show a very low wear rate and far exceed Mil. Specs.
- Mechanical Stability:
  Because of the symmetrical pattern of socket and pin engagement, these contacts are insensitive to the effects of shock and vibration.

Micro Electronics utilizes the finest materials and takes every step to retain the ductile and tensile properties, so that destructive tests such as, probe damage will not effect the normal operation.

In the Air

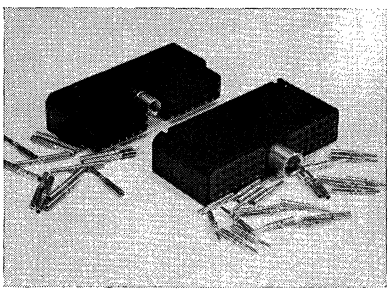


We have developed many firsts including a fully environmental connector pair, now being used in the printed circuits (Avionics) of todays flying machines. We'll even take your connectors to 110,000 ft., without leaving our facility. (Testing performed in our complete environmental test lab).

- Receptacle, Series 10-0003-00-05 has right angle 20 AWG Pins for assembly to circuit board.
- Plug, Series 11-0002-0005 utilizes MS 27491 20 AWG Sockets - Rear Release.
- Contacts, seventy-six (76) each on .100 centers.
- Connectors Designed to meet or exceed requirements of Mil-C-38999.
- Available in non-environmental and potting versions, designs can be modified to incorporate customers mounting & contact quantity requirements.
- Designs are being established to provide .050 spacing between contacts in circular and rectangular series connectors.

Space

[word meaning: Area]



We fill our Space with circuitry that almost exceeds the Area.

Why don't you try us for size.

When it comes to design we have miniature and subminiature connecting devices to meet the widest range of critical environments — We'll prove it.

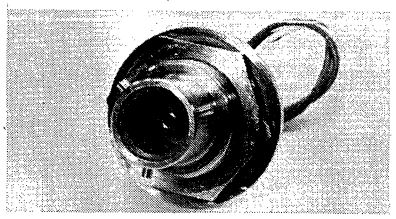
- High Strength connector body.
- Center Jack-screw coupling mechanism.
- Silicone Interfacial Seals.
- Silicone Grommet for wire seals.
- Contacts, forty-two (42) each 22 AWG - rear-release, on .080 centers.
- Connectors designed to meet or exceed requirements of Mil-C-26482.
- Available in non-environmental and potting versions.

micro electronics corporation

37550 SIERRA HIGHWAY - PALMDALE, CALIFORNIA 93550 - P. O. BOX 1238

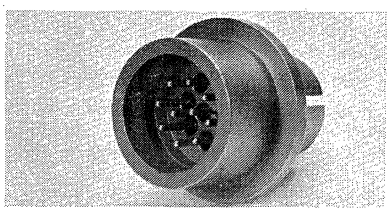
(805) 947-8908 / SALES (805) 947-0398

Under the Sea



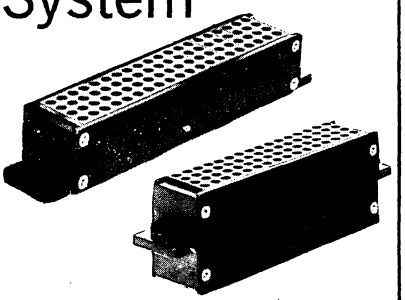
- Micro Electronics contacts have surpassed critical electronics specifications for the Navy — Poseiden Missile.
- Our contacts are currently being used in computers on board the latest craft.
- Designs are being established for molded connector assemblies to operate at 2,000 ft., 10,000 ft., and 20,000 ft. per Mil-C-24217.

Where Reliability Counts



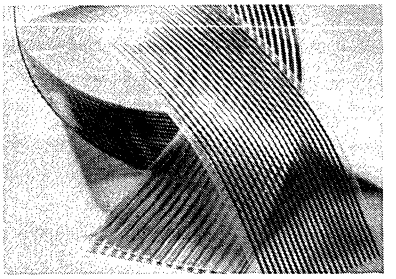
- Micro Electronics is proud to be part of the electrical connecting systems now being used in Nuclear power generating stations.
- Design Criteria:
  40 year life with temperature cycling from −20°F to 300°F. Design requirements include environmental and electrical integrity under normal and incident conditions with provisions for seismic forces.
- Power contacts to Mil-C-5015 and power plugs are our specialty.

Mil-T-81714 Terminal Junction System



- Profile Terminal Junction:
  Micro Electronics has designed and is incorporating a system that eliminates wafer stack up — proportionately reducing height by as much as ⅓.
- Retention and Bussing:
  Sockets have the reliability and surface contact of Mil-Spec. gauges packaged into mounting matrice that becomes integral with other sockets from which a logical progression of modules can be packaged, creating an interconnection system for an unlimited number of wires in gauges ranging from 12 AWG through 26 AWG.
- Installation:
  The male contact is pushed into position with a non-conductive tool. The male contact is held solidly in place by a self locking retainer. The retention system features "closed entry".
- High Strength:
  Module body with silicone interfacial seals for environmental applications.
- Mounting:
  Construction and Design is adaptable to customer mounting requirements.

On the Way



Flex-Con ™

Tomorrow's Wiring Systems Today

- Flex-Con: Cable is made up of superflex flat conductors that are made from fully annealed copper and rolled flat with this reduction producing greatest yield strength and texture crystal matrix of optimum bend. All conductors share stresses equally in the cable. Conductors are held parallel to very close tolerances across one of the largest size cable areas up to 13" wide, providing balanced electrical values. Conductors 4/0 through 24 gauge have proportionate space, and weight savings when compared to round wire construction. As an example of weight consideration each extra pound on a flight from Minneapolis to London represents a ton mile of cargo.
- Cables designed to Mil-C-55543 with connectors per Mil-C-55544. Cable construction meeting National Aerospace Standard NAS-729 Flat Flexible Conductor Cable 300 volts copper can be provided. Cable sizes under the classification of Marshall Space Flight Center Specification MSPC-220A.
- Cables produced with insulation materials such as polyester +125°C, Teflon 200°C and Polyamide 240°C.
- Applications:
  Flat Signal transmission. Jumper Cables, and Power Cables.

MIL-C-28748 Rectangular Connectors Removable Contacts (Supersedes Mil-C-8384 & Mil-C-22857)

Specifications:

Number of Contacts: 14, 18, 20, 26, 34, 41, 42, 50, 66, 75, 104

Mechanical Characteristics (Connector)
- **Temperature:** −55°C to +125°C
- **Vibration:** 10g 10 - 55 Hz
- **Shock:** 50g Shock Loading
- **Durability:** 500 Cycles
- **Contact Retention:** 25 lbs. Axial Load after 10 Insertion & Withdrawal.

Electrical Characteristics (Connector)
- I.R.: 5,000 Megohms @ 500 V.A.C.
  1,000 Megohms @ 500 V.A.C. After Moisture Test
- **High Potential:** 2,000 V.A.C. @ Sea Level
  1,000 V.A.C. After Corrosion
  750 V.A.C. After Moisture

Materials:
- Insulators: Diallyll Phthalate per Mil-M-14 SDG-F or Mil-P-19833 GDI-30F
- Contacts: Leaded Copper per CA 187
- Contact Finish: Gold .000050 per Mil-G-45204B Type I, Grade D, Class I, over Copper.

Modified Hardware: Consult factory for special plating, and protective shield for applications having live pins in the plug, or where pin protection is needed.

mueller clips

THE WORLD'S LARGEST AND ONLY COMPLETE LINE

MANUFACTURED FOR GENERAL SALE SINCE 1908

• AVAILABLE AT JOBBERS EVERYWHERE •

"WE BEGIN WHERE THE WIRE ENDS"

(For detailed information, refer to the Mueller Clip pages in the "Radio Electronic Master.")

IN UNIVERSAL USE FOR ALL KINDS OF QUICK, TEMPORARY ELECTRICAL CONNECTIONS. PLATED STEEL AND SOLID COPPER. INSULATORS IN STANDARD RED AND BLACK, AND IN SPECIAL COLORS — WHITE, BLUE, YELLOW AND GREEN.

"Mini-gator" and "Micro-gator" clips to fit the smallest crevices in tightly compacted equipment. Separate insulators for skin-tight, complete insulation.

Alligator Clips, including completely insulated model.

Crocodile Clips. (Nesting teeth.)

"Pee Wee" Clips, including completely non-ferrous type.

General purpose test clips with meshing teeth.

Needle Clips — Twin Clip — Geophone Clips.

Clips for Battery Booster Cables and Chargers.

Heavy duty Test and Battery Clips.

Large welding ground clamps.

Appliance ground clamps.

Separate flexible insulators.

NO. 123 DISPLAY-SELECTOR BOARD, a permanent, gloss-finish board of our entire line. Shipped complete, set up, with items in place over their printed code numbers. We absorb much of the cost, charging only $10.00 net postpaid in order to provide a unit which solves all quick-testing and clip-terminal problems for engineering and design departments, manufacturers and laboratories. Order direct from factory.

QUALITY BATTERY BOOSTER CABLES . . .

Heavy duty design for the commercial or industrial user who knows what he wants. Finely stranded pure copper cable with rubber insulation for maximum flexibility in coldest weather. 6 ga. 259 strands #30 wire, 4 ga. 413 strands #30. Mueller Hippo-Clips strongly clinched to cable and soldered for maximum current flow. Three models: 8' and 12' 6 ga. 100 amp.; 12' 4 ga. 200 amp.

Our Reader Service Department will answer your technical questions, and will honor your request for the latest catalog of our complete line.

FREE SAMPLE CLIPS AVAILABLE

Factory will supply free sample clips for your inspection. Refer to complete listing in "Radio Electronic Master."

NATIONAL TEL-TRONICS – a leading manufacturer of the most diversified line of hardware and components for the electronic industry.

FULL DETAILS, AND ENGINEERING SPECIFICATIONS IN OUR BIG CATALOG. SEND FOR YOUR COPY

FOR RELIABILITY

As a large manufacturer supplying the Original Equipment Manufacturers, we and our distributors in your local area maintain a stock of standard parts. Specify NTT for Hi-Reliability and Service.

ntt

A DIVISION OF EASTERN AIR DEVICES, INC.

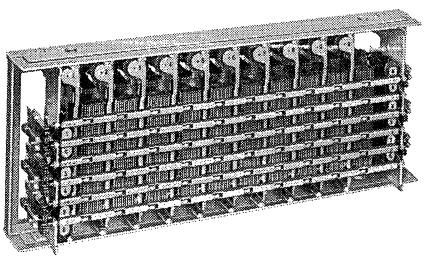
NATIONAL TEL-TRONICS CORPORATION

55 NORTHERN BLVD. GREAT NECK, L.I. NEW YORK 11021, (516) 466-5100

No one does more switching and connecting than the telephone industry.

Ever wonder why they almost always specify "electro-mechanical" equipment?

The answer is clear:
Telephone-type components offer virtually total reliability at a fraction of the cost. And North Electric offers the finest line of telephone-type components available.



North Electric Company manufactures a 1200 point Crossbar Switch which provides the most economical approach to switching. Reliability is excellent - greater than 50 million operations per select unit.

SPECIFICATIONS:

Operating Voltage – 24, 48, 100 VDC.

Timing – Typical operate and release times.

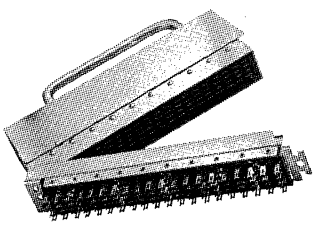
operate of select bar	– 15 MS
delay required for damping	– 15 MS
operate of hold bar	– 15 MS
total operate time is	– 45 MS
release time of select bar is	– 8 MS

dealy time required before operation of new cycle is 30 MS, therefore, a complete typical cycle time is approximately 83 MS.

Contact Rating – Bank contacts are bifurcated silver or gold which with adequate spark protection, are rated at 25 MA at 48 VDC or 110 VAC. They will provide a life in excess of 50 x 10^6 operations. Off normal contacts are bifurcated silver, rated at 0.4 ampers at 48 VDC or 110 VAC with proper contact protection.

Contact Resistance – Resistance of typical path is less than 50 milliohms for silver or gold contacts.

Size – 1200 point crossbar switch measures 1067 cubic inches. **length** 23 inches. **height** 8.674 inches. **width** 5.350 inches. **weight** 29 lbs.



North Electric Company manufactures 40, 60, 80 and 100 pin connectors using the torsion blade design which assures positive contact.

SPECIFICATIONS:

Dielectric Strength – Measured between conducting parts and frame, breakdown to voltage is in excess of 2000 volts R.M.S. when measured for one minute at sea level.

Contact Rating – The current rate is three (3) amperes. When several adjacent contacts are required to carry the same maximum load, current rating should be reduced two (2) amperes per contact.

Contact Resistance – Measured between soldering points, average resistance is 12 milliohms (silver) 9 milliohms (gold), measured with an open circuit voltage of .100 volts and a short circuit current of .100 amperes D.C.

Mechanical Life – Standard connector unit withstands 4000 plug-in operations with negligible mechanical wear.

NORTH ELECTRIC COMPANY

Electronetics Division / Galion, Ohio 44833 / A subsidiary of United Utilities, Incorporated
For immediate service, call 419/468-8279.

POMONA ELECTRONICS

¾" SPACED MOLDED BANANA PLUGS

General Specifications listed below apply to items using banana plugs in this catalog.

FEATURES . . .

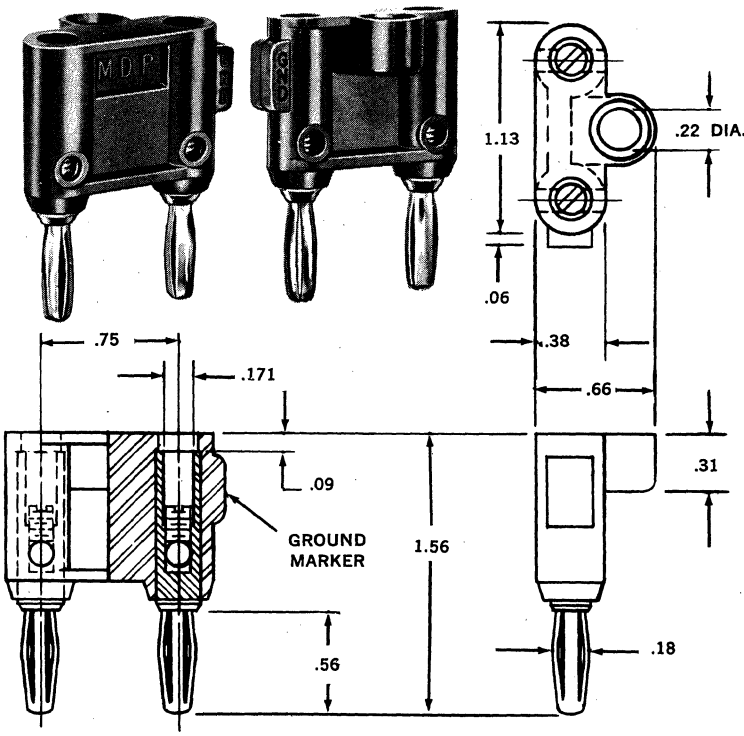
- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- STACK-UP feature allows an unlimited number of connections at the same electrical point.
- Tough thermoplastic molded directly on to the metal body of the plugs and connectors.

SPECIFICATIONS . . .

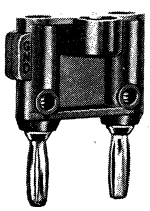
- Fits standard 0.166 dia. banana jacks.
- Spring, beryllium copper alloy 170 per QQ-C-533.
- Plug body, Brass per QQ-B-626. Comp. 22.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.

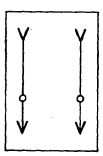
RATINGS	Models: MDP; MDP-ST; 1330; 1330-ST; 2970
■ Capacity :	0.8 pf to 10 MC
■ Current :	15 Amps. Cont., 30 Amps. Int.
■ Voltage :	5000 W.V. D.C.
■ Temperature :	—25°C to +85°C, operating temp.

ACTUAL SIZE



DOUBLE BANANA PLUG



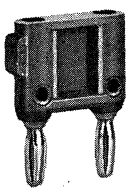


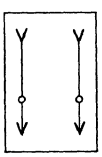
Double banana plug on ¾" centers; set screws secure leads; simplifies cable construction or component mounting; banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL MDP (Specify Color) QUANTITY DISC. CODE (A) **NET .75**

COMPONENT MOUNTING DOUBLE BANANA PLUG



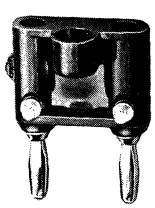


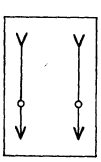
Double banana plug on ¾" centers; set screws secure leads; features recess for mounting small components; banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Red

MODEL 1330 (Specify Color) QUANTITY DISC. CODE (A) **NET .75**

DOUBLE BANANA PLUG WITH SOLDER TURRET TERMINALS



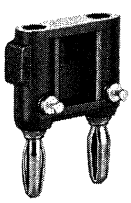


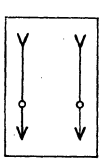
Similar to Model MDP, except has solder turret terminals for permanent noise-free connections of cables and components. Double banana plug on ¾" centers; banana jacks permit top Stack-Up for multiple connections.

COLOR: Black

MODEL MDP-ST QUANTITY DISC. CODE (A) **NET .95**

COMPONENT PLUG WITH SOLDER TURRET TERMINALS



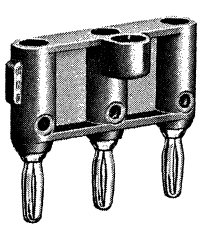


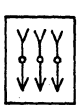
Similar to Model 1330, except has solder turret terminals for permanent noise-free connections of components, etc. Double banana plug on ¾" centers: Banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Red.

MODEL 1330-ST (Specify Color) QUANTITY DISC. CODE (A) **NET .95**

TRIPLE BANANA PLUG



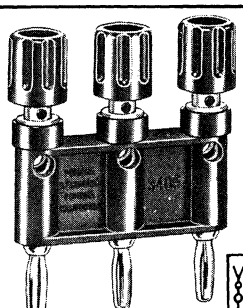


Triple banana plug on ¾" centers; set screws secure leads. Ideal for balanced line 2 conductor shielded cable assemblies. Banana jacks permit top Stack-up for multiple connections.

COLORS: Black, Red.

MODEL 2970 (Specify Color) QUANTITY DISC. CODE (A) **NET 1.25**

BINDING POSTS TO TRIPLE BANANA PLUG



Features insulated binding posts on ¾" centers for rapid mounting and interchangeability of components. Binding posts allow top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.

UPPER: Insulated Triple binding posts, on ¾" centers. Cross holed (.166 dia.) in body provide side Stack-Up connections.

LOWER: Triple banana plug, on ¾" centers.

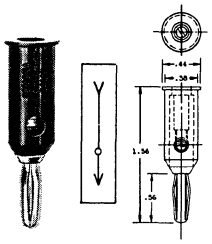
COLORS: Body, Black. Binding Posts, Red/Black/Black.

MODEL 3405 QUANTITY DISC. CODE (A) **NET 4.50**

POMONA ELECTRONICS

BANANA PLUG ACCESSORIES

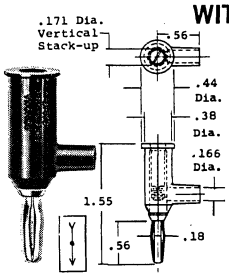
SOLDERLESS BANANA PLUG —STACK-UP



Wire firmly held in place with internal set screw, eliminating soldering. Assembly of test leads simplified.
UPPER: Banana jack, .171 dia.; Brass, nickel plated.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL 1325 (Specify color) QUANTITY DISC. CODE (A) **NET .50**

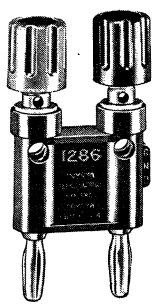
SOLDERLESS BANANA PLUG WITH SAFETY COLLAR —STACK-UP

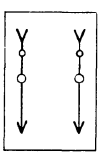


Features: Integral safety collar insulates exposed wire leads. Wire firmly held in place with internal set screw, eliminating soldering. Assembly of test leads simplified.
UPPER: Banana jack, .166 dia.; Brass, nickel plated.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL 1825 (Specify Color) QUANTITY DISC. CODE (A) **NET .50**

BINDING POSTS TO DOUBLE BANANA PLUG





Features insulated binding posts on ¾" centers for rapid mounting and interchangeability of components. Binding posts allow top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.
UPPER: Insulated double binding posts, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Double banana plug, on ¾" centers.
COLORS: Body, Black. Binding Posts, Black/Red.

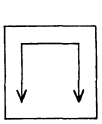
MODEL 1286 QUANTITY DISC. CODE (A) **NET 2.75**

BINDING POST TO SINGLE BANANA PLUG

Features insulated binding post. Binding post allows top Stack-Up for multiple connections. Side Stack-Up provided by thru-hole in plug body.
UPPER: Insulated binding post. Cross hole (.166 dia.) in body provides side Stack-Up connections.
LOWER: Single banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Red.

MODEL 2894 (Specify color) QUANTITY DISC. CODE (A) **NET 1.50**

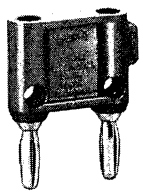
METAL SHORTING BAR

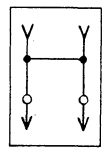


Low profile, nickel plated brass shorting bar. Double banana plugs on ¾" centers swaged to 3/32" thick brass bar. Resistance, less than 1.5 milliohms installed. Current rating: 15 Amps. Cont., 30 Amps. Int.

MODEL 1855 QUANTITY DISC. CODE (A) **NET .85**

INSULATED SHORTING BAR

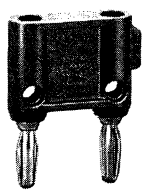


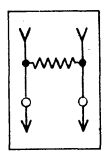


Ideal as a connecting link for use with ¾" spaced banana jacks. Banana plugs internally solder-bonded with #14 AWG wire. Banana jacks provide top Stack-Up. Cross holes (.166 dia.) in body provide side Stack-Up connections. Resistance less than 1.5 milliohms installed. Current rating 15 Amps. Cont., 30 Amps. Int. "Shorting Bar" marked on top of plug.
COLORS: Natural, Black, Red.

MODEL MDP-S (Specify Color) QUANTITY DISC. CODE (A) **NET 1.25**

MOLDED PRECISION RESISTOR



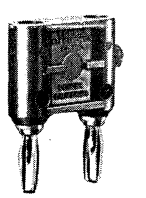


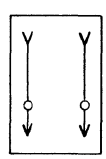
Ideal where rapid interchange of resistance values is required. Used in breadboarding, R & D labs., Standards, Terminations, etc. Deposited carbon 1% resistor, ½ watt, molded internally. Resistor soldered to double banana plug, on ¾" centers. Top Stack-Up provided for multiple connections. Cross holes (.166 dia.) in body provide side Stack-Up connections. Resistance value stamped on top of plug.

(OHMS)				
50	200	1K	100K	1 Meg.
75	250	5K	200K	2 Meg.
120	500	10K	250K	5 Meg.
130	600	20K	500K	10 Meg.
150	900	50K		

MODEL MDP-R (Specify Value) QUANTITY DISC. CODE (A) **NET 2.95**

ADAPTER — .080 TIP JACKS TO DOUBLE BANANA PLUG

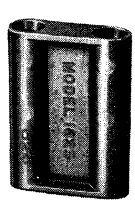


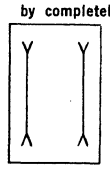


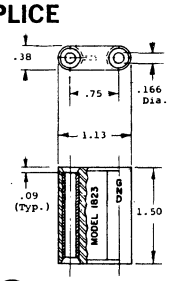
Permits .080 Tip plugs to be used with equipment having banana jacks.
UPPER: Tip jacks, beryllium copper, gold flashed; spaced on ¾" centers to accept .080 dia. pin tip plugs.
LOWER: Double banana plug, on ¾" centers, nickel plated. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1845 QUANTITY DISC. CODE (A) **NET .95**

DOUBLE BANANA PLUG SPLICE



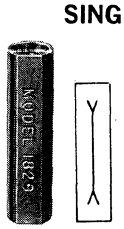


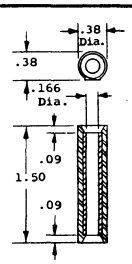


Provides rapid method for splicing cables. Reduces necessity of storing extra long cables. Molded thermo-plastic body eliminates shock hazard by completely enclosing banana plug contact. Brass, nickel plated banana jacks. .166 dia., on ¾" centers.
COLORS: Black, Red.

MODEL 1823 (Specify color) QUANTITY DISC. CODE (A) **NET .50**

SINGLE BANANA PLUG SPLICE





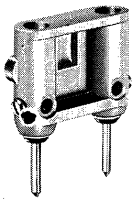
Provides rapid method for splicing single banana plug patch cords. Reduces the necessity of storing extra long patch cords. Molded thermo-plastic body eliminates shock hazard by completely enclosing banana plug contact. Brass, nickel plated banana jack, .166 dia.
COLORS: Black, Red.
Standard Package: 10 (per color)

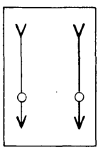
MODEL 1829 (Specify color) QUANTITY DISC. CODE (A) **NET .25 ea.**

POMONA ELECTRONICS

.080 PIN TIP PLUG ACCESSORIES

COMPONENT MOUNTING — TIP JACKS TO DOUBLE PIN TIP PLUG — SET SCREWS

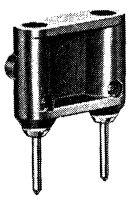


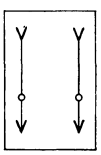


Features set screws on side of body to secure leads or components. Recess permits mounting of small component parts.
UPPER: Tip jacks, beryllium copper, gold flashed, spaced on ¾" centers, to accept .080 dia. pin tip plugs.
LOWER: Pin tips, .080 dia. on ¾" centers. Brass, nickel plated.
COLORS: Black, Red.

MODEL 2192 (Specify color) QUANTITY DISC. CODE (A) **NET 1.85**

COMPONENT MOUNTING PLUG— BANANA JACKS TO DOUBLE PIN TIP —SET SCREWS

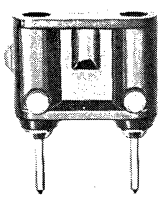


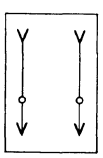


Permits single or double banana plugs to be used in equipment having tip jacks. Features recess for component mounting. Internal set screws firmly secure wire leads.
UPPER: Banana jacks, .166 dia., on ¾" centers. Brass, nickel plated.
LOWER: Pin tips .080 dia. on ¾" centers. Brass, nickel plated.
COLOR: Black.

MODEL 1858 QUANTITY DISC. CODE (A) **NET .75**

PLUG — COMPONENT MOUNTING — DOUBLE PIN TIP PLUG—SOLDER TURRETS

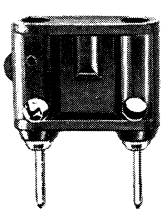


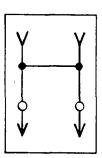


Features recess for mounting components. Gold flashed solder turrent terminals for permanent noise-free connections.
UPPER: Tip jacks, beryllium copper, gold flashed; spaced on ¾" centers to accept .080 dia. pin tip plugs.
LOWER: Pin tips, .080 dia. brass, nickel plated.
COLORS: Black, Red.

MODEL 1904 (Specify color) QUANTITY DISC. CODE (A) **NET 1.10**

INSULATED SHORTING BAR

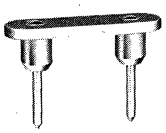


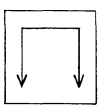


Used as a connecting link with equipment having tip jacks. Plugs internally solder bonded with 14 AWG wire. Top stack-up feature.
Current rating: 5 AMPS. cont., 10 AMPS. int. "Shorting Bar" marked on top of plug.
UPPER: Banana jacks, .166 dia. on ¾" centers. Brass, nickel plated.
LOWER: Pin tips, .080 dia. on ¾" centers. Brass, nickel plated. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLORS: Black, Red.

MODEL 1730 (Specify color) QUANTITY DISC. CODE (A) **NET 1.25**

METAL SHORTING BAR

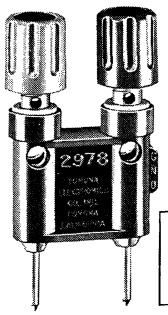


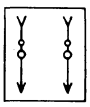


Used as a connecting link with equipment having tip jacks. Low profile, nickel plated brass shorting bar. Double pin tip plugs on ¾" centers swaged to 3/32" thick brass bar.
RESISTANCE: Less than 1.5 milliohms installed.
CURRENT RATING: 5 Amps Cont., 10 Amps Int.

MODEL 2072 QUANTITY DISC. CODE (A) **NET .85**

BINDING POSTS TO DOUBLE PIN TIP PLUG





Features insulated binding posts on ¾" centers for rapid mounting and interchangeability of components. Binding posts allow top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.
UPPER: Insulated double binding posts on ¾" centers. Top and side stack-up connectors (.166 dia.). Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Pin tips, .080 dia. on ¾" centers. Brass, nickel plated.
COLORS: Body, Black, Binding Posts, Black/Red.

MODEL 2978 QUANTITY DISC. CODE (A) **NET 2.25**

BINDING POST TO SINGLE PIN TIP PLUG

Features insulated binding post. Binding post allows top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.
UPPER: Insulated binding post. Top and side Stack-Up connectors (.166 dia.). Cross hole (.166 dia.) in body provide side Stack-Up connections.
LOWER: Pin tip, .080 dia. brass, nickel plated.
COLORS: Black, Red.

MODEL 2953 (Specify color) QUANTITY DISC. CODE (A) **NET 1.35**

SOLDERLESS PIN TIP PLUG—STACK-UP

Wire firmly held in place with internal set screw, eliminating soldering. Assembly of test leads simplified.
UPPER: Tip jack, beryllium copper, gold flashed; accepts .080 dia. pin.
LOWER: Pin tip, .080 dia., brass, nickel plated.
COLORS: Black, Red.

MODEL 1922 (Specify color) QUANTITY DISC. CODE (A) **NET .95**

ADAPTER — BANANA JACK TO PIN TIP

Permits standard single banana plug patch cords to be used with equipment having tip jacks.
UPPER: Banana jack, .166 dia. Brass, nickel plated.
LOWER: Pin tip, .080 dia. Brass, nickel plated. Cross hole (.166 dia.) in body provides side Stack-Up connection.
COLORS: Black, Red.

Standard Package: 10 (per color)

MODEL 1432 (Specify Color) QUANTITY DISC. CODE (A) **NET .20 ea.**

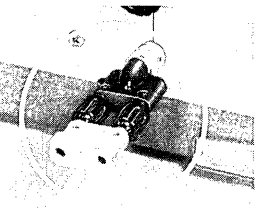
ADAPTER — .080 TIP JACK TO BANANA PLUG

Permits .080 dia. pin tip patch cords to be used with equipment having banana jacks. Insulation molded to plug body.
UPPER: Tip jack, beryllium copper, gold flashed. Accepts .080 dia. pin.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack. Cross hole (.166 dia.) in body provides side Stack-Up connection.
COLORS: Black, Red.

MODEL 1809 (Specify Color) QUANTITY DISC. CODE (A) **NET .75**

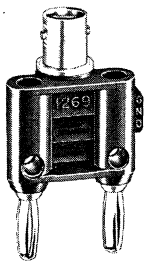
POMONA ELECTRONICS

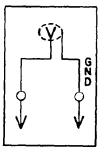
BNC ADAPTERS



Now! Increase the flexibility of your laboratory with the use of POMONA Molded test accessories. Minimize the necessity of stocking a large quantity and variety of coaxial cables by using POMONA molded adapters. Tough thermo-plastic material molded to plug body or connectors insures maximum strength, moisture resistance and excellent insulative properties.

ADAPTER — BNC RECEPTACLE TO DOUBLE BANANA PLUG

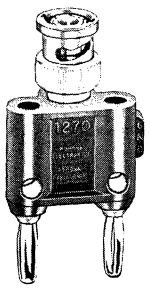


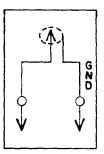


Permits BNC plug to be used with equipment having banana jacks. Excellent for adapting laboratory VTVM, oscilloscopes and signal generator inputs to readily available coaxial cables.
UPPER: BNC receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1269 QUANTITY DISC. CODE (A) **NET 3.25**

ADAPTER — BNC PLUG TO DOUBLE BANANA PLUG

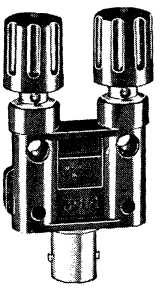


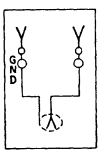


Permits BNC receptacle to be used with equipment having banana jacks. Minimizes number of coaxial connections for maximum efficiency.
UPPER: BNC plug.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1270 QUANTITY DISC. CODE (A) **NET 3.95**

ADAPTER — BINDING POSTS TO BNC RECEPTACLE

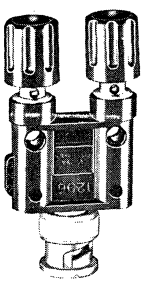


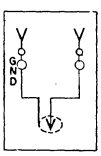


Permits single or double banana plugs to be used with equipment having BNC plug.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: BNC receptacle.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1452 QUANTITY DISC. CODE (A) **NET 4.95**

ADAPTER — BINDING POSTS TO BNC PLUG

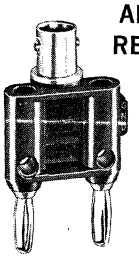


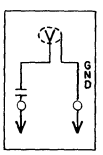


Permits single or double banana plugs to be used with equipment having BNC receptacle. Excellent for use with laboratory oscilloscopes.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: BNC plug.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1296 QUANTITY DISC. CODE (A) **NET 4.95**

ADAPTER — SIGNAL ISOLATOR — BNC RECEPTACLE TO DOUBLE BANANA PLUG





Permits BNC male connector to be used with equipment having banana jacks. General purpose ceramic capacitor molded internally. Rated @ .01 mfd ±20%, 200 WVDC. Insulation resistance 10,000 megohms min. Ideal for isolating DC signals from VTVM inputs and signal generator outputs.
UPPER: BNC receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Blue.

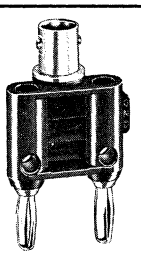
MODEL 1868 QUANTITY DISC. CODE (A) **NET 7.85**

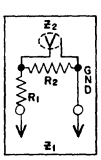
ADAPTER — SINGLE BINDING POST TO BNC PLUG

Permits single banana plug to be used with equipment having a BNC receptacle. Connector body features a Non-Tarnish finish.
UPPER: Insulated binding post for multiple stacking.
LOWER: BNC Plug.
COLOR: Binding Post: Black or Red (specify)

MODEL 3430 (Specify color) QUANTITY DISC. CODE (A) **NET 2.50**

ADAPTER — BNC MATCHING PAD

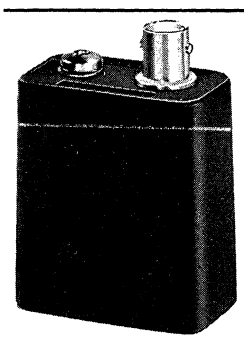


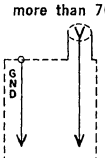


Adapts 600 OHM sources to 50, 75 or 93 OHM cables. Excellent for matching signal generators and VTVM's to standard coaxial cables. Ideal for receiver alignment. Molded in deposited carbon resistors 1%, ¼W.
UPPER: BNC receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

MODEL	COLOR	RANGE — OHMS	NET	QUANTITY DISC. CODE
1656-1	Yellow	600 to 50	10.85	(A)
1656-2	Red	600 to 75	10.85	
1656-3	White	600 to 93	10.85	
1656-4	Blue	300 to 50	10.85	

ADAPTER — BNC RECEPTACLE TO SHIELDED BANANA PLUGS

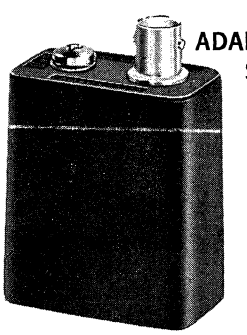


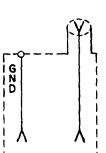


Permits BNC plug to be used with equipment having banana jack binding posts. Black anodized aluminum shield reduces noise Pick-up more than 70 DB. Ideal for low level inputs to oscilloscopes, wave analyzers, etc.
UPPER: BNC receptacle.
LOWER: Shielded double banana plug, on ¾" centers.

MODEL 1645 QUANTITY DISC. CODE (A) **NET 3.75**

ADAPTER — BNC RECEPTACLE TO SHIELDED BANANA JACKS



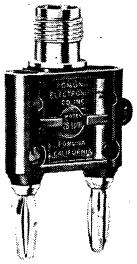


Permits BNC plug to be used with equipment having banana plugs. Black anodized aluminum shield reduces noise pick-up more than 70 DB. Ideal for low level inputs to oscilloscopes, wave analyzers, etc.
UPPER: BNC receptacle.
LOWER: Shielded double banana jacks, on ¾" centers.
COLOR: Black.

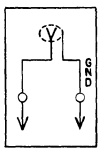
MODEL 1681 QUANTITY DISC. CODE (A) **NET 3.75**

POMONA ELECTRONICS

TNC & "N" ADAPTERS

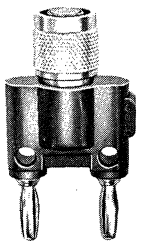


ADAPTER — TNC RECEPTACLE TO DOUBLE BANANA PLUG

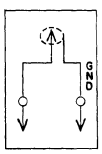


Permits TNC plug to be used with equipment having banana jacks. Perfect for connecting modern control systems to laboratory test equipment.
UPPER: TNC receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1340 QUANTITY DISC. CODE (A) **NET 6.85**

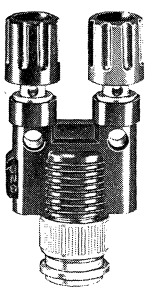


ADAPTER — TNC PLUG TO DOUBLE BANANA PLUG

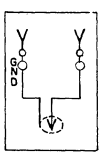


Permits TNC receptacle to be used with equipment having banana jacks. Minimizes your stock of coaxial cables.
UPPER: TNC plug.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1981 QUANTITY DISC. CODE (A) **NET 7.85**

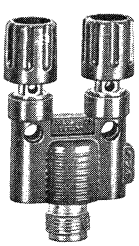


ADAPTER — BINDING POSTS TO TNC PLUG

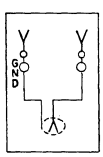


Permits single or double banana plugs to be used with equipment having a TNC receptacle. Exceptional for signal insertion with rapid interchangeability of terminations.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: TNC plug.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1982 QUANTITY DISC. CODE (A) **NET 7.85**

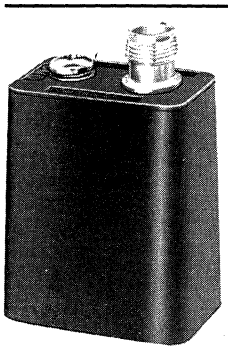


ADAPTER — BINDING POSTS TO TNC RECEPTACLE

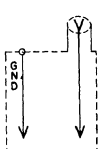


Permits single or double banana plugs to be used with equipment having TNC plug. Useful for rapid interconnection of systems and components.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: TNC receptacle.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1976 QUANTITY DISC. CODE (A) **NET 6.85**

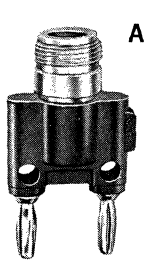


ADAPTER — TNC RECEPTACLE TO SHIELDED BANANA PLUGS

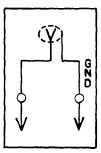


Permits TNC plug to be used with equipment having banana jack binding posts. Black anodized aluminum shield reduces noise pick-up more than 70 DB.
UPPER: TNC receptacle.
LOWER: Double banana plug, on ¾" centers.
COLOR: Black.

MODEL 1975 QUANTITY DISC. CODE (A) **NET 6.85**

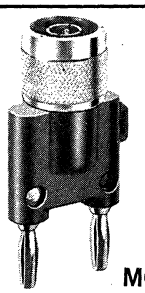


ADAPTER — TYPE "N" RECEPTACLE TO DOUBLE BANANA PLUG

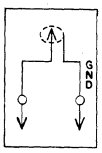


Permits Type "N" plug to be used with equipment having banana jacks. Ideal for connecting R.F. equipment to conventional test equipment.
UPPER: Type "N" receptacle.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1740 QUANTITY DISC. CODE (A) **NET 6.85**

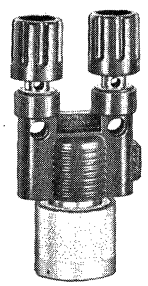


ADAPTER — TYPE "N" PLUG TO DOUBLE BANANA PLUG

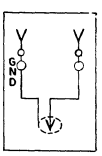


Permits type "N" receptacle to be used with equipment having banana jacks.
UPPER: Type "N" plug.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1770 QUANTITY DISC. CODE (A) **NET 7.85**

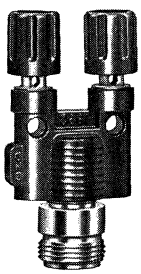


ADAPTER — BINDING POSTS TO TYPE "N" PLUG

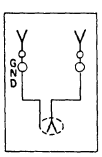


Permits single or double banana plugs to be used with equipment having Type "N" receptacle. Binding posts allow component insertion.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Type "N" plug.
COLOR: Black. Binding Posts: Black/Red.

MODEL 1796 QUANTITY DISC. CODE (A) **NET 7.85**

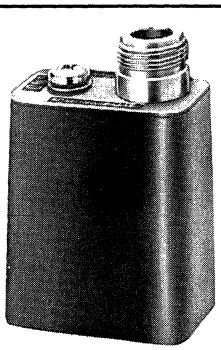


ADAPTER — BINDING POSTS TO TYPE "N" RECEPTACLE

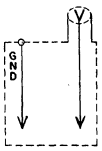


Permits single or double banana plugs to be used with equipment having type "N" plug. Useful for rapid interconnection of systems and components.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Type "N" receptacle.
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1992 QUANTITY DISC. CODE (A) **NET 6.85**



ADAPTER — TYPE "N" RECEPTACLE TO SHIELDED BANANA PLUGS

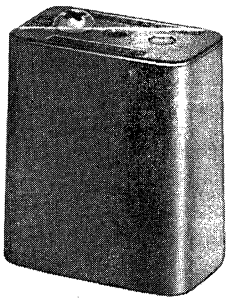


Permits type "N" plug to be used with equipment having banana jack binding posts. Black Anodized aluminum shield reduces noise pick-up more than 70 DB.
UPPER: Type "N" receptacle.
LOWER: Double banana plug, on ¾" centers.
COLOR: Black.

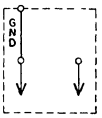
MODEL 1983 QUANTITY DISC. CODE (A) **NET 6.85**

POMONA ELECTRONICS

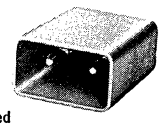
SHIELDED BANANA PLUGS
UHF ADAPTERS

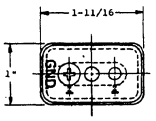


SHIELDED DOUBLE BANANA PLUG
IN-LINE CABLE ENTRY

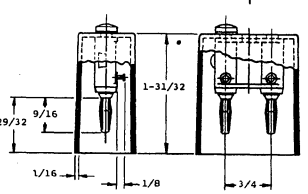


RATED: 15A CONTINUOUS
1200 WVDC
3400 VDC BREAKDOWN
2.5 PF @ 1 MC

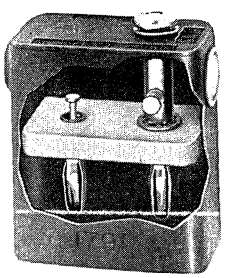




- Shielded double plug ¾" spaced
- Die cast aluminum shell, black anodized
- Noise pick-up reduced 70 DB
- Gold flashed solder turret terminals for positive reliable cable connections
- One piece nickel plated beryllium copper springs for use with standard 0.166 dia. banana jack binding posts.
- Rounded banana spring design results in maximum contact area and minimum contact resistance
- GND clearly molded in shell
- Cable opening, 7/32" diameter

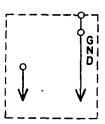


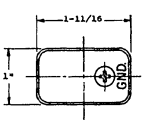
MODEL 1433 QUANTITY DISC. CODE (A) **NET 2.75**



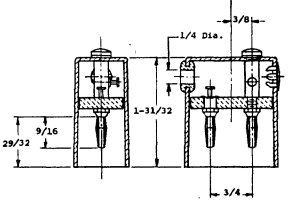
SHIELDED DOUBLE BANANA PLUG
RIGHT ANGLE CABLE ENTRY

RATED: 15A CONTINUOUS
2800 PEAK WV
5000 VDC BREAKDOWN
2.0 PF @ 1 MC.



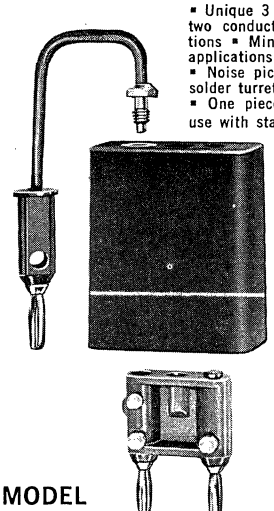


- Shielded double plug, ¾" spaced
- Ceramic insulating base
- Die cast aluminum shell, black anodized
- GND clearly molded in shell
- Noise pick-up reduced 70 DB
- One piece nickel plated beryllium copper springs for use with 0.166 diameter banana jack binding posts.
- Rounded banana spring design results in maximum contact area and minimum contact resistance
- Vinyl grommet and nickel plated snap button supplied



MODEL 1791 QUANTITY DISC. CODE (A) **NET 3.95**

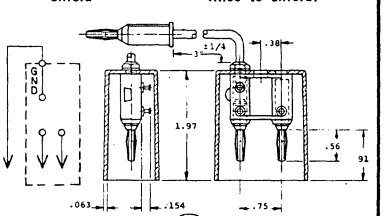
BALANCED LINE SHIELDED DOUBLE BANANA PLUG



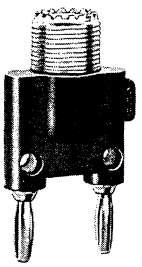
- Unique 3 terminal design allows connection to shielded two conductor cable while maintaining balanced conditions • Minimizes ground loop errors in low signal level applications • Die cast aluminum shell, black anodized • Noise pick-up reduced at least 70 DB • Gold flashed solder turret terminals for reliable noise free connections • One piece nickel plated beryllium copper springs for use with standard 0.166 dia. banana jack binding posts.

RATED:

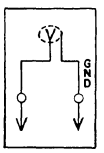
- 15A Continuous
- 1000 WV Peak; line to shield
- 2000 WV peak; line to line
- 2500 V peak breakdown; line to shield
- 5000 V peak breakdown, line to line
- 2.0 pf @ 1 MC Capacity; line to line
- 3.0 pf @ 1 MC. capacity; both lines to shield.



MODEL 1921 QUANTITY DISC. CODE (A) **NET 5.85**

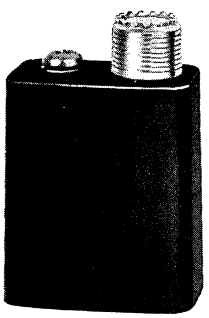


ADAPTER — UHF RECEPTACLE TO DOUBLE BANANA PLUG

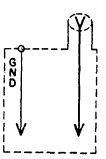


Permits UHF plug to be used with equipment having banana jacks.
UPPER: UHF receptacle, ⅝" dia.
LOWER: Double banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1707 QUANTITY DISC. CODE (A) **NET 4.85**

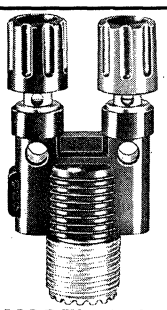


ADAPTER — UHF RECEPTACLE TO SHIELDED BANANA PLUGS

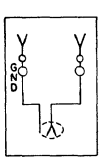


Permits UHF plug to be used with equipment having banana jack binding posts. Black anodized shield reduces noise pick-up at least 70 DB.
UPPER: UHF receptacle, ⅝" dia.
LOWER: Double banana plug on ¾" centers.
COLOR: Black.

MODEL 1708 QUANTITY DISC. CODE (A) **NET 5.85**

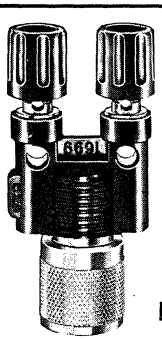


ADAPTER — BINDING POSTS TO UHF RECEPTACLE

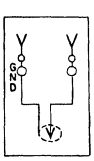


Permits single or double banana plugs to be used with equipment having UHF plug.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: UHF receptacle, ⅝" dia.
COLOR: Body, Black. Binding posts: Black/Red.

MODEL 1792 QUANTITY DISC. CODE (A) **NET 5.85**



ADAPTER — BINDING POSTS TO UHF PLUG



Permits single or double banana plugs to be used with equipment having a UHF receptacle, ⅝" dia. Convenient for use with modern oscilloscopes. Center conductor binding post Red; Ground, Black.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. jacks.
LOWER: UHF plug.

MODEL 1699 QUANTITY DISC. CODE (A) **NET 5.85**

ADAPTER — BINDING POST TO UHF PLUG

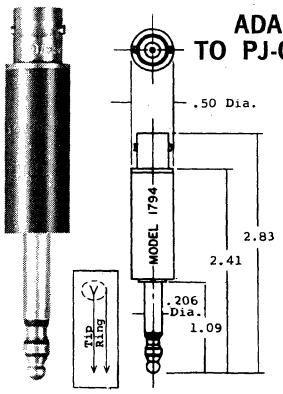
Permits single banana plug to be used with equipment having a UHF receptacle, ⅝" dia. Adds flexibility to your oscilloscope.
UPPER: Insulated binding post with .166 dia. banana jack.
LOWER: UHF plug.

MODEL 1698 QUANTITY DISC. CODE (A) **NET 3.85**

POMONA ELECTRONICS

PHONE AND PHONO PLUG ADAPTERS

ADAPTER-BNC RECEPTACLE TO PJ-068/PJ-309* PHONE PLUG

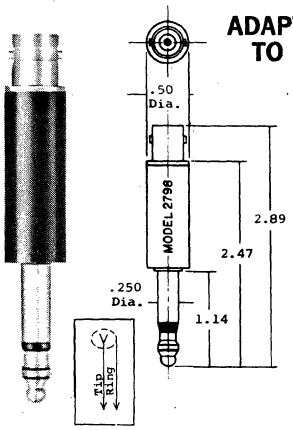


Permits BNC plug to be used with equipment having three circuit phone jacks for .206 dia. phone plugs. Readily adapts equipment to available BNC coaxial cables. Tip connected to inner contact of connector and Ring connected to shell. Sleeve, no connection.

LOWER: Phone Plug, PJ-068/PJ-309*
COLOR: Black
*PJ-309 Interchangeable with WE-309

MODEL 1794 QUANTITY DISC. CODE (A) **NET 6.85**

ADAPTER — BNC RECEPTACLE TO PJ-051* PHONE PLUG

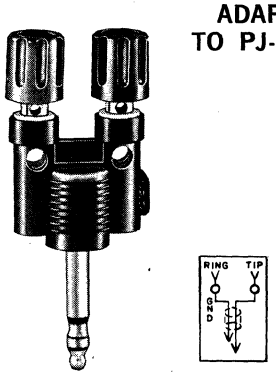


Permits BNC plug to be used with equipment having three circuit phone jacks for .250 dia. phone plugs. Readily adapts equipment to available BNC coaxial cables. Tip connected to inner contact of connector and Ring connected to shell. Sleeve, no connection.

UPPER: BNC receptacle, UG1094/U.
LOWER: Phone Plug, PJ-051*
*PJ-051 Interchangeable with WE 310

MODEL 2798 QUANTITY DISC. CODE (A) **NET 6.85**

ADAPTER-BINDING POSTS TO PJ-068/PJ-309* PHONE PLUG

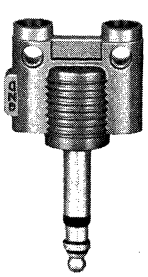


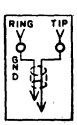
Permits single or double banana plug to be used with equipment having three circuit phone jacks for .206 dia. phone plugs. Ideal for rapid mounting of components and test leads. The PJ-068 and PJ-309 Plug have the same mechanical dimensions.

UPPER: Insulated binding posts on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side stack-up.
LOWER: Phone Plug, PJ-068/PJ-309*
COLOR: Body, Black. Binding Posts: Black/Red.
*PJ-309 Interchangeable with WE 309.

MODEL 3365 QUANTITY DISC. CODE (A) **NET 6.85**

ADAPTER-BANANA JACKS TO PJ-051* PHONE PLUG



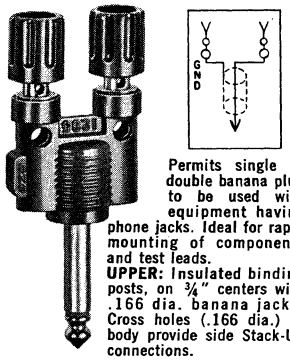


Permits single or double banana plugs to be used with equipment having three circuit phone jacks for .250 dia. phone plugs. Tip connected to hot side of adapter and Ring connected to ground side. Sleeve, no connection.

UPPER: Double banana jack, on ¾" centers. Crossholes (.166 dia.) in body provide side Stack-up connection.
LOWER: Phone Plug, PJ-051*
COLOR: Black
*PJ-051 Interchangeable with WE310

MODEL 2112 QUANTITY DISC. CODE (A) **NET 5.85**

ADAPTER — BINDING POSTS TO PHONE PLUG



Permits single or double banana plug to be used with equipment having phone jacks. Ideal for rapid mounting of components and test leads.

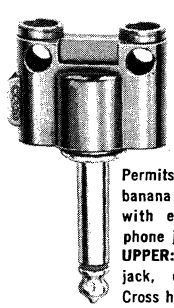
UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.

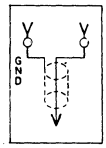
LOWER: ¼" dia. phone plug, 1-3/16" long.
COLOR: Body, Black. Binding Posts: Black/Red.

QUANTITY DISC. CODE (A)

MODEL 1285 NET 4.85

ADAPTER — BANANA JACKS TO PHONE PLUG





Permits single or double banana plugs to be used with equipment having phone jacks.

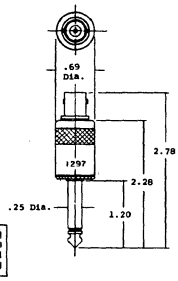
UPPER: Double banana jack, on ¾" centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

LOWER: Standard ¼" dia. phone plug, 1-3/16" long.
COLOR: Black.

QUANTITY DISC. CODE (A)

MODEL 1980 NET 2.85

ADAPTER — BNC RECEPTACLE TO PHONE PLUG

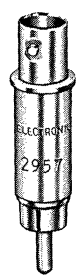


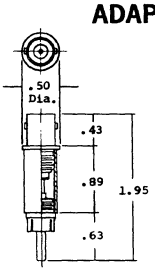
Permits BNC plug to be used with equipment having standard ¼" dia. phone jacks. Readily adapts equipment to available BNC coaxial cables. All metal construction to insure proper shielding.

UPPER: BNC receptacle, UG1094/U.
LOWER: Standard ¼" dia. phone plug, 1 3/16" Long.

MODEL 1297 QUANTITY DISC. CODE (A) **NET 5.85**

ADAPTER — BNC RECEPTACLE TO PHONO PLUG



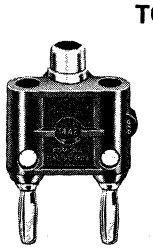


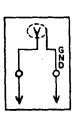
Permits BNC plug to be used with equipment having phono jacks. Readily adapts equipment to available BNC coaxial cables. All metal construction reduces pick-up more than 70 DB. to insure proper shielding.

UPPER: BNC receptacle UG1094/U.
LOWER: Phono plug.

MODEL 2957 QUANTITY DISC. CODE (A) **NET 3.50**

ADAPTER — PHONO JACK TO DOUBLE BANANA PLUG





Permits Phono plug to be used with equipment having banana jacks or binding posts. Quickly converts a cable with a phono plug to a double banana plug.

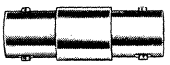
UPPER: Phono jack.
LOWER: Double Banana plug, on ¾" centers. Cross holes (.166 dia.) in body provide Side Stack-Up connections.
COLOR: Black.

MODEL 1442 QUANTITY DISC. CODE (A) **NET 3.85**

POMONA ELECTRONICS

TEST ADAPTERS

ADAPTER — BNC JACK TO JACK

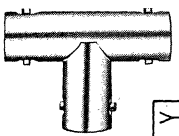


Allows the interconnection of two coaxial cables with BNC plugs.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contacts.

MODEL 3283 QUANTITY DISC. CODE (A) **NET 1.50**

ADAPTER — BNC "T" — 3 JACKS

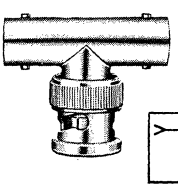


Allows the interconnection of three coaxial cables with BNC plugs.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contacts.

MODEL 3284 QUANTITY DISC. CODE (A) **NET 5.45**

ADAPTER — BNC "T" JACK — PLUG — JACK

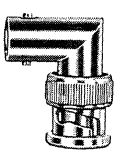


With this adapter, equipment or coaxial cables having a single BNC jack are changed to two BNC jacks.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper female and outer male contact.

MODEL 3285 QUANTITY DISC. CODE (A) **NET 3.25**

ADAPTER — RIGHT ANGLE BNC JACK TO BNC PLUG

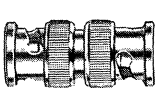


Adapts straight BNC plug to right angle BNC plug.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Beryllium copper female and outer finger contact.
- Gold flashed female and male contact.

MODEL 3534 QUANTITY DISC. CODE (A) **NET 3.25**

ADAPTER — BNC PLUG TO PLUG



Allows the interconnection of two coaxial cables with BNC Jacks.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Beryllium copper outer finger contacts.
- Gold flashed male contacts.

MODEL 3533 QUANTITY DISC. CODE (A) **NET 2.95**

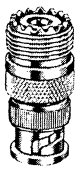
ADAPTER — BNC JACK TO UHF PLUG

Allows the use of a BNC plug on equipment having a UHF Jack.

FEATURES:
- Non-Tarnish finish.
- Rexolite insulation.
- Gold flashed beryllium copper female contact.
- Gold flashed male contact.

MODEL 3286 QUANTITY DISC. CODE (A) **NET 1.75**

ADAPTER — UHF JACK TO BNC PLUG



Allows the use of a UHF Plug on equipment having a BNC Jack.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Rexolite insulation.
- Gold flashed Phosphor Bronze female UHF and male BNC contacts.

MODEL 3287 QUANTITY DISC. CODE (A) **NET 3.25**

ADAPTER — BNC JACK TO TYPE "N" PLUG

Allows the use of a BNC Plug on equipment having a type "N" jack.

FEATURES:
- Non-Tarnish finish.
- Teflon insulation.
- Gold flashed contacts.

MODEL 3288 QUANTITY DISC. CODE (A) **NET 2.25**

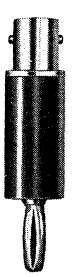
ADAPTER — TYPE "N" JACK TO BNC PLUG

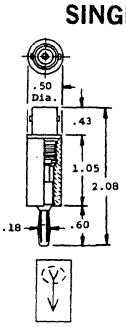
Allows the use of a Type "N" plug on equipment having a BNC jack.

FEATURES:
- Non-Tarnish finish.
- Teflon insulation.
- Beryllium copper female "N" contact and BNC outer finger contact.
- Gold flashed female "N" and male BNC contact.

MODEL 3535 QUANTITY DISC. CODE (A) **NET 2.95**

ADAPTER—BNC RECEPTACLE TO SINGLE BANANA PLUG



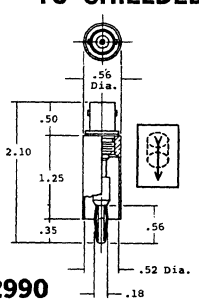


Permits BNC plug to be used with equipment having banana jacks. Inner conductor connected only. Excellent for adapting laboratory VTVM, oscilloscopes and signal generator inputs to readily available coaxial cables.

UPPER: BNC receptacle, UG1094/U.
LOWER: Single Banana Plug.
COLOR: Black.

MODEL 1894 QUANTITY DISC. CODE (A) **NET 2.50**

ADAPTER — BNC RECEPTACLE TO SHIELDED BANANA PLUG



Permits BNC plug to be used with equipment having banana jacks or binding posts. Ideal for use when shielding of single banana jacks is needed. Nickel plated brass shield reduces pick-up more than 70 DB.

UPPER: BNC Receptacle, UG1094/U.
LOWER: Shielded single banana plug.

MODEL 2990 QUANTITY DISC. CODE (A) **NET 2.50**

POMONA ELECTRONICS

ISOLATION PLUGS — COMPONENT MOUNTINGS

CREATE passive and active networks, voltage dividers, isolation networks or attenuators with the Split-Terminal isolation plugs described below.

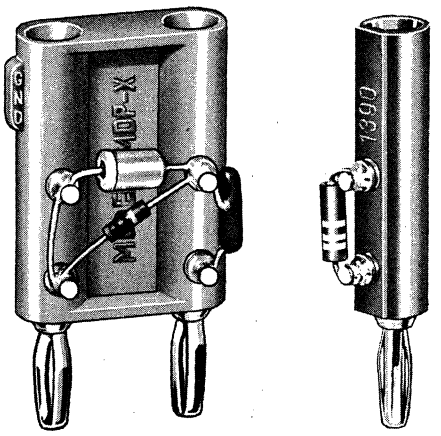
Gold flashed solder turret terminals provide permanent, reliable noise-free connections for component mounting.

Tough thermo-plastic material molded to plug body and connectors insures maximum strength, moisture resistance and excellent insulative properties.

Specifications for MDP-X, 1390, 1837, 1468:

- Fits standard 0.166 dia. banana jack.
- Spring, heat treated beryllium copper alloy 170 per QQ-C-533.
- Plug body, Brass per QQ-B-626 Comp. 22.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.

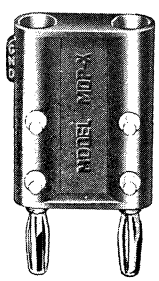
TYPICAL APPLICATION



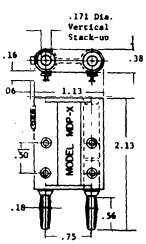
ACTUAL SIZE

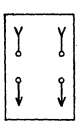
MODEL MDP-X **MODEL 1390**

DOUBLE BANANA PLUG, FOUR TERMINAL ISOLATION



Provides four terminal isolation. Top Stack-Up receptacles isolated from lower plugs. Ideal for insertion of matching networks in laboratory VTVM's, signal generators, etc. Gold flashed solder turret terminals for permanent noise-free connections.

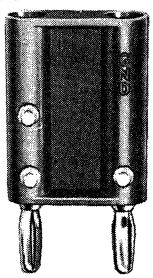




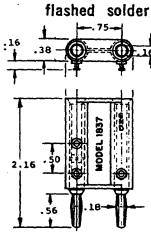
UPPER: Double banana jacks, .166 dia., on ¾" centers.
LOWER: Double banana plug on ¾" centers.
COLOR: Red.

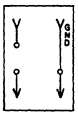
MODEL MDP-X QUANTITY DISC. CODE (A) **NET 3.25**

DOUBLE BANANA PLUG, THREE TERMINAL ISOLATION



Provides three terminal isolation. Excellent for "L" and "Pi" networks. Plug and receptacle nickel plated. Gold flashed solder turret terminals for permanent noise-free connections. "Ground" is straight feed-thru. Hot side isolated.

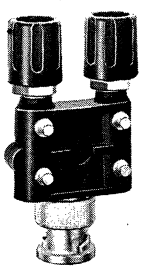


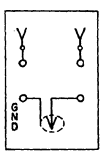


UPPER: Banana jacks, .166 dia. on ¾" centers.
LOWER: Double banana plug on ¾" centers.
COLOR: Blue.

MODEL 1837 QUANTITY DISC. CODE (A) **NET 2.75**

ADAPTER — BINDING POSTS TO BNC PLUG, ISOLATION

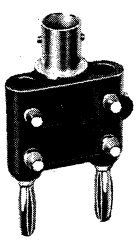


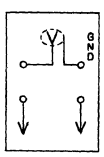


Permits single or double banana plugs to be used with equipment having BNC receptacle. Provides isolation for a four terminal network. Binding posts facilitate connections of test leads or additional components. Gold flashed solder turret terminals provide permanent noise-free connections.
UPPER: Insulated binding posts, on ¾" centers with .166 dia. jacks.
LOWER: BNC plug.
COLOR: Body, Black.
Binding Posts: Black/Red.

MODEL 1469 QUANTITY DISC. CODE (A) **NET 10.85**

ADAPTER — BNC RECEPTACLE TO DOUBLE BANANA PLUG, ISOLATION

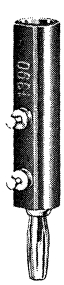




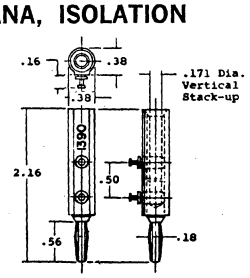
Permits BNC plug to be used with equipment having banana jacks. Provides isolation for a four terminal network. Excellent for matching pad networks. Gold flashed solder turret terminals for permanent noise-free connnections.
UPPER: BNC receptacle.
LOWER: Double banana plug, on ¾" centers.
COLOR: Black.

MODEL 1468 QUANTITY DISC. CODE (A) **NET 9.85**

PLUG — SINGLE BANANA, ISOLATION

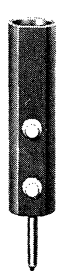


Provides two terminal isolation. Top Stack-Up receptacle is isolated from lower plug to permit addition of series resistors, diodes, etc. Ideal for computers, lab. circuit design and testing. Gold flashed solder turret terminals for permanent noise-free connections.
UPPER: Banana jack, .166 dia.
LOWER: Banana plug.
COLORS: Black, Red.

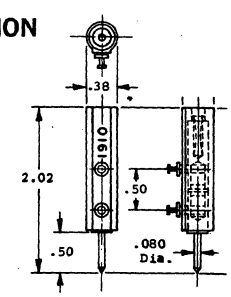


MODEL 1390 (Specify color) QUANTITY DISC. CODE (A) **NET 1.50**

PLUG — PIN TIP, ISOLATION



Pin tip jack is isolated from .080 pin tip plug. Provides for addition of series components. Ideal for use with computer boards, lab circuit designs, etc. Gold flashed solder turret terminals for permanent noise-free connections.
UPPER: Tip jack, beryllium copper, gold flashed; accepts .080 dia. pin.
LOWER: Pin tip, .080 dia. Brass, nickel plated.
COLORS: Black Red.

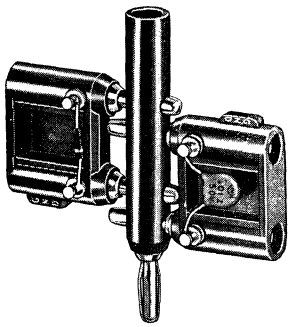


MODEL 1910 (Specify color) QUANTITY DISC. CODE (A) **NET 1.50**

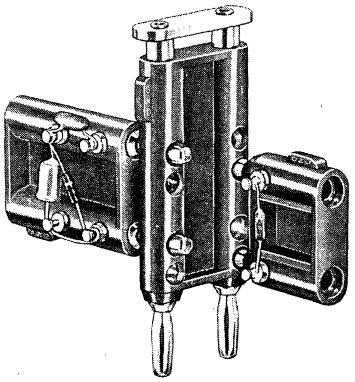
POMONA ELECTRONICS

SERIES-PARALLEL ISOLATION PLUGS CONNECTOR TEST ADAPTERS

SERIES PARALLEL ISOLATION PLUGS



MODEL 3501



MODEL 3502

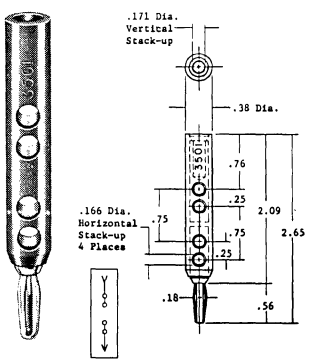
These plugs enable you to build unlimited combinations of series parallel networks eg., voltage dividers attenuator and etc.

Upper crossholes spaced ¾" on centers from lower crossholes to allow connection of double banana plugs. Double banana plugs may be plugged in from both sides.

FEATURES:

- Fits .166 dia. Banana jacks.
- Spring, heat treated beryllium copper alloy 170 per QQ-C-533.
- Plug bodies and jacks, Brass, nickel plated per QQ-N-290 class 2.
- Tough thermoplastic molded to banana jacks and plug bodies.

SERIES-PARALLEL ISOLATION PLUG

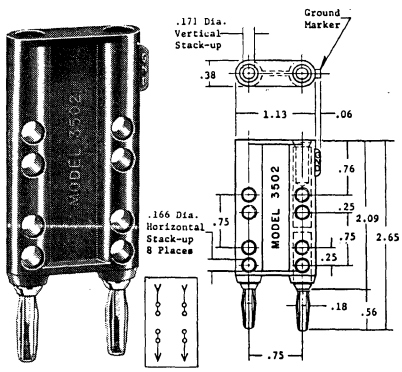


Top banana jack and upper pair of crossholes isolated from lower pair of crossholes and banana plug.

UPPER: Banana jack .166 dia.
CENTER: 4 crossholes .166 dia.
LOWER: Banana Plug.
COLOR: Red.

MODEL 3501 QUANTITY DISC. CODE (A) **NET 1.50**

DUAL SERIES-PARALLEL ISOLATION PLUG

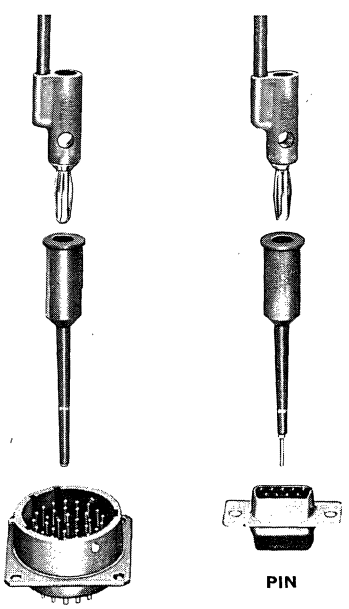


Excellent for building attenuators, voltage dividers, isolation networks, etc. Top banana jacks and upper pair of crossholes isolated from lower pair of crossholes and banana plugs.

UPPER: Double banana jack .166 dia., on ¾" centers.
CENTER: 8 crossholes .166 dia.
LOWER: Double banana plug on ¾" centers.
COLOR: Red.

MODEL 3502 QUANTITY DISC. CODE (A) **NET 3.25**

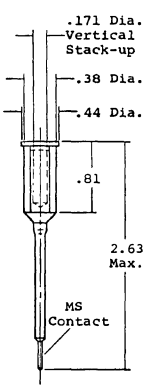
TYPICAL APPLICATION



CONNECTOR TEST ADAPTERS

An ideal test adapter for the rapid testing of the hard to get at contacts of multi-pin MS type connectors such as miniature circular, standard circular and rack and panel. Excellent for testing of continuity, voltage and signal on individual contacts. Test adapter available in Pin and socket contacts sizes of 20, 16 and 12.

- Gold flashed contacts conform to "MS" Dimensions.
- Flexible tip prevents damage to connector contacts if test adapter is accidently bent.
- Flexible tip allows testing of adjacent contacts.
- Fully insulated to prevent accidental shorting.
- Accepts standard banana plug.



UPPER: Banana jack, .166 dia., brass, nickel plated.
LOWER: "MS" style contact, gold flashed, see tab block.
Color: See tab block.

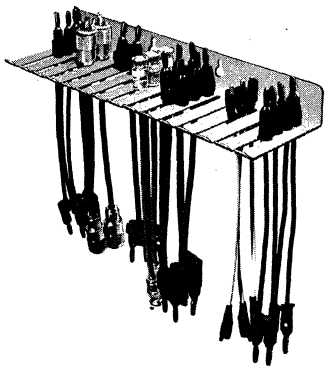
MISCELLANEOUS ACCESSORIES



TEST LEAD HOLDER

No need to spend time searching for a particular test lead. With this new rack, all of your patch cords and cable assemblies can be conveniently filed for instant selection — within easy reach. Holder mounts quickly on any vertical surface. Test leads are easy to store, easy to remove. Two models to choose from for different size cables.

MATERIAL: Cold Rolled Steel.
FINISH: Baked Enamel.

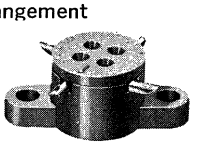
TRANSISTOR BREADBOARD SOCKET

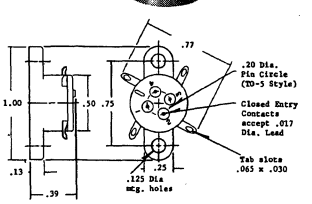
For Transistors with TO-5, and TO-12 Lead Arrangement

Excellent for breadboarding. All connections made on top of breadboard for quick accessible test points.



FEATURES:

- Closed entry contacts accept .016—.019 dia. leads.
- Beryllium copper contacts silver plated.
- Contact numbers on top of socket.
- Socket molded of low loss mica filled phenolic.
- Easily mounted with two #2 screws.



MODEL XS-T4 QUANTITY DISC. CODE (C) **NET .95**

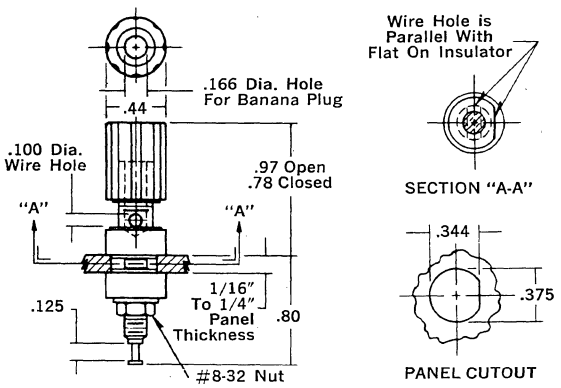
INSULATED LEXAN* POLYCARBONATE BINDING POSTS

Three Miniaturized standard insulated Lexan* Binding Posts to fill the needs of most critical requirements. The plastic molding on these units is Lexan* Polycarbonate which has high impact strength, low loss, low power factor and high insulation resistance. Smaller design than presently available.

FEATURES:
- Polycarbonate insulation.
- Small design.
- Standard and low thermal EMF types available.
- 5 way Binding Post.
- Accepts std. Banana Plug.
- Captive thumb nut.
- Gold or nickel plated.

RATINGS:
- Operating Temp.: —65°C. to +150°C.
- Working Voltage: 1500 VDC.
- Current: 15 Amps Cont., 30 Amps Int.



NEW

MINIATURIZED STANDARD TYPE

BRASS body and thumb nut insert, available GOLD FLASHED per MIL-G-45204 (or) NICKEL PLATED per QQ-N-290 class 2.

COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

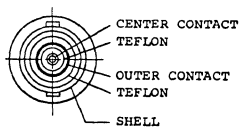
TWINAX JACKS AND PATCH CORDS

Due to the ever increasing need for low level signal patching and balanced line applications, Pomona introduces Twinax Patch cords and jacks. For use with 2 conductor shielded cable.

These connectors feature a concentric design with a center contact, outer contact and outer shell (see dwg.). This concentric design does not require matching of halves such as the Polarized stepped insulator connectors.



MATERIAL:
- Bodies and Fittings: Brass per QQ-B-626 Comp. 22 ½ hard.
- Insulators: Teflon per MIL-P-19468.
- Center Contacts:
  Female — Beryllium copper per QQ-C-530 Cond. H.
  Male — Brass per QQ-B-626, Comp. 22 ½ hard.
- Outer Contacts: Beryllium copper per QQ-C-530 Cond. H.

FINISH:
- Bodies and Fittings: Non-Tarnish.
- Center Contacts: Gold over copper plate.
- Outer Contacts: Gold over copper plate.

RATING:
- 500 VRMS

HIGH VOLTAGE CONNECTORS

CORONA-FREE 30 KV CONNECTORS

A series of Corona-Free 30 KV Connectors.

Ideal for use in X-ray, radar, laser, RF, pulse, power, and other military/industrial applications.

APPLICABLE SPECIFICATIONS: (All Models)
- Up to 30 KV continuous unmated.
- Up to 10,000 ft. and 90% humidity.

FEATURES:
- Couplers and bulkhead receptacle molded of high dielectric epoxy resin.
- Nickel plated brass connector bodies.
- Delrin insulation on cable plug.
- Couplers are fully shielded for greater safety, and reduction of electrostatic collection of dust.
- Recessed contacts eliminate danger of shock.
- Bulkhead receptacle includes corona ball, plus "O" ring for hermetic sealing.

POMONA ELECTRONICS

½" SPACED MINIATURE BANANA PLUGS AND ACCESSORIES

ONE-THIRD SMALLER Miniature Banana Plugs, a state-of-the-art development for the ever increasing demand for miniaturized test equipment.

Banana plug springs are precision formed of one-piece beryllium copper, heat treated for maximum life and low contact resistance. Tough thermoplastic molded to plug bodies.

SPECIFICATIONS:

- Fits 0.104 dia. miniature banana jacks.
- Plug body brass, per QQ-B-626, Comp. #22.
- Gold flashed per MIL-G-45204 Type 11 (.00002/.00003).
- Spring, beryllium copper alloy 170 per QQ-C-533.

RATINGS:

- Operating temp.: —25°C to +85°C.
- Working voltage: 2500 VDC.
- Current: 5 amps cont., 10 amps. int.

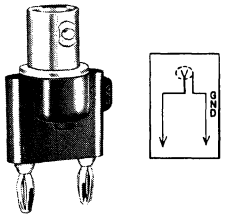
½" SPACED MINIATURE BANANA PLUG ADAPTERS AND ACCESSORIES

ADAPTER — BNC RECEPTACLE TO MINIATURE DOUBLE BANANA PLUG



This adapter allows a BNC plug to be used with equipment having ½" spaced miniature .104 dia. banana jacks. Excellent for adapting test equipment to standard coaxial cables.

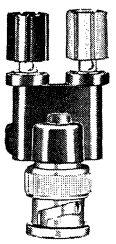
UPPER: BNC receptacle, UG 1094/U.

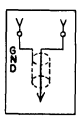
LOWER: Miniature double banana plug on ½" centers, for use with .104 dia. miniature jacks. Gold flashed one piece heat treated beryllium copper springs.

COLOR: Black.

MODEL 3269 QUANTITY DISC. CODE (A) **NET 3.25**

ADAPTER — MINIATURE BINDING POSTS TO BNC PLUG





This adapter converts a BNC receptacle to miniature ½" spaced 5 way binding posts.

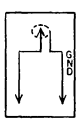
UPPER: Insulated, gold flashed miniature 5 way binding posts on ½" centers with .104 dia. miniature banana jacks.

LOWER: BNC plug.

COLOR: Black.

MODEL 3296 QUANTITY DISC. CODE (A) **NET 5.45**

ADAPTER — BNC PLUG TO MINIATURE DOUBLE BANANA PLUG



Allows a BNC cable jack to be used on equipment having ½" spaced .104 dia. banana jacks.

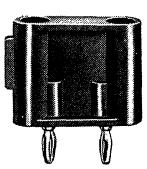
UPPER: BNC plug.

LOWER: Miniature double banana plug on ½" centers, for use with .104 dia. miniature jacks. Gold flashed one piece heat treated beryllium copper springs.

COLOR: Black.

MODEL 3270 QUANTITY DISC. CODE (A) **NET 4.50**

ADAPTER — STANDARD DOUBLE BANANA JACK TO MINIATURE DOUBLE BANANA PLUG



Permits standard double banana plug on ¾" centers to be used with equipment having miniature double banana jacks on ½" centers.

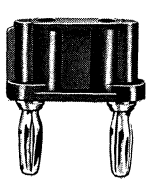
UPPER: Standard double banana jacks .166 dia. on ¾" centers. Brass, nickel plated.

LOWER: Miniature double banana plug on ½" centers. One piece nickel plated beryllium copper spring for use with .104 dia. miniature banana jacks.

COLOR: Black.

MODEL 2952 QUANTITY DISC. CODE (A) **NET 1.25**

ADAPTER — MINIATURE DOUBLE BANANA JACK TO STANDARD DOUBLE BANANA PLUG



Permits miniature double banana plug on ½" centers to be used with equipment having standard double banana jacks on ¾" centers.

UPPER: Miniature double banana jacks, .104 dia. on ½" centers. Brass, nickel plated.

LOWER: Standard double banana plug on ¾" centers. One piece nickel plated beryllium copper spring for use with .166 dia. standard banana jacks.

COLOR: Black.

MODEL 2943 QUANTITY DISC. CODE (A) **NET 1.25**

ADAPTER—STANDARD BANANA JACK TO MINIATURE BANANA PLUG

Permits standard banana plug to be used with equipment having miniature banana jacks.

UPPER: Banana jack, .166 dia.; Brass, nickel plated.

LOWER: Miniature banana plug, one piece nickel plated beryllium copper spring for use with .104 dia. miniature banana jacks.

COLORS: Black, Red.

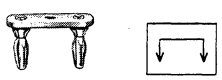
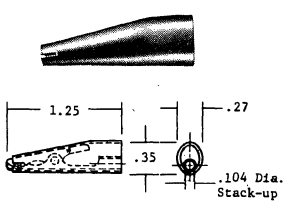
MINIATURE — METAL SHORTING BAR



Low profile, gold flashed, brass shorting bar. Miniature banana plugs on ½" centers swaged to 1/16" thick brass bar. Center hole accepts #4-40 screw for easy removal. Current rating 5 Amps. cont., 10 Amps INT.

MODEL 3030 QUANTITY DISC. CODE (A) **NET .85**

INSULATED MINIGATOR CLIP TO MINIATURE BANANA JACK

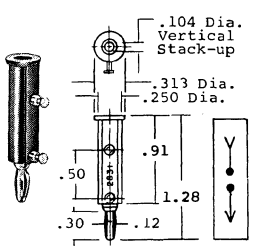


This Minigator clip accepts a miniature banana plug in the rear. Clip is steel, cadmium plated. Pinned hinge construction with full-meshing jaws for small wires. Vinyl insulators (5 red, 5 black). Unassembled.

Standard Package of 10 clips and 10 insulators.

MODEL 3217 QUANTITY DISC. CODE (A) **NET .20 ea.**

MINIATURE — SINGLE BANANA PLUG ISOLATION



Provides two terminal isolation. Allows for addition of series components. Excellent for circuit design and testing. Gold flashed solder turret terminals for permanent noise-free connections.

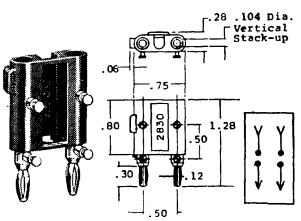
UPPER: Miniature banana jack, .104 dia. Brass, gold flashed.

LOWER: Miniature banana plug, one piece gold flashed beryllium copper spring.

COLOR: Black, Red.

MODEL 2831 (specify color) QUANTITY DISC. CODE (A) **NET 1.50**

MINIATURE — DOUBLE BANANA PLUG — 4 TERMINAL ISOLATION



Provides four terminal isolation. Top Stack-up receptacles isolated from lower plugs. Ideal for insertion of matching networks in computer boards, circuit design and testing. Gold flashed solder turret terminals for permanent noise-free connections.

UPPER: Miniature double banana jack, .104 dia. Brass, gold flashed.

LOWER: Miniature double banana plug on ½" centers. Gold flashed one piece beryllium copper spring.

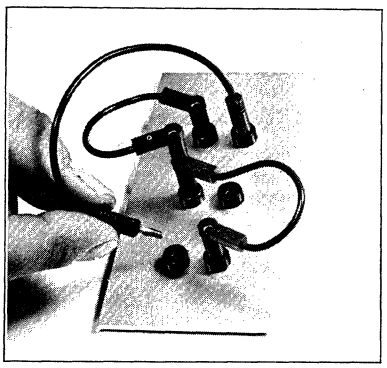
COLOR: Red.

MODEL 2830 QUANTITY DISC. CODE (A) **NET 3.85**

POMONA ELECTRONICS — MINIATURE PATCH CORDS

Miniature patch cords for use with .104 dia. miniature banana jacks. Excellent for miniaturization of test equipment and high density packaging for patch systems.

Banana plug springs precision formed of one piece beryllium copper, heat treated for maximum life and low contact resistance. Tough thermoplastic molded to plug body and wire.



FEATURES:

■ Fits .104 dia. miniature banana jacks ■ Plug body brass, per QQ-B-626, Comp. #22 ■ Gold flashed per MIL-G-45204 Type II (.00002/.00003) ■ Spring, one piece heat treated beryllium copper, alloy 170 per QQ-C-533.

SPECIFICATIONS:

■ WIRE: 20 AWG, Strand. 41 x 36 T.C. Extra flexible polyvinyl insulation .087" O.D. ■ RATED: 5 A. Cont., 10 A. Int., 5,000 V.D.C. ■ OPERATING TEMP.: —0°C to +105 C°

CREATE passive and active networks, voltage dividers, isolation networks or attenuators with these units. Solder turret terminals for permanent noise-free connection of components, etc. Entire unit may be potted or encapsulated.

Housing molded of thermosetting electrical grade phenolic. Cover, punched XXP laminated paper base phenolic. Color, housing and cover, BLACK. Cover plate and 2 each #2-56 cover screws included.

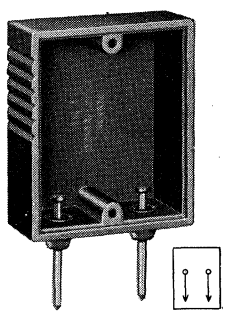
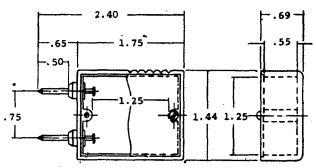
COMPONENT MOUNTING—ACROSS PIN TIP PLUGS



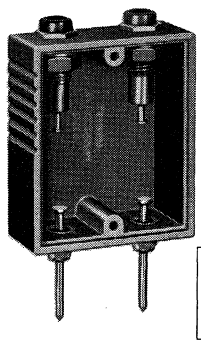


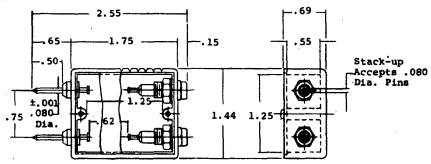
UPPER: No Connection.
LOWER: Pin tip plugs, .080 dia. on ¾" centers. Plug bodies and solder turret terminals, brass, nickel plated.

APPLICABLE SPECIFICATIONS:
Operating Temp.: —25°C to +125°C.
Working Voltage: 5000 VDC.
Current: 5 Amps Cont., 10 Amps Int.

MODEL 2268 QUANTITY DISC. CODE (A) **NET 1.95**

COMPONENT MOUNTING—PIN TIP JACKS TO DOUBLE PIN TIP PLUG—JUNIOR SIZE



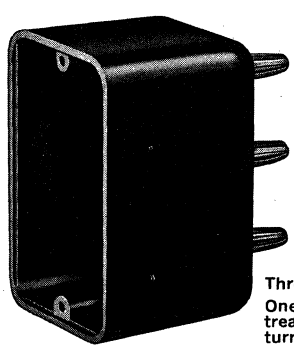


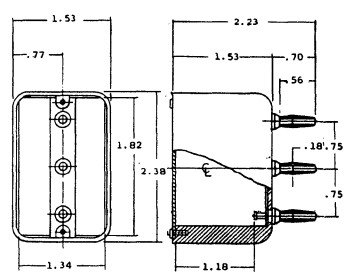
UPPER: Tip jacks, on ¾" centers, per MS-16108. One Red, one Black.
LOWER: Pin tip plugs, .080 dia. on ¾" centers. Plug bodies and solder turret terminals, brass, nickel plated.

APPLICABLE SPECIFICATIONS:
Operating Temp.: —25°C to +125°C.
Working Voltage: 5000 VDC.
Current: 5 Amps Cont., 10 Amps Int.

MODEL 2260 QUANTITY DISC. CODE (A) **NET 4.85**

COMPONENT MOUNTING — (3) ¾" SPACED BANANA PLUGS — KING SIZE





Three-in-line ¾" Spaced Banana Plugs.

One piece beryllium copper spring, heat treated, nickel plated. Plug body and solder turret terminals, brass, nickel plated. For use with standard .166" dia. banana jacks.

APPLICABLE SPECIFICATIONS:
Operating Temp: —25°C to +125°C.
Working Voltage: 5000 VDC.
Current: 15 Amps Cont., 30 Amps In.

MODEL 1943 QUANTITY DISC. CODE (A) **NET 3.25**

POMONA ELECTRONICS

SHIELDED "BLACK BOXES" MINIATURE SIZE

NOW AVAILABLE, *SHIELDED* "BLACK BOXES." Boxes that fulfill the requirement for RF applications.

Ideal for compact packaging, eg., voltage dividers, isolation networks, impedance matching networks, and other varied uses.

Cover and self-tapping screws included.

APPLICABLE SPECIFICATIONS: (ALL MODELS)

Operating Temp.: −55°C to +150°C.
Working Voltage: 500 V Peak (Model 2415, 1500 V Peak).
Noise Rejection: Greater than 70DB.

FEATURES:

- SHIELDED HOUSING; Die Cast Aluminum. FINISH: BLUE baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.
- COVER; .040 Thick Aluminum #6061-T6 with clear anodized finish per MIL-A-8625A.
- Four screws secure cover for proper shielding.
- Solder turret terminals for permanent noise free connection of components.

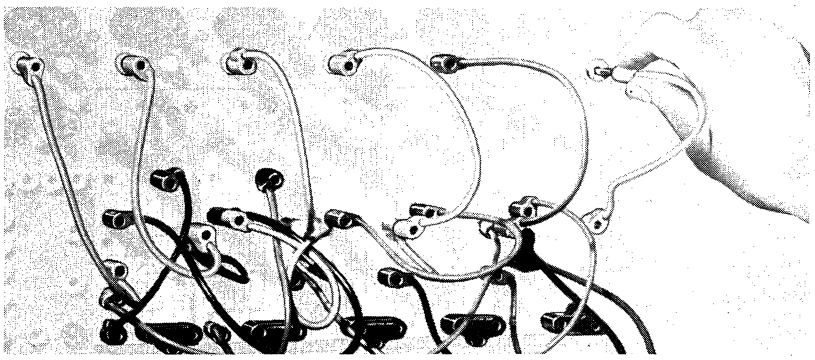
PATCH CORDS BANANA PLUGS

POMONA BANANA PLUG PATCH CORDS

Tough thermoplastic insulation molds the plug and leads into a strong moisture resistant integral unit. Excellent for computer board and test equipment applications. Used by leading industries in applications where extreme reliability is of prime importance.



FEATURES

- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- Extra flexible polyvinyl insulation used on all leads.

SPECIFICATIONS

- Fits standard 0.166 dia. banana jacks.
- Spring, beryllium copper alloy 170 per QQ-C-533.
- Plug body, brass per QQ-B-626, Comp. 22.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.
- Operating Temp.: −0°C to +105°C.
- Wire, 18 AWG, stranding 65 x 36 T.C.
- Insulation, polyvinyl .144″ O.D.
- Ratings: 15 A. Cont., 30 A. Int. 10,000 W.V.D.C.

POMONA ELECTRONICS

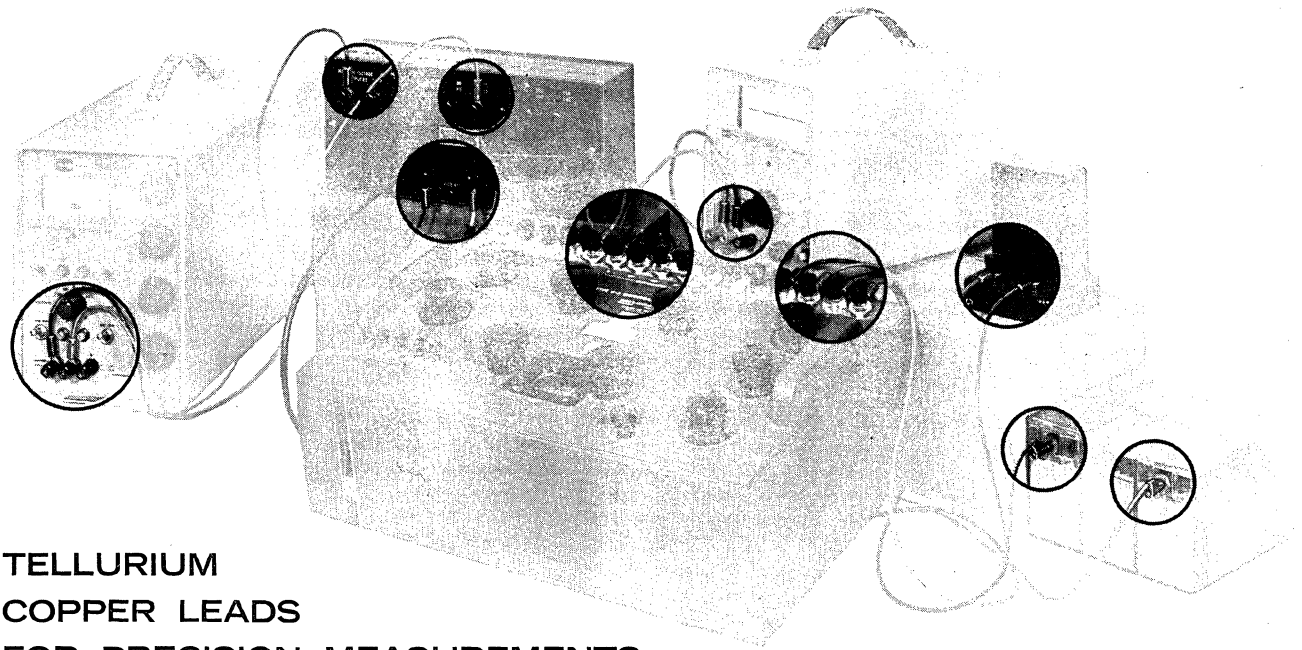
JUMPERS — LOW THERMAL E.M.F.



TELLURIUM COPPER LEADS FOR PRECISION MEASUREMENTS

POMONA ELECTRONICS has advanced the state of the art in measurements where Thermoelectric Effects are significant sources of error. Comparators designed for use with the Kelvin-Varley voltage divider and microvolt leads were tested with Primary Standards Laboratory equipment.

Thermoelectric voltages were not detected until the most sensitive galvanometer range was used.

THERMOELECTRIC PROPERTIES—Tellurium copper gold plated spade lugs cold-staked to multi-stranded 12 gauge COPPER wire minimize thermoelectric effects—an absolute necessity for low voltage, high precision measurements.

LOW RESISTANCE—12 gauge multi-stranded COPPER wire results in extremely low cable resistance. Spade lugs plated with 50 micro inches gold for minimum contact resistance and minimum thermal EMF when using copper binding posts. (Less than 0.01 μv/c°).

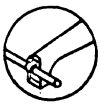
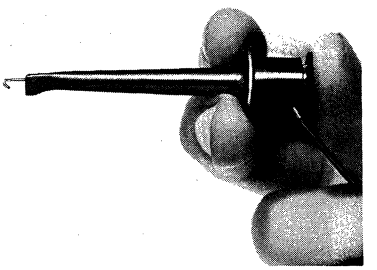
POMONA ELECTRONICS

MINI-TEST CLIPS

A miniature test clip for making rapid and reliable tests. Plunger type action gives fast positive contact. Conductor is gold plated beryllium copper. Nylon insulation molded directly onto clip and wire providing a strong, reliable integral unit. Clip is completely insulated to point of connection.





FEATURES:

- Plunger type action between thumb and two fingers.
- Comfortable finger grip operation.
- Positive connection that won't pop off.
- No sharp teeth to damage or nick wires.
- Beryllium copper conductor alloy 170 per QQ-C-533; gold plated per MIL-G-45204 Type II.
- Stainless steel spring.
- Molded nylon insulator per MIL-P-20693.

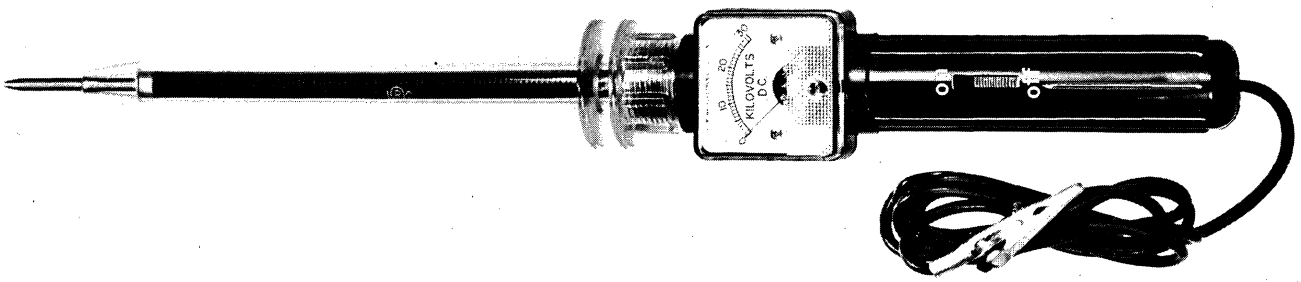
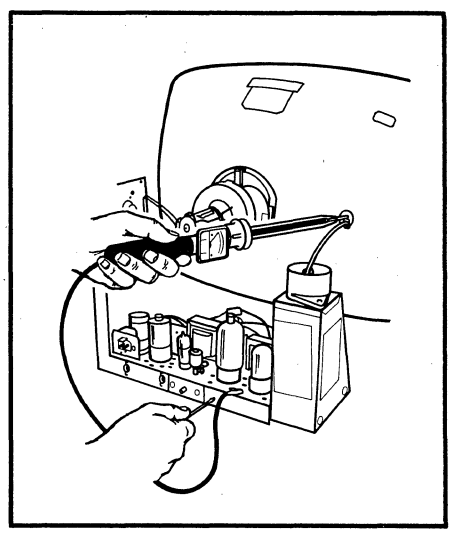
HIGH VOLTAGE TEST PROBES

DC HIGH VOLTAGE TEST PROBES WITH BUILT-IN METER



These High Voltage Test Probes built by Pomona Electronics are the most advanced instruments of their kind on the market; the only test probes featuring a built-in voltmeter. The Test Probes are self-contained, portable test instruments for rapid measurements of high voltages.

Easy to operate! Just ground the test probe instrument by attaching alligator clip to chassis, contact test probe tip to high voltage being measured and read voltage from the built-in meter. No warm-up time. No batteries.



PATENT PENDING

SPECIFICATIONS:

RANGE: See below. **SENSITIVITY:** 20,000 ohms/volt (50 ua) movement. **ACCURACY:** ± 3% full scale. **MULTIPLIER RESISTANCE:** See below. **MATERIAL:** Handle—high impact thermoplastic. Probe—high impact polystyrene. **LENGTH:** 14¾" overall. **WEIGHT:** 8 ounces.

MOLDED BREAKOUTS

A new series of "Breakouts", designed to convert standard coaxial cables to test cables.
By connecting proper Breakout receptacle or plug to corresponding cable plug or receptacle, any standard coaxial cable becomes a test cable equipped with clip leads.
All connections feature a non-tarnish finish, and tough molded thermoplastic insulation molded to connector and wire.

APPLICABLE SPECIFICATIONS:
Wire: (With Alligator Clips) 18 AWG, Strand. 65 x 36 T.C. Extra flexible polyvinyl insulation, .144" O.D.
Wire: (With Minigator Clips) 20 AWG, Strand. 41 x 36 T.C. Extra flexible polyvinyl insulation, .087" O.D.
Operating Temp.: —25°C to +85°C.
Working Voltage: 500 V Peak.

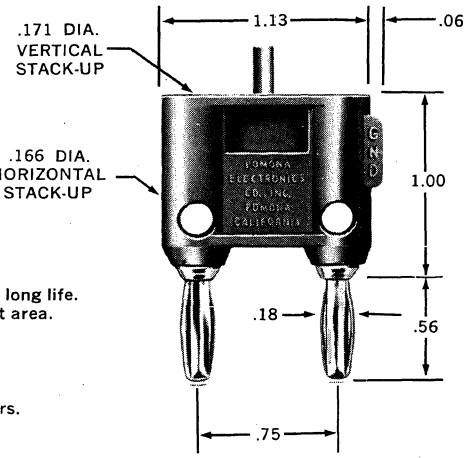
PATCH CORDS DOUBLE BANANA PLUGS

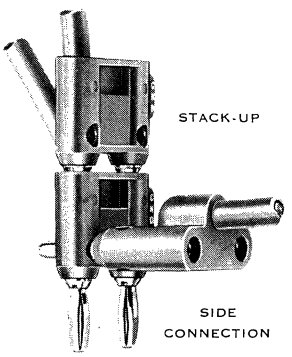
POMONA MOLDED DOUBLE BANANA PLUG PATCH CORDS AND TEST LEADS

. . . indispensable for bridge transformer connections, three terminal capacitor measurements and general hook-up for two wire systems. They are horizontally and vertically stackable in parallel.

Tough thermo-plastic material molded to plug body and cable insures maximum strength, moisture resistance and excellent insulative properties.

Used by leading industries in applications where extreme reliability is of prime importance.





FEATURES . . .

- One piece beryllium copper heat treated spring for long life.
- Rounded spring design results in maximum contact area.
- GND., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS . . .

- Fits standard 0.166 dia. banana jacks, on ¾" centers.
- Contact resistance less than 0.001 ohms per plug.
- Spring beryllium copper alloy 170 per QQ-C-533.
- Plug body brass per QQ-B-625, Comp. 22.
- Nickel plated per QQ-N-290, Class 2.

STRESS RELIEVED AND WEATHERPROOFED CRIMP BNC CABLE ASSEMBLIES

These new cable assemblies feature polyethylene collars which are injection molded directly onto cable jacket and connector body. The resulting encapsulation offers two outstanding advantages:

STRESS PROTECTION against failure from excess bending, flexing, twisting;

WEATHERPROOF SEAL between cable and connector.

Connectors have non-tarnish finish and conform to MIL-C-39012

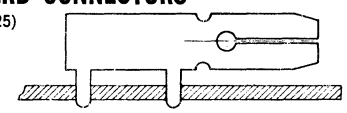
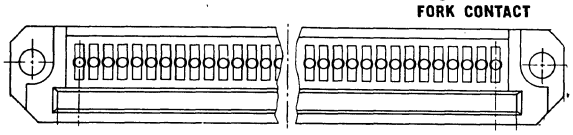
PC BOARD CONNECTORS

(Contact Spacing .050 or .025)

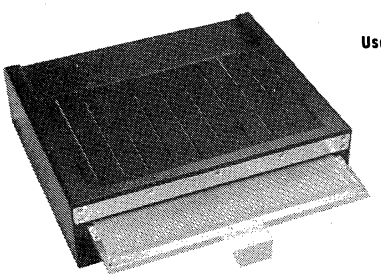
- **PC board to round wire**
- **PC board to flat cable interconnections**





Socket Contact: Crimp or Solder type
Pin Contact: Crimp insertable (.050 centers)
Solder type (.025 centers)

CARD READER (Manual or Air Operated)



Uses: — Testing
— Programming
— Data Processing
— Instrumentation
— Automated Machine Control

Manual model or Air Operated push button models are available. Prewired models include 12 x 80 matrix; 12 x 80 matrix with diode isolation; and 960 individual inputs and outputs. All contacts gold plated with adjusted wiping action.

PROBE CONTACTS & SOCKETS

Probe Contacts provide reliable access to printed circuit boards, wire wrap panels, and other circuitry having a multitude of contact points on uneven levels.

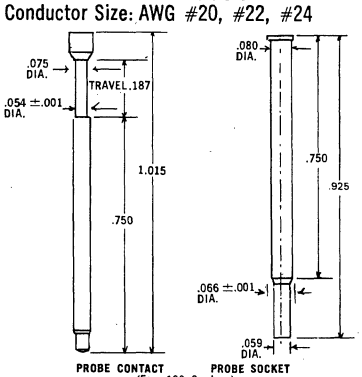
SPECIFICATIONS:

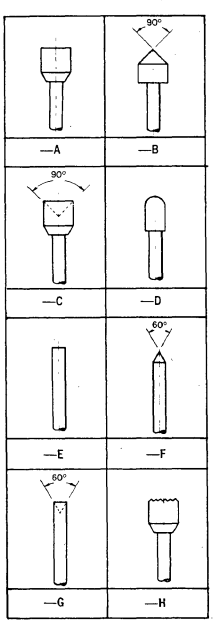
Electrical:

Current Rating: 3 amps. continuous
Contact Resistance: 10 milliohms or less

Mechanical:

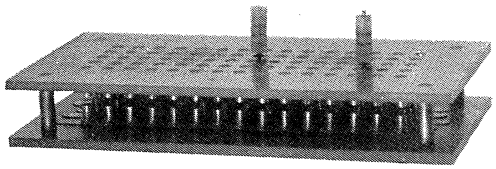
Travel: 3/16 in.
Contact Pressure: Initial: 1.4 oz.
Final: 4 oz.
Conductor Size: AWG #20, #22, #24





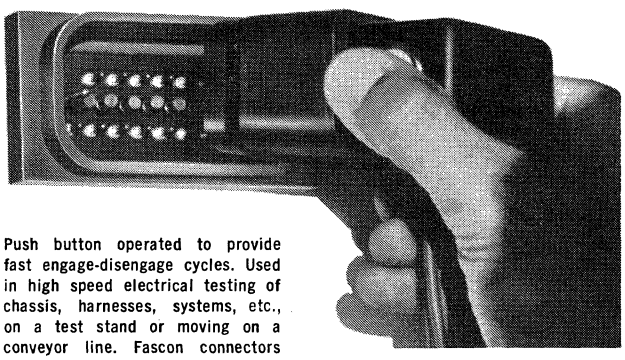
* Other sizes ranging from .050 centers to .187 centers are available.

MATRIX PIN BOARDS



Designed for applications requiring high reliability. Used for matrix interconnection, programming or as multi input output switches. Available with .100 centers and up. Larger models also available with diode pins.

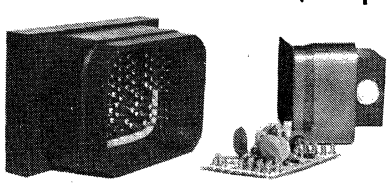
FASCON TEST CONNECTORS (Air Operated)



Push button operated to provide fast engage-disengage cycles. Used in high speed electrical testing of chassis, harnesses, systems, etc., on a test stand or moving on a conveyor line. Fascon connectors are available with any combination of replaceable pin and socket and coaxial contacts.

Push button switch pressed with the thumb turns on vacuum. Connector engages automatically.

PC BOARD TEST FIXTURES (Air Operated)



Each custom built to test a specific PC board, Test Fixtures are furnished in different sizes and shapes utilizing Program Data's exclusive probe contacts and sockets.

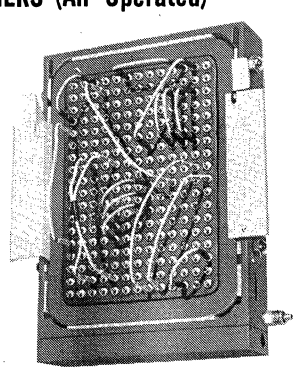
PATCHCORD PROGRAMMERS (Air Operated)

Push button operated Patchcord Programming Systems make use of pneumatic power to make and break interconnections.

Remote controlled models are also available for multi contact switching applications.

Furnished with DC or coaxial contacts, all contacts Mil spec. Gold plated.

Sizes vary from 230 to 5120 contacts. Required air pressure is +10 psig and −10 psig tapped from line pressure or air compressor 5 in. dia. by 6 in. long supplied by Program Data can operate one or more systems.



For further information and data please contact

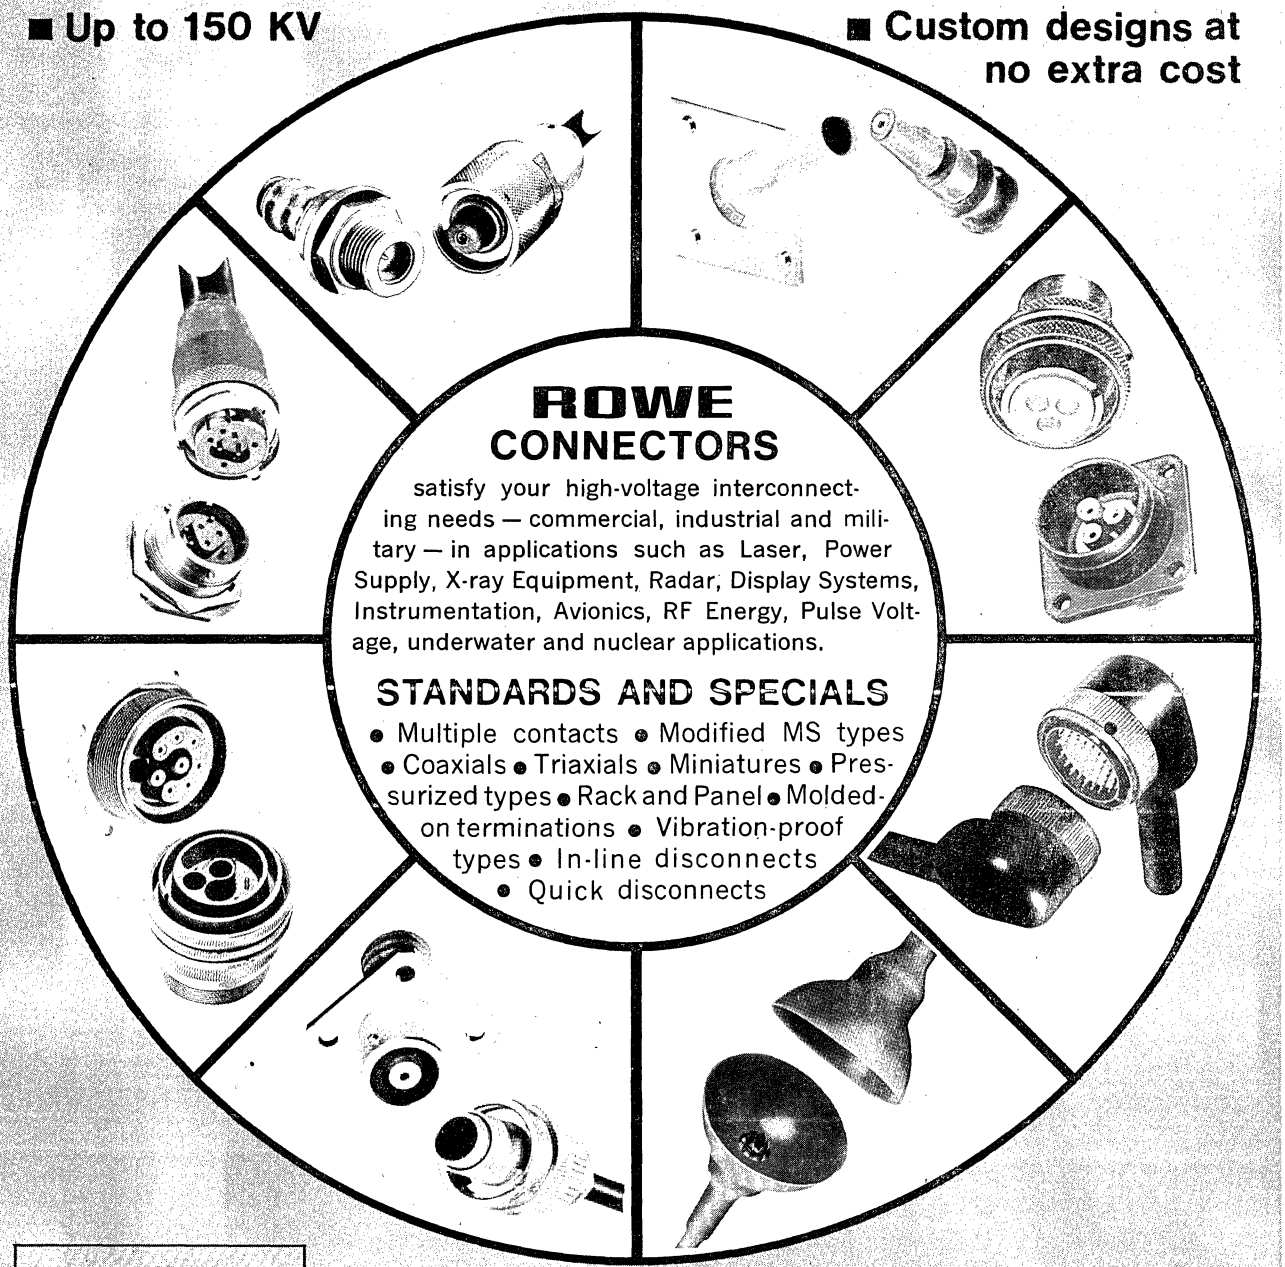
HIGH VOLTAGE CORONA-FREE CONNECTORS and CABLE ASSEMBLIES

■ **Up to 150 KV**

■ **Custom designs at no extra cost**

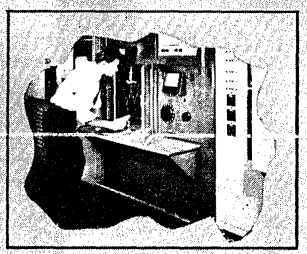


ROWE CONNECTORS

satisfy your high-voltage interconnecting needs — commercial, industrial and military — in applications such as Laser, Power Supply, X-ray Equipment, Radar, Display Systems, Instrumentation, Avionics, RF Energy, Pulse Voltage, underwater and nuclear applications.

STANDARDS AND SPECIALS

• Multiple contacts • Modified MS types • Coaxials • Triaxials • Miniatures • Pressurized types • Rack and Panel • Molded-on terminations • Vibration-proof types • In-line disconnects • Quick disconnects



SPECIALIZED TEST FACILITIES

To insure that connectors and cable assemblies meet rigid specifications — dielectric strength, corona inception and extinction, altitude, leakage, temperature, humidity, shock, vibration, and hydrostatic pressure testing.

ACOUSTIC CONTROL BOX

Sound control boxes. Complete with volume control and driver units. With acoustical headset. As engineered and manufactured for a major American airline.

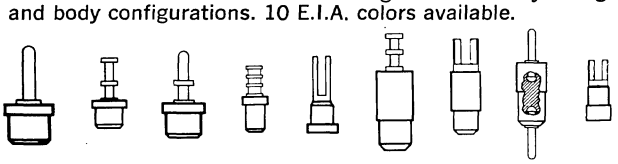
SEALECTRO CIRCUIT HARDWARE

PRESS-FIT® TEFLON* INSULATED TERMINALS

Simply punch or drill the correct hole in a chassis or panel and insert the "Press-Fit" terminal... it's in for good and with all of the outstanding insulating properties of Teflon. "Press-Fit" terminals are available in the most complete across-the-board selection of types in the industry—from micro-miniature units designed, developed and available only from Sealectro to heavy duty types especially designed for high current capacities.

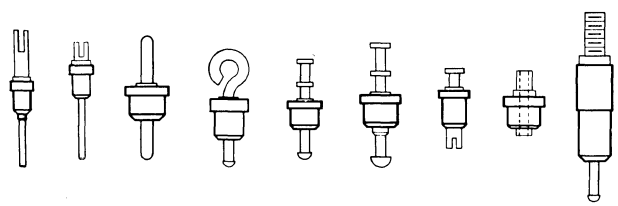
STAND-OFFS

Extremely wide selection of bushings, lugs, platings and finishes in micro-miniature, sub-miniature, and miniature sizes. One piece assembly—no additional hardware involved. From .073" to .215" diameter bushings with a variety of lug and body configurations. 10 E.I.A. colors available.



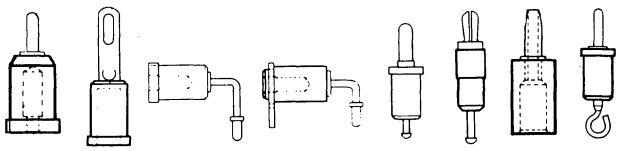
FEED-THRUS

Machined from virgin Teflon to extremely close tolerances for fast, easy and sure installation. Bushing diameters from .075" to .218" in over 350 micro-miniature, sub-miniature, miniature, and tubular units. Available in 10 standard E.I.A. colors and dozens of terminal styles.



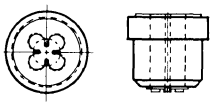
JACKS AND PROBES

Ideal for test points, instrument probes, jumper plugs and multiple connectors while many units are designed for printed circuit applications. Body and mating jack and probe configurations are available to fill virtually every requirement. Offered in 10 standard E.I.A. colors for ease of circuit coding.



CLOVERLEAF RECEPTACLES

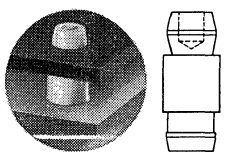
Designed to allow dip-soldering of metal chassis. Unique design for three, four or more thru-leads provides multi-wire connections with each wire in a perfect capillary flow configuration for positive, uniform solder connections. "Press-Fit" chassis installation.



U.S. Pat. No. 3,193,617

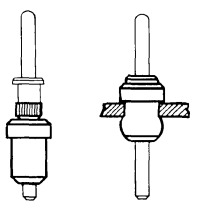
SPACER/BUSHINGS

Completely eliminate the need for metal stand-offs, spacers, and insulators. Install in seconds. Specifically designed for mounting printed circuit boards on metal chassis or panels. "Press-Fit" chassis installation with "snap-on" P. C. board mounting.



NEW Rivet-Loc™ TERMINALS (Pat. Pending)

Rivet-Loc terminals are a new type terminal designed for insertion in either chamfered or unchamfered holes. They overcome the inherent shortcomings of older semi-assembled terminal types while providing uniform above chassis height. After bushing insertion in the chassis, the lug is inserted from the major diameter side expanding the bushing and securely locking the terminal in the chassis.

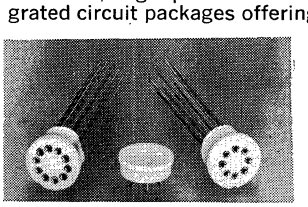


BEFORE INSTALLATION AFTER INSTALLATION

PRESS-FIT® NEW TRANSISTOR & I.C. SOCKETS & HARDWARE

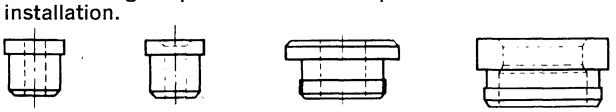
SOCKETS

Low cost, high precision sockets for transistors and integrated circuit packages offering "Press-Fit" installation combined with virgin Teflon bodies and precise new contact design for maximum electrical and mechanical performance. Standard units designed for 3 and 4 lead TO-18 and TO-5 packages and 8, 10, and 12 lead integrated circuit packages.



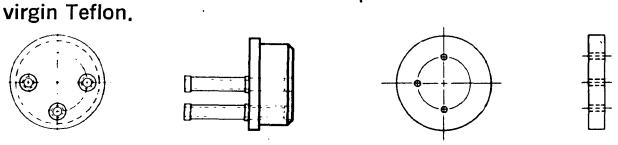
"PRESS-FIT" BUSHINGS

A complete line of over 500 standard bushing configurations designed for lead feed-thrus, insulators, bearings, stand-offs, component mounting devices and hundreds of other applications. All machined from virgin Teflon, offered in E.I.A. colors, and featuring simple economical and permanent "Press-Fit" installation.



HOLDERS AND PADS

The widest line of Teflon transistor and I.C. holders and pads in the industry. Available in numerous JEDEC packages with from 3 to 12 leads. Color coded and precision machined from virgin Teflon.



*Registered Trademark E. I. DuPont de Nemours & Co.

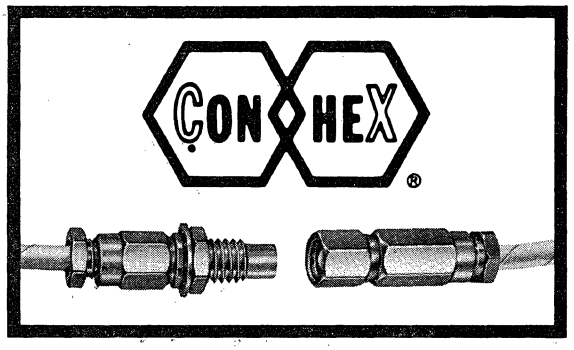
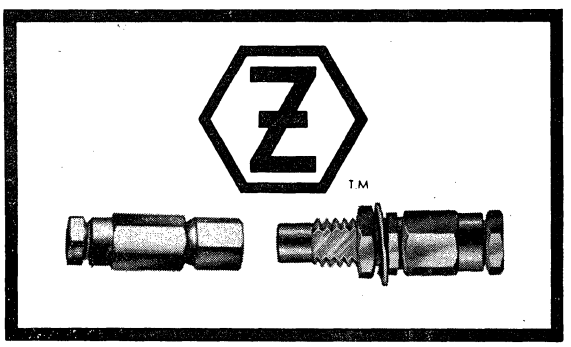
CONHEX® R. F. CONNECTORS



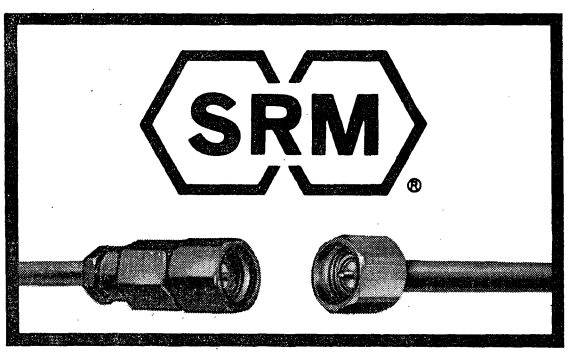
PERFORMANCE, PRICE, DELIVERY FOR RG-188/U AND SIMILAR CABLES UP TO 12.4 GHz

Conhex subminiature R. F. connectors are designed to meet or exceed the requirements of MIL-C-22557. Over 300 standard units — straight, right angle, bulkhead, strip-line, screw-on, snap-on and slide-on — are standard items.



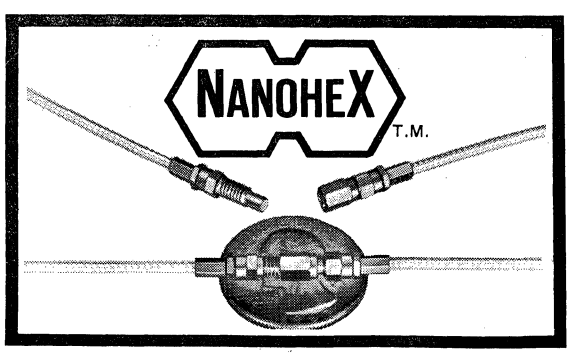
RELIABILITY AND HIGH PERFORMANCE IN AN ECONOMICAL CONNECTOR PACKAGE

Designed for complete compatibility with miniature coaxial cables, such as .141" diameter semirigid types, the Z Series offers the optimum in performance, reliability and cost. More and major manufacturers are discovering that Sealectro Z connectors not only meet their VSWR and power handling requirements but are many times more reliable than similar size connectors especially when subjected to adverse environmental conditions.



FOR STANDARD MATING ENGAGEMENTS AT REDUCED COSTS.

SRM connectors are designed to mate with standard OSM-type mating engagements at reduced cost. SRM connectors are designed for use with RG-141/U, RG-142/U, RG-188/U and similar subminiature coaxial cables, and provide maximum performance and minimum VSWR all the way to 18 GHz



MAXIMUM SPACE AND PAYLOAD SAVINGS WITH PERFORMANCE TO 12.4GHz

Specifically designed for microminiature RG-196/U and RG-178/U, Nanohex connectors are the smallest commercially available. They combine extremely small size and light weight with exceptional performance and reliability. Over 50 standard types including straight, right angle, printed circuit, and bulkhead mounted units in screw-on, slide-on and snap-on are featured in the complete line.

SEALECTRO

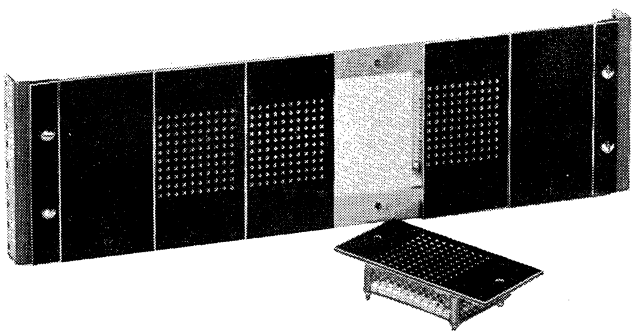
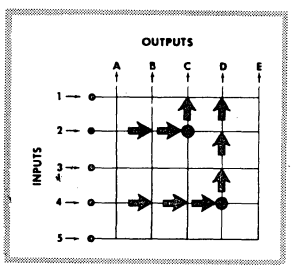
SEALECTROBOARD®

CORDLESS PROGRAMMING BOARDS



"Sealectroboard" programming and switching provides complete ease and simplicity of operation with drastic reductions in hardware and space. A single pin is used to complete the program circuit or insertion of a component . . . move the pin to a new location and you have a new program function. "Sealectroboards" are made in 2 to 5 deck versions and with a variety of pin styles such as shorting pins, diode holders and skip pins as well as with engraved or silk-screened panel marking and color coded program areas.

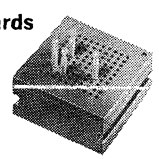
Modular "Sealectroboard" are designed to facilitate program board expansion in prototype and design appications and are offered off-the-shelf from Sealectro Distributors. Each modular board is a 10 x 10 matrix with two contact decks in bussed upper and lower or bussed upper, individual lower contact configurations. Companion mounting and panel pieces are designed for 19" relay rack mounting and allow expansion from a single board up to 6 boards in just 5½" of rack space. Write for our complete catalog and technical specifications. . . .



Bussed Upper and Lower Contacts

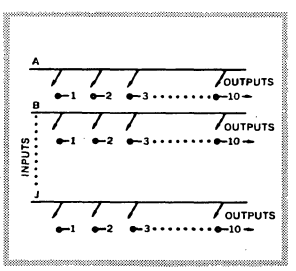
The Modular Sealectroboard is available with bussed upper and lower contacts and provides an ideal means for input/output switching. The standard 10 x 10 hole Modular Sealectroboard may be considered 10 Single Pole, Single Throw, Normally Open switches with 10 inputs each.

New Miniboards



Pack a 10 x 10 hole format (100 crosspoints) into a 1 inch square. These new microminiature boards have all of the standard features of the larger size Sealectroboard, including modular, expandable construction, shorting and diode pins, and Sealectro's built in reliability.

U.S. Pat. No. 3,027,534

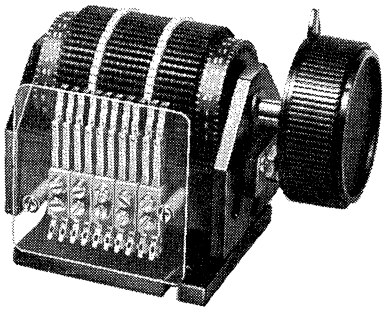


Bussed Upper and Individual Lower Contacts

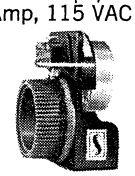
The Modular Sealectroboard is also available with bussed upper and individual lower contacts which provide individual electrical access to each program hole and a path between many terminals and a lesser number of bussed terminals. The standard 10 x 10 hole Modular Sealectroboard with this contact configuration may be considered a 10 Pole, Single Throw, Normally Open switch with 10 positions per pole.

PROGRAM SWITCHING SEALECTROSWITCH®

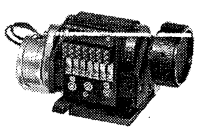
PROGRAMMING SWITCHES



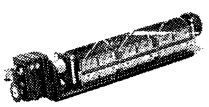
Programs may be changed in seconds without special tools and with 100% reproducibility. The Sealectroswitch programming switch provides a degree of versatility that can't be met by comparable devices . . . and in half the space and half the cost. Extremely high "built in accuracies" are provided through precision machined drums while flexibility is obtained through unique, field-adjustable, sliding contact actuators. Check these features • Field Adjustable Cams With Multiple ON/OFF Functions or Point-to-Point Switches • Manual or Remote Operation With Timing Motor or Solenoid Drive • Transfer Speeds to 50 Milliseconds Without Appreciable Contact Bounce • Removable Drums • Form A, B, and C Contacts in a Single Unit • Up to 57 Circuit Controls in a Single Unit. • Contacts Rated for Dry Circuit to 2 Amps, 24 VDC or 115 VAC. • Optional 10 Amp or 20 Amp, 115 VAC U. L. Approved Contacts.



Recycling timer with point-to-point or cam action, single snap-action contact.



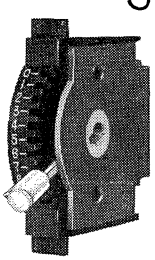
Enclosed, snap-action contacts and timing motor drive.



60 program positions, 60 contacts and stepping motor drive.

U.S. Pat. No. 3,330,917 Also protected by foreign patents

SEALECTRO SLIDE 'N SWITCH™



The Sealectro Slide 'n Switch circuit selector is designed to provide a highly reliable random access switching device for the programming of all types of automated equipment. Standard units are 11 position, single pole with a built-in "skip" function. If it is desired to switch from position 1 to position 5, the Slide 'n Switch handle is pulled out and the switch handle moved from 1 to 5. No electrical contact is made with any of the intermediate switch contacts.

Multiple units may be stacked side-by-side to provide any number of decade switches while the unique printed circuit board construction of the switch permits any special electrical coding to be supplied at minimum cost. Slide 'n Switch output terminations mate with standard edge-mount pc card connectors.

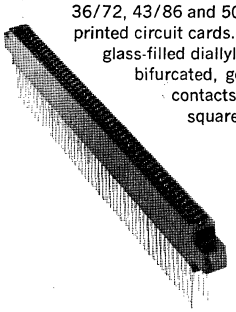
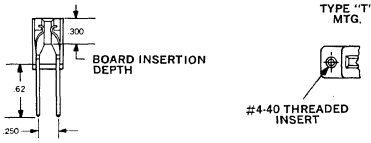
ADVANCED PACKAGING, INC.

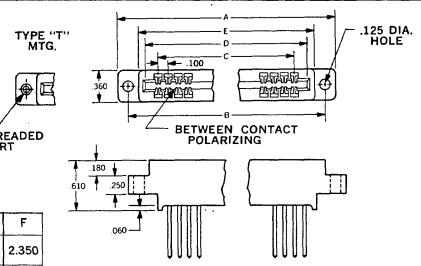
PRINTED CIRCUIT CARD CONNECTORS

P7000 SERIES .100" CONTACT CENTERS WIRE WRAP TAILS



The P7000 series is available in 22/44, 30/60, 36/72, 43/86 and 50/100 contact pairs, for 1/16" printed circuit cards. Insulator bodies are green, glass-filled diallyl phthalate, with pre-loaded, bifurcated, gold-plated phosphor-bronze contacts. Wire wrap posts are .025" square, by .62" long. Commercial or military contact platings are offered.





Part No. (*)	Pairs/Contacts	A	B	C	D	E	F
P7000-44	22/44	3.035	2.775	2.100	2.300	2.460	2.350
P7000-60	30/60	3.835	3.575	2.900	3.100	3.260	3.150
P7000-72	36/72	4.435	4.175	3.500	3.700	3.860	3.750
P 7000-86	43/86	5.135	4.875	4.200	4.400	4.560	4.450
P 7000-100	50/100	5.835	5.575	4.900	5.100	5.260	5.150

*Add C for commercial plating (.000010 gold). Add M for military plating (.000030 gold). Add T for stainless steel threaded insert. Example: CP7000-60T

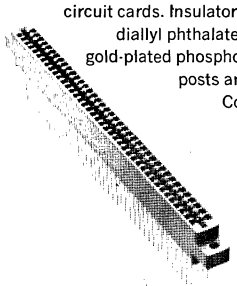
PERFORMANCE

- Contact resistance: will not exceed 30 Mv at rated current.
- Operating voltage: 800 VDC at sea level.
- Current rating: 3 Amps
- Insulation resistance: 5000 megohms minimum.
- Operating temperature: −65°C to +150°C

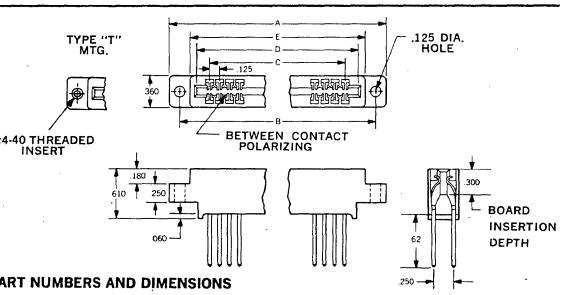
MATERIALS

- Insulator: Diallyl phthalate per MIL-M-14, Type SDG-F (color, green)
- Contacts: Phos. bronze per QQ-B-750. Gold plated per MIL-G-45204, Type II.

P8000 SERIES .125" CONTACT CENTERS WIRE WRAP TAILS



The P8000 series is available in 28/56, 31/62, 40/80 and 50/100 contact pairs, for 1/16" printed circuit cards. Insulator bodies are green, glass-filled diallyl phthalate, with pre-loaded, bifurcated, gold-plated phosphor-bronze contacts. Wire wrap posts are .025" square, by .62" long. Commercial or military contact platings are offered.

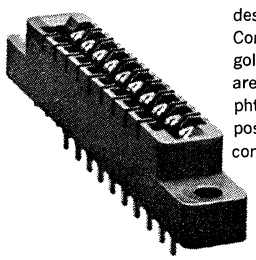


PART NUMBERS AND DIMENSIONS

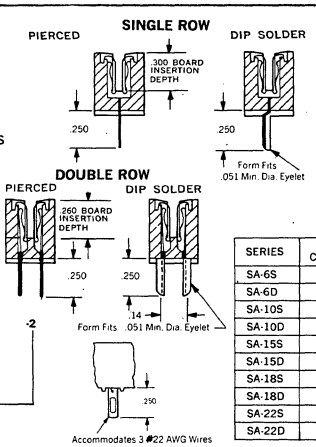
Part No. (*)	Pairs/Contacts	A	B	C	D	E
P8000-56	28/56	4.305	4.045	3.375	3.625	3.785
P8000-62	31/62	4.680	4.420	3.750	4.000	4.160
P8000-80	40/80	5.805	5.545	4.875	5.125	5.285
P8000-100	50/100	7.055	6.795	6.125	6.375	6.535

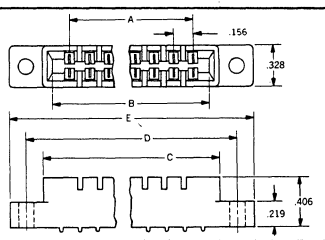
*Add C for commercial plating (.000010 gold). Add M for military plating (.000030 gold). Add T for stainless steel threaded insert. Example: CP8000-80T

SA SERIES PIERCED OR DIP-SOLDER TERMINALS .156" CONTACT CENTERS



The SA series circuit board connectors, with .156" contact spacing, accept 1/16" boards. SAE connector contacts are the latest in bifurcated bellows design, with either pierced or dip-solder terminals. Contact plating meets military requirements, or is gold-flashed for commercial use. Insulator bodies are precision molded in green, glass-filled diallyl phthalate, and are available in 6 to 22 contact positions, with in-between and in-contact polarizing keying.



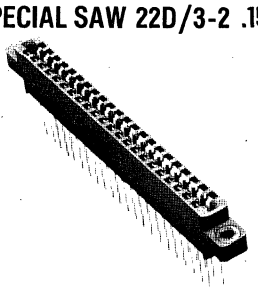


ORDERING NUMBER, EXAMPLE SA C 22 D/ 1 -2
- Connector Series
- Plating style: C, commercial; M, military (*)
- Contact positions:
- Connector style: S, single row; D, double row
- Contact termination: 1, pierced; 2, dip solder
- Mounting style: -2, clearance hole; -3, threaded insert

(*) Add C for commercial plating (.000010 gold). Add M for military plating (.000030 gold).

SERIES	NO. OF CONTACTS	A	B	C	D	E
SA-6S	6	.780	1.078	1.218	1.531	1.781
SA-6D	12					
SA-10S	10	1.404	1.703	1.843	2.156	2.406
SA-10D	20					
SA-15S	15	2.184	2.484	2.624	2.937	3.187
SA-15D	30					
SA-18S	18	2.652	2.953	3.093	3.406	3.656
SA-18D	36					
SA-22S	22	3.276	3.578	3.717	4.031	4.281
SA-22D	44					

SPECIAL SAW 22D/3-2 .156" CONTACT CENTERS WIRE WRAP TAILS



The SAW22D/3-2 circuit board connector, with .156" contact spacing, accepts 1/16" boards. Built to the same high quality standards as the SA series, the insulator body is of black glass-filled nylon, with phosphor bronze, gold plated contacts meeting MIL-G-45204, Type II requirements. Double row of 22 contact positions provides for 44 terminals. Wire wrap posts are .025" square by .62" long, on a .156 x .140 mounting matrix. These connectors are specifically designed to meet high volume wire wrap production requirements.

THE NEW CONNECTOR PEOPLE

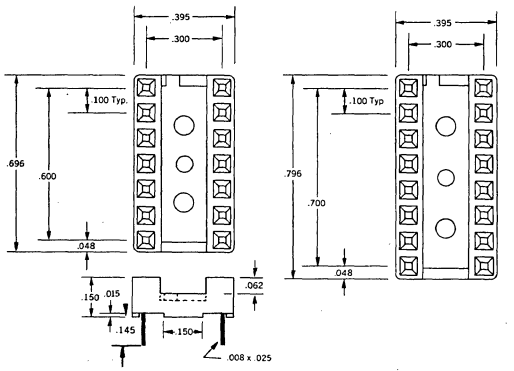
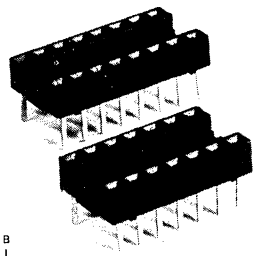
DUAL-IN-LINE IC SOCKETS & IC STRIPS (Wire Wrap* & Dip Solder)

3100 SERIES HIGH DENSITY, LOW PROFILE, CLOSED ENTRY MOUNTING FOR 14 AND 16 PIN DIPS



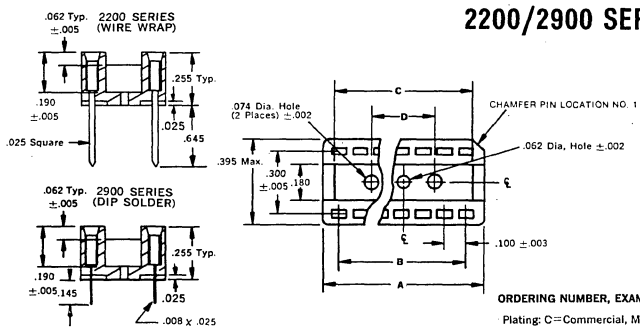
The 3100 series DIP sockets are designed for very high density packaging of 14 and 16 pin IC packages or module boards. Only .150" high above the circuit board, these low profile sockets can be mounted end-to-end on .100" centers and side-to-side on .400" centers. Molded of black or white glass filled nylon, with the special SAE spring design, the contacts can be plated with either military or commercial gold plate, or tin plate.



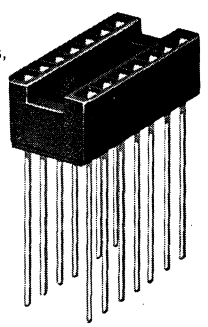
ORDERING NUMBER, EXAMPLE C SA 3100 – 14 B

- Plating: C=Commercial, M=Military, T=Tin
- SAE IC Socket Symbol
- Series:
- Number of Contacts
- Color: B=Black, W=White

2200/2900 SERIES HIGH DENSITY MOUNTING FOR 14 AND 16 PIN DIPS



The 2200/2900 series DIP sockets accept 14 and 16 pin standard dual-in-line IC packages or module boards, mounting on a .100 x .300" contact matrix. They are molded of black or white glass filled nylon, Type 6, with spring temper phosphor bronze contacts, military or commercial plated, or tin plate.

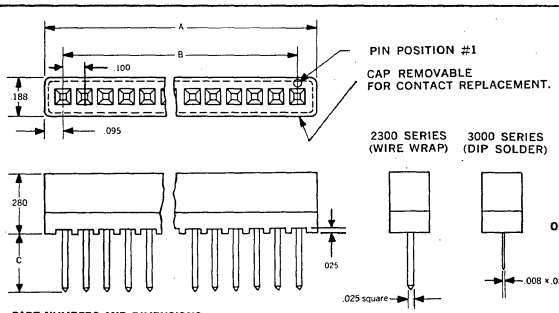


Dimensions	A	B	C	D	E
14 Contact	.760	.600	.610	.300	.800
16 Contact	.860	.700	.710	.400	.900

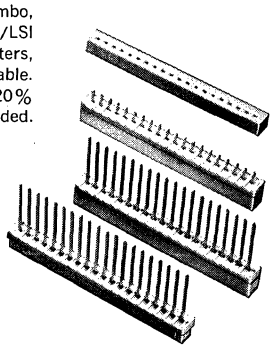
ORDERING NUMBER, EXAMPLE C SA 2200 – 14 B C ST

- Plating: C=Commercial, M=Military, T=Tin
- SAE IC Socket Symbol
- Series: 2200=Wire Wrap, 2900=Dip Solder
- Number of Contacts
- Color: B=Black, W=White
- Closed Entry Cap (Optional, adds .035 to overall height)
- 2 Level Wire Wrap Tail .425 long (Optional)

2300/3000 SERIES CONNECTOR STRIPS FOR MSI/LSI DIPS



The 2300/3000 series connector strips are designed to be used in pairs to accommodate the new jumbo, dual-in-line packages recently introduced by MSI/LSI manufacturers. Contact spacings are on .100 centers, and either wire wrap or dip solder terminals are available. Black or white insulator bodies are of 20% glass-filled nylon. Closed entry cap included.



ORDERING NUMBER EXAMPLE: C SA 2300 –20 BC ST

- (*) Plating — C = Commercial, M = Military, T = Tin
- SAE connector symbol
- SERIES: 2300 = Wire wrap 3000 = Dip solder
- No. of Contacts:
- COLOR: BC = Black body and cap WC = White body and cap
- 2 level wire wrap tail .425 long (optional)

PART NUMBERS AND DIMENSIONS

SERIES	NO. OF CONTACTS	A	B	C
*SA2300-12	12	1.290	1.100	.645
*SA2300-20	20	2.090	1.900	.645
*SA3000-12	12	1.290	1.100	.145
*SA3000-20	20	2.090	1.900	.145

(*) C = .000010 gold per MIL-G-45204, Type II
M = .000050 gold per MIL-G-45204, Type II, class I.
T = .00020 bright tin per MIL-T-10727

THE SAE DIPSTIK HOLDS 5 DUAL-IN-LINE IC's, AND WITH MANY ADVANTAGES OVER USUAL MOUNTING TECHNIQUES.

No soldering
holds either 14 or 16 pin dips
IC replacement takes only seconds, and NO special tools
100% test point accessibility
integral EMI shielding

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

You'll find these SMITH products on the shelves of leading industrial Electronic Distributors, throughout U.S.A. For your production runs, draw directly on our large plant inventories of standard components.

NATIONWIDE REPRESENTATIVES

The SMITH network of Qualified Sales Engineers is at your service! These men and their organizations are technically qualified and eager to help you with your requirements for standard or special components that we manufacture.

MODERN FACILITIES

We invite you to utilize our modern manufacturing facilities and methods for your molding, screw-machine, stamping or sub-assemblies. We are equipped for both long and short runs. From raw material to finished part, SMITH detailed workmanship and production efficiency assure a quality product, speedily and economically made.

SPECIAL REQUIREMENTS?

Use our Engineering and Production Facilities to design and develop new products or modify existing components to meet your specific needs. "Specials are Standard with SMITH!"

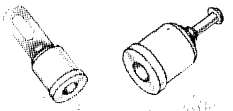
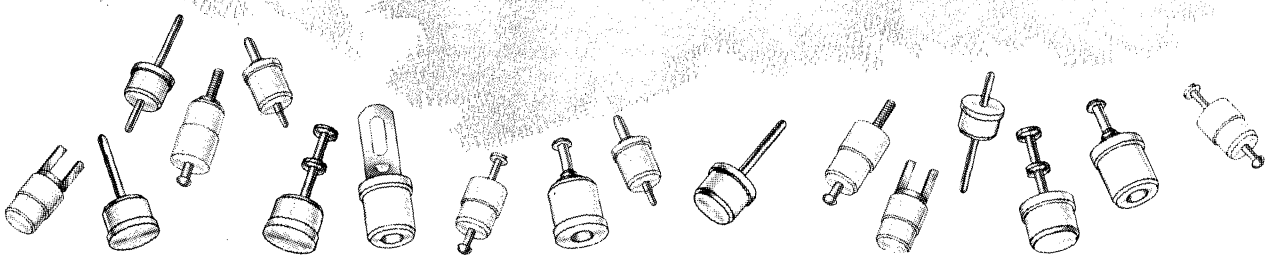
MANUFACTURERS OF ELECTRONIC COMPONENTS



Herman H. SMITH, inc.

TEFLON TERMINALS



SMITH TEFLON Terminals are designed for use as precision components in critical electronic applications such as Computers Microwave UHF-VHF Missiles Satellites

Utilizing the plastic memory characteristic of Teflon* these terminals literally glide into and lock themselves in punched or drilled holes thus minimizing labor as well as added cost of materials.

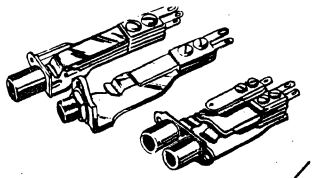
IT'S SOUND PLANNING TO SPECIFY H.H SMITH

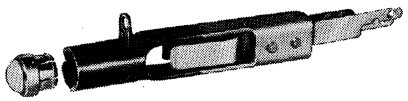
JACK MOUNTING PANELS

Used for mounting standard and miniature telephone and coaxial jacks, keys, lamp sockets, etc. Equivalents of W.E. and many others available. Request bulletins on Product Family 70.



SINGLE and TWIN TELEPHONE JACKS

Standard and miniature size jacks. All circuit configurations. Panels for these provided by Product Family 70. Request bulletin on Product Family 51, 53, and 55 on jacks.

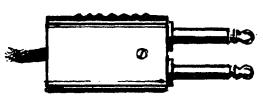


LAMP SOCKETS and KEYS

Mount on telephone type jack mounting panels. Sockets use telephone type slide-base lamp. Numerous varieties of turn and push keys. Request bulletin on Product Families 54 and 56.

TELEPHONE PLUGS

Nearly all types, W.E., Kellogg, A.E., etc. both single and twin in two and three circuit forms. All have molded in place nylon insulation. Request bulletins on Product Family 80.



TRIMM'S

Full Line

TERMINAL and RELATED PATCHING EQUIPMENT —and HEADSETS

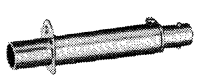
Available from our industrial distributor in your area.

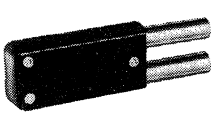
AUDIO PATCH, SWITCHBOARD, and TEST CORDS

With standard and miniature size single and twin telephone plugs. Nylon braided tinsel conductor cords. Request bulletin on Product Family 30.

COAX JACKS — PLUGS — PATCH CORDS — and RELATED COMPONENTS

Standard sized single and twin jacks including normal through and terminating types, W.E. and RCA compatible, fitting wide assortment of coax cables and other connectors. Twin looping plugs, single plugs, plug adapters, patch cords, etc. Also specialized triax and twinax concentric series jacks and plugs as well as miniaturized type. Request bulletin on Product Family 60.





HEADSETS

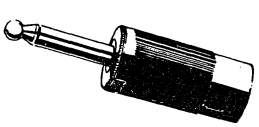
Many types in all cost ranges, applicable to wide variety of applications. Request bulletin on Product Family 01 through 29.

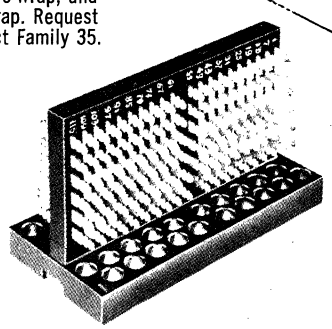
AUDIO PLUGS and JACKS

Numerous low cost plugs and jacks for hi-fi, tape recorders, sound equipment, etc. Request bulletin on Product Family 40.

TERMINAL BLOCKS

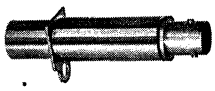
Originally used by the telephone industry (often called Christmas Tree type) now also widely used in other system work. Up to 14 rows per block; 10, 20, and 26 terminals per row. Lug types — solder, wire-wrap, and hybrid solder-wire wrap. Request bulletin on Product Family 35.





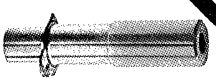
TRIMM INC. P.O. BOX 489 — LIBERTYVILLE, ILLINOIS 60048 312-362-3700

Connector and Patching Systems



COAXIAL PANEL JACK
J-3
for .070" pins (RCA)
J3-W
for .090" pins (WE)
Rear mates with Trompeter Plugs PL-23 thru PL-29 or any standard BNC plug.

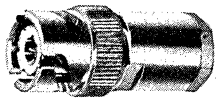
JACK
J3E-N*
for .070" pins (RCA)



J3EW-N* for .090" pins (WE)

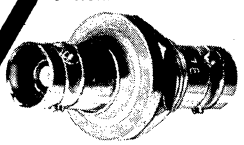
Substitute cable group for "N" i.e. J3EW-2

COAXIAL PANEL JACK
J13-R*
for .070" pins (RCA)
J13W-R*
for .090" pins (WE)
Incorporates ½ watt, 2% resistor for circuit termination when patch cord plug is not inserted.
*Substitute resistance value for "R" i.e. **J13-75**
for Video only

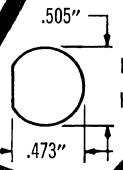


CABLE PLUG
PL-75
for ¼" OD Twinax only or Cable Group 9.
PL-76, ¼" Triax, Cable Group 7
PL-77, WE 754E & RG22/U Group 10.
PL-78, WE Group 11, 760A Twinax Cable.
Mates with jack J-72, receptacles BJ-72, 73,74, 77, 78, 79.

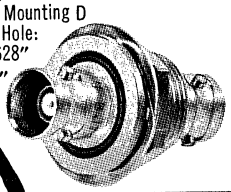
BJ-78
CONCENTRIC CONNECTOR



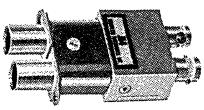
Bulkhead Mounted FEED THROUGH
for Twinax/Triax



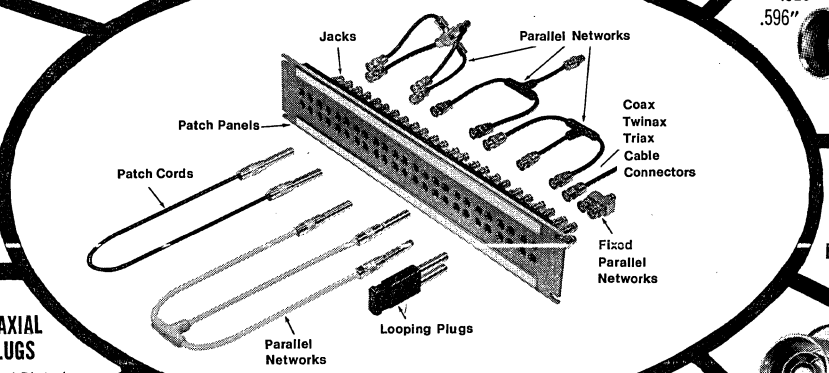
BJ-73
FEED THROUGH
(insulated)
Outer Circuit insulated from chassis
Mounting Hole: .628" .596"

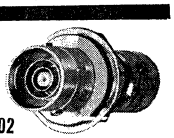


J-14
PANEL JACK

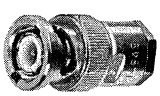


for .070" pins (RCA)
J-14-W for .090" pins (WE)
'Normal Through' connection eliminates looping plug. Patch cord allows signal re-routing.



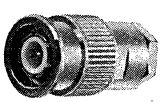


BJ-102
QUADRAX FEED THROUGH



BNC PL-28

COAXIAL PLUGS
Nickel Plated Body
Gold Plated Pins



TNC PL-49

AUDIO / VIDEO
PCAV-L-75
for Simultaneous Patching

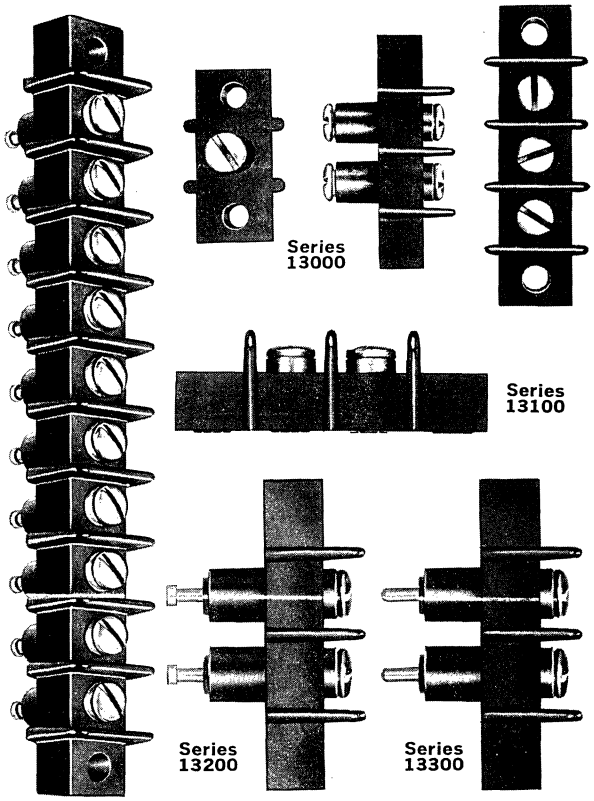
Single Row Terminal Strips

BEAU precision injection molded thermosetting phenolic Series 13000 Single Row Terminal Strips are rated 300v at 20 amp. Fully insulated feed-thru. Available in 1 to 26 terminals, so order by Model No. and desired number of terminals: No. 13018 (No. 13000 with 18 terminals). Marker strips available for mounting beneath the blocks. Tab terminals available as noted below.



NEW . . . for 1971 . . . PC CONNECTOR

A new BEAU Connector has been introduced for use on pc board assemblies or flexible circuits and uses the "Jones" connector base concept.

See your local representative listed in E. E. M. Yellow Pages . . . or call the BEAU Distributor in your area.

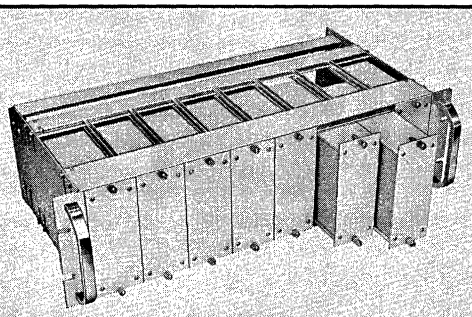
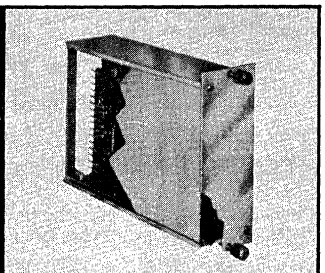
Vector PACKAGING SYSTEM FOR CARDS AND MODULES



CMA3-20 with 10 EFP204-6.6 modules for 4½ x 6½ cards FP52-2 filler panels, HA-12 handles.

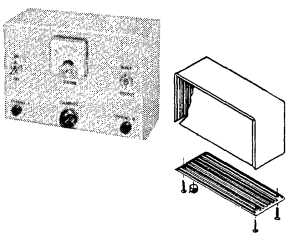
VECTOR STRUT CAGES

Sleek, versatile system employs aluminum extrusions for rack mounting plug-in modules. Built in adjustability with slotted side walls, sliding bracket mounted cross members. Available for 3½", 5¼", 8¾" rack panel heights, depths of 9", 12" & 15" for rack widths of 10", 19" & 24". NIMS (Nuclear Instrument Module System) bins & modules also available.



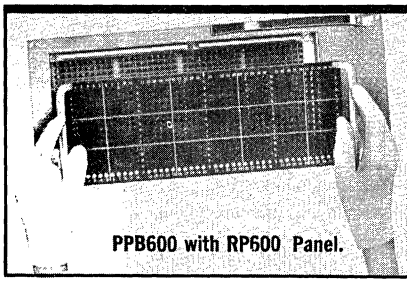
VECTOR "EFP" (EXTENDED FRONT PANEL) CASES

Typical module has extruded internal .075" grooves top and bottom for card mounting, plus slide-off side covers, 10-32 thumb screws. Modules available in widths of 1.6", 2.0", 3", 4½", for cards 2.73" x 4.50", 4.50" x 6.50", 4.5" x 9.6", 7.98" x 9.62". Modules supplied with front panel and unpunched rear plates

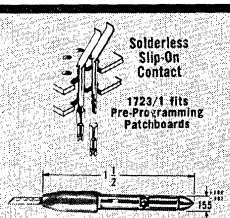


MULTI-MOD CASES

Versatile all aluminum Multi-Mod cases have four interior surfaces with .075" slots for cards and mounting plates and are ideal for packaging instruments, meters and other circuitry. Available in widths of 1.6", 2.0", 3.0", 4.5" for following card sizes: 2.98" x 2.98", 2.98" x 4.50", 4.49" x 4.50", 4.49" x 6.50", 4.49" x 8.50", 4.49" x 9.89", 6.49" x 9.89", 7.88" x 9.89" and 7.88" x 13.89".



PPB600 with RP600 Panel.



Pre-Programing Patch Cord Plug

VECTOR PRE-PROGRAMING PATCHBOARDS

Vector Pre-Programing Patchboard Systems are made with 204, 300, 600, and 1200 contacts, Long lived beryllium copper, nickle or gold contacts assure reliability over thousands of cycles. Transverse engagement cycle assures post patching capability. Complete line of color coded patch cords available. Removable programing panels supplied with standard alpha-numeric markings, blank or customer supplied markings.

PLUGBORDS FOR MOUNTING

DUAL-IN-LINE PACKAGES, ROUND OR RECT. INTEGRATED CIRCUIT PACKAGES, FLAT PACKS, TRANSISTORS, DISCRETES.

Plugbords listed are provided with G pattern of .062" dia. pre-punched holes on alternate .1" centers or in P pattern grid of .042" dia. holes on .1" centers. Use Vector T28 push-in Mini-Klip terminals with the G pattern and Vector T42-1 Micro-Klip Terminals with P pattern (see Vectorbords).

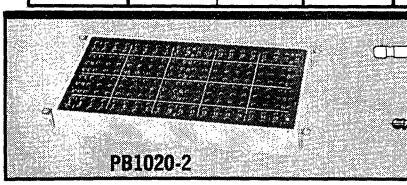
3795 2.73" W x 4.5" L, 44 contacts (total 2 sides, spaced on .1" centers) .042" diameter holes located .1" x .1", no matrix pattern. Holds sixteen 14- or 16-lead DIP, I.C.s or Sockets.

3677-2 4½" x 6½" Epoxy glass. 44 Contacts (total 2 sides) spaced on .156" ctrs. .042" dia. holes located .1" x .1" plus etched, tinned Vcc & ground bus plus soldering pads. Hold 24, 14-lead DIP, I.C.s or Sockets.

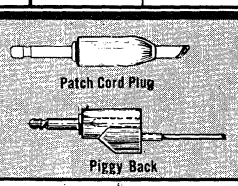
838WE-1GN 4½" x 6½" Epoxy glass. 43 contacts (total 2 sides) on .156" ctrs. .062" dia. holes located .1" x .2" grid. No matrix pattern.

3662 4½" x 6½" Epoxy glass. 43 contacts (total 2 sides) spaced on .156" ctrs. .042" dia. holes located .1" x .1" grid. No matrix pattern.

BR27 Brackets, aluminum, provide support for cards. Attach to receptacle mounting screw.



PB1020-2



FIXED PANEL PATCHBOARDS

Reliable, low cost programing panels for maximum program flexibility at minimum cost. Available in sizes with 9, 10, 20, 50, 100, 200 and 300 contacts, spaced on .265" grid. Wrap-around beryllium copper nickle gold plated contacts handle up to 5 amps, and are located behind protected entry hole for damage-free years of use. Supplied with standard alpha-numeric markings or custom markings to order. Full line of color coded .090" tip diameter patchcords including piggy backs available.

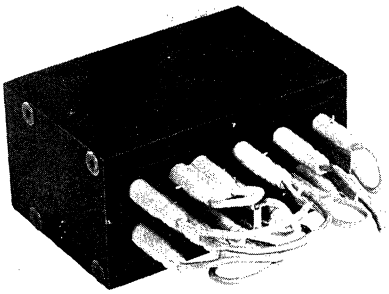
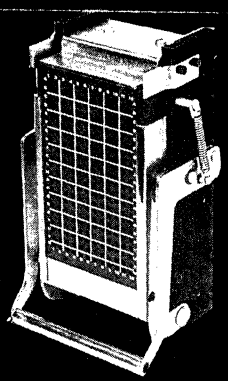
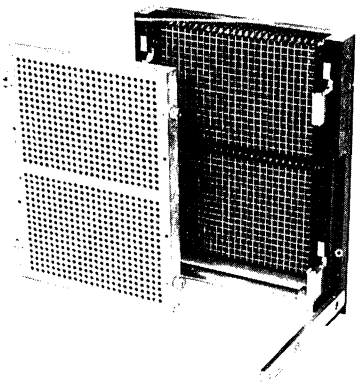
Patchboard Programming Systems and Accessories



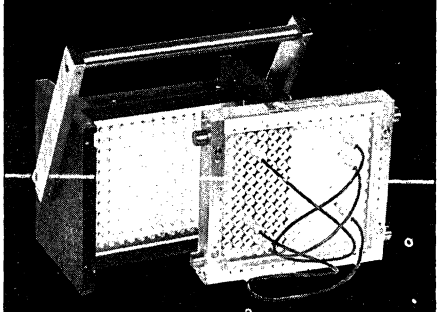
Fixed Systems —26 standard models ranging from 30 contact points to 7,188 combine reliability and economy to meet a wide variety of programming needs primarily in industrial controls and communications.



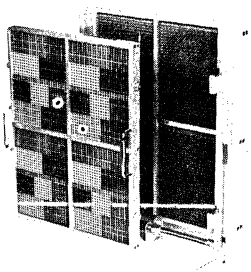
Lever Lock Systems —are most utilized by large computer manufacturers. A lever provides the necessary force to simultaneously mate up to 680 patchcord tips and paddle contacts. A smaller model offers 252.



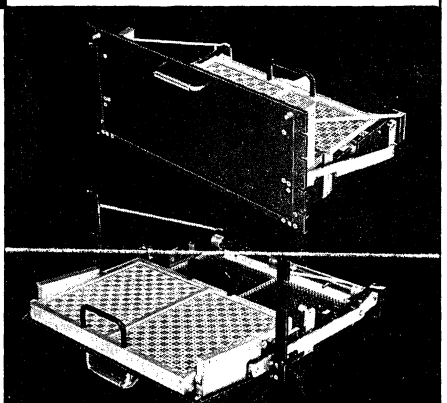
Shielded Systems —Each paddle contact is isolated with metal shielding. Crosstalk reduction is 92 db at 1000 cycles, 100 volts peak to peak. There are six models ranging from 360 to 4200 contacts.



True Thru-Shielded Systems —offer individual shielding, matched impedance, VSWR of 1.01 from 100 MHz to 500 MHz. These advanced programming systems can be manufactured to virtually any specifications.



Roll Cam Systems —offer greatest capability and reliability, large number of contacts (24 sizes from 48 to 5120 contacts). Camming action engages full patchboard gently and accurately and optimizes connections.



Drawer Type Systems —a roll cam designed for horizontal mounting to save up to 50% in panel areas. Also provides R.F. shielding. Five standard sizes range from 480 to 1870 contacts. All fit 19"-wide racks.

Plating—Nickel or Gold
Board Material—Phenolic or Diallyl Phthalate
Contact Diameters—.093 and .053
Connections—Solder, wire wrap or Locktite
Finish—clear polish or black anodized
Silk Screen—Alpha/ numeric grid or special designs
Patchcords—Manual or fixed; single tip to nine-prong tip; squids; splits; shunts.
All unconditionally guaranteed.
Tools—a variety of 27 tools for crimping, extraction, insertion, and paddle contacts.

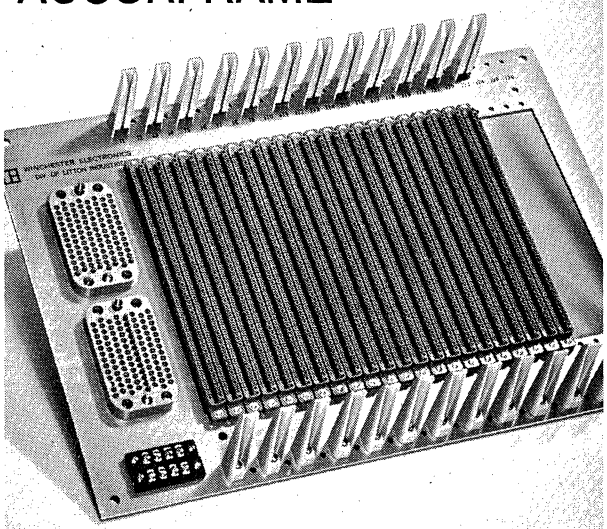
ACCURFRAME®

The AccurFrame® system is the simple yet accurate positioning of precision molded Wire-Wrap connectors onto a metal frame. This technique offers substantial cost reduction, versatility of application and flexibility of design for automatic wire wrapping.

The heart of the AccurFrame packaging is our HW Series of Wire-Wrap printed circuit connectors. Designed for .062 printed circuit cards, the connectors are precision molded of diallyl phthalate with contact spacings of .100 x .200 inches or .125 x .250 inches. The contacts are bifurcated phosphor bronze with gold over nickel plating. The terminal posts are .025 inches square and have been designed to MIL-STD-1130. Post ends are flat within .020 inches of true position, and each post will accept up to three #30 AWG solid wires. Correct post alignment and retention is assured in the body of the connector by twisting the terminal a full 90 degrees.

Standard AccurFrames are available for off-the-shelf delivery. Custom designs and configurations can be made to order.



RACK AND PANEL CONNECTORS

The following chart indicates our broad range of standard rack and panel connectors, available in a wide variety of dielectrics. Many were developed for and qualify under Mil-C 008384 and Mil-C 22857.

Type of Connector	Current Rating (range)	No. of Contacts (range)	Max. Wire Size (Stranded)	Protective Types	Termination Types*	Series

Electronics

many non-standard problems.

RF CONNECTORS

Winchester Electronics offers the complete line of Radiall coaxial connectors. These include standard BNC, TNC, Type N (Mil-C 39012), SMA, SMB, SMC, UG and miniatures (Mil-C 22557), as well as the proprietary miniQUICK and SUBLOCK Series of quick disconnect high performance connectors.

Winchester Electronics also offers full capability to design and produce special RF and High Voltage connectors to customer requirements.

The miniature and sub-miniature series is finished with a heavy gold plate. The standard series is plated with NSR, a patented nickel base finish providing better physical characteristics than standard nickel plating.

All connectors are machined to close tolerances, are rack plated, and provide superior electrical performance at competitive prices.

CLASS DEFINITION

Class M—Designed to meet military requirements as to materials, plating and performance.
Class I—Same as Class M except for reduced plating.
Class C—Economical non-military applications.

PLUGMOLD® MULTIOUTLET SYSTEMS FOR ELECTRONIC APPLICATIONS

Plugmold systems: the versatile, efficient way to organize electrical wiring and devices

To contain power wiring — along with a variety of outlets, switches, jacks, circuit breakers and other devices — use versatile Plugmold systems. Rugged, attractive Plugmold systems accommodate 14 to 2/0 AWG wire and accept a variety of electrical devices up to 60A, circuit breakers to 100A.

- With outlets and other devices placed where you need them, Plugmold adds efficiency and convenience wherever it is used.
- Made of steel, Plugmold protects wiring and keeps it accessible.
- A complete line of fittings makes it easy to apply Plugmold to almost any wiring situation.
- All Plugmold multioutlet assemblies and fittings are listed by Underwriters' Laboratories, Inc., and Canadian Standards Association.
- For engineering assistance, contact your nearest Wiremold representative — listed in the EEM yellow section.

Plugmold with prewired outlets

PLUGMOLD 2000 and 2200: Furnished completely prewired (No. 12 Type TW). Grounding outlets (15A, 125V) are spaced at regular intervals.

Outlet Spacing: 6, 9, 12, 18, 30, 60″ on centers.

Lengths: 1, 3, 5, 6′, and in Snapicoil® prewired harness up to 500′.

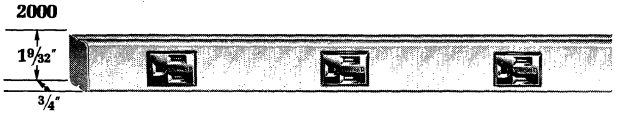
Circuit arrangements . . .

G Series: 2-wire, 1-circuit; Plugmold base serves as grounding conductor.

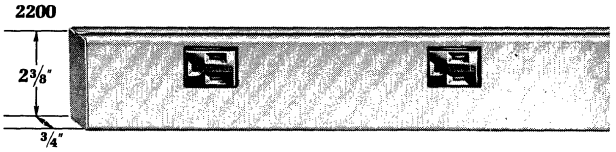
GA Series: 3-wire, 2-circuit; outlets wired alternately; Plugmold base serves as grounding conductor.

GB Series: 2-wire, 1-circuit; has insulated grounding conductor. (On special order, GB series available with insulated, isolated grounding conductor.)

2000



2200



Other Plugmold systems

Four types are furnished unwired. Outlets and other devices may be spaced as desired.

PLUGMOLD 2100: For use with various receptacles made by Wiremold (15A, 125V; 15A, 250V; 15A, 277V; and 20A, 125V). Devices include 2- and 3-wire receptacles, Lumiline single receptacle, single-pole switch, and keyless socket. Accepts wiring from 14 to 6 AWG. Devices can also be installed in 1-, 2-, and 3-gang Wiremold boxes as desired.

PLUGMOLD G-3000: For use with most outlets (up to 50A) and devices designed for a 1-gang box. Accepts wiring from 14 to 2 AWG.

PLUGMOLD G-4000: Used with or without channel divider strip. With divider, one compartment holds power wiring (devices to 20A), the other carries low potential (communications, etc.) circuits. Without divider, the full channel accepts devices to 50A. Max. depth of devices, 1 5/8″. Accepts wiring from 14 to 2 AWG.

PLUGMOLD G-6000: For use with most outlets (up to 60A) and devices designed for a 1- or 2-gang box. Holds circuit breakers (to 100A). Accepts wiring from 14 to 2/0 AWG.

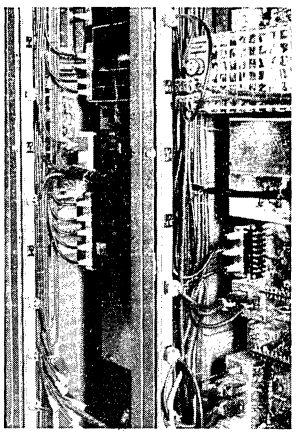
PLUGMOLD® MULTIOUTLET SYSTEMS FOR ELECTRONIC APPLICATIONS

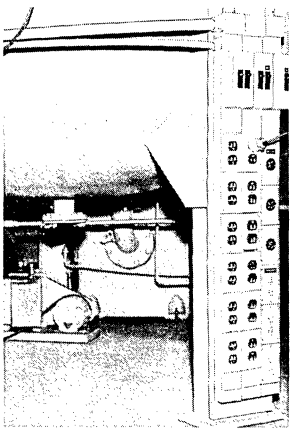
Typical uses of Plugmold

On original equipment: Plugmold adds value, convenience and efficiency to control consoles, cabinets, racks, benches, chassis, modular equipment, data processing equipment, trailers, shelters, etc.

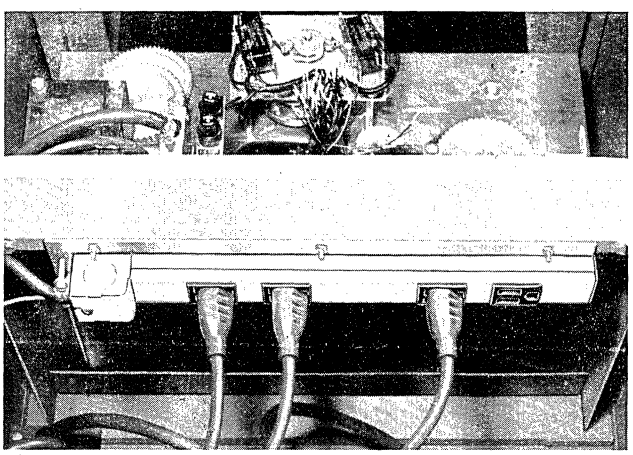
In laboratory and production areas: Use Plugmold on benches, over benches, on walls and partitions — wherever you need to put electricity to work.



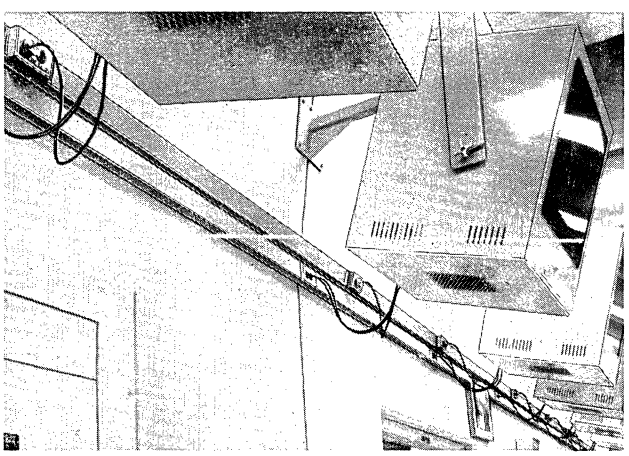
Strips of Plugmold in cabinets feed radio/TV transmitting equipment. *WTIC Broadcast House, Hartford, Conn.*



Rotary accelerator has Plugmold on leg to handle a variety of services. *G.E. Space Center, Valley Forge, Pennsylvania.*



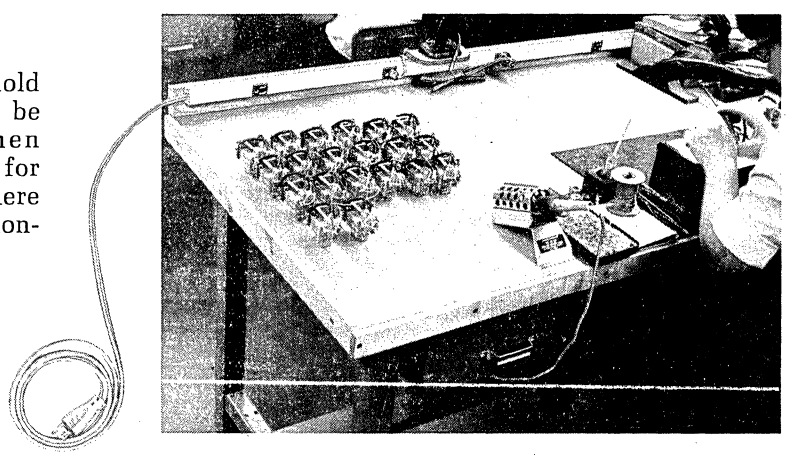
Central time transmitter in computer uses Plugmold to feed power to fan, clocks, etc. *Friden, Inc., Rochester, N.Y.*



Plugmold brings power wiring and antennae leads to closed-circuit TV monitors. *J. F. Kennedy Space Center.*

20CSK Cord Set Kit

The Cord Set Kit converts runs of Plugmold 2000 into portable power units that can be easily moved with work benches, then plugged in again at a new location. Ideal for laboratory and production situations where changing needs require frequent repositioning of benches.



Wiremold®

SOLD BY ELECTRICAL DISTRIBUTORS EVERYWHERE

Delay Lines

Andersen designs and develops many more different types of delay devices (including optical and microwave) than any other concern.

Andersen is the only firm producing delay devices for the entire range of frequencies.

Andersen is the sole major manufacturer of delay devices specializing in signal processing systems.

Andersen supplies a substantially greater volume of delay equipment than any other source.

	TYPICAL APPLICATIONS	RANGE OF PARAMETER	NEWEST DEVELOPMENTS and UNIQUE CHARACTERISTICS
AUDIO	Sonar, voice equalization, ASW sensors.	1 usec to 1 sec delay, balance or unbalanced. Typical delay-bandwidth products up to 40. Impedances from 100 to 1000 ohms.	Delay-BW products up to 60 or more for fixed lines, and 15 or more for electrically variable lines. Extremely low attenuation for delay-BW of 40 max, e.g. 0.001 db per usec max. For higher delay-BW 0.01 db per usec max. Extremely low frequency ripple, better than 1%. Phase response and group delay to better than 1% at 3 db response.
VIDEO	Radar-sonar signal processing, comb filters, correlation, cancelling, television broadcast, delay equalization, field storage, signal synchronization.	Lumped constant lines with delay-BW products of 40 to 60, delays from 1 nsec to milliseconds. Quartz lines with CF to 150 Mhz and delays to 4000 msec. Electrically variable delays of 0.1-100 usec with delay-BW product of 15.	High fidelity storage of one full field of TV signal. Variable delay of full 360° of chrominance. EVDL's with improved group delay and response characteristics meeting video color standards.
IF-RF	Non-dispersive: MTI, clutter cancellation, coherent integration, target simulation, range markers, coded sequence processing, transversal equalizers, receiver gain control versus time, time multiplexing correlation, Variable time delay, digitally controlled. Dispersive: Pulse expansion-compression systems, spectrum analyzers, doppler estimators.	CF to 150 Mhz, BW to 50% of CF. Delay 4000 usec in single unit, longer when used in cascade. Products always offered with unity gain.	Short delays with low spurious, e.g., 1 usec delay, 48 db spurious at 60 Mhz. Wider BW, e.g., 65% at 60 Mhz CF. Flat amplitude response e.g., plus or minus 0.2 db 30% BW 60 Mhz CF. VSWR across BW e.g., 1.3 to 1 nom 50 ohms.
MICRO-WAVE	Non-dispersive: ECM, ECCM, radar processing and checkout systems, fusing, altimeters, transponders. Dispersive: High resolution pulse compression and similar wide band signal processing.	CF UHF through X-band, delay 200 nsec to 10 usec. BW to 500 Mhz. Pulse-compression ratios to 500 to 1.	10 db insertion loss at 500 Mhz, delays to 10 usec at X-band. Dispersive lines with 500 Mhz Bw, .5 usec dispersion. Transducer peak power capability to 50 watts, average power 2 watts.
DISPER-SIVE	Pulse expansion — compression systems, spectrum analyzers, panoramic receivers, doppler estimators.	C.F. 1-120 MHz, Dispersive B.W. to 60 MHz, Delay Dispersion to 1000 microseconds, Compression Ratio to 2500. All units available with ovens and temperature controllers, meet Mil-specs. Complete pulse compression systems our specialty.	IMCON systems, B.W. up to 15 MHz, dispersion up to 300 micro-seconds, small size, good linearity and temperature stability. DELECON systems offer B.W. up to 60 MHz, dispersion up to 30 microseconds, good linearity and temperature stability. STRIP LINES are least expensive, B.W. up to 6 MHz, compression ratio up to 200 per strip, low insertion loss, small size.
DIGITAL	Deltics, delta modulators, spectrum analyzers, matched filters, serial memories, scratch pad, refresh, buffer storage, A-D conversion.	Wiresonic: CF to 2 Mhz, storage 20,000 bits per unit. Glass: CF to 20 Mhz, storage 4500 bits per unit. Quartz: CF to 40 Mhz, storage 30,000 bits per unit.	Dual channel, 35 Mhz memory in single small package. Low cost high capacity temperature compensated multi-line packages. Lowest cost per bit in comparison with ferrites and MOS. Highest bits per cubic inch. Lowest power dissipation per bit.
OPTICAL	Laser modulation, Switched light sources, Q switches, mode lockers, beam deflectors, optical signal processing, cross and auto correlation, radar pulse compression-expansion matched filters, spectrum and Fourier analyzers, acousto optical continuously variable and multi-tapped delay lines.	CF 0.1 Mhz to 12 Ghz. BW octave or greater. Modulation to 4 Ghz. Time-BW products to 20,000 Mhz-useconds. Spectral ranges from UV to IR.	High efficiency, high power broad band transducers, IR modulation Stable, high rep rate Q switches, liquid cooling for high power, compact solid state designs.

LUMPED CONSTANT DELAY LINES

CUSTOM-BUILT

Allen Avionics, Inc. manufactures a wide variety of delay lines to customers' specifications. The following specifications encompass areas in which we normally work. If, however, your requirements fall outside of the following parameters, we would still be interested in hearing from you.

RANGE — Delay times from 3 nanoseconds through audio ranges are available.

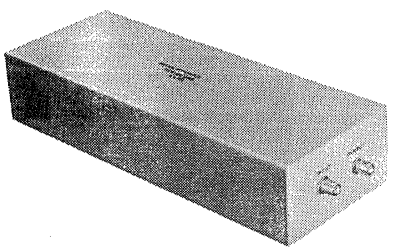
TIME DELAY/RISE TIME RATIO — Time delay to rise time ratio to 300/1.

CONSTRUCTION — Units are hermetically sealed in metal cans with glass to metal terminals. Epoxy encapsulated units are also available.

SIZE — Sizes are available from .750 x .270 x .225 inches.

DELIVERY — Prototypes of special lines can often be delivered in a week or two.

Our engineering staff is always available to help with any delay line and application problems.



HIGHEST $\frac{\text{TIME DELAY}}{\text{RISE TIME}}$ RATIO EVER BUILT!

These Delay Lines have the highest ratio of time delay to rise time that has ever been built in a Lumped Constant Line. Unlike other types of high ratio lines, the Lumped Constant Delay Line has a passband from D.C. to its cutoff frequency and maintains a constant delay over these frequencies. These lines are also unique in that they offer relatively low insertion loss.

This group of lines is characterized by tight time delay tolerances, low pulse distortion, excellent phase linearity and good temperature stability.

For laboratory use, any time delays from 10 microseconds to 100 microseconds can be built into variable decade instruments with ratios of over 100/1. These units could have a resolution of up to 1/5000 of the total delay.

SERIES "HF" HIGH FREQUENCY

The HF Series in most cases will serve as more than adequate electrical replacement for coaxial cable. The inconvenience of handling and storing cable will thus be eliminated. Standard impedances of 50 and 75 ohms are available. Units are normally supplied with BNC connectors. Tapped lines can also be supplied.

50/1 RATIO
ATTENUATION 9 db MAXIMUM
SIZE: 2½" x 4½" x 12"

Available in any delay from .5 to 4.75 μs

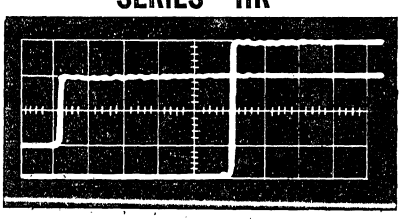
75/1 RATIO
ATTENUATION 12 db MAXIMUM
SIZE: 3½" x 4½" x 12"

Available in any delay from 1.5 to 4.75 μs

100/1 RATIO
ATTENUATION 15 db MAXIMUM
SIZE: 3½" x 6½" x 16"

Available in any delay from 2.0 to 4.75 μs

SERIES "HR"



1 MICROSECOND PER DIVISION
(5 Microseconds Delay — .05 Microsecond Rise Time)

100/1 RATIO
ATTENUATION 8 db MAXIMUM
SIZE: 2½" x 4½" x 12"

Available in any delay from 5 to 50 μs

130/1 RATIO
ATTENUATION 9 db MAXIMUM
SIZE: 3½" x 4½" x 12"

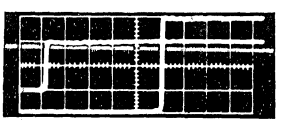
Available in any delay from 5 to 100 μs

SERIES "VHR"

The "VHR" Series have a characteristic impedance of 50 ohms.

These units are hermetically sealed in a metal can 3½ x 6½ x 16 inches, with four ¼ x 20 studs on the 6½ x 16 inch surface.

Two BNC connectors are located on the 3½ x 6½ inch surface for input and output connections. Variable Decade Delay Units can be manufactured for laboratory use from the "VHR" Lines.



5 MICROSECONDS PER DIVISION
(25 Microseconds Delay — .1 Microsecond Rise Time)

150/1 RATIO ATTENUATION 16 db MAXIMUM
SIZE: 3½" x 6½" x 16"

Available in any delay from 10 to 70 μs

200/1 RATIO ATTENUATION 18 db MAXIMUM

Available in any delay from 10 to 75 μs

250/1 RATIO ATTENUATION 20 db MAXIMUM

Available in any delay from 20 to 100 μs

LUMPED CONSTANT DECADE DELAY LINES TYPE "D"

Type "D" Variable Decade Delay Units are engineered to provide variable time delays with absolute stability for accurate triggering and excellent reproduction of the input pulse. These lumped constant delay lines are completely passive. All models have a minimum of 1000 to 1 resolution and consist of three or more decade switches. Any delay output of Type "D" decade delay unit is the summation of individual lines. It is not the result of a tapped line. This feature is an important factor in eliminating undesirable reflections in the output pulse. Accuracy at any delay exceeding 1% of the unit's total delay is within 3%. These units have a characteristic impedance of 500 ohms in and out. While the units listed are standard, other delays and impedances can be manufactured to specifications.

Part No.	Maximum Time Delay In Microseconds	Resolution In Microseconds	Rise Time @ Max. Delay In Microseconds	Bandwidth Kilohertz	Attenuation In db

DUAL-IN-LINE "MINI" SPIRADEL®*
THE WORLD'S LOWEST COST DELAY LINE
HAVING TIME DELAY TO RISE TIME GREATER THAN 5/1

FEATURES EXCELLENT PULSE FIDELITY

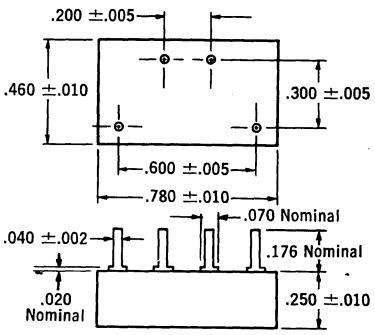
Exceptionally Fine Phase Linearity Over Wide Frequency Range.

- **Operation from −55°C to +105°C. Units exhibit a change of less than 175 parts/million/°C over this entire temperature range.**
- Designed for dual-in-line mounting. Compatible with integrated circuits.
- Standard delay tolerance 10%. (5% available).
- Maximum attenuation for all delays: 7%.
- Bandwidth from DC to frequency f = .35/rise time.

To order standard units, specify "Mini" Spiradel and Total Delay.

Time Delay (Nano-seconds)	Rise Time (Nano-seconds)	Bandwidth Megahertz	Impe-dance (Ohms)
10	2.5	144.0	125
20	4.0	90.0	200
30	6.0	60.0	250
40	8.0	45.0	300
50	10.0	36.0	350
60	12.0	30.0	400
70	14.0	25.7	400
80	16.0	22.5	475
90	18.0	20.0	500
100	20.0	18.0	500
125	25.0	14.4	500
150	30.0	12.0	1000
175	35.0	10.2	1000
200	40.0	9.0	1000

ACTUAL SIZE



UP TO 5 UNITS can be connected in series to achieve longer delays providing the delays and impedances of each unit are the same. The total rise time of the series combination can be determined by the following formula:

$$Tr = \frac{Td}{50} + Tr_1$$

Where Tr = Total Rise Time
Td = Total Time Delay
Tr_1 = Rise Time of Individual Unit

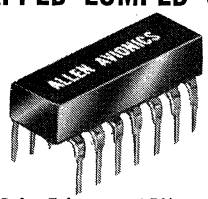
*Patented and patents applied for.

"LC DIP" THE WORLD'S SMALLEST DUAL-IN-LINE 14 PIN TAPPED LUMPED CONSTANT DELAY LINE

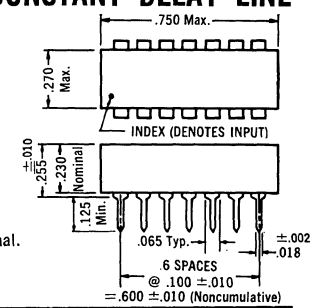
THE "LC DIP" represents the smallest delay line now available. It offers the ultimate in high density packaging and tapping capabilities. The units are excellent for high frequency applications. The availability of 10 equal delay increments and the dual-in-line packaging along with its low silhouette make for compatibility with semiconductor and other assemblies where circuit board height must be held to a minimum. This makes the "LC DIP" extremely adaptable for the computer and allied industries.

While the table lists our standard units with an impedance of 100 ohms, other delays and impedances can be manufactured.

Time Delay (nano-seconds)	Rise Time (nano-seconds)	Band-width (MHz)	Maximum Attenuation (%)
50	10	36.0	8
100	20	18.0	12
150	30	12.0	15
200	40	9.0	23
250	50	7.2	30

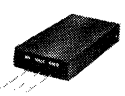


Delay Tolerance: ±5% or 4 ns (whichever is greater).
Impedance: 100 ohms nominal.
Working Voltage: 50 volts DC.
Construction: Epoxy encapsulated.



TYPES "N", "A", "L" DELAY LINES

TYPES "N" & "A"

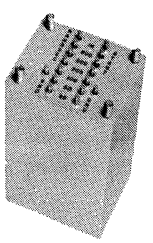


TYPE "L"

Type	Time Delay	Impe-dance	Time Delay To Rise Time Ratio	Size
N	20, 30, 40, 50, 60, 70, 80, 90, 100 ns.	100 Ω	3.5 to 1	⅝" x ⅝" x .450"
A	0.1, 0.2, 0.3, 0.4, 0.5 μs.	500 Ω	3.5 to 1	⅝" x ⅝" x .450"
	0.5, 0.6, 0.7, 0.8, 0.9, 1.0 μs.	1000Ω		
L	25, 75, 200, 250 μs.	250 Ω	5 to 1	2½" x 4½" x .8"
	50, 150, 400, 500 μs.	500 Ω		
	100, 300, 800, 1000 μs.	1000 Ω		

PULSE & VIDEO DELAY LINE TYPE AV-397

Maximum Delay: 2.075 microseconds ±3% variable in .025 microsecond steps from .025 microseconds to 2.075 microseconds.
Time Delay of Individual Lines: 1, .5, .2, .2, .1, .05, .025 microseconds.
Rise Time for Entire Line: .06 microseconds maximum.
Frequency Response: 3 db down at 5 MHz for 2.075 microseconds delay.
Distortion: 2% maximum with .2 microsecond input pulse.
Impedance: 75 ohms ±5%.
DC Working Volts: 300.
Temperature Coefficient: 50 parts/million/°C from −55°C to 105°C.
Attenuation: 7% maximum for 2.075 microsecond delay.
Mechanical: Hermetically sealed in a steel can 2" x 2½" x 5½", painted gray with black identification markings, and using 10/32 x ½ inch studs spaced on 1½" x 2" centers for mounting.



TV LINE EQUALIZER TYPE AV-535

The Allen Avionic's AV-535 Equalizer is designed to compensate for losses in RG-11/U (75 ohm) cable and its equivalents. The unit is capable of equalizing 50 to 300 feet in 50 foot increments.

Terminals on mounting surface are so arranged to provide for simplified strapping for compensation of different cable lengths. All units are foamed and hermetically sealed in steel cans.

Size: 2 x 3½ x 5 inches (not including mounting stud length).
Mounting Centers: 1½ x 3 inches.
Stud Size: 8/32 x ½ inch long.

Impedance: 75 ohms ±2 ohms to 8 MHz.
Attenuation of Cable Plus Equalizer: 3 db.
Attenuation of equalizer alone is as shown in the following table:

Feet	0.1 MHz	2 MHz	4 MHz	8 MHz
50	2.97 db	2.86 db	2.79 db	2.67 db
100	2.93	2.68	2.53	2.27
150	2.90	2.51	2.28	1.88
200	2.86	2.35	2.03	1.52
250	2.82	2.19	1.82	1.21
300	2.78	2.02	1.58	0.86

Tolerance: ±.07 db.

FOR IMMEDIATE DELIVERY!

SPIRADEL is a small diameter, distributed constant delay line, featuring higher delay to rise time ratio and excellent pulse fidelity. Its new shape offers greater package design versatility than most other delay lines available, and the entire unit is encapsulated for maximum environmental protection.

SPIRADEL is designed for operation from −55°C up to +105°C. Bandwidth is from DC to frequency f = .35/rise time.

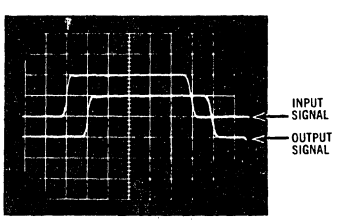
FIXED DELAY

FIXED SPIRADEL covers a delay range of 20 to 6000 nanoseconds. Any delay within this range may be selected. Time delay to rise time ratios range up to 30 to 1. Any impedance from 50 to 1000 ohms is available. Standard delay tolerance is 5%, although tighter tolerances can be held.

TAPPED DELAY

TAPPED SPIRADEL covers a delay range of 20 to 1000 nanoseconds. Any delay within this range may be selected. Total delay tolerance is ±5%. Tap delay shall be multiples of 10% of total delay ±5% or 2 nanoseconds, whichever is greater.

TO ORDER STANDARD UNIT:
SPECIFY SPIRADEL (FIXED or TAPPED), TIME DELAY, IMPEDANCE & DIAMETER



Actual oscilloscope presentation photo of input and output pulses of 100 ns. Spiradel, illustrating excellent pulse fidelity.

PRECISION, RUGGEDNESS, RELIABILITY

These four series of military grade delay lines are encapsulated in an epoxy casting resin, which is poured under vacuum and cured to a solid, void-free block of high-temperature plastic. All components and wires are solidly supported against shock and vibration and completely protected from moisture and salt spray. All four series meet the requirements of MIL-STD-202.

The remarkable performance and stability of these very compact delay lines is due to the extraordinary care taken in the design and manufacturing processes. Phase characteristics are individually adjusted for optimum pulse performance, to give fast-rising, noise-free output pulses with minimum overshoot and distortion. A complete system of inspections and tests at every stage of construction and assembly assures the utmost in quality and reliability.

SERIES L AND SERIES N

Delay Tolerance: 2%
Delay Temp. Coeff.: 0.003%/°C to 0.01%/°C
Test Voltage: 800 vDC
Working Voltage: 400 vDC max
Pulse Voltage: 400 v peak max
Temperature Range: −65°C to 125°C
Connections: 22 gauge pins, 3/16" long

Designed to plug into printed wiring boards for dip-soldering into place, these high-performance units are readily adaptable to other types of circuit construction, since the 22 gauge pins may be easily formed to fit lugs or terminal posts. The pins are laid out on the standard 0.1" printed circuit grid.

Careful control of the attenuation characteristic and the provision of special phase-compensating circuits result in superlative pulse performance. The tables give the cut-off frequencies of the delay lines which are available in each series. Part Numbers: Give series, impedance, and delay; e.g., N-1000-40.

BLILEY GLASS DELAY LINES FOR DIGITAL STORAGE

Digital glass memories have recently found wide application as an ultrasonic storage device in computers and associated digital processing equipment. Bliley ultrasonic digital delay lines meet this requirement with bit rates as high as 30M bits/sec and access times as low as one microsecond. Although digital lines operate at one-half the period of the center frequency, the recommended bit rate is approximately two-thirds of the center frequency.

Digital lines operate in the RZ or return to zero mode which is the least demanding on external circuitry. Additional circuitry is required for NRZ operation to obtain increased storage capacity or BIPOLAR operation for increased signal to noise ratio. Most digital lines utilize low temperature coefficient glass as the delay medium to obtain good delay time stability with temperature change as indicated in Figure 1.

Attenuation depends upon delay time, operating frequency, required signal to noise ratio, terminating impedance, input and output admittance conditions and pulse shape. The most efficient operation of a digital line is achieved at its point of minimum attenuation (center frequency) although it may operate satisfactorily at any point throughout its 3 db bank pass. To reduce loss level, ceramic transducers are used up to 20 MHz and quartz transducers from 20 MHz to 30 MHz.

Typical digital response characteristics are shown in Table I, and Table II indicates the present design range parameters for glass lines.

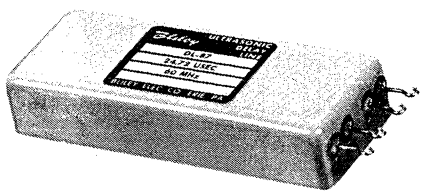

FIG. 1

Bliley is equipped to manufacture a broad range of custom-designed delay lines. Our experienced staff will welcome an opportunity to analyze your specifications and prepare quotations for your requirement. Literature will be sent promptly upon request.

BLILEY ULTRASONIC DELAY LINES FOR RF APPLICATIONS

Ultrasonic delay lines are widely used in conventional RF systems such as video pulse integrators and moving target indicators in radar applications. This type of ultrasonic delay line is available over the range from 1 microsecond to 4500 microseconds.

In general, low TC glass is used for the short delay time range, with frequency temperature characteristics as shown in Figure 1. Long lines, which use fused quartz as the delay medium, have a temperature coefficient of minus 75 ppm per degree C.

Long delay lines may be specified with carrier frequencies in the range from 10 MHz to 40 MHz. Spurious signal attenuation shown in Table III applies only to frequency range 25-40 MHz. Best attenuation of spurious signals is achieved in medium delay time ranges and at higher carrier frequencies. Dependent upon loss level requirements, bandwidth may be estimated from 50% to 65% of carrier frequency. Loss and bandwidth characteristics are interdependent and are controlled by choice of terminations, carrier frequency and transducer capacity as shown in Table IV.

TABLE III. LONG DELAY LINES

Delay Time Range (μsec)	30-400	200-700	300-1400	500-1600	600-2000	1400-2700	600-3300	1300-4500

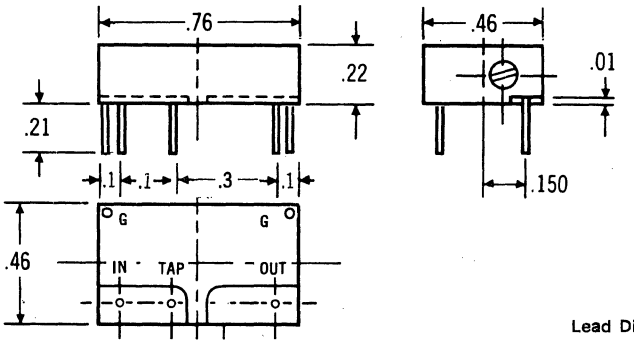
DUAL-IN-LINE VARIABLE DELAY LINES

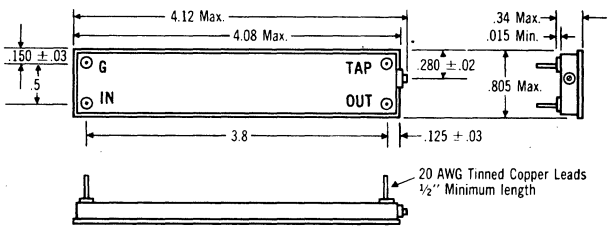
DV Series



BEL introduces the first variable delay line compatible with IC Dual-In-Line packaging featuring: • Hermetic Seal-O-Ring construction • Precious metal contacts • Resolution — MIN 2% (for high reliability performance)

Lead Dia. = .020

NV Series
PV Series

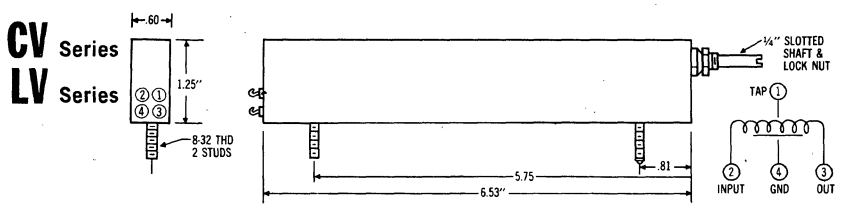


VARIABLES

These precision hermetically sealed variables are available in a wide range of delays and impedances. Both may be provided with various mounting and terminal configurations to suit most applications.

NV Series in Metal Case
PV Series in Epoxy Case

CV Series
LV Series



VARIABLES

These precision hermetically sealed variables are available in a wide range of delays and impedances. Both may be provided with various mounting and terminal configurations to suit most applications.

DUAL-IN-LINE DELAY LINES

- Delays from 1-1000 nanoseconds.
- Band Width to 60 mhz.
- Impedance 50 to 1000 ohms.
- Resistive Terminations if desired.
- Tapped Delay Lines available.
- Several separate lines in one case.
- Contact Bel Engineering for special applications.

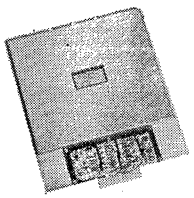
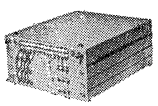
DELAY LINE COMPUTER MEMORIES DELCOMS





THE DELAY LINE COMPUTER MEMORY (DELCOM) offers the **Lowest Price Per Bit** of any high speed memory device. Computer Devices Corp. offers convenient standard packages for all practical storage capacities from 10 bits to 20,000 bits in single delay line units as well as multi delay line units* with massive storage capacities. All Delcoms are compatible with DTL and T²L logic. Normal power requirements are +12 and −12 VDC and +5 VDC. However, Delcoms are tailored to your bit rate, delay, input-output logic and power requirements.

MODEL SERIES	MAXIMUM STORAGE (BITS)	MAXIMUM (Hz) BIT RATE	SIZE INCHES
MS 2219	1,300	2.6	3.25 x 4 x 1
MS 777	1,500	2.3	3.50 x 6.37 x .5
MS 772	4,000	2.2	4.50 x 6.25 x 1.12
MS 773	8,000	2.0	8 x 10.50 x .62
MS 2150	16,000	2.0	11 x 14 x .75
MS 775	20,000	2.0	12 x 15 x .75
*MA 2254	10,000	2.0	6.50 x 4 x 3.50
*MA 2255	24,000	2.0	8 x 5 x 2.75
*MA 2256	250,000	2.0	19 x 14 x 17

*Examples of multi delay line units.

ADDRESSABLE RANDOM ACCESS MEMORY

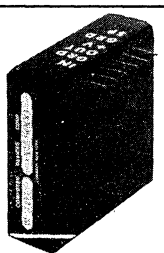
M4000 Series

- Random Access
- Binary coded address
- Average access time 512 μsec
- Integrated circuits throughout
- Storage modularly expandable without limit
- Immune to primary power failure
- Visual display available

STORAGE

One basic unit stores either 1024 — 12 bit words expandable in 2 bit steps per module or 2048 — 6 bit words expandable in 1 bit steps per module.

Other models with capacity of up to 16,384 words of any length.



KEYED OSCILLATOR

For Precision Gating
Frequencies from 0.5 to 25 MHz

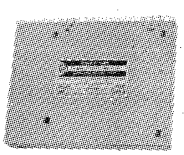
The 0G5000 is a square wave oscillator which can be precisely gated by means of a control voltage. The leading edge of the 1st output pulse occurs within 3 nanoseconds of the gating or keying signal. It will respond to a gate width equal to one output frequency cycle or greater. Size: 2.0x1.7x.62".

CONTROL SIGNAL is ground to −4V or −5V DC with rise time of less than 10% of output period length.

OUTPUT SIGNAL is ground to +4V DC from DTL or T²L logic gates. Duty cycle: 50% ±10%. Period accuracy: Better than ±1%.

DIGITAL DELAY LINES FOR DIGITAL AND CW APPLICATIONS

MAGNETOSTRICTIVE DELAY LINES are extremely stable with temperature, with stabilities of up to .5 PPM/°C achievable. Although primarily used in digital applications at bit rates of up to 1 MHz RZ or 2 MHz NRz, they also delay CW signals with center frequencies from 200 KHz to 1 MHz with a bandwidth of 20%. Insertion loss is about 60 db.



MODEL	DELAY (μsec)	SIZE (INCHES)
ML 545	up to 23 μsec	1 x 5 x .375
MT 767	1,000	3.5 x 4.0 x .46
MT 762	2,000	4.0 x 5.0 x .50
MT 763	4,000	6.0 x 7.0 x .50
MT 764	8,000	9.5 x 10.5 x .75
MT 765	16,000	10.5 x 11.5 x .56

MULTIPLE OUTPUT DELAY LINES

Multi-tap Delay Lines are supplied with as many tap points as desired and are useful as word generators and correlators.

MODEL	TOTAL DELAY μsec	NO. OF TAPS	TAP SPACING μsec	SIZE
ML718	15	12	1.25	1.75 x 8 x .50
ML790	16	16	1.0	1.75 x 8 x .50
ML791	20.3	14	1.45	1.75 x 8 x .50
ML883	28	24	1.0	3 x 9.37 x .50

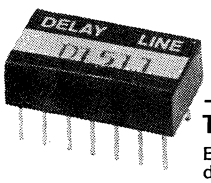
FIXED AND TAPPED DELAY LINES

DUAL-IN-LINE THINLINE — NANOSECOND SUB-MINIATURE LINES



.21 inch thickness and pin arrangement makes these lines compatible with dual-in-line packaging. Encapsulated in plastic.

MODEL	IMPEDANCE OHMS	DELAY	RISE TIME OR FREQ. RESP.	SIZE INCHES
D1521-1	Available in 50, 93 and 100 ohms	50 Nsec	20 Nsec	Dual-In-Line Pin Spacing .21 x .39 x .7
D1521-4		25	10	
D1521-7		10	4	
D1521-10		5	2	
D1551-1	200	100 Nsec	10 Nsec	Dual-In-Line Pin Spacing .21 x 1.0 x 1.5
D1551-2		150	15	
D1551-3		200	20	
D1551-4		250	25	
D1551-5		300	30	

TAPPED DELAYS

Each line provides 10 tap delays spaced at equal intervals.

D1511-1	100	10 Nsec	3 Nsec	Dual-In-Line Pin Spacing .21 x .39 x .7	
D1511-2		20	6		
D1511-4		40	13		
D1511-6		60	20		
D1511-8		80	26		
D1511-10		100	33		

MANY TAPS PER LINE

50 taps	D1543	100	150 Nsec	13 Nsec	.25 x .8 x 5.2
50 taps	D1544	100	300	20	.25 x 1.0 x 5.3
30 taps	D1545	100	90	8	.25 x .8 x 3.2

MINIATURE LUMPED CONSTANT

Hermetically sealed in a metal container. Delay tolerance ±5%.

Temperature stability less than 50 PPM/°C. P.C. Mounting.

D647- — — 0	Available in 93, 330, 500 and 1000 ohms	.05 μsec	Available with 3 delay to rise time ratios in 3 case sizes 4:1 .30 x 1.0 x 1.25 8:1 .30 x 1.0 x 2.45 12:1 .30 x 1.0 x 3.45
D647- — — 1		.10	
D647- — — 2		.25	
D647- — — 3		.50	
D647- — — 4		.75	
D647- — — 5		1.00	
D647- — — 6		1.45	
D647- — — 7		2.90	
D647- — — 8		4.35	

INEXPENSIVE DISTRIBUTED CONSTANT DELAYS

Plastic encapsulated units with a temperature coefficient of 150 PPM/°C. P.C. Mounting. Many other models available including the nanosecond range.

DD679- — — 1	Available in 330, 500 and 1000 ohms	.1 μsec	Available with delay to rise time ratios of: In 2 case sizes 5:1 .37 x .5 x 4.5 10:1 .37 x 1.0 x 4.5
DD679- — — 2		.2	
DD679- — — 3		.3

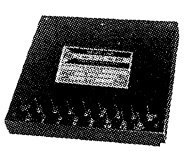
DD679- — — 5		.5	
DD679- — — 6		.6	
DD679- — — 7		.7	
DD679- — — 8		.8	
DD679- — — 9		.9	
DD679- — — 10		1.00	

ATC TRANSPONDER AND BEACON CODING DELAY LINES



Standard 1.45 μsec tap spacings plus other special delay points are provided. Hermetically sealed steel cased, plastic encapsulated and PC mounted units are offered.

D1560	400	10.15 μsec	.33 μsec	.55 x 2.25 x 3.62
D1365	180	20.3	.5	.87 x 3.5 x 3.5
D1000	330	20.3	.5	.35 x 2 x 4
D120	180	25.0	.55	.75 x 5 x 4.37
D298A	500	25.3	.6	1.62 x 2.87 x 4.25
D637	180	20.3	.3	2.37 x 2.75 x 3.18
D1190	400	20.3	.4	.63 x 4 x 5
D1191	500	24.65	.5	.63 x 4 x 5
D1210	500	8.0	.5	.5 x 1 x 4

LOW FREQUENCY ANALOG DELAY LINES

Fixed and multi-tapped delays with high accuracy and flat response VSWR ±½ db; phase linearity ±¼ %.

DA921	2000	420 μsec	100 KHz	14 x 2 x 1
DA563	1000	500	30	7 x 2.5 x 2
DA301	600	1,000	20	19 x 3.5 x 9
DA261	500	5,000	5	19 x 5.25 x 10
DA607	500	20,000	3.5	19 x 7 x 15
DA177	1000	100,000	.2	19 x 21 x 12

SEE VARIABLE DELAY LINE SECTION FOR VARIABLE ANALOG DELAY LINES

MANY OTHER MODELS AND SPECIALTY Delay Lines are available. If exactly what you want is not listed, please call.

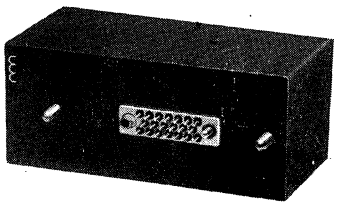
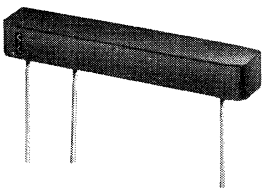
(516) 543-4220

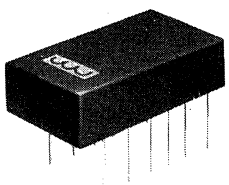
Columbia Components Corporation Delay Lines



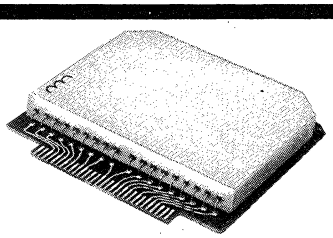
Q-Lines (Lumped Constant)
State-of-the-art design and packaging technology enables CCC to offer delay to rise time ratios of up to 100:1, with the smallest envelope sizes possible. Coupled with extremely low attenuation, distortion and operating temperature ranges of −55°C to +125°C make CCC Q-Lines ideal for a wide range of applications.
Write for data sheet DL-6-368



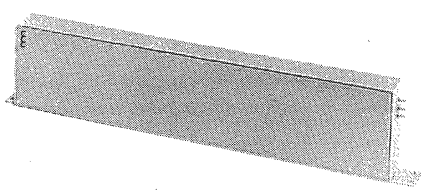
Minilines (Distributed Constant)
Economically priced delay lines featuring low profile envelopes which are ideal for printed circuit mounting and applications requiring high package density. Delays up to 2 μsec, impedances for 100 to 1,000 ohms and rise times as low as 2.5 nanoseconds are available and meet all applicable portions of MIL-D-23859A.
Write for data sheet DL-4/5-368



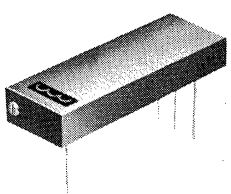
Dual-In-Line (Mates with standard) DIP Socket)
Series DU nanosecond delay lines offer the ultimate in hi-density packaging commensurate with fast rise time. Designed for frequencies up to 125 MHz., at impedances of 100 and 200 ohms, with minimum distortion and insertion loss, this series offers uncompromising speed and accuracy in Computer, Radar and Pulse train positioning applications.
Write for data sheet DL-10-270



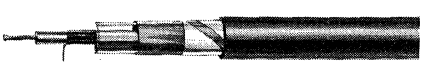
Transponder and Beacon Coder Delay Lines
Tap delay spacing of 1.45 microseconds with special tap delays designed for the various systems are available as off shelf and customer designed items. These lines have minimum volume and weight for airborne use and are normally supplied wired to printed circuit cards. These delay lines exhibit high delay accuracy and unsurpassed temperature stability — normally 10 ppm/°C.



Electrically Variable Delay Lines (E.V.D.L.)
Sophisticated voltage variable devices for applications such as Aperture Phase Correction in color television signal generation. Or as a Phase Modulator where the modulating voltage is used as the device bias. CCC E.V.D.L.'s are being used at frequencies up to 50 MHz by major producers of studio broadcasting equipment throughout the world.



Varilines (Mechanically Variable Delay Lines)
Columbia manufactures a wide range of precision variable delay lines encompassing delay ranges of from 0 to 20 nanoseconds, to 0 to 15 microseconds in impedance ranges of 50 to 2,000 ohms. These units can be supplied continuously variable or may be decade switched, and suitable for printed circuit applications.
Write for data sheet DL-1-368



Magnetic Core Delay Cable
Economical low-loss, high impedance delay elements for use in pulse work demanding extremely fast rise times. These delay cables can be supplied in calibrated lengths with molded-on end terminations, ready for installation or may be obtained in bulk. Delivery is usually from stock.
Write for data sheet DL-7-368

For special applications, quotations and delivery information, please call or write. Ask for complete catalog.

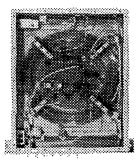
DELAY LINES

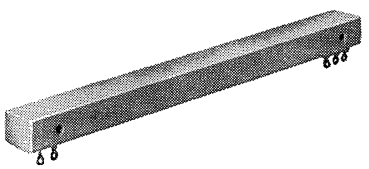
WITH OR WITHOUT CIRCUITRY

MAGNETOSTRICTIVE ★ LUMPED CONSTANT ★ ULTRASONIC ★ DISTRIBUTED CONSTANT ★ DISPERSIVE STRIP

MAGNETOSTRICTIVE DELAY LINES — Fixed and variable delays to 10,000 microseconds. Fixed — FMS Series; Variable — VM Series.

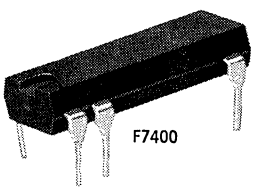


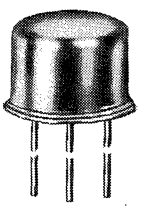
FIXED MAGNETOSTRICTIVE DELAY LINE — Up to 10,000 bits of data for memory storage. Circuitry compatible with all microcircuit logic. Choice of data format: RZ, NRZ or Bipolar.



ULTRASONIC DELAY LINES — Replaces most quartz or glass lines. Offers superior performance, lower attenuation and smaller size at less cost. Frequencies to 30 MHz. Delays to 200 usec and greater.

SUBMINIATURE DELAY LINES

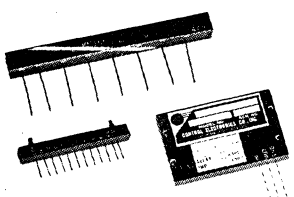




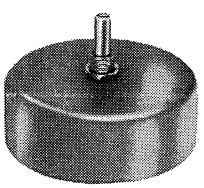
F-TO-5

TO-5 and micrologic packaged delay lines from 0.01 to 0.64 and longer delays. Ideal for timing transistors and other circuit components.

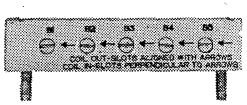
LUMPED CONSTANT DELAY LINES — Many shapes available including miniature types with pin connectors for PC Boards, connector fingers for plug-in units...multi-tapped units...terminal-ended units, etc. Delays from 0.05 usec to 500 usec for standard units. Delay to risetime ratios up to 100:1. Temperature stability to 50 ppm/C°.



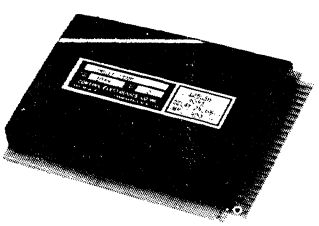
COMPACT FIXED DELAY LINES FOR PC BOARDS — Extremely high density packaging. Typical Unit: 25:1 delay-to-rise-time ratio in a volume of 2 cubic inches.



VARIABLE DELAY LINE Resolution of 1 part in 120. Delay up to 10 usec. 1″ x 3½″.

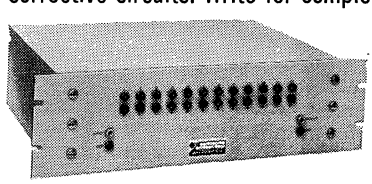


UNIQUE BINARY CODED SECTIONAL DELAY LINE — Uses miniature transfer switches. Also available with terminals for remote switching.



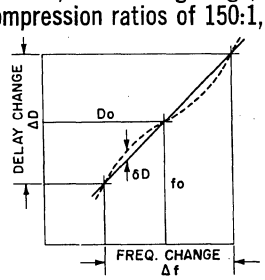
IFF MULTI-TAP DELAY LINES Standard IFF delay lines with taps every 1.45 usec. High density packaging available for airborne transponder use.

AUDIO, HIGH FREQUENCY & DISTRIBUTED CONSTANT DELAY LINES — With unusual circuits, extreme delays, high frequency application, rapid rise times, conforming waveform circuits and corrective circuits. Write for complete details.



AUDIO DELAY CABINET — Relay rack mounted cabinet houses 25 millisecond delay with taps at every ms. Units can be cascaded for longer delays.

DISPERSIVE STRIP DELAY LINES — Delay varies with frequency. A prime application is in Pulse Compression Radar Systems, eliminating large, expensive filter components. Compression ratios of 150:1, typical.



$\Delta D \cdot \Delta f$ = COMPRESSION RATIO OR DISPERSION FACTOR

$\frac{\Delta f}{fo}$ = BANDWIDTH %

fo = MIDBAND FREQUENCY

Do = MIDBAND DELAY

SHORT FORM CATALOG

DELAY LINES

STEP VARIABLE

DESCRIPTION
L-C networks in tandem, with precise delay increments and low attenuation. Use as delay syntesizers for evaluation of Worst-Case design analysis; as time delay standards and Phase measuring devices. Meets Military specifications. Type 510 and 511 use a single 10 positions switch.

SPECIFICATIONS
ACCURACY: ± 2% of setting. ATTENUATION and *TIME DELAY see table. *RISE TIME: 2% of time delay or less. TEMPERATURE COEFFICIENT: ± 50 PPM/°C. DISTORTION: Less than 3% for pulse signals on most types. Essentially no harmonic distortion for sine wave signals. SIZE: 8 x 3.5 x 4.5 (20.32 x 8.89 x 11.43 cm) Max. for type 510 and 511. 16.75 x 5.25 x 5.5 (41.54 x 13.33 x 13.97 cm) Max. for type 1510 and 1511 (Rack-Mount Panel available on request).

*other can be provided on request.

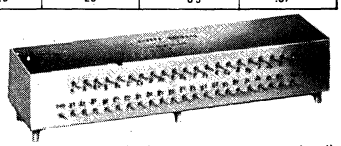
AUDIO



SPECIFICATIONS
TOTAL DELAY: See table. TAP DELAY: Normal IN and OUT (100 taps can be accommodated). DELAY ACCURACY: ± 3% (± ½% on request). IMPEDANCE: 200 to 10,000 ohms. ± 5%. ATTENUATION: 6 db or better. PHASE RESPONSE: ± 1% over bandwidth. TEMPERATURE RANGE: -55°C to +125°C. TEMPERATURE COEF.: ± 50 PPM/°C (± 15 PPM/°C on request). WORKING VOLT.: 200 WVDC (400 WVDC on request). CASE: Vertically sealed metal. SIZE: 5.75 x 3 x 2 (14.6 x 7.67 x 5.10 cm). MOUNTING: 4 - 10 - 32 x .25 studs, spaced 3.5 x 2. TERMINALS: Glass-to-metal or press-fit.

DECADE INDUCTORS

DESCRIPTION
For audio and low frequencies. Used in prototype, lab. standards, wave filters, equalizers, tuned circuits and related applications. Switches are Make before Break and constructed of ceramic stator-and-rotor members with ball-and-socket detent. Contacts silver alloy.

SPECIFICATIONS
ACCURACY: ± .25% at 1KHZ (other freq. on request). DC RESISTANCE: Approx. 40 ohms per H. TEMPERATURE COEFFICIENT: ± 26 PPM/°C between 16°C and 32°C. MAX. VOLTAGE: 130 VRMS. MAXIMUM CURRENT:*. TERMINALS: Type 400 soldering lugs on .75 spacing. Type 1400 jack-top binding posts on standard .75 in. spacing. CASE DIMENSIONS: Type 400 8 x 3.5 x 4 (20.32 x 8.89 x 10.16 cm) Max. Type 1400 16.75 x 8.25 x 5.5 (42.54 x 20.32 x 13.97 cm) max. INDUCTANCE CHANGE WITH AC CURRENT:*. INCREMENTAL INDUCTANCE:*.

*See catalog sheet on Decade Inductors.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

ESC world's leading producer of delay lines is currently updating its catalogue.

NEW ADDITIONS WILL INCLUDE:

1. Completely revised standard lumped constant delay lines featuring higher delay to rise time ratios, lower attenuation and tailored to MIL-D-23859.
2. Low temperature coefficient (30 PPM/°C max.) delay lines (Series D, E, and F).
3. Low profile series in case heights of .110" max. (Series FM).
4. Delay to rise time ratios of 100, 150, 200 and 250:1 (Series HP).
5. A new series of LC lines suitable for printed circuit board mounting (Series PC).
6. Td/Tr ratios exceeding 10:1 for many of our continuously variable delay lines.
7. New series of Programmably adjustable delay lines (Series PM).
8. New miniature continuously variable lines compatible with DIL (Dual in Line packaging) (Series 900).
9. Economical nanosecond lines in DIL packages (Series EC, EP, EL).
10. Tapped delay lines (Series T).
11. Extended ranges in Millisecond lines.

KAPPA electromagnetic delay lines

miniature nanosecond delay line

KM Series SPECIFICATIONS
Operating Temperature: —55°C to +125°C
Temperature Coefficient: 100 ppm/°C
Attenuation: 0.5 db maximum
Dielectric Strength: 100VDC
Meets MIL-D-2389A
Distortion (typical): ±10%; with an input rise time of 20% of specified rise time of 1 nsec. whichever is greater.

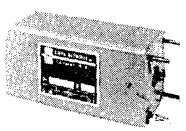
typical delay lines

STANDARD LUMPED CONSTANT DELAY LINES Series LC

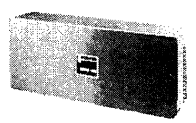


Delay: 50 Nanoseconds to 1 second
Bandwidth: DC to 250 MHz
Rise Time: As low as 2 Nanoseconds
Impedance: 25 ohms to 50 K ohms

STANDARD DISTRIBUTED CONSTANT DELAY LINES Series DC

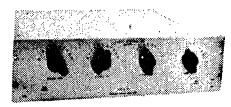
Delay Range: to 3 usec.
Standard Tolerance: ±5% on Delay
Delay-to-Rise-Time Ratio: 11 maximum
Distortion: ±5% (typical), ±10% max.

PRECISION AUDIO DELAY LINES Series A



Delay Range: From 500 usec to 1 sec.
Bandwidth: 70 KHz (maximum)
Delay Linearity: nominally within ±0.25% available to within ±0.05%

PRECISION DECADE DELAY UNITS Series DK



Variable delays available between input and output terminals in decade steps. Each decade has eleven (11) switch contacts and ten (10) delay increments so that the dial values overlap.

DELAY TRIMMERS: TINY TRIM® SERIES

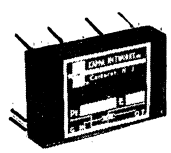
Size: ¼ Cubic Inch

PART NUMBER	SHIFT RANGE @3.58 MHz DEG.	DELAY (Nano-sec)	RISE TIME (Nano-sec)	IMPED-ANCE (ohms)
TT20D	25	20	5	500
TT30G	38	30	7.5	390
TT40D	50	40	10	500
TT50C	64	50	12.5	390
TT50C	75	60	15	330

TRANSPONDER LINES Series C

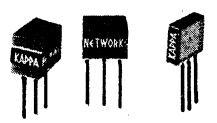
Tap Spacing: 1.45 usec., or as required
Tap Tolerance: ±.05, or as required
Delay-to-Rise-Time Ratio: 100 maximum
Temperature Stability: 50 ppm. °C or less

LOW DISTORTION LINES Series D



Distortion at Output: 2% maximum
Distortion at Taps: Less than 5% at any tap
Distortion Limit: As low as 0.1% if required
Delay Range: Up to 100 usec.

ULTRA MINIATURE DELAY LINES Series T



Delay Range: to 200 nsec.
Delay/Rise Time: 10 maximum
Attenuation: .2 db maximum
Fully encapsulated

minitrim® delay line

Ideal for P.C. Board Mounting
Kappa Minitrim delay lines are designed for circuits requiring precise delay adjustments.

SPECIFICATIONS
Attenuation: less than .5 db
Resolution: less than 1 nsec.
External termination: (not supplied)
Dielectric Strength: 300VDC
Operating temperature: —55°C to +125°C O Ring shaft seal
High Impedance tap: (variable)

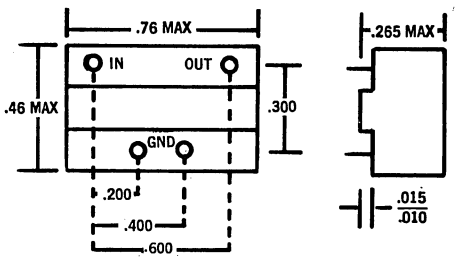
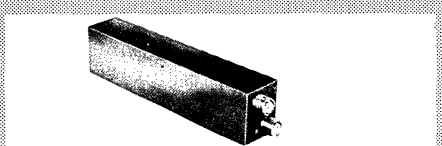
dual in-line delay lines for p.c. board mounting



video delay lines



Kappa Video delay lines yield a greater delay-bandwidth from fewer components than conventional units, and their performance more nearly approaches constant delay at all transmitted frequencies than conventional (m-derived) delay lines. We have illustrated only some of the many Video lines available from Kappa.

SPECIFICATIONS
Delay Range: to 10 usec.
Impedance: 75 ohms ± 2%
Linear Delay Bandwidth: to 14MHz

Part No.	Delay ± 2%	Insertion Loss	Freq. Response	Description	Size	or ⅞" sq. by

atc

Kappa is a major supplier of delay lines for Beacon Decoding Networks, Airborne Computers, Dme, IFF Coding and Decoding, Radar and other air traffic control applications.

One example of delay lines supplied has a time delay of 2 lines of 10.15 usec each, rise time 0.3 usec, impedance 400 ohms, attenuation 2 db, with 60 taps housed in a 4.75" x 4.5" x 7" package.

sonar

Typical of the many delay lines supplied for sonar applications is Kappa Part Number A104G which has a delay of 1,000 usec, a delay linearity of ± 0.15% to frequency of 15,000 cps, with an impedance of 4,700 ohms, insertion loss of 1 db, with 75 taps housed in a 4" x 4½" x 7" package.

computer

Kappa has designed and produced literally hundreds of different models of computer delay lines. These range from 7 nsec to 1000 nsec time delay, impedance from 50 ohms to 500 ohms, from untapped to units having 60 taps, all in the smallest physical packages available.

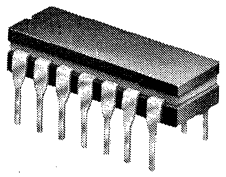
RCL *electromagnetic delay lines*

DIP DELAY LINES FIXED DUAL-IN-LINE PACKAGES

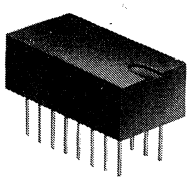


RCL Series DP-100 "Standard" DIP

Designed to fit standard Commercial DIP pin spacings. Both series completely interchangeable in all electrical specifications . . . pin spacings are precisely the same both in width and length.

TC: 200 PPM/°C OR Better than 50 PPM/°C
Maximum number of taps: 10 (Taps may be added to suit special requirements)
Maximum of delay: 500 nanoseconds
Maximum impedance: 500 ohms
Available in 14 pin or 16 pin packaging

- Meets or exceeds all applicable sections of MIL-D-23859A
- Figures of merit ranging from 2 to 5
- Hermetically sealed construction
- Precious metal terminals available



Delay Time Range: 10 nanoseconds to 500 nanoseconds with maximum number of 2 taps
Impedance Range: 50-500 ohms
Figure of Merit: 2 to 5

Case sizes: (For DP300 Series)
14 pin . . . .775 (length) x .450 (max.) (width) x .300 (max.) above PCB
16 pin . . . .885 (length) x .450 (max.) (width) x .300 (max.) above PCB

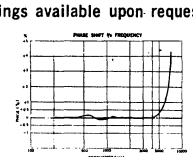
RCL Series DP-300 "Coffin" DIP

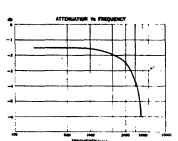
AUDIO DELAY LINES Series L1100

RCL Audio Delay Lines are custom designed and manufactured to the most stringent specifications. The electrical performance, due to advanced design techniques, plus classical and synthesis network theories, insures the ultimate in precision performance.

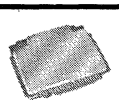
ENGINEERING FEATURE:
Envelope delay of better than 0.1% in the mid-frequency region, and 0.2% in the 6 Db fall off. The frequency characteristic is maximally flat with 0.1% frequency ripple.

Typical Delay range up to 10 milliseconds
Typical Delay-Bandwidth product up to 30
Typical Impedance 500 ohms to 1,000 ohms
Typical Attenuation 0.001 to 0.003 per microsecond.
Units are normally housed in standard rack type mounting cabinets.
A typical example of electrical performance for a delay line of 5 milliseconds is indicated in the following graphs:
Any tap spacings available upon request.





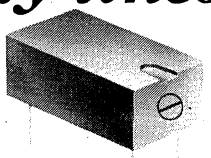
TRANSPONDER-DECODER NETWORKS RCL Series L1200



Taps are available every 1.45 microseconds, or for any other electrical spacing which may be desired.

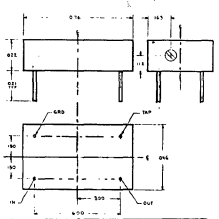
Features:
Dense Packaging
High reliability
Extremely low temperature coefficient of delay over the temperature range of −55°C to +125°C
Accuracy of Delay: 0.1% or better
Figure of Merit: up to 100

VARIABLE DELAY "DUAL-IN-LINES" DIP Series L-1500



RCL offers for the first time, a variable delay line in a Dual-In-Line package.

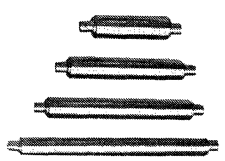
- Hermetically sealed construction
- Precious metal contacts
- Resolution: 2% minimum for highest possible reliability performance



Delay lines meet applicable portion of MIL-D-23859A.
Short run production facilities can produce prototype quantities in exceptionally short lead time.

RCL TYPE #	DELAY RANGE (nsec)	RISE TIME (Max nsec)	IMPED. OHMS (±1%)
L1500	0-5	5	100
L1501	0-20	15	200
L1502	0-30	20	350
L1503	0-40	25	500

VIDEO DELAY LINES (75 OHM CABLE SIMULATORS) RCL Series L1300 and L1400



SPECIFICATIONS:
Bandwidth Series L1300-1 10MHZ
Series L1300-2 7MHZ
Frequency Response Flat, 0 ±.1 db
Impedance .75 ohms
Delay up to 300 ft. standard
Signal Attenuation 2 db to 1.2 db standard (3 db optional)

SERIES L-1300 (FIXED)

RCL Type #	Delay (Nanosec)	Cable Equiv.	Size
1301	25	16 ft.	1.5x.75 O.D.
1302	50	32 ft.	2.5x.75 O.D.
1303	100	64 ft.	4.0x.75 O.D.
1304	140	90 ft.	5.25x.75 O.D.
1305	280	180 ft.	7.0x.75 O.D.

SERIES L1400 (TAPPED)

BANDWIDTH 7 MHZ

RCL Type #	Resolution in feet	Cable Equiv.
1401	25	300 ft.
1402	66	600 ft.

Longer delays available upon request

Developed specifically for TV Broadcast studio work, either black and white, or color. For use either in TV cameras or TV Tape recorders.
REPLACES CUMBERSOME COAXIAL CABLE OR EQUALIZING AMPLIFIERS.
Meet all stringent TV requirements of . . .
. . . frequency response
. . . frequency ripple ratio
. . . group delay linearity (P.P. and mean value).
Available in cylindrical form with BNC connectors or for P.C.B. application.
Standard cable equivalent: 1.56 n Sec. per foot. Belden: Type 8281

Series VL RCL SPECIAL VIDEO DELAY LINES

Designed to equalize and/or synchronize color television signals. These lines are especially designed to fulfill existing stringent specifications in regard to frequency and phase response within the color television frequency band, 405, 525 and 621 line color video systems.

Specialized design feature and test instrumentation are applied. The visual display of frquency and phase response using sophisticated test equipment makes it possible to manufacture video delay lines to precise performance specifications.

These lines are used in color TV cameras and recorders. In addition, similar delay lines are used for studio work, to either replace or equalize bulky cable lengths. These cable replacements are normally 75 ohm lines with either standard terminals or BNC coaxial plugs.

Precise loss pads are also available for 75 ohm lines equipped with BNC plug and jacks for easy coupling between cables and delay lines.

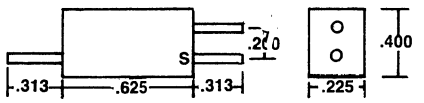
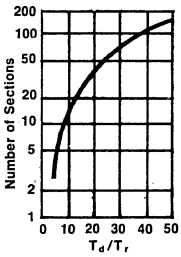
L-141	20	4	50

*±.5 nsec. or 5% whichever is greater.
**Impedances of 75, 93, 120 and 150 ohms also available.





ECONOLINE DELAY LINES

The chart at the left can be used to determine the number of modules required to provide a desired delay and rise time.

1. Determine the delay to rise time ratio by dividing the desired time delay by the desired rise time.
2. Using the chart determine the number of sections required for this T_d/T_r.
3. Divide this number of sections by the total delay to determine the delay per section.

Total delay is the sum of the individual section delays. It can be trimmed to the desired value by selecting the proper value of the last module.

RCL Part No.	Delay nsec (±5%)	Impedance ohms (±5%)	Attenuation db/μsec.	Working Volt. (max.)

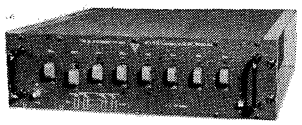
WIDE-BAND DELAY STANDARD

Accuracy Traceable To National Bureau Of Standards



TYPE 20A SERIES

Type 20A Series Wide-Band Decade Delay Standard — Bandwidth over 1000 mc. Resolution 1 nanosecond. Characteristic Impedance 50, 75, or 93 ohms. Accuracy 1%. Type 20B1-3 Series Continuously Variable Delay Standard — Bandwidth over 8000 mc; 1% Accuracy. Readability 0.05 ps; infinitesimal resolution.

CONTINUOUS SWEEP TIME DELAY CORRELATOR

TYPE 1050

Produces true and accurate time correlation by using a continuously variable delay line. Wide frequency response. Large dynamic range. Instantaneous and continuous sweeping. Use as narrow-band filter for removing noise. Use to determine transmission time and path of transmission. Use to determine degree of coherence between two random signals. Continuously Variable Time Delay: Zero to 0.18 ms up to 180 ms. Frequency Range: 3 cps to 200 kc. Analog output available for plotting correlation curve; accuracy ±0.4% of full scale.

DECADE DELAY LINES

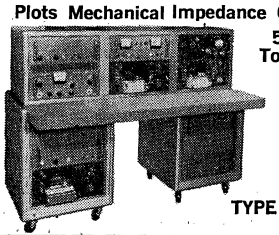
4-Decade Variable, Resolution 1/10000.

TYPE 801-2 SERIES

Absolute stability, no time jitter. Faithful reproduction of input signal. Especially suitable for time correlation study. Delay up to 0.2 sec.; 200 sections. Bandwidth over 200 kc. Variable in four decades. Total Delay: 50 us, 100 us, 500 us, 1000 us, 10 ms, to 200 ms. Impedance 250 ohms to 1k. Rack mount panel.

DYNAMIC ANALYSIS SYSTEM

Plots Mechanical Impedance Curve, 50 CPC To 10 KC.



TYPE 1010

140 db dynamic range. Noise level up to 1000 percent without affecting accuracy. Accuracy: Phase ¼°, amplitude ratio ½ db. Sweep rate: 6, 18, 60 minutes or 3 hours. Automatically plots phase and amplitude ratio curve. Fourier response, transfer function, transmissibility, spectral density of random or periodic signals.

TYPE 611 SERIES

TYPE	TOTAL DELAY	IMPED.	TYPE	TOTAL DELAY	INPUT IMPED.	OUTPUT IMPED.
602b	1.1 us	75 ohms	611a1	8 us	600 ohms	300 ohms
602d4	16.5 us	300 ohms	611a3	32 us	750 ohms	375 ohms
603	27.5 us	600 ohms	611b1	16 us	150 ohms	75 ohms
603b1	11 us	1000 ohms	611b4	12 us	800 ohms	400 ohms

Type 602-3 Series—Equal input and output impedance. Rise Time: Less than 4% of total delay. 11 equal steps. Impedance: 50, 75, 93, up to 1k ohms. Type 611 Series—Total Delay Range: 8 us to 128 us. 5-step variable control. Rack mount construction.

DUAL-CHANNEL SYNCHRONOUS FILTER

0.5° Phase Accuracy, 40 DB Dynamic Range.

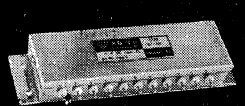
TYPE 1034

Automatically and continuously tracked with the frequency of an external synchronized signal from 2 cps to 10 kc. Phase matched within 0.5 degree over the entire range. Useful for plotting phase and amplitude characteristics between two distorted signals. Isolates noise and distortion up to ten times signal level. Transistorized with rugged construction for reliable operation.

WIDE-BAND FIXED DELAY LINES

TYPE 10T SERIES

Rise Time Less Than 2% Of Total Delay. Type 10T Series Ultra Fast Rise Time Delay Lines. Bandwidth: Over 70 mc. Maximum Signal: Up to 300v. Impedance: 50, 75, 93, 500 ohms. Coaxial connectors for input and output.

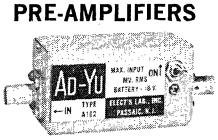


TYPE 8T SERIES

TAPPED DELAY LINES

Up to 100 taps available. Impedance: 50 ohms to 5k. Total Delay: 0.05 to 0.2 sec. Rise time less than 2% of total delay. Meets MIL specifications

ULTRA LOW NOISE PRE-AMPLIFIERS



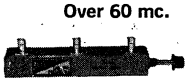
TYPE	GAIN	OUTPUT	BANDWIDTH
A1027A	20±0.3	35 Ohms	0.1c to 1.2mc
A1027B	40±0.5	30 Ohms	3c to 400kc
A1027C	40±0.5	30 Ohms	3c to 400kc

Input Impedance Over 1000 Megohms. Completely transistorized, non-microphonic, completely shielded. Distortion: Less than 1%. Use as pre-amplifier for hydrophones, piezoelectric transducers, capacitance microphones, etc. Use as impedance converter from high impedance source or capacitive source to low impedance coaxial cable.

CONTINUOUSLY VARIABLE DELAY LINES

TYPE 505-9 SERIES

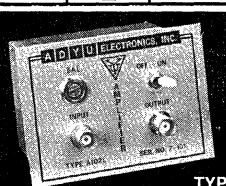
Resolution Time 8×10^{-11} sec., Bandwidth Over 60 mc.



TYPE 551-7 SERIES

Type 505-9 Series — Mechanical Rotation: 345°; Rise Time: 10% of total delay. Impedance: 50 ohms to 1k. Total Delay: 0.05 us up to 10 us. Attenuation: Less than 1 db for most types. Type 551-7 Series — 20 turns mechanical rotation. Small physical size. Suitable for radar IF phase shift. Impedance: 50 ohms to 1k. Useful up to 60 mc. Total Delay: 0.01 us to 10 us.

WIDE-BAND PRE-AMPLIFIERS

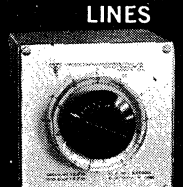


TYPE A1023

Completely Transistorized, Non-Microphonic, No Hum, Completely Shielded. Miniature in size with built-in battery or external power supply. Wideband noise less than 4 microvolts.

TYPE	A102	A102B	A102E	A102J	A102K
GAIN	100	1000	100	100	10,000
BANDWIDTH	1c to 150kc	1c to 200kc	1c to 5mc	1c to 1mc	4c to 500kc

VARIABLE DELAY LINES

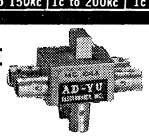


TYPE 521 SERIES

Type 521 Series—60 steps coarse control plus continuously adjustable vernier control. Resolution Time: 8×10^{-11} second. Maximum delay over 30 microseconds. Type 605 Series—60 steps; Type 606-7 Series—120 steps. Time delay accuracy ±1% at any point. Can be used for matched low output impedance.

TYPE	521a	521b	605a	605m	606a	606j	607k	607p
TOTAL DELAY (US)	6	9	0.6	6000	1.2	1200	2400	48000
IMPEDANCE (OHMS)	500	750	75	500	75	1000	500	500

MICROWAVE COAXIAL SWITCH



Type MC-104A — double-pole double-throw; Type MC-104B—single-pole double-throw. DC to 2 kmc with VSWR less than 1.05. Life Expectancy: 15000 operations minimum. 50 ohms input and output impedance.

MICROWAVE IMPEDANCE CONVERTER

Type MC-102A, 50 ohms to 73 ohms; Type MC-102B, 50 ohms to 93 ohms. Converts 50 ohms to 73 ohms, 50 ohms to 93 ohms or vice versa. DC to 3000 mc. Low VSWR. 1 watt average, 10 watts peak.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

SPECIFY "ARNOLD" FOR YOUR **PERMANENT MAGNET**

Arnold permanent magnets are available in all types of Alnico material, in sizes ranging from large castings weighing over 80 pounds to very small sintered parts weighing less than one gram.

Alnico 5 can usually be depended upon to deliver the greatest energy product to the magnetic circuit per weight of magnet material. It is therefore generally the first choice for a magnetic material except where special physical considerations are paramount. Modified or premium grades are also available, such as Arkomax 800, a crystal-oriented material used where size and weight must be reduced without loss of energy.

Special assemblies such as rotors, traveling wave tube magnets, magnetron magnets, etc. may be supplied in an aluminum jacket to facilitate mounting and supply an added protection to the magnet.

Large magnet assemblies may be supplied for focusing mass spectrometer and other measuring applications where a high degree of stability and uniformity of field is required.

Many sizes and types of Alnico magnets are carried in stock for immediate delivery.

ALNICO 8 Available from Arnold in production quantities, Alnico 8 possesses the highest coercive force of all Alnico grades, as well as a high energy product and a relatively low temperature coefficient. It is especially suited for traveling wave tube periodic focusing applications. Gap flux densities greater than 1000 gausses are attainable in tubular-type straight field focusing magnets. Alnico 8 is also recommended for applications which involve strong demagnetizing fields, or where space considerations dictate the use of a short magnet.

ARNOX 5 Arnox 5 is a ceramic permanent magnet material composed of highly oriented barium ferrite. It has many times the energy product of Arnox 3 and is comparable in many applications to Alnico 5. Because of its high coercive force, its use is recommended in applications where a short magnetic length is desirable or where extremely high demagnetizing forces are encountered.

ARNOX 7 is a magnet material which was developed primarily for D.C. motors. It combines high energy with very high resistance to demagnetization over a wide range of temperatures.

ARNOX 8 is a premium quality ferrite magnet with the highest magnetic energy of all Arnox magnet grades. It is used where great magnetic efficiency and space-saving are desired. In addition to the higher flux density available from this magnetic material, it also provides a very high resistance to demagnetization.

SILECTRON C, E, O AND DISTRIBUTED GAP CORES Precision-rolled Silectron strip in 1, 2, 4 and 12 mil thicknesses. They are supplied in a wide variety of shapes, and in sizes from a fraction of an ounce to several hundred pounds. In addition to standard transformer applications, they may also be supplied for special applications such as saturable reactors, instrument transformers and pulse transformers.

Distributed Gap Cores reduce watt loss by 30%, exciting current by 70% and cost by 10% over conventional 12 mil C cores of the same size and weight. Made of the best commercial grades of .012" grain-oriented silicon steel, cores are available in 36 basic sizes for power transformer and reactor applications.

Over 1,000 stock cores are listed in the Arnold Silectron catalog. A wide selection of preferred sizes are stocked for immediate shipment.

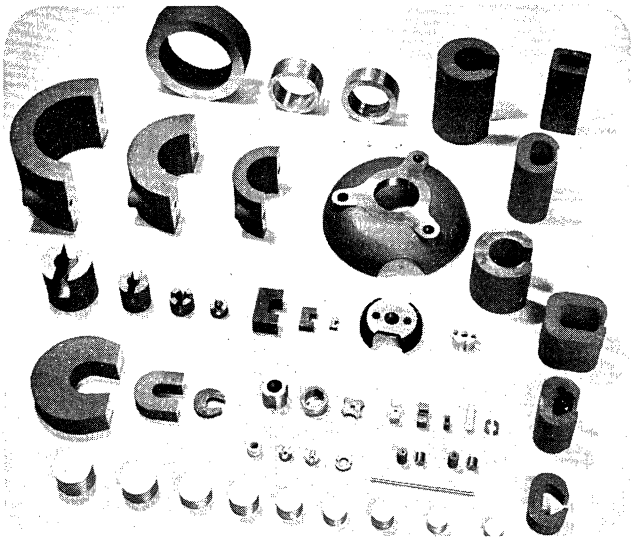
TAPE WOUND CORES OF HIGH PERMEABILITY MATERIALS Arnold tape wound cores are available made of Deltamax, 4-79 Mo-Permalloy, Supermalloy, Mumetal, 4750 Electrical Metal, Silectron, or the new rectangular-loop material, Supermendur. All except Supermendur cores are available in standard tape thicknesses of ½, 1, 2, 4 or 12-mils.

Toroidal cores are made in 30 standard sizes with protective nylon or aluminum cases. Special sizes produced to individual requirements. Wide selection of Deltamax, Square Permalloy and Supermalloy type 6T cores (aluminum cased, oil filled, heremetically sealed and epoxy coated) carried in stock for immediate shipment.

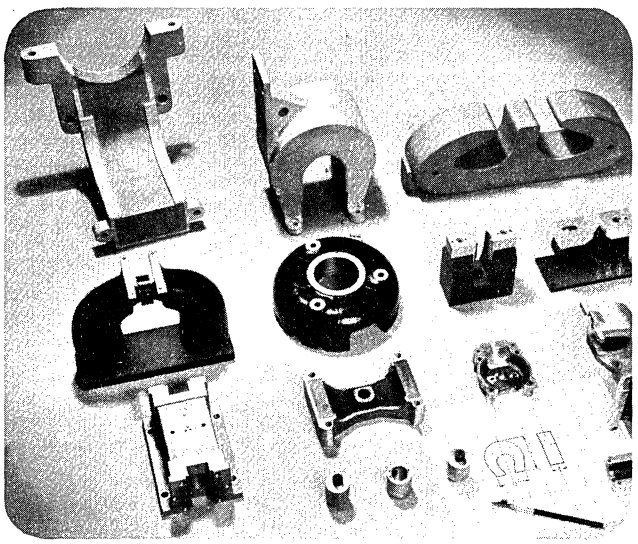
BOBBIN CORES Arnold bobbin cores are available in a wide range of sizes, tape thicknesses, widths and number of wraps to suit the ultimate use of the core in electronic computer assemblies. Magnetic materials usually employed are Deltamax and Square Permalloy in standard thicknesses of 1, ½, ¼ and ⅛ mil. Bobbins are supplied in ceramic or stainless steel.

MO-PERMALLOY POWDER CORES Available in a wide range of sizes, from .140" OD to 5.218" OD. They are given various types of enamel and varnish finishes, some of which permit winding with heavy Formex insulated wire without supplementary insulation over the core.

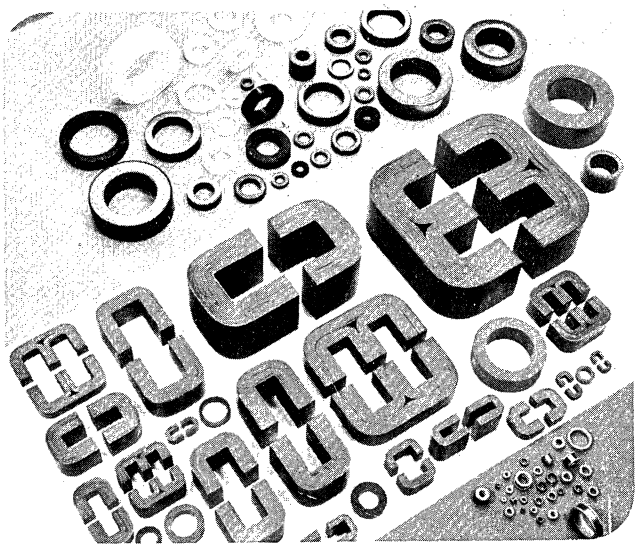
These powder cores are supplied in standard permeabilities of 14, 26, 60 and 125 Mu; high-permeability cores of 147, 160, 173, 205, 250, 300 and 350 Mu are also available in all sizes. They provide constant permeability over a wide range of flux density, and in many cases may be furnished stabilized to provide essentially constant permeability over a specific temperature range. Preferred sizes carried in warehouse stock for immediate shipment.



Typical group of Arnold permanent magnets, both cast and sintered types.

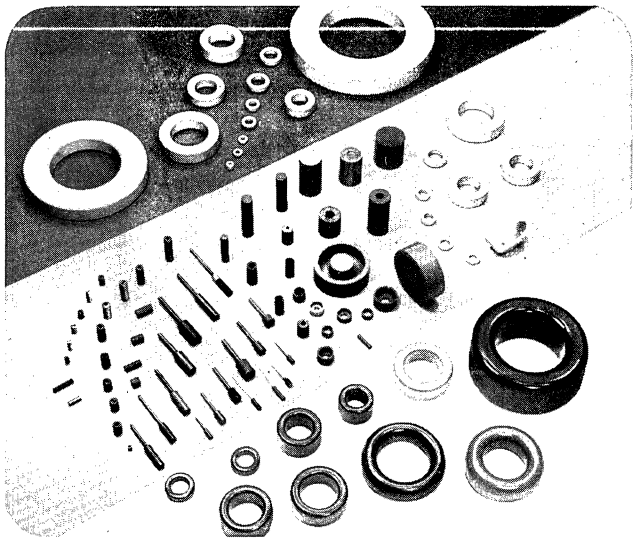


Typical group of permanent magnet assemblies.

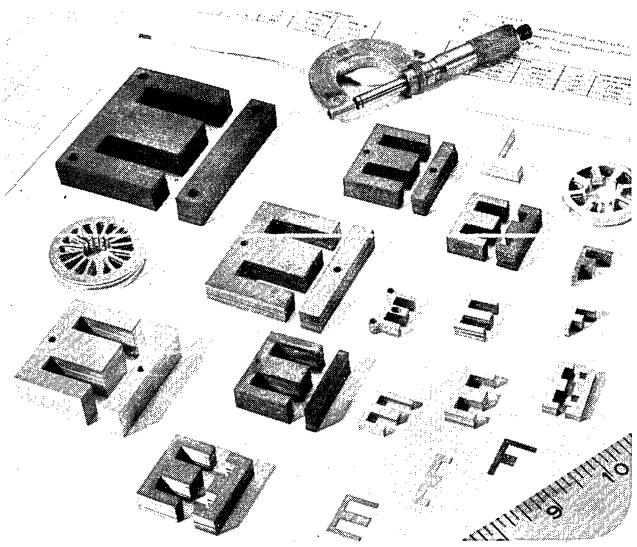


Top to bottom: Tape wound cores, Silectron C, E and O cores, and bobbin cores.

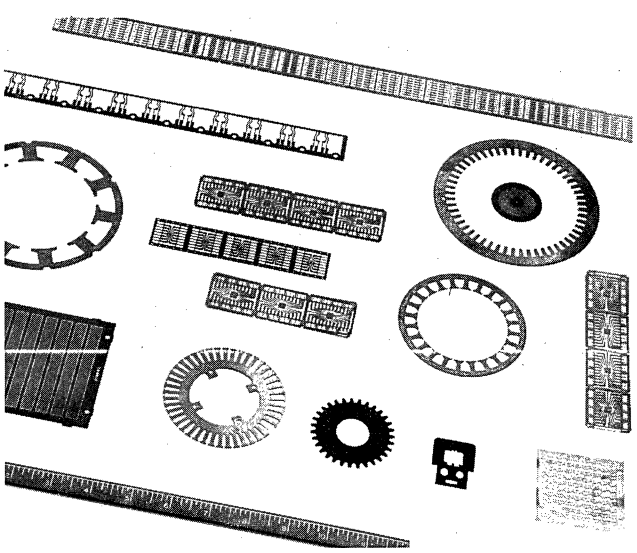
AND OTHER **MAGNETIC MATERIAL** REQUIREMENTS . . .



Powder cores.



Laminations of silicon and nickel-iron.



Chemically etched parts.

IRON POWDER CORES A wide selection of cores is available from simple cylinders to special cores of complicated design. The line includes all standard types of threaded cores, cup, sleeve, slug and cylindrical insert cores as well as a series of iron powder toroids conforming to the standard sizes adopted by the Metal Powder Industries.

SOFT FERRITE CORES Arnold Soft Ferrite cores are available in a wide range of shapes and permeabilities. Threaded cores, slugs, toroids, beads, E, & U-shapes and pot cores are produced in many sizes from standard tooling. Permeabilities range from 40 to 200 for nickel zinc ferrite and 400 to 3000 for manganese zinc ferrite. Higher permeability materials are currently under development.

MSS IRON POWDER CORES MSS powder cores have a very high electrical resistivity combined with a lower magnetostrictive noise than any other commercial iron powder even when cores are operated at saturation flux densities. They are moderately priced and are available in a wide range of sizes.

LAMINATIONS AND FORMED PARTS Arnold produces a wide selection of silicon-steel, nickel-iron and cobalt-iron laminations for motors and transformers. Thin-gauge laminations (1, 2 and 4-mil thicknesses) of high-permeability materials are specialties. A complete line of transformer cans and hardware is available, including Mil-T specification. Many sizes and types of magnetic shields are available or can be fabricated to your exact requirements from Mumetal and other shielding materials. Shielding materials are also available in bulk form, without annealing.

PHOTO-CHEMICAL FABRICATION This technique provides a wide variety of stress-free, burr-free parts. It also provides economical fabrication where expensive tooling is not justified. A wide range of materials is available for applications such as lead frames, recording head laminations, and other applications.

PRECISION FOIL AND STRIP PRODUCTS Thin and Ultra-thin metals and alloys are custom processed in one of the newest and most modern rolling facilities in the world. Materials such as Aluminum, Brass, Copper, Magnetic Alloys, Stainless Steels and others are produced to individual requirements of gage, width, hardness, flatness, grain size, edge and surface condition.

VICALLOY Vicalloy is a carbon-free permanent magnet alloy containing about 10% vanadium, 50% cobalt and the balance iron.

Vicalloy may be fabricated in the form of castings, hot rolled bars and forgings, or cold rolled strip, wire and tubing. After suitable heat treatment, the material is quite readily machinable. Vicalloy is available on special order in bar, strip and thin tape for recording purposes.

2V PERMENDUR A ferromagnetic alloy of cobalt, vanadium and iron that possesses high flux density saturation properties. Its magnetostrictive properties are useful in many transducer applications.

A NEW CUSTOMER SERVICE

Ogallala Electronics, the newest Arnold division, offers a new service designed to meet special requirements for alnico and ceramic permanent magnet and ferrite customers. If you want fast delivery on prototype or production quantities, call today for complete information or costs estimates. Ogallala Electronics can offer you

Close tolerance grinding and shaping
All shapes and sizes
Large inventory of stock parts for immediate delivery
Engineering assistance
Competitive prices
Stringent quality control

Call Howard Harrington, Ogallala Electronics, (308) 284-4093, or write to 601 West First St., P.O. Box 59, Ogallala, Nebraska 69153.

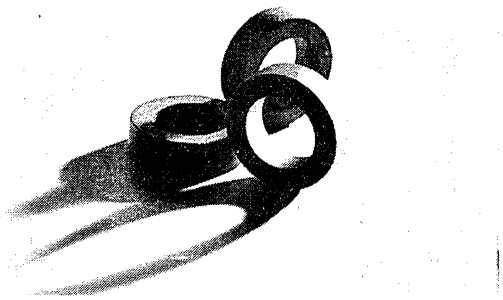
FERRONICS INCORPORATED

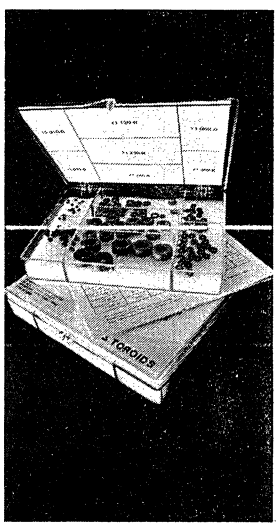
TECHNICAL ACHIEVEMENTS IN FERRITE MANUFACTURING

We've put the whole package together... and you're the big gainer. Starting with the raw oxides through to the finished part, quality control is single sourced. Ferronics offers you TOTAL RESPONSIBILITY and TECHNICAL COMPETENCE.

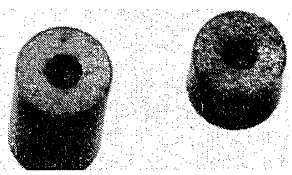


Want consistent performance in a toroid? Look to Ferronics for the answer to this question. We manufacture a complete line — made from a variety of ferrites. Ferronics insures uniform performance from shipment to shipment through stringent quality control programs.

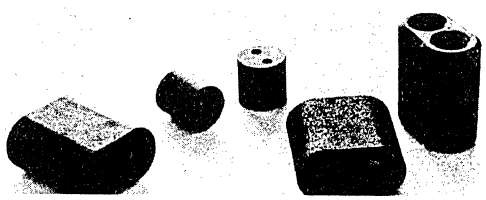
If you have a special transformer problem — come to Ferronics, the problem solver.



Our Ferronikit offers design engineers a variety of sizes and materials of ferrite toroids and shielding beads. The toroid kit contains one material in seven sizes . . . the bead kit has three materials in two sizes. Whether you're a design engineer or a hobbyist these kits will interest you.

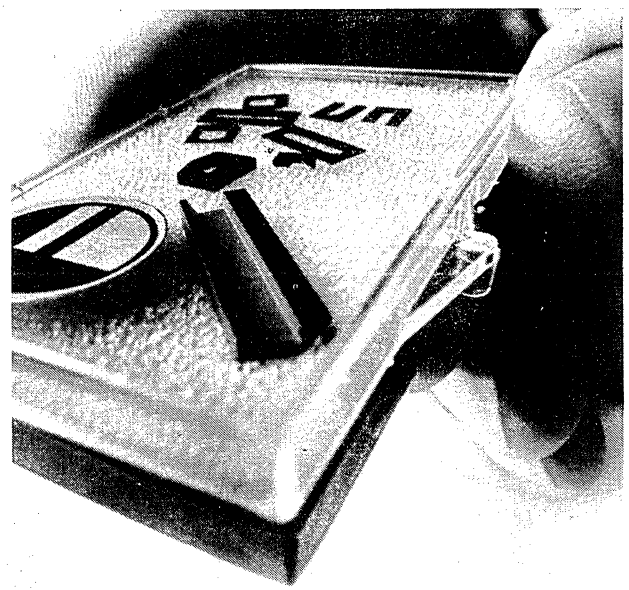


Get rid of static and unwanted noise in your circuits. Take a look at the wide variety of materials and shapes we've designed to help you solve these problems. Single and multi-hole beads and baluns are available for: RF shielding, signal isolation, noise suppression, transient filtering, and transformers.



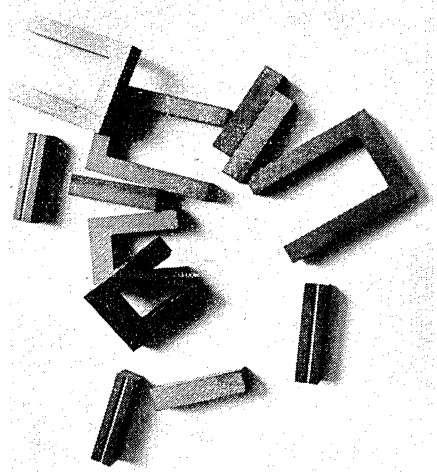
Does your application require a special shape? Ferronics has the equipment and technological know-how to help solve your problem through custom ferrite processing. If your application requires or can utilize a special pressed shape, consider the possibilities. It's an economical approach to uniform product performance.

Need a special non-oriented ceramic magnet? Ferronics will design the shape you need especially to meet your requirements. We're not concerned with short or long runs because our advanced manufacturing capability offers flexibility and ultimate cost reductions.



If you're in the market for Glass or Epoxy bonded recording head pole pieces, Ferronics is the place to stop. These units, integral parts of recording head assemblies, are finding wide usage in drum and disc memory systems, and in video and telemetry recorders.

Single or dual gaps having track widths less than 3.5 mils and gap lengths less than 50μ inches are designed and manufactured to your specifications.



Looking for precisioned machined ferrites or white ceramics? Ferronics can help you solve your problems. Pole pieces for recording head assemblies, U, E, and I cores and multi-track recording head cases are just a few of the products we are producing to your specifications.

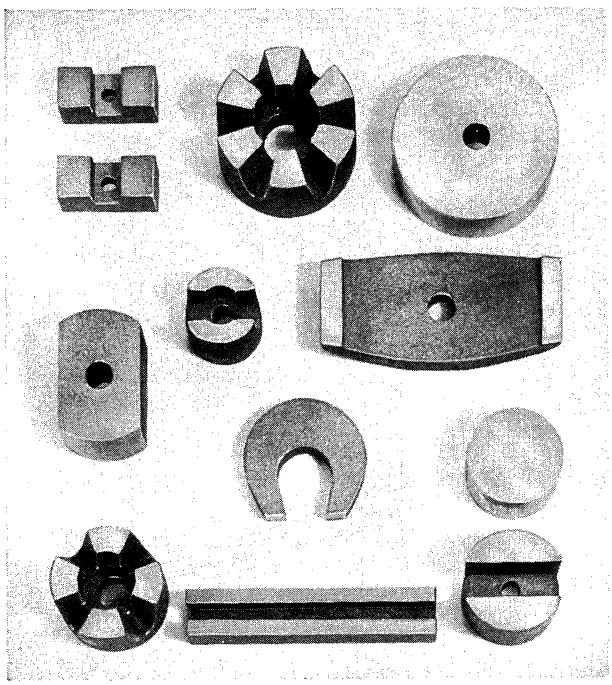
FERRONICS INCORPORATED • 66 NORTH MAIN STREET, FAIRPORT, NEW YORK 14450 • (716) 377-6820

PERMANENT MAGNETS

Many GE permanent magnets are stocked and may be ordered by catalog number. Where a stocked magnet does not meet all the application's requirements, General Electric can design a magnet that does. Engineering design assistance or information on stocked and special magnets is available on request.

ALNICO MAGNETS

- Radio and television speakers
- Telephones
- Refrigerator latches
- Electron tube assemblies
- Motors
- Generators
- Toys and novelties
- Space vehicles and missiles
- Controls



In today's industries, Alnico is still the most widely used permanent magnet material, and the growing family of Alnico grades continues to find new and ever-increasing usage.

This broad acceptance is the result of the wide range of magnetic properties obtainable with Alnico, the high degree of stability with respect to time and temperature, and the vast array of sizes and shapes that can be manufactured economically through General Electric's mass production methods.

The Alnicos are precipitation-hardened alloys made by conventional casting or sintered powder metallurgical techniques and a specialized heat treatment. Precise control of the various Alnico chemistries plus the heat treating process give the material its well-known qualities of high magnetic induction and high resistance to demagnetization.

The family of GE Alnico permanent magnets includes cast Alnico 3, 4, 5, 5DG, 5-7, 6, 8, 9, and sintered Alnico 2, 5, and 8. These various grades offer industry proven magnetic materials with a wide range of magnetic inductions and coercivities (resistance to demagnetization) in the exact shape and size required.

The versatility of Alnico, plus General Electric's advanced research and design and application engineering capabilities, continues to broaden the acceptance of these most widely used magnets.

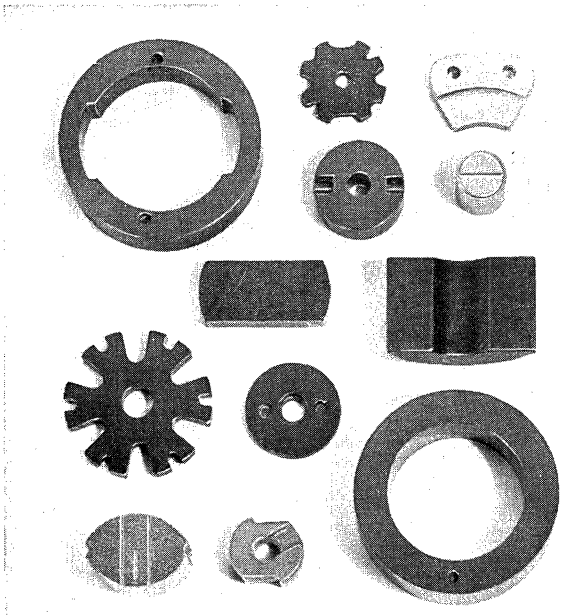
LODEX® MAGNETS

- Hearing aids
- Core meters
- Miniature motors
- Speedometers
- Reed switches
- Timing motors

Lodex, the trade name of General Electric's recently developed magnet material, can be formed economically into precise close-tolerance shapes and small sizes for intricate applications.

A product of GE research and development, Lodex production techniques eliminate form grinding or high-temperature treating. This new magnetic material, consisting of elongated single domain iron cobalt particles in the size of smoke particles uniformly dispersed in a lead matrix, is pressed or extruded (rather than cast or sintered) into its final shape. Such a manufacturing process makes it possible to produce magnet shapes to extremely close physical and magnetic tolerances and to maintain close piece-to-piece magnetic uniformity.

Since its introduction, the family of Lodex magnets has found widespread and growing usage among manufacturers requiring intricate, tight tolerance shapes with a high degree of magnetic uniformity. Designers know that this physical and magnetic uniformity in their applications virtually eliminates the need for final testing of the end product and permits automation in the production process.



For complete information contact your nearby GE Sales Office, or write to General Electric Co., Section 998-80. Schenectady, N. Y. 12305.

MAGNETIC SHIELDS UP TO 30" DIAMETER FOR CATHODE RAY TUBES & TRANSFORMERS

by Telcon Metals Ltd. and Magnetic & Electrical Alloys Ltd.

An extensive range of standard shields are available for cathode ray tubes, transformers, chokes, photo multipliers, vibrators, high gain amplifiers and other applications. Special patterns also can be produced to meet individual requirements. Shields are available either single or multilayer construction. Technical assistance available on your shielding problems.

TELFORM DEEP DRAWN COMPLEX SHAPES

A NEW CONCEPT IN MAGNETIC SHIELD CONSTRUCTION

Specially developed for quantity production of high efficiency complex shields, new TELFORM construction utilizes precision drawn segments to drastically reduce welded seams. The result is extra close fitting shields with improved shielding characteristics. This new technique is applicable for CRT tubes up to approximately 20" long. No premium charge even though dimensions, finish and appearance are far more uniform throughout batches than conventionally fabricated shields. Rapid delivery after initial tooling. Available in 80%, 50% and 36% nickel-iron alloys up to 0.10" thick.

Extremely Competitive Prices on Custom Shields.
Send for Illustrated Catalog and Ask for a Quotation.

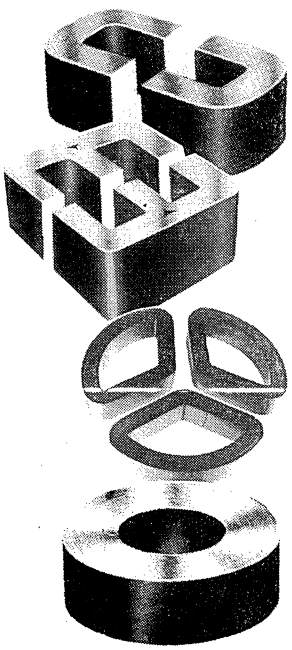
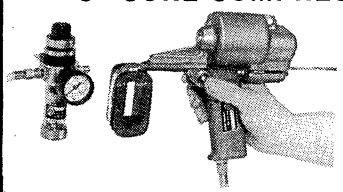
TELMAG E, C and TOROIDAL

Tape-wound cores



- Grain oriented Silicon Steel Cores.
- Made to EIA Spec. RS217 and trade specifications by our British associate TELCON MAGNETIC CORES LTD. . . . one of the largest manufacturers of grain oriented silicon steel components.
- Available in all American standard or special sizes to American core numbers. Popular types available from New York warehouse for immediate delivery.
- Sold at prices that help you solve your constantly rising cost level problem—due to the unique combination of American material and one of the largest manufacturing facilities in the world.
- Now also available "Circular E cores" for improved performance of 3-phase transformers. Savings in weight, larger window area, better cooling and magnetically balanced circuits offer broad advantages over conventional 3-phase cores.
- Toroidal cores available in 2, 4, 6 and 12/13 mil tape thickness. Cores can be supplied impregnated or edge bonded for improved rigidity. Also available gapped or cut. Prices are always calculated by weight; there is no need to accept catalog sizes if your design calls for a special size.

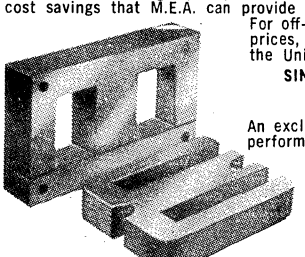
"C" CORE COMPRESSED AIR BANDING TOOL by TELMAG



Manufacturing rejects caused by variations in banding of "C" transformer cores can now be eliminated. The new "C" core Compressed Air Banding Tool provides consistent banding stresses in assembly-line operation. By making cores useful which were formerly rejected, the tool soon pays for itself.

NiFe MAGNETIC LAMINATIONS FOR TRANSFORMERS & CHOKES

by Magnetic & Electrical Alloys Ltd. . . . one of the largest commercial manufacturers of high quality NiFe alloy laminations in Europe. To find out the cost savings that M.E.A. can provide let us quote on your next requirement. For off-the-shelf delivery at the lowest quantity prices, many std. laminations are stocked in the United States.



SINGLE "E" LAMINATIONS TO REPLACE "EI187" AND "EE24-25" TYPES IN 6 MIL AND 8 MIL

An exclusive M.E.A. development that increases performance, reduces material cost, reduces labor cost. No modification of bobbin, clamps or other parts required, and when the final lamination has been inserted into the bobbin, the single "E" is practically self-clamping. End result is a 50% saving in assembly cost.

BERYLLIUM COPPER PRECISION SPRINGS

Highest quality beryllium copper springs, *micro-processed* from 100% laboratory-certified stock for superior performance. All standard products available from stock!

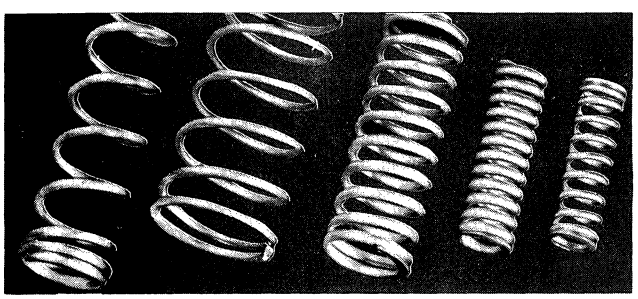
Instrument Specialties precision springs are made from extra quality beryllium copper made to our specifications.* Every lot is tested to be sure that each lot meets these stringent specifications. The exact lot appropriate for the design and application of a particular spring is then selected to meet individual requirements.

Springs are hardened in accordance with the individual requirements of each particular application to develop a *balanced* combination of precise tolerances, high yield strength, ductility, conductivity, stability and long life. Every step in the manufacturing process is controlled by experienced craftsmen using specially designed equipment and relying on over 30 years of experience in the production of the highest quality beryllium copper precision springs.

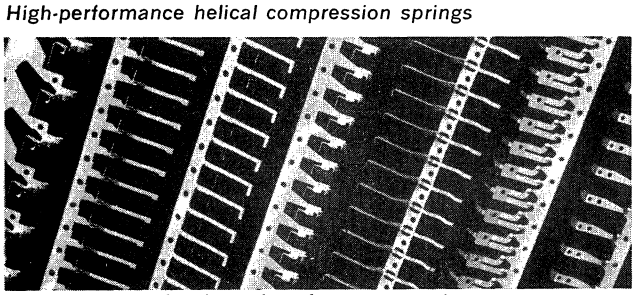
*Beryllium copper used is Alloy No. 25, conforming to ASTM-B194 and Federal QQ-C-533a Alloy 172.

COMPLETE ENGINEERING AND DESIGN SERVICE

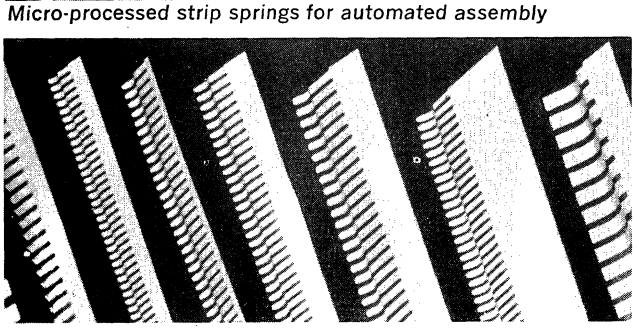
Instrument Specialties is recognized as the leader in the industry; our engineers are available at all times to assist you in solving your problems in the application of beryllium copper springs. Our extensive knowledge and long experience enable us to recommend better parts at lower costs. Prototype quantities can be produced quickly and economically. Just call or write today, or contact any of our representatives.



High-performance helical compression springs



Micro-processed strip springs for automated assembly



Micro-processed finger contact strip springs

Micro-Processed Coil Springs

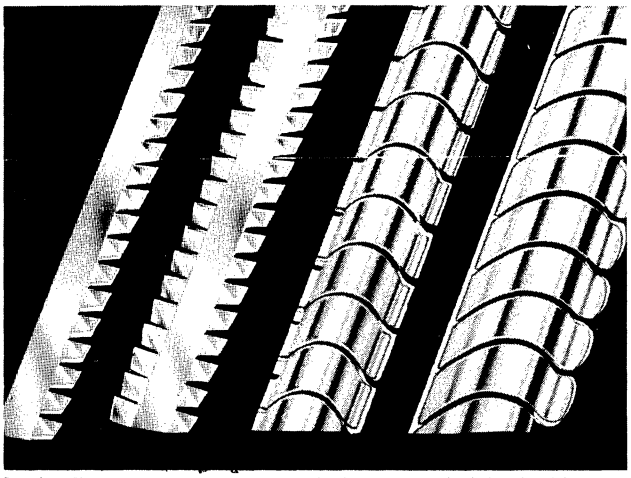
Micro-processed helical compression springs for use as balance weights, brush springs, clutch springs and many other applications. Fabricated from high-strength, heat-treatable beryllium copper and formed on specially designed coiling machines, I/S coil springs offer long life, uniformity and high stability. Two to ten times closer tolerances reduce adjusting and testing after assembly. Pitch, length and number of coils are accurately controlled to meet exacting requirements, and are subjected to exacting load tests.

Strip Springs

Micro-processed flat springs in easy-to-handle strip form are available for automated production, such as rapid positioning in plastic molds or other assemblies. Each length is handled and positioned only once. Individual springs can be separated with finger pressure with no trace of burr. Soldering, welding, plating, tinning, riveting can be performed while the entire strip is intact. Tangling is eliminated. (Also available with CONTIPS® precious metal contacts and Selective Plating.)

Finger contact shielding strips

Micro-processed finger contact strip springs for grounding and shielding in high-frequency equipment and for forming large-diameter contact rings are offered in a wide variety of configurations. Various lengths to 16"; widths, contours and hole locations can be specified for many catalog items. Standard finish is "bright finished" (tarnish resistant). A wide variety of electroplated finishes can be specified, depending on surface conditions. Finger contact strips are also available with CONTIPS® precious metal contacts.

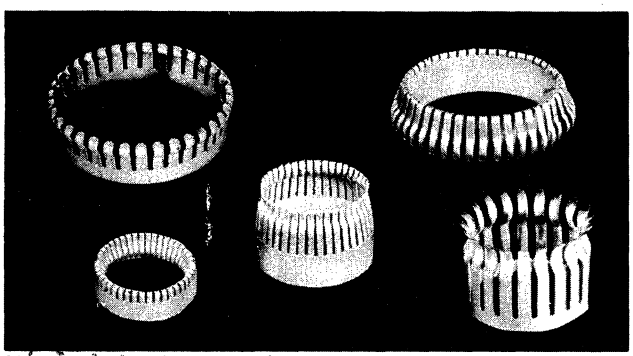


Sticky-Fingers—a new concept in instant RFI/EMI shielding

Sticky-Fingers® Self-Adhesive Shielding

Sticky-Fingers®, a high-performance finger contact strip with its own self-adhesive, provides an extremely tight, instant bond to shield against RFI/EMI in all types of metal cabinets and electronic enclosures. Installed by simply peeling off protective paper backing and placing strip in position, Sticky-Fingers adhere instantly; bond permanently. Soldering or mechanical fastenings are completely eliminated. Sticky-Fingers' adhesive meets MIL Specs for salt spray, shock and humidity cycle tests, and is unaffected in temperature ranges from −65 F to 160 F. Shielding effectiveness is greater than 108 dB at 10 GHz, and 70 dB at 200 kHz magnetic.

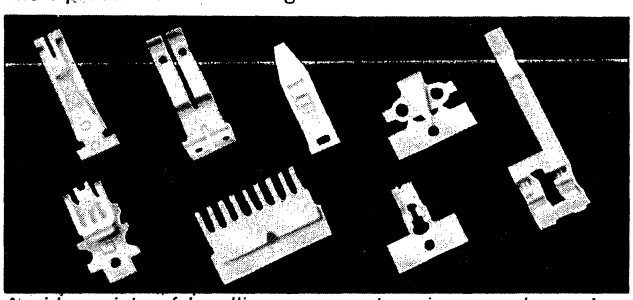
Sticky-Fingers are optionally supplied with a Magnefil® insert strip for even greater shielding at the magnetic end of the frequency spectrum.



Micro-processed contact rings

Micro-processed contact rings

Precision micro-processed contact rings are offered in a wide variety of sizes and shapes and in standard finishes for tube cavities, tuning and shielding applications. Contact rings are supplied in diameters from 0.160″ up, in male or female configurations. Almost any number of fingers can be specified. Micro-processing assures precise uniformity to unusually close tolerances. Contact rings are supplied in "bright finished" (tarnish resistant). A wide variety of electroplated finishes can be specified, depending on surface conditions. Contact rings can also be supplied with CONTIPS® precious metal contacts which do not affect spring qualities.

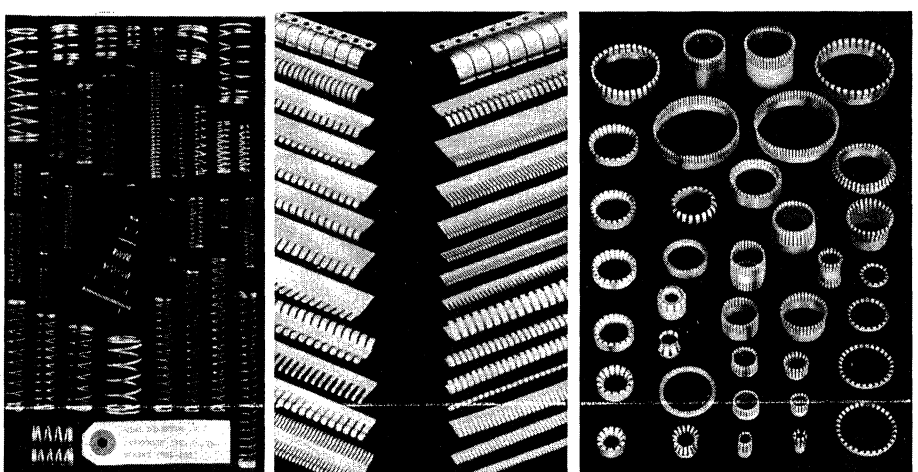


A wide variety of beryllium copper stampings can be custom-designed and produced to meet most any specific requirement

Custom Flat Springs and Stampings

Instrument Specialties is equipped to supply custom machining and heat treating to meet specialized customer requirements.

Included are welded spring assemblies, riveted contact springs, inlaid or overlaid strip precision metal springs and other stampings, whether of a spring nature or not.



Engineering design kits for development work

Engineering design kits

Instrument Specialties can supply design engineers with engineering design kits of selected beryllium copper spring samples for use in development work. Each kit contains a comprehensive assortment of beryllium copper springs. Each sample is selected and tagged for proper identification. Each design in the kit can be readily duplicated for prototype or production requirements.

Kits are available as follows:

Coil springs, 50 samples
CAT. No. 97-44 ..... $15.00

Finger contact strips, 34 samples
CAT. NO. 97-272 ..... $25.00

Contact rings, 36 samples
CAT. NO. 97-273 ..... $15.00

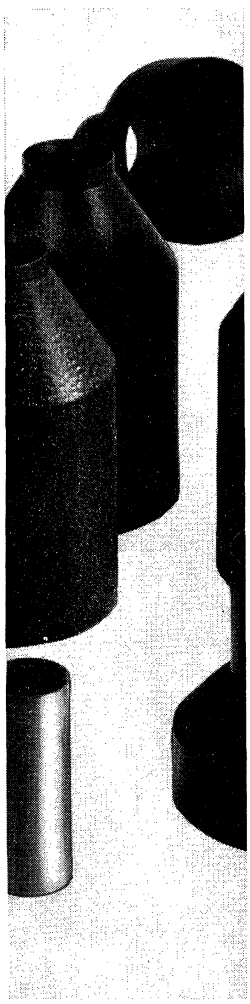
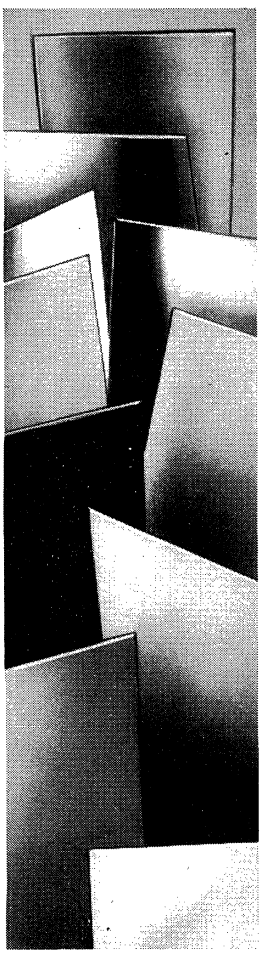
Research through Production for all your magnetic shielding needs

Magnetic Shield Division has the total magnetic shielding capability to assist you in solving any shielding problem. 80% of current shield designs originated with MSD and this design and engineering experience is available to you for research, planning and fabrication.



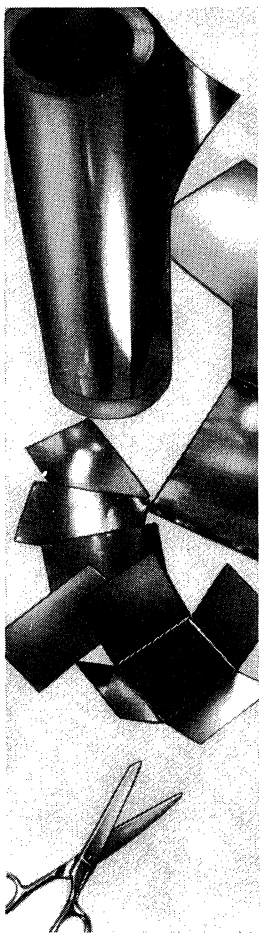
FABRICATION

Netic and Co-Netic Magnetic Shields can be fabricated in any size, shape and quantity, from a miniature tube to a shielded room.



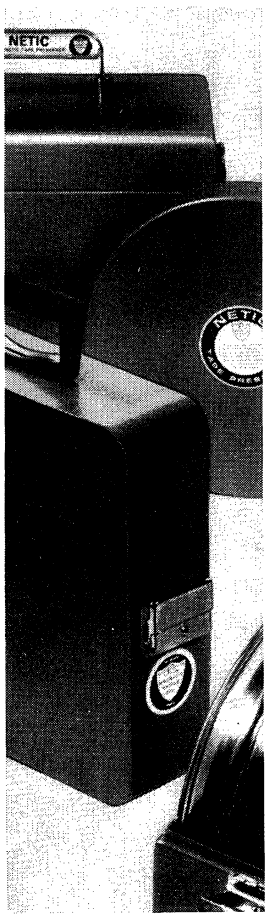
SHEET STOCK

For fabrication in your plant or ours. Low cost shielding solutions are provided by fully hydrogen annealed Perfection Annealed stock which normally requires no further heat treatment.



FOIL

Netic and Co-Netic Foils are ideal for prototype evaluation and production applications. Available in both plain and adhesive backing, they can be easily shaped in minutes to fit your needs.



TAPE PRESERVER CONTAINERS

Used world-wide to protect against loss of valuable tape data. Round and rectangular portable units include the new, smartly designed "Executive." Stacked, sectionalized units for permanent storage are also available.

TECHNICAL ASSISTANCE

The concentration of design experience and engineering knowledge that has provided over 80% of the magnetic shield designs now in use is yours to assist you in solving an engineering, R & D or production problem. Phone (312) 766-7800.

FAST, CONVENIENT DELIVERY. Some items from stock. Fabricated items 3-4 weeks.

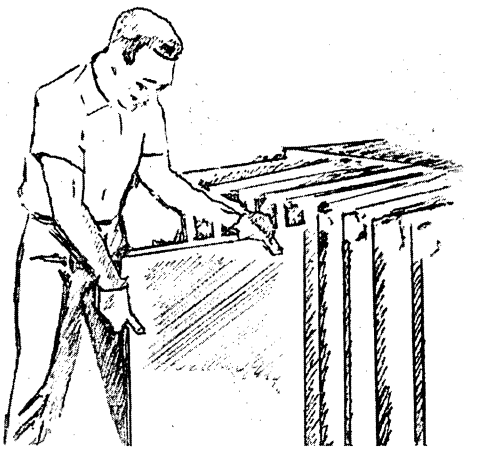
Netic & Co-Netic Alloys STOCKING GUIDE

NETIC, CO-NETIC — Netic is basically used in fields of high intensity because this shielding alloy will not saturate easily, but it will achieve only medium attenuation. CO-NETIC is basically used in fields of low intensity in order to utilize its high attenuation characteristics. When to use NETIC, CO-NETIC, or combination depends on the attenuation required, and the magnitude and type of field to be shielded against.



PHYSICAL DATA ON SHIELDING ALLOYS
(STRESS ANNEALED CONDITION)

	CO-NETIC AA	NETIC S3-6
Density (grams/cm³)	8.21	7.8
Coefficient of expansion Per Degree C. (20°/100°)	12.42×10^{-6}	13.10×10^{-6}

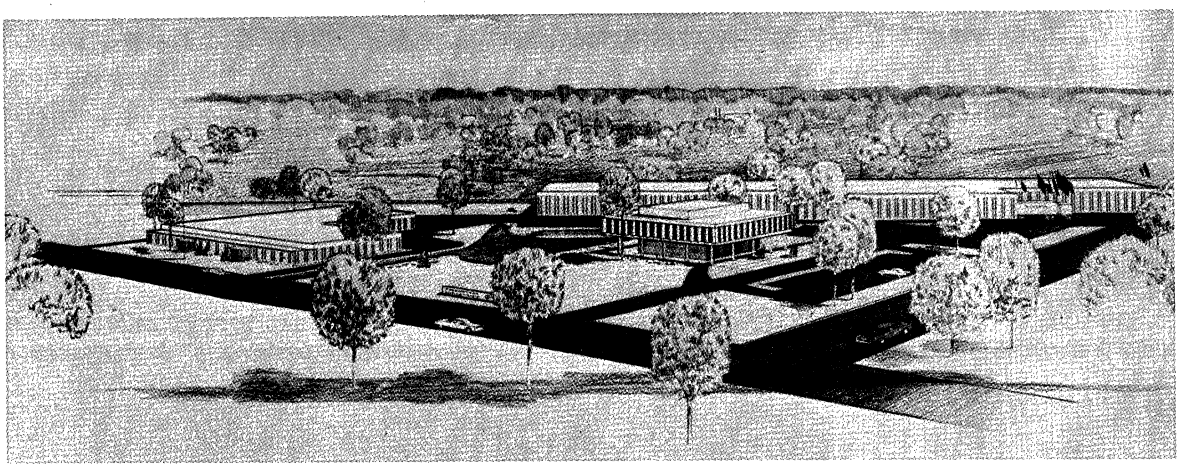
Thermotech®

"Where new ideas take shape in plastics"



People make the difference at THERMOTECH

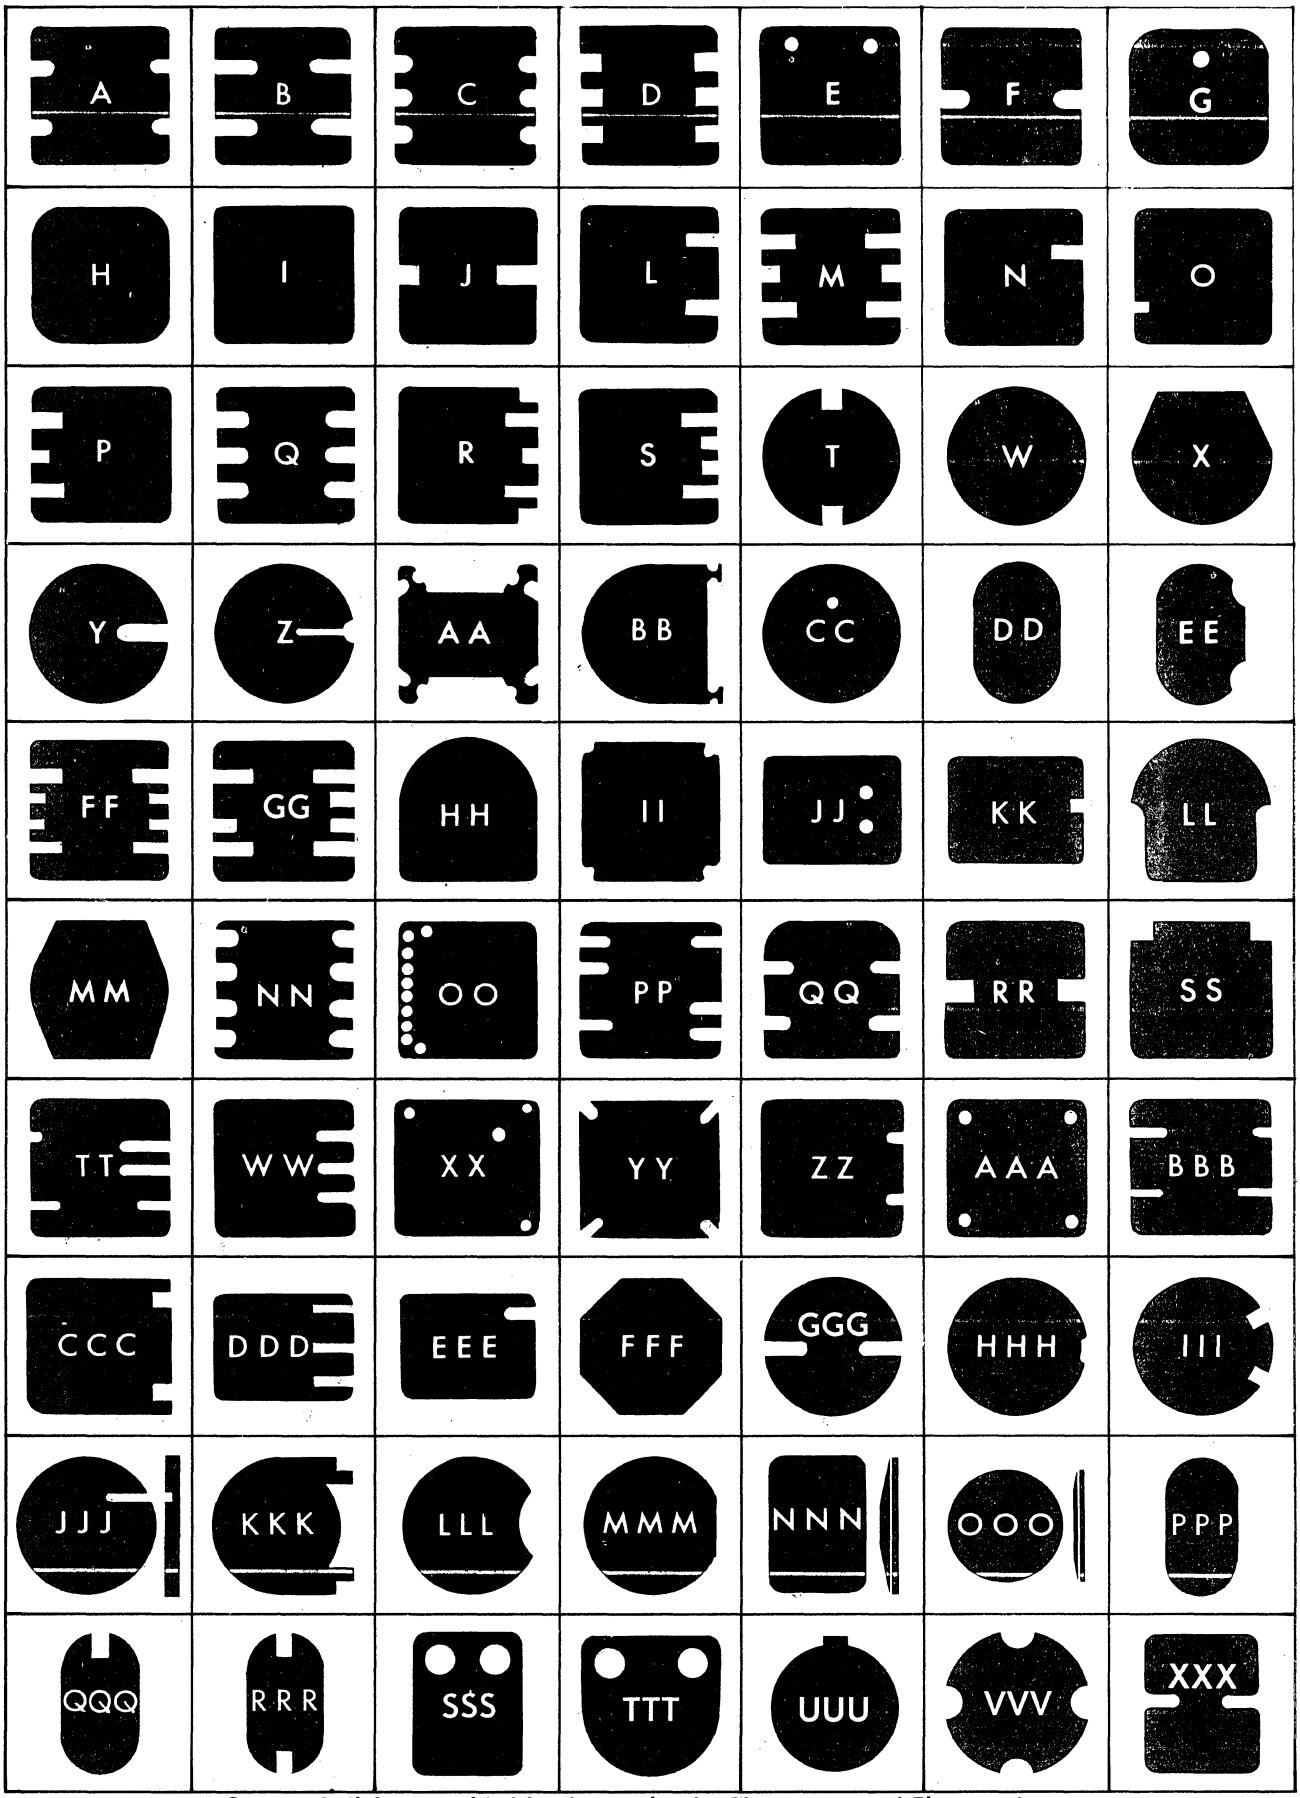
In Precision . . . The Thermotech difference starts at the beginning of every job with a thoughtful, all-the-way-through analysis of your parts requirements by designers, production estimators and make-ready engineers. And that difference carries through to tough-minded quality control people being very hard to please, before, during and after production runs. We care. And because we do, you get parts that always perform to spec, all the time, flawlessly.

In Performance . . . Whatever the parts requirement, from micro specialization to stock inventory item . . . and whether the run is a few hundred or in the millions . . . Thermotech leads the industry in on-time delivery, low rejection rates and cost reduction. Short Interval Scheduling gives us unique control over all the variables in a production run, enables us to keep in constant touch with your order, keep it on target, on time.

In Productivity . . . No other single-source supplier offers you Thermotech's kind of production strength: A whole generation of dedicated pioneering in methods, materials and designs, backed up by an array of sophisticated test equipment and specialized presses unmatched in the industry. All now housed in 130,000 sq. ft. of modern, environmental-controlled facilities which give our Molding Group people the ultimate in service resources.

The net, net: Our growing list of customers throughout the world is a positive response to Thermotech's ability to innovate better product, better service, better value. It's good to know that there's one company with the ability to come up with better answers than your questions — regardless of your needs.

FLANGE DESIGNS



Custom Coil forms molded in Thermoplastic, Thermosets and Fluorocarbons.

MAGNETIC LAMINATIONS Request Bulletin TB-108A

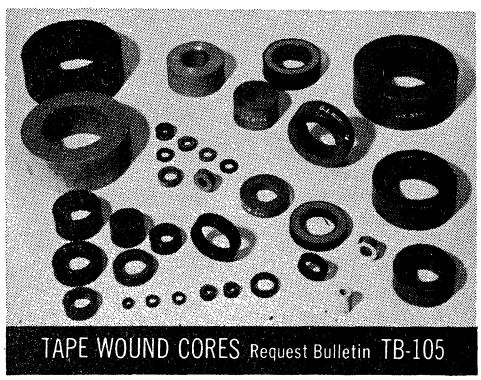
MAGNETIC LAMINATIONS
...nickel alloys and grain-oriented silicon steel

Available without tooling charge in a wide variety of standard EI, EE, F, DU, IU, L shapes, in 6 and 14 mil thicknesses, of non-oriented (round loop) and oriented (square loop) 50% nickel alloys, high permeability 80% nickel alloys, and grain-oriented silicon steel.

Exclusive G-L "Hy-Q" finish and use of highest quality carbide dies, provides high stacking factor, high interlaminar resistance, and high "Q" in transformers, filters, reactors, chokes, and inductors.

Maximum initial permeability is obtained from precisely controlled hydrogen anneals in closed furnaces. In the 80% nickel alloys, G-L "Mu-Max" laminations have raised the minimum initial permeability available to the designer by an average of 30%.

Special shapes are tooled in G-L's own Die Shop either with steel dies for economical short-runs or in carbide for maximum die life. Typical specialties are head laminations, spacers, and shields in thicknesses down to 1 mil, with thickness tolerances as close as 50 microinches.

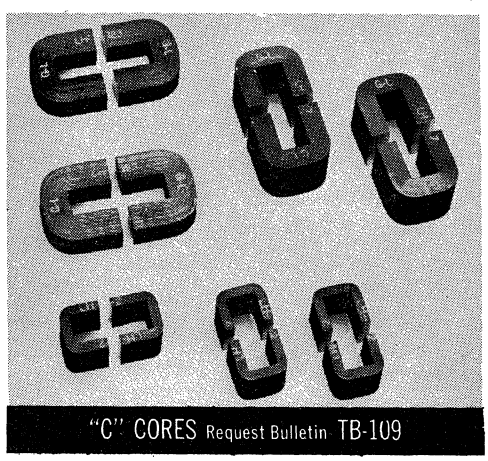


TAPE WOUND CORES Request Bulletin TB-105

TAPE WOUND CORES and BOBBIN CORES
Promptly produced in gapless toroidal form—in sizes from 1/16" OD and 1/32" tape width... to more than 10" OD and 2-3/4" tape width, weighing thousands of grams.

Wide selection of available alloys, as tabulated below, cover applications from tiny pulse transformers for transistorized ignition systems to massive cores for mag-amp controlled power supplies of missile launching submarines.

Cores are wound with 1/8 mil to 14 mil thick tape in various nickel alloys and silicon steel—uncased, or cased in a choice of aluminum, molded phenolic, or new glass filled nylon boxes... or on stainless or ceramic bobbins. Aluminum cased cores optionally available with G-L's "EE" coating, which not only eliminates taping before winding the core, but also provides a seal resistant to vacuum impregnation. The "EE" coating is neither tacky nor brittle, exhibits no cold flow, and does not soften at high temperatures. Aluminum cased cores, "EE" coated, have been used successfully in magnetic amplifiers at temperatures as high as 200°C., and have survived the shock of missile launching and in-flight centrifugal and centripetal forces, as high as 200 G.



"C" CORES Request Bulletin TB-109

"C" CORES
A wide range of 4 mil "C" cores from the smallest requirements up to approximately 4-1/2" in overall length are now available from stock. G-L "C" cores are produced by new manufacturing techniques with special emphasis on maintaining precise dimensional and electrical uniformity, to assure easy assembly and low power losses.

Because of new improved impregnation materials and techniques, "C" cores manufactured by G-L will operate continuously in temperature environments in excess of 200 degrees Centigrade without deterioration of the interlaminar bond.

AVAILABILITY:

LAMINATIONS—Stocks of all popular standard shapes, alloys, and thicknesses warehoused on both East and West Coasts for immediate shipment.

TAPE WOUND CORES—Stocks of IEEE, EIA standard sizes cased in plastic, aluminum, and EE coated, warehoused on both East and West Coasts for immediate shipment. Most other sizes available in quantity in less than two weeks.

"C" CORES—Prototype stock maintained on both East and West Coasts for immediate delivery.

BOBBIN CORES — Catalog bobbin sizes available in quantity in three weeks or less... bobbin cores are normally made to customer specifications.

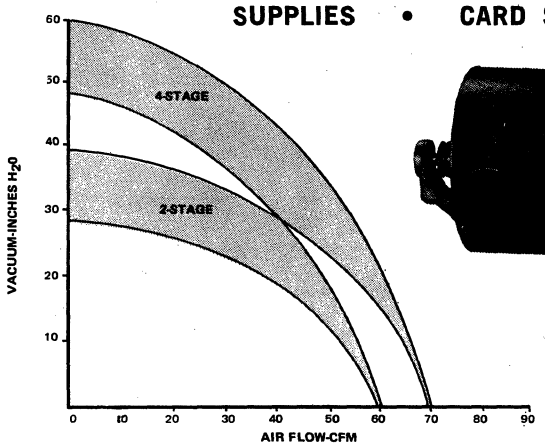
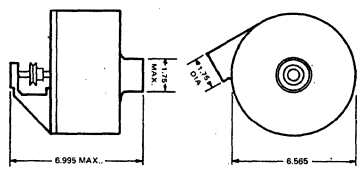
AMETEK / Lamb Electric

Windjammer® BLOWERS FOR QUIET WORKING AIR

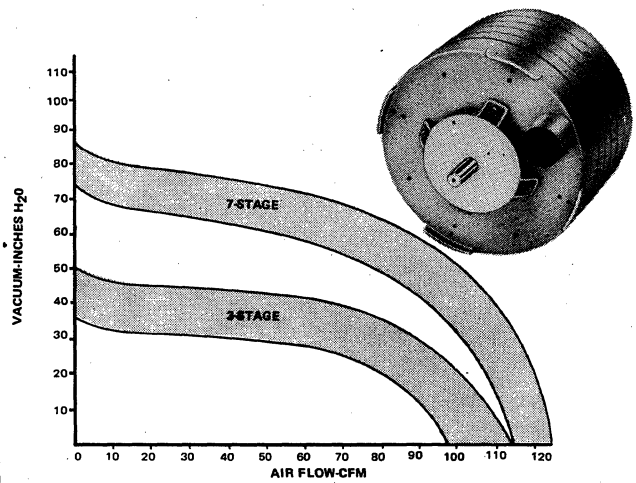
APPLICATIONS: POWER AIR COOLING • TAPE TRANSPORTS • VACUUM OR PRESSURE SUPPLIES • CARD SEPARATING • AIR SAMPLERS . . .

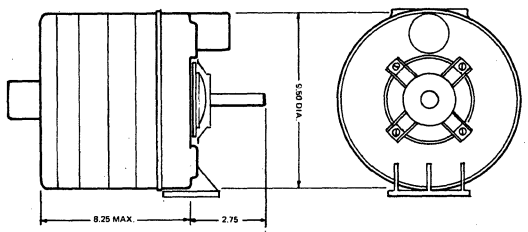




WINDJAMMER 5.7 Belt Driven Blower

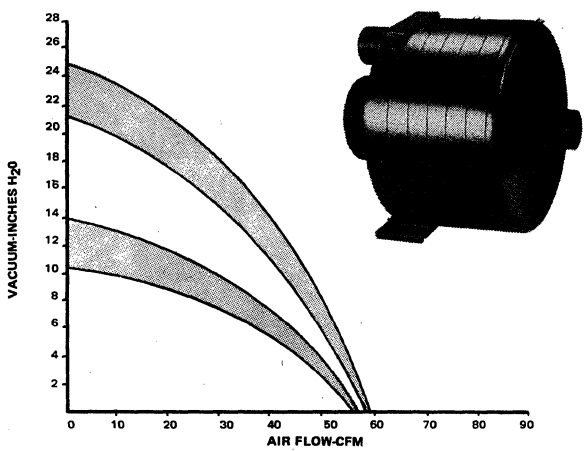
Quiet, efficient belt driven centrifugal fan system delivers vacuum, pressure or both. Available in one to four stage modular fan systems, the unit provides a wide range of operating characteristics. Available with shroud for extra noise reduction and ease of mounting. Prelubricated, shielded ball bearings and the elimination of rotating vanes assures long life and minimal maintenance.

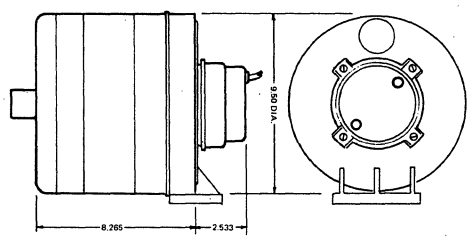




WINDJAMMER 9.5 Belt Driven Blower

Dependable, silent belt driven centrifugal fan system produces vacuum, pressure or both to a variety of applications. From one to seven modular fan stages adapt the unit to a wide range of operating conditions. Available with shroud for further noise abatement. Rotating fans, designed for maximum efficiency, and shielded, prelubricated ball bearings assure long, maintenance free life.

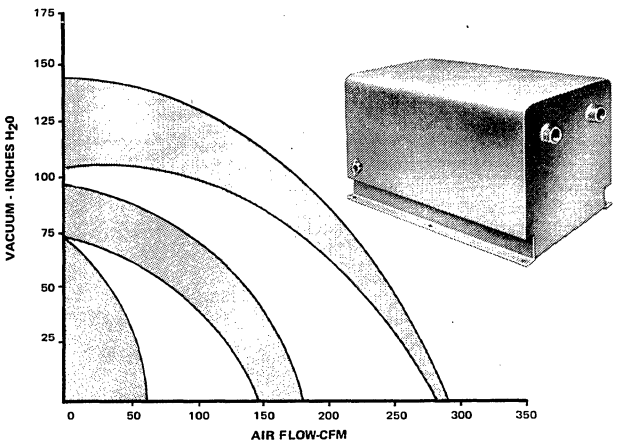




WINDJAMMER 9.5 Motor Driven Blower

Compact, self contained motor driven blower utilizing a standard 9.5 WINDJAMMER blower. Single or three phase induction motors with balanced components assure quiet, vibration free operation. Prelubricated ball bearings provide long life and the motor operates with fan systems sealed without degradation. Optional thermal protector available.

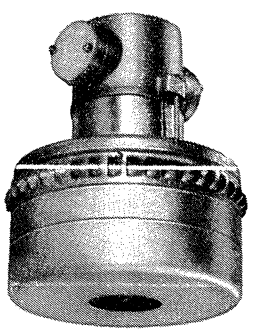
Windjammer® CUSTOM DESIGNED AIR SYSTEMS



WINDJAMMER SYSTEMS

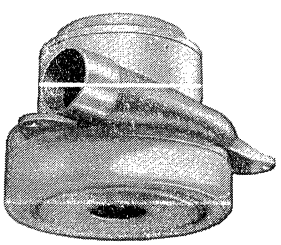
Single or multiple output packages which provide complete working air requirements for a variety of applications. Assembled from standard WINDJAMMER belt driven blowers and motors to customer specifications, the systems can be provided with stock base plates, covers, noise reduction materials, filters, elapsed time meters, remote control relays and other features. Designed for high performance, the system provides any combination of vacuum and/or pressure to the air system in any machine.

DEPENDABLE SERIES UNIVERSAL VACUUM MOTOR/BLOWERS



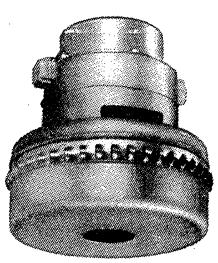
7.5″ Dia. Two & Three Stage Bypass Vacuum Motor/Blower

Rugged, single phase, two pole, AC or DC motor with centrifugal blower ideally suited to applications requiring long life and high performance.



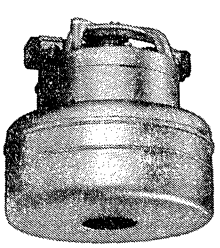
7.17″ Dia. Two Stage Bypass Vacuum Motor/Blower

Reliable, two pole, single phase, AC or DC motor and centrifugal bypass blower for high performance in light duty applications requiring wet or dry air flow.



5.7″ Dia. Two Stage Bypass Vacuum Motor/Blower

Efficient, single phase, two pole, AC or DC motor with centrifugal blower for wet or dry air flow and economic performance.



5.7″ Dia. Two Stage Thru-Flow Vacuum Motor/Blower

Lightweight, single phase, two pole, AC or DC motor with a centrifugal blower for dry air flow and economic performance.

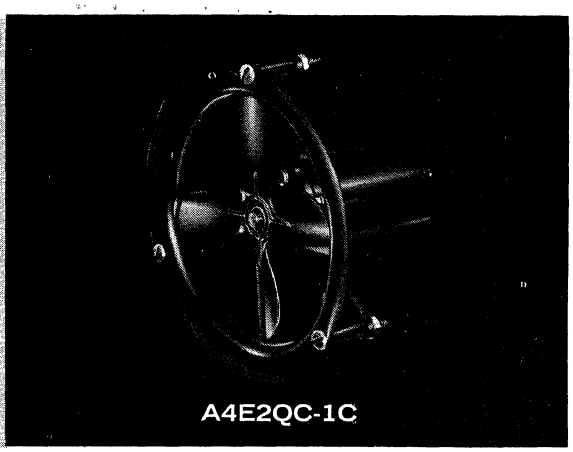
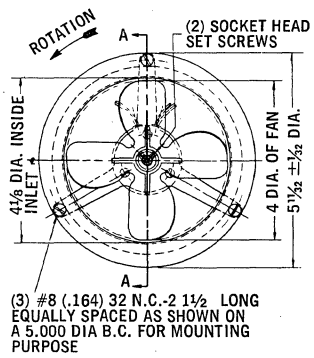
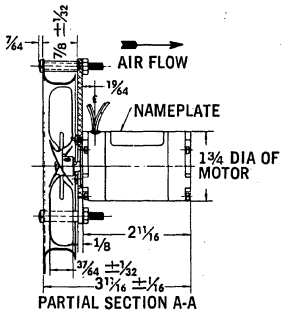
MINIATURE AXIAL FLOW FANS

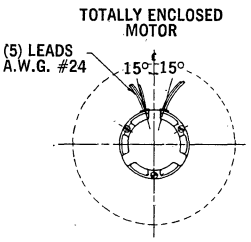
50, 60, 400, 320-1600 Hz, DUAL FREQUENCY
1 - 2 OR 3 PHASE
CUSTOM DESIGNED TO YOUR REQUIREMENT



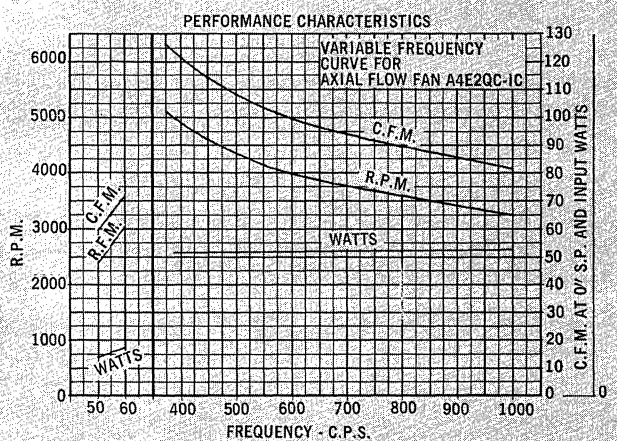




AXIAL FLOW FAN
MODEL NO. A4E2QC-1C



SPECIFICATIONS



Ashland miniature axial fans are small, light and versatile, they produce high air volumes with minimum space and weight. The latest in methods and materials combined with fine workmanship assure trouble free life under the most adverse ambients.

Special bell mouth mountings can be supplied or the fans can be incorporated in tube-axial enclosures. Modifications of mounting arrangements or special designs can also be supplied.

NOTE: For high altitude applications models are available wherein the loss of specific weight of air with altitude is compensated for by increased shaft speed of the motor. This condition approaches constant weight flow of air throughout the altitude range. Model A4K4-1CC is an example of such a unit. Operating from 115 volts, 400 Hz, 3 phase, the rated air delivery is 55 CFM st 0′ altitude and 368 CFM at 50,000′ altitude.

OUR ENGINEERING DEPARTMENT WILL BE HAPPY TO REVIEW YOUR COOLING PROBLEMS AND MAKE RECOMMENDATIONS TO SOLVE THEM.

These Ashland blowers are designed to meet all existing military specifications and because of their small size and light weight are particularly adapted to military and airborne applications. They are compact, sturdy and efficient in operation. They can be supplied with either plastic or specially designed metal blower housings, and with mounting dimensions to meet your requirements.

GENERAL ELECTRIC — RESILIENT MOUNTED SLEEVE BEARING MOTORS — DRIP PROOF

PRECISION MADE TO COMMERCIAL SPECIFICATIONS

FOR ELECTRONIC — INSTRUMENT AND INDUSTRIAL APPLICATIONS

USED BY THE INDUCTION HEATING, BROADCAST & TV INDUSTRIES

AIR DELIVERY — TO 1250 CFM AND 6.0" STATIC PRESSURE

COMPLETE UNIT — FINISHED WITH BLUE-GREY BAKED ENAMEL

All blowers are shipped with 12 O'clock blast which may be changed in the field to any of the 4 positions shown. Special positions can be supplied on order.

ROTATION — Model A blowers are available with either CW or CCW rotation. CCW rotation will always be shipped unless CW rotation is specified. The rotation cannot be changed in the field. Rotation is determined by viewing the blower wheel from the drive side of the housing.

MOTOR — NEMA frame designs manufactured by General Electric* are supplied with the Model A blowers. They are rated at 40°C, open — drip proof with integral resilient mounting.

THERMAL PROTECTION — can be provided upon request.

LUBRICATION — all angle, sleeve bearing, General Electric motors require a minimum of Service. Lubrication instructions are shown on the terminal box coverplate.

WARRANTY — Ashland's standard one year warranty applies to all materials and workmanship of the blower. The motors are warranteed by G.E. for 13 months from date of manufacture. They can be serviced at any local G.E. service station.

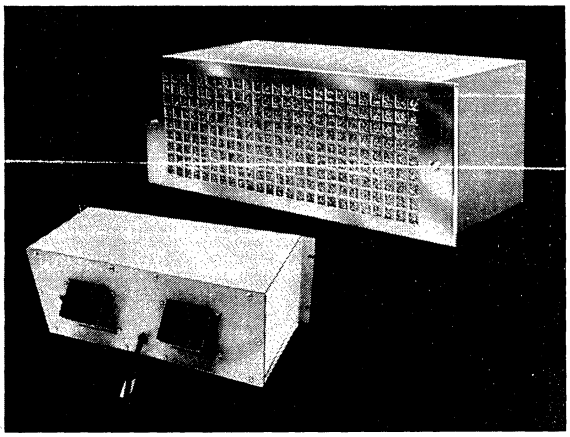
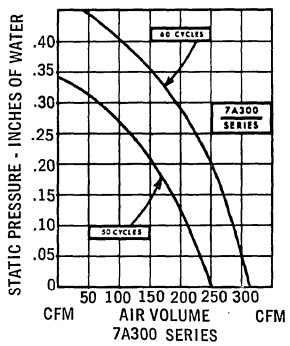
RACK MOUNTED BLOWERS

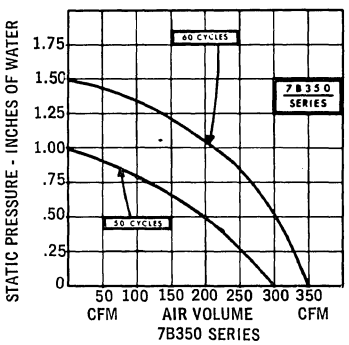
DESIGNED TO SURPASS WITH WIDE SAFETY MARGINS, THE MOST CRITICAL ENVIRONMENTAL CONDITIONS. THEY CAN WITHSTAND SHOCK, VIBRATION, MOISTURE AND OTHER SEVERE ENVIRONMENTAL CONDITIONS.

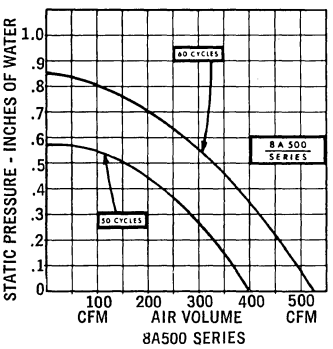
APPLICATIONS

Control systems • Accounting machines
Computers • Data processing systems









SPECIFICATIONS

7A300

Panel Size: Standard — 7″ high x 19″ wide; Recessed — 5¼″ high x 19″ wide
Motor: 110/120 VAC, 50/60 cycle, 1 phase heavy duty induction type with sleeve or ball bearings, 1600 RPM.
Air Delivery: 310 CFM @ 0″ Static Pressure, 48″ Shut Off.

7B350

Panel Size: Standard — 7″ high x 19″ wide; Recessed — 5¼″ high x 19″ wide
Motor: 110/120 VAC, 50/60 cycle, 1 phase, heavy duty, permanent split capacitor, ball bearing, 3350 PRM.
Air Delivery: 355 CFM @ 0″ Static Pressure, 1.3″ Shut Off.

8A500

Panel Size: Standard — 8¾″ high x 19″ wide; Recessed — 7″ high x 19″ wide
Motor: 110/120 VAC, 50/60 cycle, 1 phase, heavy duty, permanent split capacitor, ball bearing, 1700 RPM.
Air Delivery: 525 CFM @ 0″ Static Pressure, .83″ Shut Off.

These Blowers are specially designed for 19″ electronic racks. Their Slow Speed, Low Velocity Centrifugal Blowers quietly deliver cool filtered air... keeping the electronic rack pressurized and dust free.

Ashland's rack blowers distribute a maximum air volume at a minimum noise level.

Let Ashland design a rack blower unit for your particular cooling requirement.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

DACO Self-Reactivating Desiccators [Dehumidifiers] for head-up displays, navigational systems and other airborne optical equipment.

Provide clean, moisture-free air

Moisture condensing as a result of changes in temperature and air pressure during flight causes optical instruments to fog and electrical connections to short. DACO Desiccators trap moisture and thoroughly dry the air before it enters the instrument. A special drying cell reduces the moisture content of saturated air to such a small amount that the dew point falls as low as –70°F. Condensation within the instrument is prevented even under such extreme conditions as those in the Arctic regions or at 80,000 feet altitude. In addition, DACO Desiccators prevent dust from entering the system, blocking solid particles as small as 10 microns.

Automatic desiccant regeneration for long continuous service

DACO Desiccators continue to remove moisture from the air, without replacement of the desiccant, long after the desiccant in static desiccators would become saturated and have to be replaced. The exclusive DACO design automatically purges and regenerates the desiccant during flight, making it possible to use these desiccators for several years without servicing.

Reliable, verified performance

DACO Self-Reactivating Desiccators are among the most reliable components on an aircraft. An entirely new departure from previous types of desiccators, they have been designed specifically for use with airborne instrumentation, and are produced under careful control in facilities designed especially for this purpose. The performance of every DACO Desiccator under its specified application conditions is verified by testing before shipment.

Small Size

Designed to fit into tight locations, DACO Desiccators have a maximum diameter of 1.47 inches (exclusive of the mounting flange). Their length ranges from 4 to 7.63 inches, depending upon the air handling capacity.

Wide choice of models

Models are supplied to condition 0.05 to 1.5 cubic feet of air (net cavity volume). Each model is available as a 115-volt AC/DC or a 28-volt AC/DC unit. A variety of mounting flanges and a choice of standard port or port for use with air hose, are also provided.

For additional details, model specifications, dimension drawings and ordering information, ask for DACO Bulletin 500.

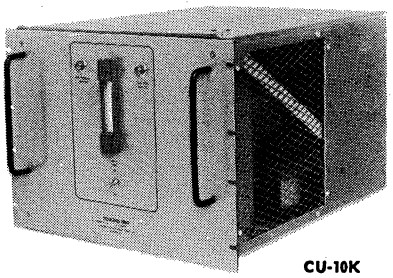
DACO™

COOLING UNITS
HEAT EXCHANGE - REFRIGERATING

Electro IMPULSE, INC.



CU-10K

CU SERIES

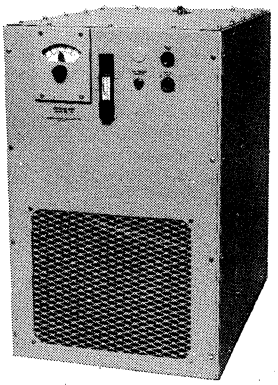
Heat exchange cooling units are useful whenever it is desirable to prevent runaway heat conditions. Heat is absorbed by a circulating coolant liquid, then exhausted into the ambient by forced air passing through a radiator.

Use this series when coolant temperatures can be allowed to rise above ambient.

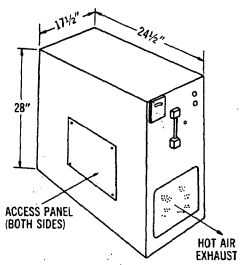
Model	Capacity Watts	Coolant Flow GPM (0-Back Pressure)	Input Power Frequency	Amps	Suitable Liquids*	Back Pressure P.S.I.
CU-500	500	.3	110v - 60 Hz 24v - DC	6	0	15
CU-1500	1500	.5	24v - DC		0	40
CU-2500	2500	1	110v - 60 Hz	6	ETH	50
CU-5000	5000	2	110v - 60 Hz	10	—	50
CU-5000S	5000	2	110v - 400 Hz		—	60
CU-10K	10000	2	110v - 60 Hz	11	W	50
CU-10K-S	10000	2	110v - 400 Hz		—	60
CU-20K	20000	4	110v - 60 Hz	12	—	60
CU-50K	50000	10	220v - 60 Hz	12	0	20
CU-100K	100000	20	220v - 60 Hz	15	—	20

*Suitable Liquids: Water — W. Oil — O. Ethylene Glycol with inhibitors — ETH.
Optional Equipment Available: Flow Switch, Thermometers, Thermostat, Flowmeter, Heater and Water De-ionizer.

RU SERIES



RU-75



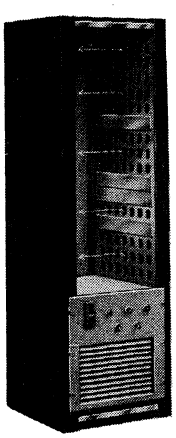
Models from this series are required when coolant temperatures must be below ambient. Using refrigeration, they can provide temperatures to 0 degrees C and below, while removing up to 6800 watts of heat.

These units are ideal for remote applications. Coolant temperatures are low, flow rate is steady, and the final heat sink can be in a location which will not cause overloading of air-conditioning equipment.

Special options can provide temperature control of ±1 degree C, while combinations of refrigeration and heating can hold temperatures at any point above ambient.

Model	Capacity Watts	Coolant Flow GPM (0-Back Pressure)	Max. Back Pressure P.S.I.	Operating Power 60 cps	HP
RU-12.5	212.5	1	60	115	.5
RU-25	425	1	60	115	.5
RU-50	850	1	60	115	.7
RU-75	1,275	1	60	115	1
RU-100	1,700	2	60	115	1
RU-200	3,400	2	60	220	1.3

Optional Equipment Available: Thermometer, Thermostat, Flow Meter, Heater.
In chart above, change model designation to RC for Rack Cooler specifications, and to RUH for Refrigeration-Heating Combination shown at left.



RACK COOLER

This series is designed for air, rather than liquid cooling. A sealed volume of air is cooled by a refrigeration system and continually re-circulated within the enclosure. Cool sensitive rack-mounted electronic equipment, or use duct work and manifolds for extensive cooling of radar or other electronic control consoles and cabinets.

For specifications, see chart above and merely substitute "RC" for "RU" in the Model column.

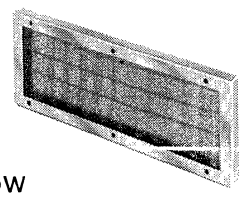
EVANS air filters

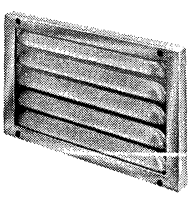
for Electronic Cabinet Application

. . . used on Computers . . . Card Readers . . . Tape Transports . . . Transceivers . . . Power Supply Units . . . both large and small cabinetry. Evans Air filters are permanent. Rigid. Aluminum. Made to withstand the brutal abuse of military field conditions. Frames have mitered corners for smooth, close tolerance fit. Die cut, expanded aluminum grids are criss crossed and precision fitted into each filter. Patented Brillo Lock design gives more air delivery with positive cleaning results.

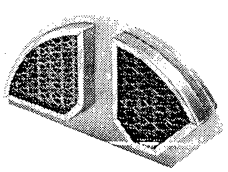
Tolerance:	± 1/32″
Velocity:	200 to 900 FPM
Efficiency:	75% AFI Test
Finishes:	Available in chemical film finish to meet requirements of MIL-C-5541 . . . MIL-F-14072 . . . MIL-A-8625
Sizes:	Filter of 1/2″ or 3/4″ dimension. Made to a maximum area 400 sq. inches . . . with maximum length 25″ on one side without special bracing. For complete information, write or call.



LOW RESISTANCE FILTER
Special serts permit fastening solidly to blower unit. Made for air drop equipment.



LOUVERED FILTERS
For outside application. Louvers protect filter media from water, ice, snow.



HEAVY DUTY UNIT
For rugged military use. Extra rigid frame made from .063 aluminum.

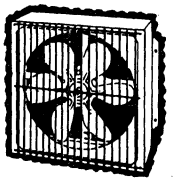
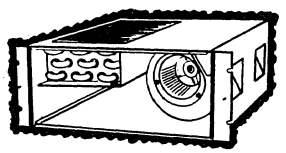
PACKAGED RACK BLOWER

Pressurizes and cools. Removes air pollution. Over 100 models, up to 1000 CFM. Commercial. Mil-Spec. EMI Shielded.



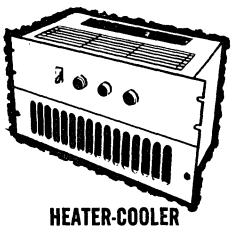
PACKAGED FAN (REVERSIBLE)

Low cost. Minimum space. Shallow depth. Pressurizes or exhausts. Four models, to 1200 CFM. Commercial. Mil-Spec. EMI Shielded.



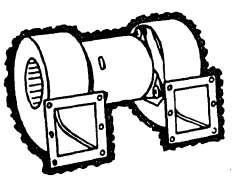
HEAT EXCHANGER

Maintains cabinet at 80°F max. with 1 KW heat dissipation. Air recirculates in rack and is cooled by exchanger in blower case.



HEATER-COOLER

For field installations, unheated military huts, unattended control stations. Maintains even 65°F with surrounding air as low as 10°F.

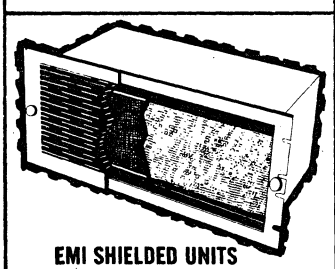


CENTRIFUGAL BLOWER

Single or dual. For spot cooling or pressurizing. 10 to 1000 CFM. Exhaust in any position. Commercial and Mil-Spec.

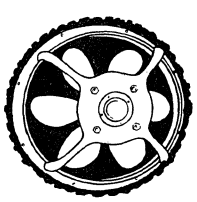
VENTURI-MOUNTED FAN

Rugged economy. 420 CFM, push or pull. Mounts top, bottom, or side. No vibration. Quiet. Commercial or Mil-Spec.



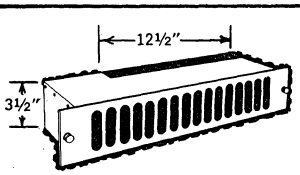
EMI SHIELDED UNITS

Cuts signal leakage either inward or outward.



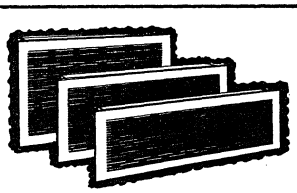
ORIFICE FAN — PANEL FAN

Extra-low-cost cooling. Up to 550 CFM. Strong, quiet, vibration-free. Easy to install. Life lubrication.



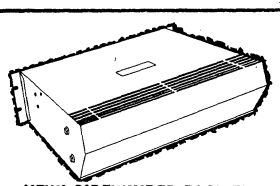
SLOT BLOWER

Ideal for densely packed circuitry. Fits 3½" panel slot. Forces narrow air slot (12½" wide) into cabinet. 150 CFM. Quiet.



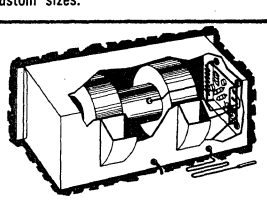
FILTER-GRILLE PANEL

Self-contained. Easy to install. Provide more exhaust louver area for improved air discharge. Washable filter. Standard or custom sizes.



NEW! SIDEWINDER BLOWER

More air! Higher pressure! Quieter! Uses less space! Provides 17-inch-wide airstream in a 19-inch rack! Three models — 3½", 5¼", 7" deliver 180, 350, 515 CFM.

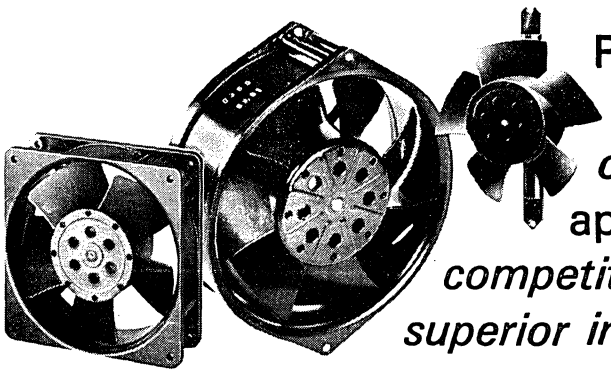


SOLID-STATE TEMPERATURE CONTROLLER

Cuts audible noise level. Modulates blower speed! Keeps equipment operating between 80-90°F. More reliable than air conditioning—but costs less.

PAMOTOR

FANS, BLOWERS, ACCESSORIES



Pamotor designs give every equipment designer and user the *optimum cooling* device for his application, at a *thoroughly competitive price*—and they are *distinctly superior in seven important ways . . .*

• ALL-METAL CONSTRUCTION • EASIER MOUNTING • LOWER NOISE • IMPROVED SHAPE FACTOR •
• REDUCED ELECTROMAGNETIC FIELD • LOWER OPERATING TEMPERATURE • LOWER COSTS •

. . . that add up to FAR GREATER RELIABILITY.

CFM*	SIL** (dB)	Dimensions (inches)	Series (S) or Model (M)	NOTES
General-Purpose Fans (24 models)†				
43	28.8	3-1/8 x 3-1/8 x 1-1/2	8500 (S)	Ultra-compact.
65	***	3-1/2 x 3-1/2 x 2	3000 (S)	Adjustable speed, high air flow.
70	18.0	4-1/2 x 4-1/2 x 1-1/2	4800 (M)	Low speed, virtually noiseless. Ideal for Hi/Fi, Stereo, TV, medical and office equipment.
105	39.6	4-1/2 x 4-1/2 x 2	1500 (S)	High performance, low noise, low cost.
115	37.5	4-1/2 x 4-1/2 x 1-1/2	4500 (S)	Low cost, low noise.
115	43.0	4-1/2 x 4-1/2 x 2	2500 (S)	Low cost, many uses.
125	43.0	4-1/2 x 4-1/2 x 2	1000 (S)	For lab and office equipment, communications, sound, industrial control systems.
130	39.8	4-1/2 x 4-1/2 x 1-1/2	4600 (M)	Handles 30% higher back pressure than conventional 4½" designs.
130	43.0	4-1/2 x 4-1/2 x 2	2000 (S)	Highest free air delivery in 4½" designs.
250	40.6	6 diameter x 2	7500 (S)	For large enclosures with high resistance to air flow. Replaces 2 smaller fans or one 7"–10" conventional design.††
High-Temperature Operation (7 ball-bearing models)†				
43	28.8	3-1/8 x 3-1/8 x 1-1/2	8506 (S)	20,000 hours @ 85°C.
115	37.5	4-1/2 x 4-1/2 x 1-1/2	4506 (S)	20,000 hours @ 85°C.
135	50.0	4-1/2 x 4-1/2 x 2	2110 (M)	400Hz high-temperature operation.
250	40.6	6 diameter x 2	7506 (S)	20,000 hours @ 85°C.
400Hz Operation (2 models)†				
110	50	4-1/2 x 4-1/2 x 2	1110 (M)	Axial design for airborne equipment.
135	50	4-1/2 x 4-1/2 x 2	2110 (M)	Ball-bearing design for high temperature.
No Venturi Housing (4 models)†				
35	22	3 diameter x 1-1/2	8700 (M)	Mounts on 4" bracket.
65	37	4-1/8 diameter x 1-1/2	4700 (S)	Saves space and weight.

*CFM — Cubic Feet per Minute **SIL — Speech Interference Level *** Low noise level of Series 3000 varies with fan speed selected.
†Ratings shown are at 115V, 60Hz unless specified otherwise. Most series include models for 220V and 50-60Hz.
††Series 7500 will deliver 200CFM at 0.2" water back-pressure.
Flanges available for replacing 7" and 10" conventional designs with these superior fans.

Premium Grade PENTAFLOW™ Series — 5-Year Warranty
Special models in Series 4500, 4600, and 8500 available at slightly higher prices than comparable standard models.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

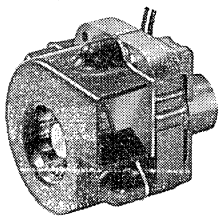
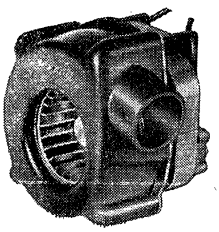
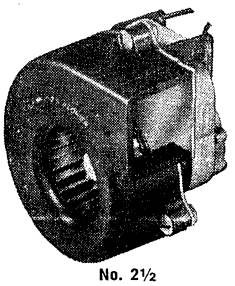
SPACE-SAVING *Precision Bearing* MOTOR-BLOWERS



No. 1½



No. 2



No. 2½

A new line of compact Motor-Blowers are now available with air deliveries ranging from 5 to 19 cfm free air output. Designed to fill the requirements where space is a problem and a minimum of 5-year maintenance free performance is imperative. The precision bearing "power-pac" motor with permanent sealed-in lubrication requires no oiling and operates at an extremely low noise level. The unit can be mounted in any position. The low input wattage required is a cost saving factor of particular advantage ir multiple installations.

MODEL NUMBER	TYPE	INPUT VOLTAGE	WATTS	DUTY CYCLE	RPM	OUTPUT FREE AIR CFM	DIMENSIONS H x W x D	LIST PRICE

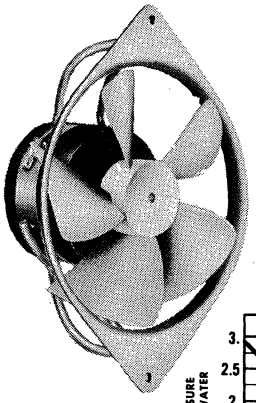
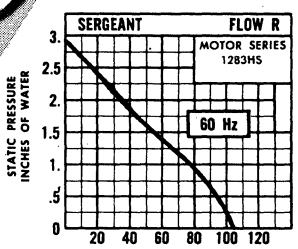
sergeant T.M. FAN





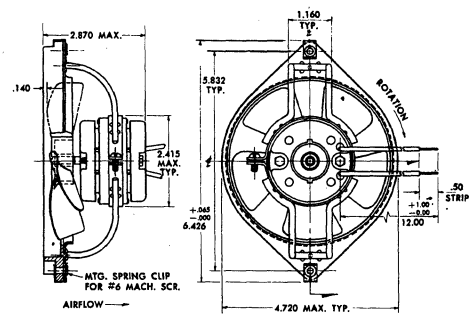
The Sergeant fan joins the famous Muffin and Skipper fans to form a family of three general purpose, commercial flushing fans in a choice of three price ranges. While the Sergeant fan is extremely low in price, it is reliable and ideally suited for cooling electronic equipment. The fan measures $4\frac{11}{16}$" by $2\frac{3}{4}$" in depth.

The Sergeant is available for either direction of airflow. It may be quickly mounted using two mounting holes which fit the industry's standard 4.125" square hole layout. Mounting in any attitude is permissible and there is a choice of mounting directly to the panel wall where the impeller may extend beyond the panel or flush mounting by including a venturi spacer.

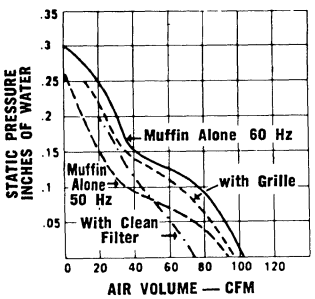
This fan is suitable for ambients up to 130°F (55°C) and has a design life of five years at 75°F (25°C) without maintenance. The fan is impedance protected and satisfies U.L. requirements. The sound interference level is a low 43 db at free delivery. The Sergeant draws watts. Electrical connection is made to 12" long 18 gauge leads.

The mounting spiders are formed steel wire, bright zinc plated. The venturi is cold rolled steel, bright zinc plated. The venturi spacer and the impeller are injection molded acetal resin thermoplastic.

For 115 vac, 50-60 Hz. Weight



muffin® fan



The Muffin Fan is the most reliable commercial tubeaxial fan available. The Muffin Fan can be expected, with a 90% survival rate, to operate up to 10 years at room temperature. Installed in equipment, it minimizes component derating, increases the life expectancy of the equipment and assures top performance. Ultra-long-life bearings are precisely aligned for vibration-free operation. Encapsulated motor winding adds years to life of unit. Molded in bus-bar motor leads. Completely integrated design of motor, blades, optional venturi, grille and filter in a performance matched assembly. The Muffin Fan is designed for 115 VAC, 50-60 Hz, 1 Phase applications. Models for 230 VAC are also available. It has UL yellow card component recognition. File No. E-31293.

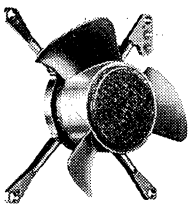
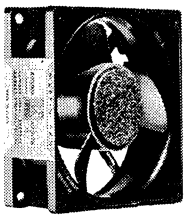
Sentinel, Muffin, Whisper, and Centaur Fans

AVAILABLE IN 4 VERSIONS



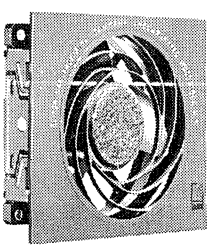
"SKELETON FAN"

Consists of a motor-driven propeller with 4 mounting arms containing molded-in leads. It can be mounted as an air-stirring device among hot components or can be mounted in a round, sharp-edged or bellmouth aperture in the equipment enclosure.



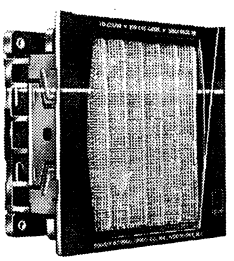
"VENTURI FAN"

An assembly of the "SKELETON FAN" mounted in a 4.68" square molded plastic VENTURI BLOCK only 1.50" thick. May be used in either a round or square opening in an equipment panel. Mounting holes are provided on both upstream and downstream sides to permit the fan to push or pull air. It may also be used with the MOUNTING CLIPS described in this folder.



"GRILLE FAN"

The "GRILLE FAN" results from the addition of the GRILLE and MOUNTING CLIPS to the "VENTURI FAN". The "VENTURI FAN" may be mounted against the inside surface of the equipment enclosure and the grille snapped into place from the outside. The grille is an advanced aerodynamic design which minimizes the accumulation of lint and dust, and keeps the acoustical noise level to the minimum while insuring maximum airflow.



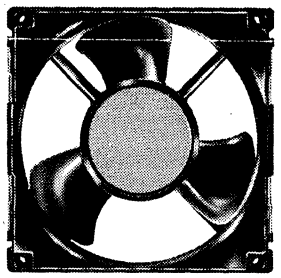
"FILTER FAN"

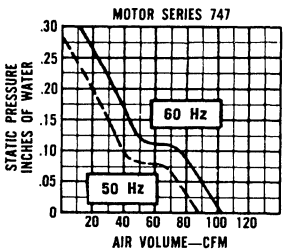
A complete cooling package consisting of matched fan and filter for maximum efficiency. The FILTER BOX locks in place between the GRILLE FRAME and the "VENTURI FAN" adding less than .75" to over-all depth. This unit completely eliminates guess work and risks involved in unmatched fan/filter assemblies. FILTER BOX, GRILLE and MOUNTING CLIPS are also available as separate accessories for existing "VENTURI FAN" installations.

Accessory Items For Sentinel, Muffin, Whisper and Centaur Fans.

Mounting Clips No. 13996 (Set)
Spiral Grille No. 16238
Filter Assembly No. 15449
Filtercoat No. 18440
Finger Guard No. 20132-2
Plug & Cord Assembly No. 16415

Sentinel® FAN





The Sentinel Fan has retained the high air performance, versatility, compact design and low noise level of the Muffin Fan but is designed for the more "rugged" application where the ambient temperature is higher. It is also for the customer that requires long, trouble free life without the requirement for maintenance. The Sentinel Fan may be used in a maximum ambient of 100°C and will withstand greater shock and vibration than the Muffin Fan was designed for. To achieve this design criterion the Sentinel Fan incorporates a glass-filled phenolic venturi block, an encapsulated stator, stainless steel ball bearings and an aluminum heat sink which draws heat from the windings to provide a cool running motor. The Sentinel Fan was designed to meet U.L. approval and has been satisfactorily qualified to MIL-E-4970A. The Sentinel Fan is designed for 115 VAC, 50-60 Hz, 1 Phase applications. Models for 230 VAC are also available.

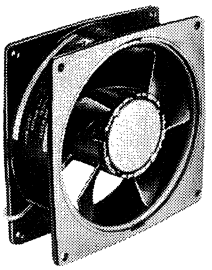
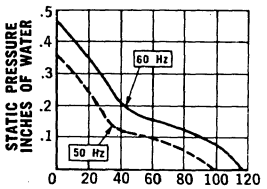
SPARTAN FAN





Delivers 115 CFM free delivery for military applications. Dimensions of $4\frac{11}{16}$" square by $1\frac{1}{2}$" in depth make this fan dimensionally interchangeable with the Muffin Fan. Powered by a multi-slot, double-shielded, ball bearing induction motor which is lubricated for life at a maximum ambient of 100°C. Electrical connection is made by means of 12" leads. The Spartan Fan is designed for 115 VAC, 50-60 Hz, 1 Phase and 400 Hz, 1 Phase and 400 Hz, 3 Phase. The Type "R" version contains round mounting rims for use with standard motor mounting clamps. The air-flow direction may be reversed by turning fan end-for-end. The Venturi Ring, spiders and hub are a single aluminum casting suitable for shock and vibration requirements. The Spartan Fan meets applicable military specifications for ground and shipboard use.

OPTIONAL ACCESSORIES: Terminal Block.
"Synclamps" for Clamping Rim Mtg. Part #24254. (3 Required Per Fan).
"Rever-Synclamps" for Clamping Rim Mtg. Part #14015.(3 Required Per Fan).

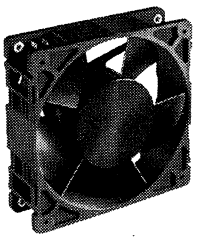
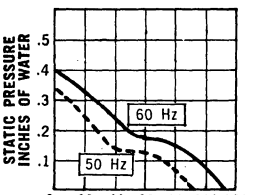
CENTAUR® FAN



Available in 4 Versions



New aerodynamic principles by Rotron permit the new Centaur to achieve greater aerodynamic efficiencies than ever before from axial flow fans — and with low acoustical disturbance and compact size.

The Centaur with its computer designed five-bladed impeller molded of high impact polycarbonate is precisely matched to a powerful shaded pole motor — available with either oil-impregnated sleeve bearings or precision ball bearings lubricated for life. The recommended operating ambient temperature is −40°C to +55°C with sleeve bearings, and −40°C to +72°C with ball bearings. The motor is mounted to a spider of die cast aluminum which is in turn assembled to a venturi of high temperature resistant black phenolic.

The Centaur will deliver 115 cfm of air, free delivery operating at 115 volts, 60 Hz, or 100 cfm free delivery at 230 volts, 50 Hz making it possible for the design engineer to select a fan to deliver the same cfm on European power sources as Muffin fans or Sentinel fans at 60 Hz power used in the U.S.A.

The Centaur is designed to be physically interchangeable with the Muffin fan or the Sentinel fan.

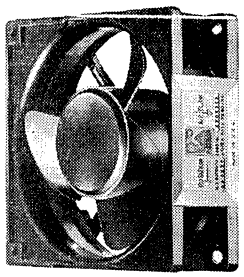
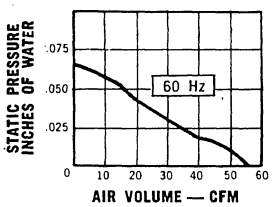
Whisper® Fan



MARK I
Available in 4
Versions



Breathing 55 cubic feet of cool air over, under and around every heat-generating component, the Whisper Fan improves performance of hi-fi equipment, radio-TV receivers and O.E.M. equipments by minimizing drift due to temperature change within the enclosure. So quiet you have to feel the breeze to know it's going. Only 18 db SIL. Also supplied as Whisper Fan Kit complete with special mounting, hardware, plug and cord for electrical connections and detailed instructions. Whisper Fan is designed for 115 VAC only, 50-60 Hz, 1 Phase.

WEIGHT 1.0 POUND

Mounting hole dimensions 4.125"

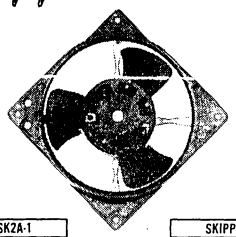
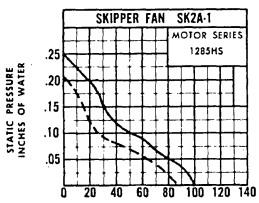
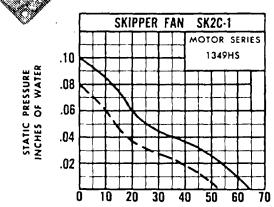
Skipper® FAN







FEATURES

- **Saves installation time**—venturi model needs only two mounting screws
- **Easily reversible air flow**—designed for mounting from either side
- **Mounts easily**—on any panel thickness
- **Powerful**—moves 100 cfm
- **Extra quiet**—35.8 db (SIL); ultra quiet low speed model yields only 25.2 db SIL
- **Thin profile**—2-inch axial depth
- **Compact**—installs in an area less than 4¾-inch square
- **Lightweight**—weighs less than 1 lb.
- **Never needs lubrication** — prelubricated bronze sleeve bearings for 5-year maintenance-free life
- **Cool running** — die-cast zinc motor housing for better heat dissipation
- **Designed for high temperature operation**—provides continuous cooling at temperatures up to 50°C (122°F)
- **Needs no plug or cord**—furnished with 12-inch leads
- **Meets UL Class "A" Insulation Specs.**
- **Impedance protected**
- **Immediate delivery**—both venturi and skeleton models in stock for fast delivery

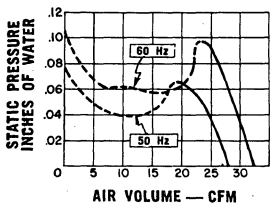
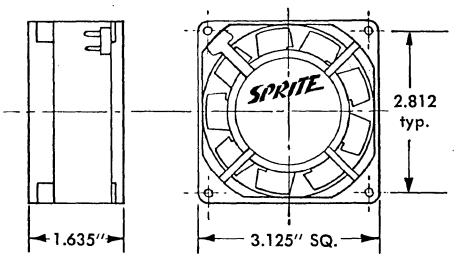
SPRITE® FAN



The Sprite fan has been designed especially for commercial cooling applications in low-profile electronic equipment, where size and reliable LOW COST performance are the important requirements.

It is only 3⅛" square, still, this rugged little fan with its nine-bladed propeller delivers 33 cfm — tailored to produce high pressure at the ranges approaching free delivery. (See Curve)

WEIGHT 14 OUNCES

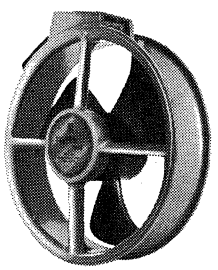


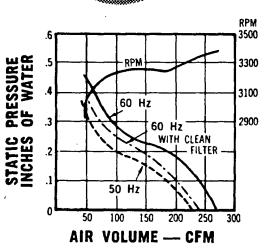
Review these important features:

- Small—only 3⅛" square.
- Peppy—delivers 33 cfm.
- Reversible air flow—Simply turn fan end-for-end.
- Impedance protected.
- Designed to meet UL requirements.
- Designed to operate in temperature up to 140°F (60°C).
- Quiet—only 35 db SIL.
- Long life—up to five years.

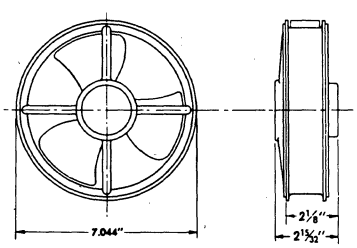
FEATHER® FAN

For Further Information Request Catalog Sheet E-3001





The Feather Fan delivers 270 CFM for flushing computer consoles, power supplies, heat exchangers and electronic control equipment that can spare little room for a cooling device. The fan's depth dimension of only 2 15/32" x 7" diameter imposes little space displacement on the system to be cooled. The Feather Fan is constructed of high-impact polycarbonate plastic which is resistant to extreme temperatures and boasts outstanding dimensional stability. The fan is powered by multi-slot induction motor that incorporates prelubricated stainless steel ball bearings for an ambient temperature range of −55°C to +65°C. 115 VAC, 50-60 Hz, 1 phase. A capacitor is provided which is mounted on the fan venturi. The electrical connection is made to tinned brass terminals and a mating plug and cord is available. The fan is provided with clamping rims for easy mounting and the airflow is reversible by turning the fan end-for-end. A matched filter box #17785 which is permanent, nonloading and washable is optional as are fan guards.



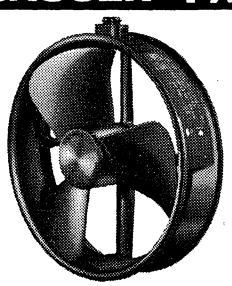
WEIGHT 1.5 POUNDS

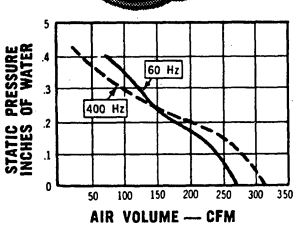
OPTIONAL ACCESSORIES:
Rim Guard #14559.
Panel Guard #14651.
Plug & Cord #16398.
Filter Box #17785
Mounting Clamp #16410 (3 required per fan).
Panel Mount Guard Clip #14611 (3 required per guard).
Rotron Filtercoat #18440.

Also available to meet MIL-B-23071/1/. Please Inquire.

SAUCER® FAN

For Further Information Request Catalog Sheet E-3000





The Saucer Fan is ideally suitable for integration into modern electronic packages requiring 270 CFM of cooling air. Its axial length or thickness is strictly limited to the minimum measurement required by a highly efficient propeller, with no further space sacrificed for the driving motor. In other words, **"It is all fan"**. Airflow is reversible by turning the fan end-for-end. Clamping rims at each end of venturi provide easy mounting. Electrical connections are made to a compact terminal block. The Saucer Fan meets applicable military specifications for ground equipment.

A 400 Hz version is also available.

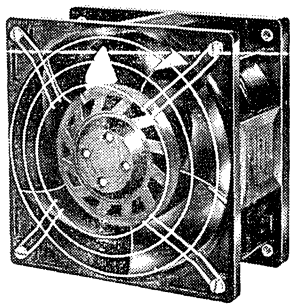
TARZAN® FAN

For Further Information Request Catalog Sheet M-8000.

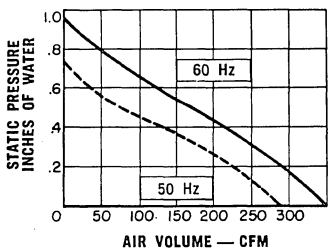


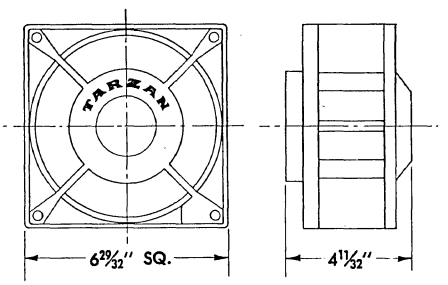
WEIGHT 5 POUNDS

The Tarzan fan brings an entirely new concept of air moving device versatility to the science of electronic cooling — CENTRIFUGAL BLOWER PERFORMANCE IN A COMPACT AXIAL FLOW FAN. This unique Rotron aerodynamic design (patent applied for) develops much greater pressure than comparably sized axial flow fans.

Its straight line performance curve permits the packaging engineer to realize full potential from the Tarzan at any point along the curve with no instability normally found in a curve of an axial flow fan.

When considering a squirrel cage centrifugal blower to deliver 175 cfm at 1/2" water static pressure — CONSIDER A TARZAN FIRST — SAVE SPACE — eliminate discharge diffusers.





More features:

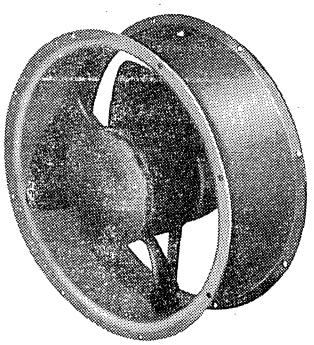
- Long maintenance free life.
- Economically priced.
- Reversible air flow — Simply turn fan end-for-end.
- Ball bearings — lubricated for life.
- 115 VAC, 50/60 Hz.
- 230 VAC, 50/60 Hz.

Optional accessories:

- Plug and Cord #17555.
- Filter Box #20990.
- Finger Guard #21196-2.

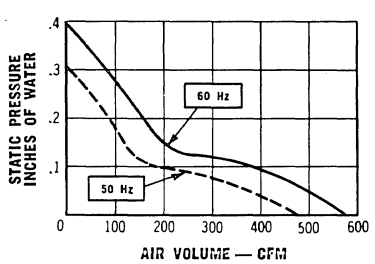
Caravel® FAN

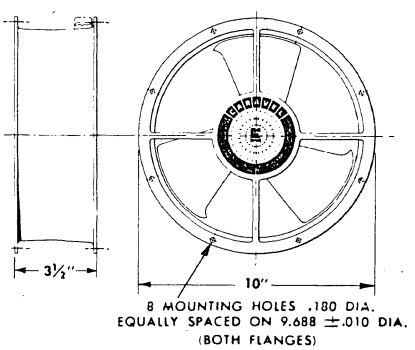
For Further Information Request Catalog Sheet E-3050



WEIGHT 5 POUNDS

The Caravel Fan delivers an air volume of 575 CFM while holding a narrow depth dimension of only 3½" x 10" diameter. This high performance and compact design makes it ideal for flushing large racks and cabinets. The fan may be mounted directly to a panel or cabinet wall using the holes located around the circumference of the venturi. Airflow may be reversed by turning the fan end-for-end. The motor is provided with ball bearings for long, quiet life. No maintenance is required. The electrical connection is made to a terminal block and a mating plug and cord is optional. The Caravel is suitable for the most rugged commercial applications where the cabinet temperature does not exceed 140°F. Thermal protection for the motor, designed to meet UL approval, is available on special order.





CARAVEL TYPE CHART

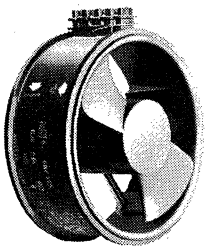
PROPIMAX® 2

For Further Information Request Catalog Sheet E-2900



WEIGHT 6.5 OUNCES

The PROPIMAX-2 is ideal for 400 Hz airborne and missile applications where high shaft speeds are mandatory to obtain maximum air performance in a minimum of space. Selection from constant speed or high altitude varying speed "Altivar"® motors, which change shaft speed directly with altitude. A 50-60 Hz design is also available. The units are lubricated for a maximum ambient temperature of 125°C and will have a life expectancy of 2000 hours of continuous duty in an ambient atmosphere of 14.7 psia and 72°C. For fan life specifications for motor series 366ZS contact factory. The airflow is reversible by turning venturi ring end-for-end. There are clamping rims at each end of venturi for quick mounting. A single terminal block for all electrical connections. Meets applicable military specifications.

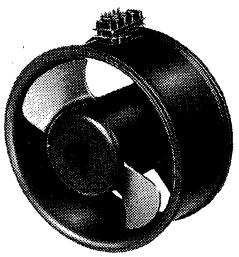
OPTIONAL ACCESSORIES: "Synclamps" for Clamping Rim Mtg. Part #24254. (3 Required Per Fan).
"Rever-Synclamps" for Clamping Rim Mtg. Part #14015. (3 Required Per Fan).

PROPIMAX-3 & 3B

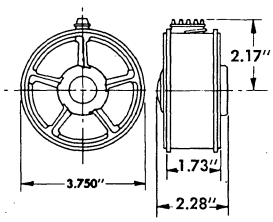
For Further Information Request Catalog Sheet E-2901.

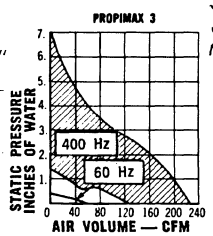


WEIGHT 15.2 OUNCES

The PROPIMAX 3 and 3B will deliver up to 220 CFM free delivery and will work against high air impedance. It is ideal for cooling small airborne systems which must place maximum emphasis on size and weight. This means heavy component density with large heat loads and high air impedance in relation to the envelope dimensions of the system. The PROPIMAX 3 has a two bladed propeller and is powered by a constant speed 400 Hz motor operating at 22,000 RPM. The PROPIMAX 3 will deliver large volumes of air against relatively high static pressures. The PROPIMAX 3B is provided with a four bladed propeller for operation at speeds of 12,000 RPM or less on 400 Hz. The PROPIMAX 3B will deliver large volumes of air against lower static pressure levels. The PROPIMAX 3B offers a choice of a constant speed 11,000 RPM design and high altitude, variable speed "ALTIVAR"® motors which change speed directly with altitude. There is also a 50-60 Hz design available.

The units are lubricated for a maximum ambient temperature of 125°C and will have a life expectancy of 2,000 hours of continuous duty in an ambient atmosphere of 14.7 psia and 72°C. For more stringent duty conditions fan life specifications must be individually defined. Airflow is reversible by turning fan end-for-end. There are clamping rims at each end of the venturi for quick mounting. A single terminal block for all electrical connections. Meets applicable military specifications.





OPTIONAL ACCESSORIES:
"Synclamps" for Clamping Rim Mtg. Part #14015. (3 Required Per Fan).
"Rever-Synclamps" for Clamping Rim Mtg. Part #24254. (3 Required Per Fan).

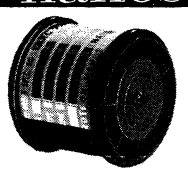
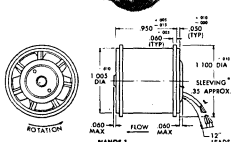
nanos FAN

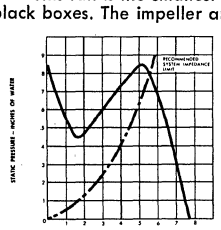




ACCESSORY
Synclamp Rotron PN #24688
(3) required per fan

The Nanos fills the requirement for an extremely small air moving device. It is only 1" in diameter by 1" long or it may be provided in a 1" cube and delivers up to 7.5 cfm free delivery.

This fan is the smallest and lightest of a family of miniature high frequency fans for tightly packed electronic black boxes. The impeller and correctional vanes are of airfoil construction for maximum aerodynamic efficiency and minimal acoustical noise. Power is provided by an inverted construction, hysteresis motor, utilizing an air lubricated hydrodynamic journal bearing.



The Nanos is designed to withstand 100G shock in any direction. The temperature range is −55°C to +100°C. Under normal continuous running conditions, life expectancy would be in excess of 20,000 hours or more than 500,00 start-stop cycles. The fan may be mounted in any attitude. The airflow is reversible by turning the fan end-for-end.

Electrical connection is made to (3) leads 12" long. Choice may be made between a round configuration with clamping rims of a 1" cube which will mount flush at either end or on the side. For the servo configuration specify Nanos-1 or for the cube unit Nanos-1B or 1-C depending on desired airflow direction. Power requirement is 26 vac, 400 Hz 1ϕ.

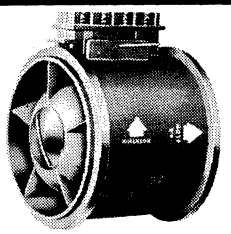
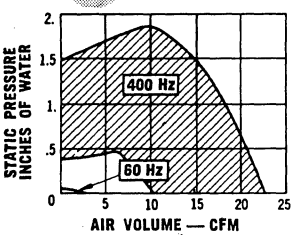
VANEAXIAL FANS

Vaneaxial fans are usually employed in high component density assemblies which require high performance under relatively high air impedance and at the same time offer minimum space for the cooling device. Vaneaxial fans in this group offer exceptional reliability under extreme operating conditions. These fans are generally of high frequency (400 Hz) power designs with resulting extremely high motor rpm. This speed provides the excellent pressure building abilities within their small physical size. They can also be supplied with 50-60 Hz motors. Models with Altivar motors are available for high altitude use in aircraft and unmanned high atmosphere vehicles.

AXIMAX ® 1

For Further Information Request Catalog Sheet F-3100.





The smallest and lightest of a family of miniature, high frequency fans for use in tightly packaged airborne "black boxes" where size and weight must be held to an absolute minimum, where reliability is critical and where high heat loads must be dissipated with cooling air. The Aximax 1 will answer all of these requirements while overcoming considerable air resistance. It will deliver 17 CFM at 1" w.g. Mounting is by Clamping rims.

The Aximax 1 is available for both pressurized and non-pressurized applications and is built for single-phase or three-phase operations, and meets applicable military specifications.

A 50-60 Hz motor is available.

Weight 4 ounces.

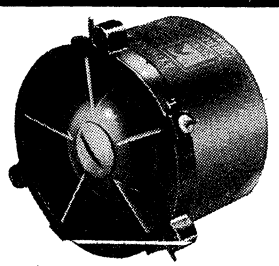
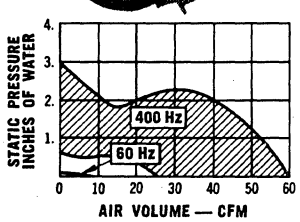
AXIMAX 2

For Further Information Request Catalog Sheet F-3200.





Air delivery of 60 CFM, free delivery, is provided from a fan 2" in diameter by 1.5" axial length. The Aximax 2 is designed for maximum cooling against high static pressures with a minimum space and weight loss. It is available from a choice of constant speed or variable speed motor designs for low or high ambient densities. The Aximax 2 can be supplied with clamping rim mounting and electrical connection to a compact terminal block or as shown in the sketch. It meets applicable military specifications. A 50-60 Hz motor is also available.

Weight: 4.5 ozs.

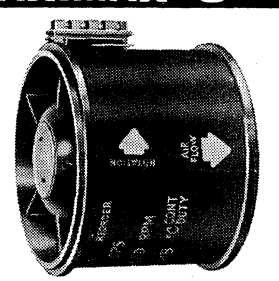
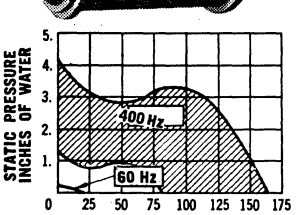
AXIMAX 3

For Further Information Request Catalog Sheet F-3300.





The Rotron Aximax 3 vaneaxial fan is specifically designed for high frequency cooling applications where high air deliveries against high static pressures are to be obtained in a minimum of space, therefore requiring high shaft speed. For airborne equipment, including missiles, the features of the fan will be found particularly attractive. Selection can be made from constant speed motors or varying speed motors for low ambient densities. Airflow is reversible by turning fan end for end. The Aximax 3 is mounted by clamping rims. It meets most applicable military specifications.

A 50-60 Hz motor is also available.

Weight: 14 ozs.

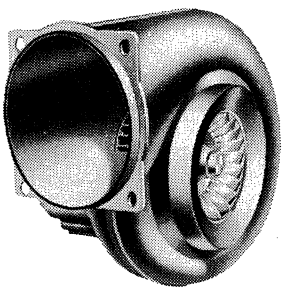
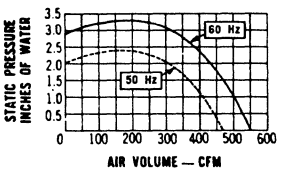
Model CXH33A

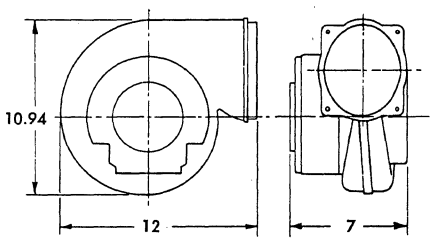
Model CXH29A

CENTRIMAX®

- Delivers more air with more efficiency than conventional squirrel cage blower.
- Package size substantially smaller than assembled squirrel cage blower.
- Motor completely integrated with impeller design.
- No maintenance — oversize, double shielded, precision ball bearings — lubricated for life.
- Ultimate in reliability — no centrifugal starting switches or relays which are the cause of most single phase motor failures.
- Every unit comes equipped with adjustable blast direction — impeller housing can be rotated 360°.

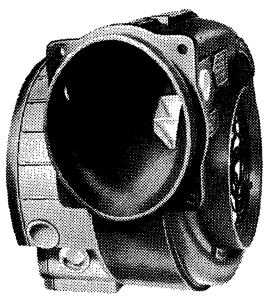


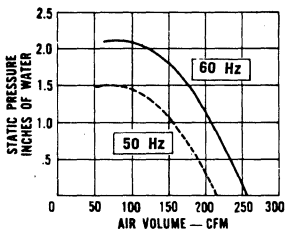


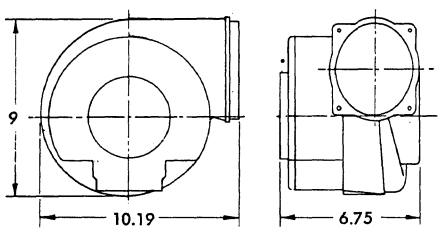


Model	Volts	Hz	Phase	Watts	Amps.	Cap. Mfd.	CFM
CXH33A2	115	50-60	1	420	3.7	12.0	540
CXH33A3	230	50-60	1	380	1.7	6.0	545
CXH33A33	220	50-60	3	410	1.3	—	530

- Can be installed in any attitude and mounted from any one of three mounting surfaces.
- Designed to accept standard, readily available round ducting.
- Blower housing fabricated from flame retardant polyester resin.
- Never rust, never bend.
- Thermal safety cut out feature available as optional.
- Operating temperature from −20°C to 85°C.
- Available in 115 VAC, 60 Hz, single phase; 230 VAC, 50 Hz, single phase; 208-230 VAC, 50-60 Hz, three phase.







Model	Volts	Hz	Phase	Watts	Amps.	Cap. Mfd.	CFM

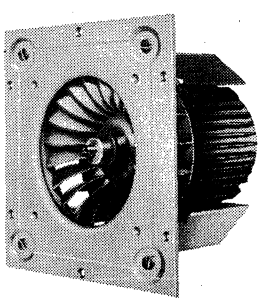
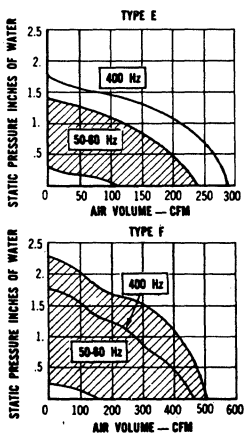
For Further Information Request Catalog Sheet G-3350.

Model G

For complete details request Rotron catalog sheet G-3340.

TYPES E & F





The Model G blowers are another type of blower incorporating the centraxial impeller. This blower uses the impeller without a scroll type housing. It consists of a mounting inlet plate holding the motor and the centraxial impeller. It has the unique feature of drawing the air in axially and discharging it uniformly radially 360° around the impeller. The Model G blower incorporates great flexibility in installing the blower in tight spaces.

Two basic sizes of the Model G blower are available. The Type E with airflows up to 285 cfm and maximum static pressures at no delivery up to 1¾" and the Type F with airflows up to 500 cfm and maximum static pressure at no delivery up to 2¼". Motors are available for either 115 or 230 volts, single or three phase, and 50/60 or 400 Hz. Applicable military specifications can be met. Protective screens on the inlet and mounting for the Rotron Model 2A Airflow Switch are available as accessories.

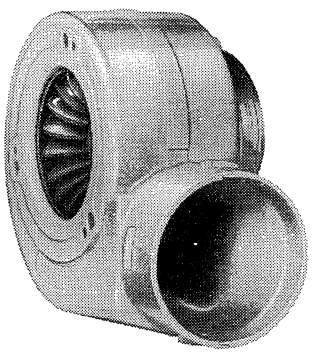
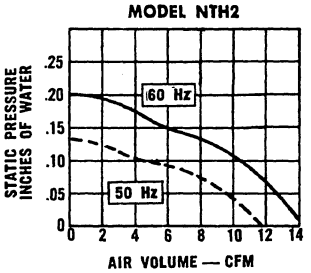
CENTRAXIAL BLOWERS

Centraxial blowers, so named for their unique impellers, are far more efficient than squirrel cage blowers of similar capacity or size. The centraxial impeller functions similarly to a turbine impeller. Therefore, you might compare efficiency by comparing a water turbine to an old fashioned water wheel. Centraxial blowers cost less to buy, cost less to install because of their built-in versatility and cost less to operate since they require less power to get performance.

They operate in the specific speed range of 9,000 to 80,000.

NUGGET® BLOWER





The Nugget (Model NTH2) is a new, compact, low cost blower ideally suitable for spot cooling applications in test instruments, transmitters, TV cameras, office machinery, and tape recorders. Its centraxial wheel, a new design concept by Rotron affords greater efficiency than standard squirrel cage wheels — greater volume to pressure characteristics. It is only $3\frac{19}{32}$" x $4\frac{1}{32}$" x $2\frac{3}{32}$". The Nugget delivers 14 CFM. The Nugget incorporates a specially designed miniature subfractional horsepower induction motor that draws only 7 watts. 115 VAC, 50-60 Hz, 1 Phase, 3200 RPM. The rugged blower housing is injection molded from polycarbonate plastic to form a combination of features which will prove helpful and convenient to any packaging engineer. The Nugget is also available without housing to be used as an air stirring device (Model NTP2). This model requires a space of only $2\frac{1}{2}$" x 2".

OPTIONAL ACCESSORIES:

Plug & Cord Assembly, Part No. 17555 (For both models)

Rim (inlet), Part No. 17469 (For Model NTH2 only)

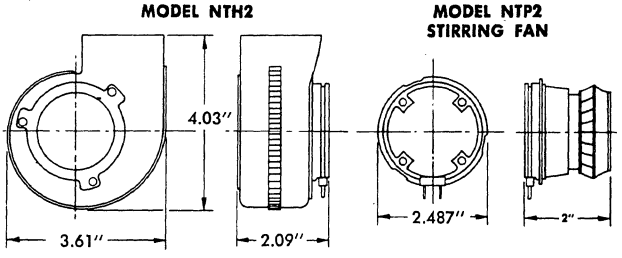
Inlet Clamp Part No. 17597-1 (For Model NTH2 only) (Use with Rim #17469)

Outlet Clamp, Part No. 17597-1 (For Model NTH2 only)

Flange (Outlet) Part No. 17471 (For Model NTH2 only)

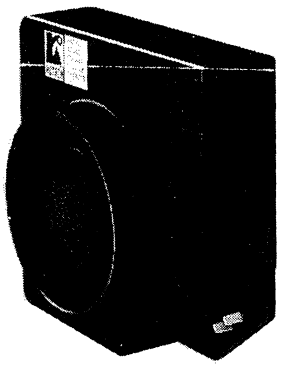
3 Brass Inserts, Part No. 19803 to be used on Blower Inlet, Model NTH2

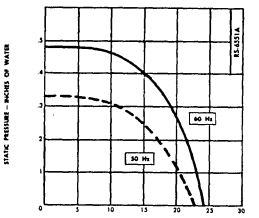
WEIGHT 0.6 POUNDS



For Further Information Request Catalog Sheet G-3310.

biscuit BLOWER





The Biscuit blower is designed for packaging within the confines of equipment having a vertical profile of no more than $1\frac{3}{4}$". This new blower provides high pressure centrifugal blower performance in a space never before possible. It has a depth dimension of only $1\frac{5}{16}$".

Delivering up to 25 cfm free delivery and with a high static pressure capability, it permits a significant increase in the packaging density of instruments using the latest integrated circuit technology.

The Biscuit blower features the same inverted motor construction and resiliently mounted permanently lubricated sleeve bearing system as Rotron's famous Muffin® fan and, therefore, provides a design life in excess of 10 years at room ambient without maintenance.

Among the commercial applications for which it is designed are computer terminals, core memories, heat exchangers and sinks, power supplies, projector lamps and rack mounted instruments. In the office equipment field, the Biscuit is ideal for the cooling of copying machines, optical character readers and X-Y plotters and recorders.

Encapsulated stator construction integrates the electrical portion of the shaded pole motor into the blower housing to provide a monolithic structure totally impervious to moisture. The Biscuit may be mounted from the back, the inlet or the discharge. Electrical connection is made to a choice of tinned solder terminals or plug and cord #17555 may be specified. Other options include an inlet ring, hose clamp or outlet guard.

The Biscuit is designed for U.L. component recognition and has a low speech interference level of 44 db. It operates on a power source of 115 vac, 50-60 Hz. Also available for 230 vac. Power draw is 16 watts. Specify BT2A-1 for a plain inlet or BT2A-2 for a rim inlet.

Spiral® BLOWERS

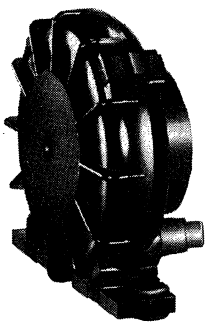
Spiral blowers are revolutionary new motor-blower packages designed to develop unusually high positive or negative air pressure at low to moderate volume of air. Thus, performance achieved without the use of sliding seals or vanes. Contacting surfaces are confined to the precision extra wide ball bearings, lubricated for extremely long life — no maintenance is required.

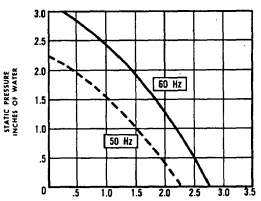
Life expectancy is enhanced by their low speed motors as well as by the absence of brushes or commutators. The RF noise, characteristic of the universal motors generally used in vacuum cleaner type blowers, is eliminated.

Optional accessories include adjustable trimmer valve, differential pressure gauges for instantaneous trimming to system requirements and a thermal protector.

MINI-SPIRAL

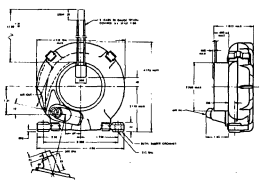
For Further Information Request Catalog Sheet J-6550.





The Mini-Spiral is a high pressure, low flow air moving device specifically designed for gas sampling applications. The unique regenerative energy conversion characteristic of the Spiral® blower has been combined with the highly reliable ball bearing system of the famous Sentinel® fan, offering proven long life and reliability in a compact package. This tiny blower which measures 4⅝" in diameter by 1 3/16" in depth will create a suction of 3" wg, which could normally be achieved with a centrifugal blower many times its size and power consumption.

The Mini-Spiral may be used in commercial equipment to draw up to 2½ cfm through long lengths of tubing, resistance filter or chemical beds. It may be operated continuously at shut-off (no airflow) when it would provide maximum suction of 3" wg for gas sampling, fume removal, document hold down, tape hold down or the removal of chad.

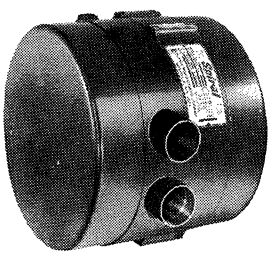


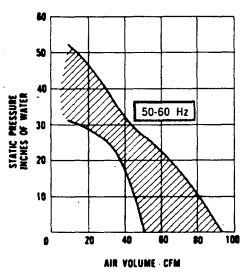
The blower housing and impeller are a high strength, glass filled, flame retardant phenolic. Bearings are double shielded, single row, radial ball, stainless steel which are lubricated for life. Magnet wire is Nema Class F. Termination consists of two U.L. style 1180 Teflon® leads, 20 AWG, 12" long.

The Mini-Spiral satisfies U.L. requirements and may be operated continuously in an ambient up to 72°C. It has a life expectancy of 50,000 hours at 40°C. A low speech interference level of 45 db renders the Mini-Spiral suitable for application in office equipment. Mounting is easily provided for running screws through two butyl rubber grommets. The weight is only 1.1 lbs.

DUPLEX SPIRAL

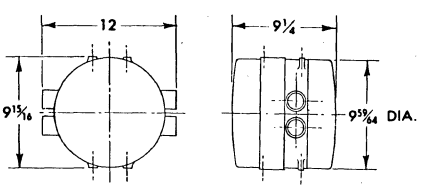
For Further Information Request Catalog Sheet J-6610.





The Duplex Spiral offers greater performance characteristics than the Spiral Model SL2 above. By internal ducting of the airflow from two impellers, higher pressures are achieved with Model SL4; Model SL5 extends the airflow range, and Model SL6 provide an economical source of **two** independent high pressure air streams, which can be utilized at different pressure levels. While the dimensions of all these models are the same, the functions cannot be changed in the field. The Duplex Spiral is designed for use in ambient temperatures up to 55°C, in typical applications as:

- Magnetic tape slack control and capstan motor cooling in one package (Model SL6).
- Document and card handling equipment.
- Paper tape and card reading equipment.
- Power supply for fluid amplifiers.
- Laser head cooling.
- Printed circuit motor cooling.
- Materials handling.
- Waveguide pressurization, or cooling.
- Actuation of machine elements.
- Gas sampling and purification.
- Air bearings for tape and film.
- Microwave cavity cooling.
- For holding photographic film or paper on rollers OR frames.



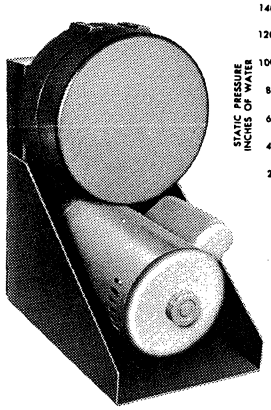
Remember these features:

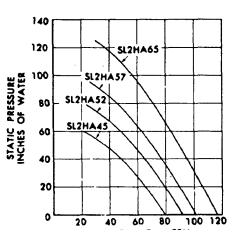
- Two independent air sources from one package.
- Two jobs for the price of one.
  OR
- Extended performance — pressures — vacuums to 2 PSIG.
  OR
- Extended performance — airflow delivery up to 94 CFM.
- Oil free air flow — no possible contamination.
- Quiet.
- Low Speed — 3300 RPM.
- Economically priced.
- Continuous duty.
- Available for single or three phase, 50-60 Hz power, 115 or 208/230 VAC.
- Optional accessory — Dust filter.

BELT DRIVEN SPIRAL BLOWER

For complete details, request Rotron catalog sheet J-6620.

MODEL SL2HA





To obtain even higher pressures and airflows than can be obtained with a Model SL2 or Duplex Spiral shown above, Rotron has adopted the Model SL2 to be belt driven from an external motor. This permits the blower speed of the Model SL2 Spiral to be increased for higher air performance. Pressures or vacuums up to 4½ psig can be obtained. Flows at free delivery of 115 cfm can be obtained. The flexibility of different pulley ratios permits the designer to meet altitude and frequency requirements without overdesign.

Motors used with this blower are induction motors with no brushes to wear and operate at 3450 rpm. They are available in all common voltages and frequencies and have permanently lubricated ball bearings. Belts are designed for 10,000 hours life with no maintenance or adjustments.

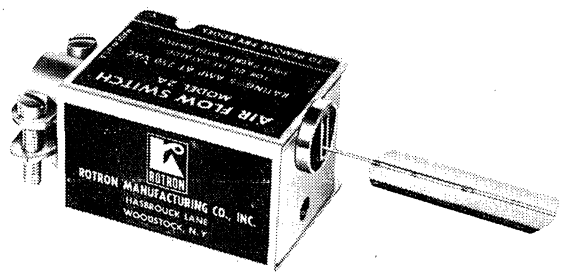
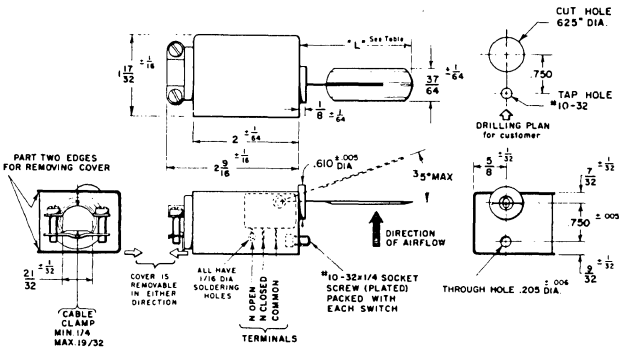
AIRFLOW INTERLOCK SWITCH

For Further Information Request Catalog Sheet K-6800.

The Rotron Model 2A Airflow Interlock Switch provides insurance against equipment damage due to a loss of the cooling airflow regardless of the reason for the malfunction. The Model 2A Airflow Switch is a velocity actuated switch, not pressure actuated, and senses the loss of airflow because of an obstruction, or air leak up-stream from its location, or due to the failure of the cooling fan. The switch is a single pole double throw type and normally open and normally closed contacts are available which may be used to turn off the power to the endangered equipment or actuate alarm systems. Eight different vane sizes are available to size the switch for various air velocities. A convenient determinator kit permits quick selection of the proper air vane for a particular application.





Rotron Model 2A Airflow Switches Will Actuate and De-Actuate in an Airstream of the Following Velocity in Ft./Min. For "Standard" Air (29.9 Inch HG, 70°F).

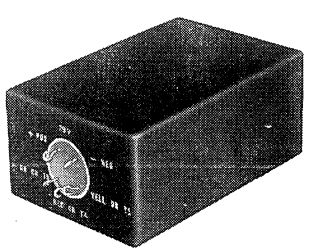
POWER CONVERSION MODULES

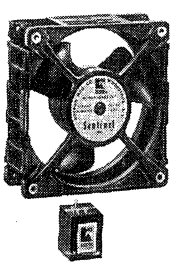
SYSTEM POWER SUPPLY PROBLEMS FOR DTL, TTL, MOS AND OTHER LOGIC DRIVES?
SYSTEM POWER SUPPLY PROBLEMS FOR COOLING DEVICES?



Rotron can solve these independently or combine both requirements in a common supply. Power DC to AC inverters, AC to AC converters, and DC supplies can be designed to meet your specifications. Rotron's approach of combining these requirements results in increased efficiencies, weight and size reduction of the often neglected power supply. Your Packaging Engineer will be grateful for the additional volume allotted to today's dense packages.

Please call upon us to consult in the solution of your power supply problems. As a bonus, free consultation is offered on your cooling applications.

Wide assortment of BATAC and DELTAC (frequency converter) designs available. For further information, contact Rotron Applications Engineering Dept. Woodstock, N.Y. Return to Section #4000 for other BATAC and DELTAC Applications.



ROTRON DC FANS BRUSHLESS DC WITH ROTRON BATAC®

The Batac solid-state DC to AD single-phase inverter gives long, maintenance-free life to air-moving devices that operate on DC power. Single-phase fans mate with the low-voltage square-wave output of the Batac, eliminating the need for a transformer. The Batac/Fan combination offers all the advantages of AC operation—no brush dust or brush changes, arc-free operation, and no commutator to create RFI.

FEATURES

- Rotron reliability and performance from a DC power source
- Efficient—Every design tailored to a specific load
- Compact—Batac sizes range from 1⅜" x 1⅛" x 1" to 2½" x 3½" x 4⅛"
- Available with protection against accidental reversal of input voltage
- Offered with integral RFI suppression network
- For use in ambients between −40°C and +71°C
- Offered with voltage surge protection
- Reasonably priced

Also available for use with the aforementioned fans is a variety of solid state Deltac converters capable of increasing or decreasing output frequency with respect to input, on 115 VAC, single phase supplies.

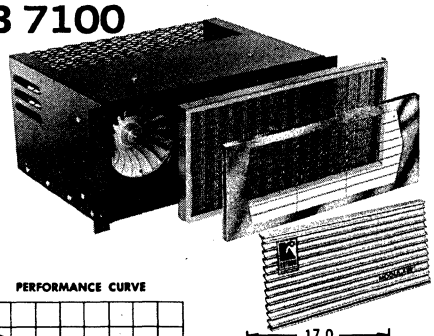
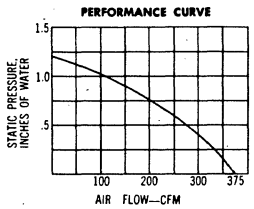
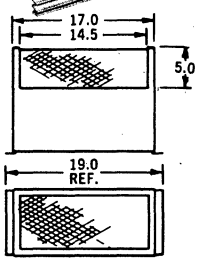
MB 7100







DESCRIPTION — The Modulair MB 7100 is a most efficient cabinet panel blower incorporating two (2) famous Rotron Centraxial wheels noted for their high pressure building characteristics and driven by two matched ball bearing motors, pre-lubricated for years of maintenance-free life.

The standard MB 7100 normally occupies a panel opening of 7", however, recessed models, Type 175 and Type 275, require only 5¼" panel space and utilize the cabinet space between the bottom cabinet frame and the base of the cabinet, with no loss in airflow.

The air is discharged evenly across the entire width of the Modulair in a turbulent pattern. The noise level is only 65 db (SIL).

WHERE TO USE — In EIA standard rack cabinets where component density is great and there is much resistance to airflow — where pressure building capabilities of the MB 7100 are necessary.

MOTORS

- Two (2) motors are used in MB 7100
- Ball Bearings
- Pre-lubricated
- Life — 5 years
- Thermal Protection standard

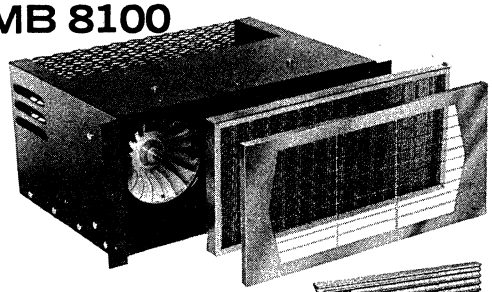
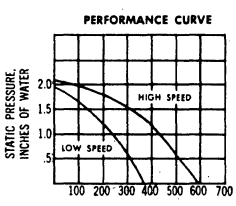
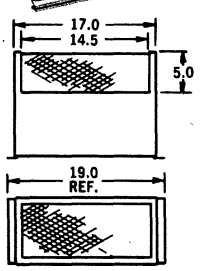
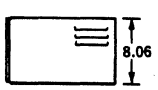
MB 8100









DESCRIPTION — Modulair Model MB 8100 normally occupies a panel space of 8¾" and delivers 600 cfm from two Rotron designed Centraxial wheels noted for their high pressure building characteristics and driven by two (2) matched ball bearing motors, pre-lubricated for years of maintenance free operation.

Modulair Model MB 8100, Types 175 and 275 are recessed models requiring only 7" panel space and utilize the space available between the bottom cabinet frame and the base of the cabinet, with no loss in airflow.

The air is discharged evenly across the entire width of the Modulair in a turbulent pattern to affect every area of the cabinet and eliminate hot spots. The noise level is only 75 db (SIL) at high speed and 70 db (SIL) at low speed.

WHERE TO USE — In EIA standard rack cabinets where component density is great and there is much resistance to airflow — where pressure building capabilities of MB 8100 are necessary.

MOTORS

- Two (2) motors are used in MB 8100
- Ball Bearings

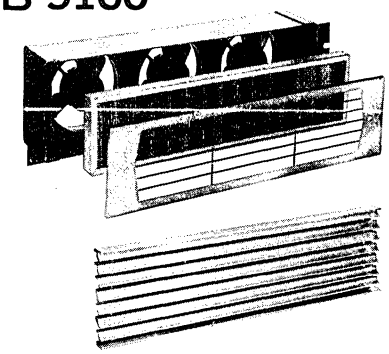
MB 9100



DESCRIPTION — Modulair MB 9100 series incorporates the performance capabilities of three (3) famous MUFFIN fans and delivers 240 cfm of clean, filtered air from a package only 5¼" high and 3½" deep. Life expectancy of the MUFFIN fan is 10 years.
The Modulair MB 9100 series can also be supplied with Rotron's ball bearing Sentinel and Spartan fans to meet military specifications or with Rotron's new Centaur for a 20% increase in air delivery. Model 9100 is impedance protected. The noise level is only 52 db (SIL).
WHERE TO USE — Modulair MB 9100 should be used in EIA rack cabinets where the component density and resistance to airflow is minimal and where there is relatively free passages for the flow of air.
DUST FILTERS — Modulair model MB 9100 comes equipped with low impedance, washable, 3 ply corrugated screen viscous impingement filter.

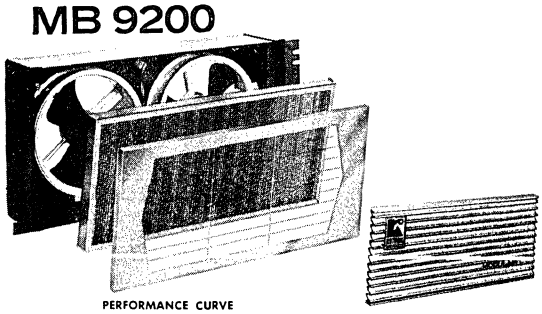
MB 9200



DESCRIPTION — Two (2) powerful ball bearing Rotron Feather Fans delivering 400 cfm from a package 8¾" high and only 3½" deep make up the Modulair MB 9200 series.
The Modulair MB 9200 can also be supplied with Rotron's Saucer fan to meet military specifications. Modulair MB 9200 can be supplied with thermal protection. The noise level is only 56 db (SIL).
WHERE TO USE — Modulair MB 9200 should be used in EIA rack cabinets where component density and resistance to airflow is minimal and where there are relatively free passages for the flow of air.
DUST FILTERS — All Modulairs come equipped with low impedance, washable, porous, Scott Foam filters enclosed in a rigid aluminum frame.

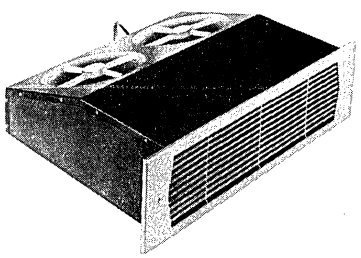
MB 5100 TWINPAX



DESCRIPTION — The Modulair MB 5100 Twinpax utilizes the performance capabilities of two (2) Rotron Feather Fans or two (2) Rotron Saucer Fans, as in Modulair MB 9200, to discharge 400 cfm of clean, cool, filtered air.
MB 5100 Twinpax requires only 5¼" panel space, an unusually low profile for a unit with so much performance.
Modulair MB 5100 Twinpax can be supplied with thermal protection. The noise level is only 55 db (SIL).
WHERE TO USE — Modulair MB 5100 Twinpax should be used in EIA rack cabinets where component density and resistance to airflow is minimal and where there are relatively free passages for the flow of air.
DUST FILTERS — Modulair MB 5100 Twinpax is supplied with a large permanent aluminum washable filter.

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem,** the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

ADVANTAGES OF ALSIMAG® TECHNICAL CERAMICS

MORE MATERIALS

For many decades American Lava has worked with leading firms to develop special ceramics for their advanced designs. The result is the greatest number of special ceramic compositions available from any source. This wealth of ceramic materials can help in two ways. First, it may give you the exact performance you require. Second, it enables you to select the most economical material that meets your design requirements.

MORE PROCESSES

American Lava offers the broadest processing capabilities in the industry. These include forming ceramics by all modern methods including pressing, extrusion, injection molding, isostatic pressing, plus metallization, plating, chemical milling, machining, grinding, lapping, and hermetic bonding.

Many of these processes were pioneered by American Lava. Examples are (1) the ability to produce certain as-fired ceramics to precision tolerances and (2) the proprietary AlSiBase process for producing thin flat ceramics.

MORE SPECIALIZED ENGINEERING TALENT

American Lava, built on engineering ability, has demonstrated that it is the best source for any problem involving technical ceramics.

GREATER PRECISION

Technical ceramics play an increasingly important part in American industry because they can meet especially demanding requirements. American Lava has the experience, know-how and facilities to produce ceramics to the closest tolerances, and to measure and inspect them by agreed means.

MORE MODERN DESIGNS

Technical leadership at American Lava Corporation is based on working with its customers to give them what they want. This currently involves work on composite substrates, composite packages, buried metal patterns, super-smooth and flat substrates, special temperature compensating dielectrics, ceramic capacitors and new ceramic coatings for metal and low expansion glass.

VOLUME PRODUCTION

American Lava has the resources, know-how and the desire to make commitments required to meet volume requirements of its customers. A long parade of firsts in new manufacturing capabilities have allowed American Lava to keep pace with the ever changing need for technical ceramics in volume.

EXPEDITED PROTOTYPES

Special procedures speed the production of prototypes for your evaluation. A chart giving the characteristics of our most frequently used AlSiMag ceramic compositions will be sent on request. Suggestions are available from our specialized engineering staff.

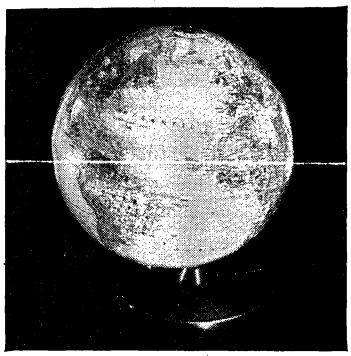
70th YEAR OF CERAMIC LEADERSHIP

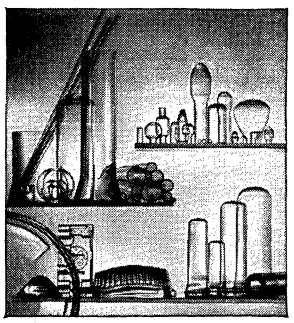


Worldwide Service and Prompt Delivery for Quartz, Lucalox® and Electronic Glass Products

G

GLASS

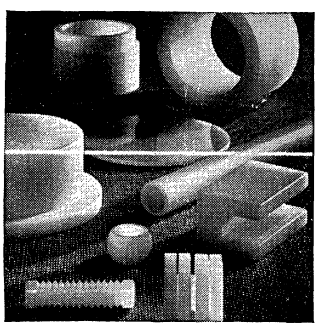
Machine-pressed shapes, formed to specification without additional grinding and polishing, can be furnished in a wide variety of glass compositions. At far right, is an example of an as pressed lens system for an audio visual entertainment unit for children. A highly experienced staff is available for customized orders in glass tubing, special glass formulations (beads) and other glass components.



L

LUCALOX®

Lucalox®, a polycrystalline alumina, is available in standard tubing, rod, plates, discs and custom parts. This versatile ceramic is ideal for such critical applications as electrical insulators in corrosive environments, where wear surfaces require dimensional stability and for windows when low loss factor is important. Lucalox can transmit up to 90% of total light in the visible spectrum. Outstanding characteristics include: chemically inert to cesium, fluorine, sodium, potassium; transmits radiation in both visible and infrared wave lengths; surface may be polished to less than one micro-inch; high dielectric strength. Lucalox can be fabricated to complex specifications. Standard shapes in stock.



Q

QUARTZ

General Electric high purity fused quartz is available in clear and translucent tubing and rod, solid shapes, standard fabrication, and to custom specifications. New Type 125 fused quartz, a high-quality, economical material which features the absence of large bubbles, is suitable for commercial grade optical and mirror applications. It has low stress birefringence and high transmission in both UV and IR wavelengths.

Insulating Tubings and Sleevings- High Temperature Wire and Cable

HYGRADE®

HYGRADE Fabric-Base Insulating Sleevings, the oldest and best known in the industry, are constructed of carefully braided fiberglass yarn, impregnated and coated with varnishes, vinyls, resins, or silicone rubber compounds.

HYGRADE SR-398 Silicone Rubber Coated Fiberglass Sleeving is a Class H material of closely woven glass braid coated with highly abrasion-resistant silicone rubber.

HYGRADE SV-862 Silicone Varnish Impregnated Fiberglass Sleeving is a flexible Class H insulation with unusual resistance to temperature extremes and weathering.

HYGRADE VF Flexible Fiberglass Sleeving is a tough, Class B insulation of plastic-covered fiberglass combining excellent electricals, flexibility, heat stability.

HYGRADE Polytube 463 Class F Flexible Fiberglass Sleeving is an acrylic-coated material compatible with the wire enamels used in motors and transformers.

HYGRADE Polytube 962 Class F Flexible Fiberglass Sleeving is a polyurethane-coated insulation compatible with the wire enamels in motors and transformers.

HYGRADE Thermoflex 1200 Class C Flexible Fiberglass Sleeving is made of 100% tightly braided fiberglass. For use at continuous temperatures as high as 1200°C.

HYGRADE Thermoflex 500 Class C Flexible Fiberglass Sleeving is made of tightly braided and pigmented fiberglass. For continuous operating temperatures to 500°C.

Ask for data sheets on these HYGRADE and FLEXITE products

FLEXITE®

Included in the FLEXITE line are extruded plastic tubings of Teflon, Silicone Rubber, Vinyls, Polyethylene, Nylon, and other plastics; Shrinkdown Heat Shrinkable extruded Tubings; and TGL Triangular Guide Line Wrapping Tape.

FLEXITE TFE Extruded Tubing of DuPont Teflon is a flexible material for continuous use at 250°C, with outstanding electricals, heat stability, chemical resistance.

FLEXITE AR-400 Modified Teflon Tubing is a flexible material with exceptional abrasion and cut-through resistance at temperatures from −70°C to 250°C.

FLEXITE SR-200 Silicone Rubber Extruded Tubing is made of an extremely elastic compound, and is excellent for high voltage applications at Class H temperatures.

FLEXITE Teflon FEP Extruded Tubing is a fluorocarbon tubing suitable for continuous use at 200°C. It possesses outstanding electricals and chemical resistance.

FLEXITE HT-105C Extruded Vinyl Tubing is U/L recognized for continuous use at 105°C. It is a strong, very flexible tubing suited for many general applications.

FLEXITE E Extruded Vinyl Tubing is an extremely flexible tubing designed primarily for low temperature applications (to −68°C), as in aeronautical instrumentation.

FLEXITE Polyethylene is a flexible Class A tubing offering excellent electricals, compatibility and abrasion resistance over a wide (−70°C to 80°C) temperature range.

FLEXITE Shrinkdown HT-105 Heat Shrinkable Tubing is a flexible material supplied in expanded sizes to cover shapes; it shrinks 50% on application of heat (190°F).

FLEXITE Shrinkdown PO-135 is a Class B flexible tubing which shrinks at 235°F. It is widely used to jacket cables, insulate terminals, and as a printed marker.

FLEXITE Shrinkdown TE-250 is a Heat Shrinkable Teflon Tubing for use at Class H temperatures. It shrinks at 621°F to make a form-fitting Teflon cover over shapes.

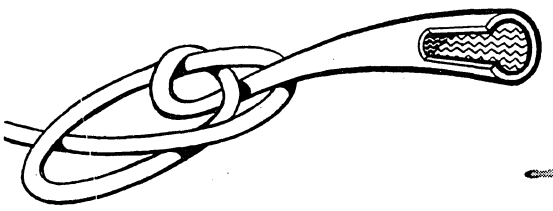
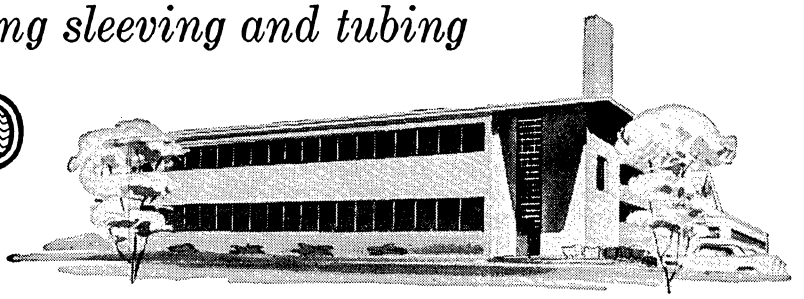
RELIABLE PRODUCTS DELIVERED ON TIME

VARFLEX *the complete line*

of electrical insulating sleeving and tubing





Whatever your problem, heat, cold, flexibility miniaturization, high insulating or dielectric strength—Varflex can supply the required reliability and delivery. Our rapidly expanding plant is fully equipped to supply sleeving for any combination of characteristics you may need. In addition to maintaining large stock for off-the-shelf delivery, Varflex has the productive capacity to provide prompt delivery (often 48 hours) on special orders. As insulation specialists, we are ready to work with you on unusual specifications or applications.

Check your needs against this complete line:

VARGLAS SILICONE RUBBER. Tubing: The ultimate in flexibility, yet dielectric protection to 8000 volts. Class H-A-1 certified to meet Government Specification MIL-I-18057 (SHIPS). Class H-B-1 (4000 volts) available, also. Continuous exposure from minus 70° to 400°F. does not affect coating or Fiberglas braid. Sleeving: Made in Class H-C-1 (2500 volts), Class H-C-2 (1500 volts) and Class H-C-3.

VARGLAS SILICONE RESIN. Tubing: Class H-A-1 is recommended for applications requiring extremes of heat endurance and high dielectric strength (7000 volts). Class H-B-1 is identical except for dielectric guarantee (4000 volts). Good abrasion resistance. Both grades conform to MIL-I-3190A. Sleeving: Made in Classes H-C-1 (2500 volts), H-C-2 (1500 volts) and H-C-3.

SILFLEX SLEEVING. A light coating of Silicone resin on Fiberglas braid. Extremely flexible within a temperature range from minus 85°F. to 500°F.

VARGLAS SILICONE LEAD WIRE. Made from solid or stranded wire covered with one or more walls of Fiberglas braid and impregnated with Silicone. Built to your specifications.

VARGLAS SILICONE TYING CORDS. Continuous filament Fiberglass cords impregnated with Silicone resin, ¼" to ½" diameter. Specify Type 46 for dry cure, Type 48 for tacky cure.

VARGLAS CLASS F TUBING. Made with synthetic resins such as epoxy, polyester or urethane on glass braid and offering better than Class B heat resistance (up to 155°C for continuous operation) while maintaining good electrical properties.

VARFIL TUBING AND SLEEVING. Fiberglas braids impregnated with polyester resin. Four grades available in coils as well as 36" lengths in most sizes. In a class by itself because of its toughness, flexibility, high temperature resistance and ability to withstand bending and twisting without dielectric loss. Compatible with varnish. Over 1000 hours at 125°C., with intermittent operation at 150°C.

VARFLO TUBING AND SLEEVING. Class B insulation. For those who need flexibility, solvent, oil and moisture resistance. Has good shelf life and will not lose dielectric strength when subjected to severe twisting. Three grades . . . Classes B-A-1, B-B-1 and B-C-1. Flame and fungus resistant if specified. B-A-1 approved under MIL-1-21557. Passes proposed Navy 90° bend test after 2,000 hours at 300°F with 3500 volt end point.

VARGLAS VARNISHED TUBING. Flexible continuous coatings of flame resistant varnish built up over Fiberglas braid in eight or more carefully controlled operations. Varnished tubings have thinner walls and good heat resistance.

VARGLAS VARNISHED SLEEVING. NEMA Classes B-C-1, B-C-2 and B-C-3 are similar except for dielectric strength. The impregnant is oleoresinous varnish.

VARGLAS ACRYLIC CLASS F (155°C). Highly resistant to acids, organic solvents, oils and water and exhibits fair resistance to alkalies. It is compatible with polyester, acrylic, epoxy, phenolic and formvar wire enamels. Designed to perform for long periods in the 150°C-175°C range without loss of any electric or physical properties. All standard grades.

VARGLAS LECTON ACRYLIC. Specifically designed for hermetic motors. Non-contamination of Freon and other refrigerants in Class B motors. B-A-1, B-B-1, and B-C-1 grades.

VARGLAS NON-FRAY SLEEVINGS: Type H: The normalizing treatment given the Fiberglas braid removes the organic impurities and tends to hold the individual filaments together. The lack of any bonding agent means it may be subjected to temperatures as high as 1600°F. Recommended for applications where dielectric requirements are not of prime importance. Resists fungus and is noncorrosive. Type HP: Similar to Type H, but dyed various colors for coding purposes. Ideal as secondary insulation where primary covering might disintegrate due to high temperature or continual flexing. Colors may fade at 300°F. Type HO: A very light treatment of resin added after the braid has been normalized—just enough to hold the sleeving round for accurate cutting. Will distend to cover soldered joints or terminals. Available in eight colors. Colors fade at 300°F., but sleeving unaffected up to 1600°F. Better by 400° than formerly available.

VARGLAS LITEWALL SLEEVING. Wall thickness of Type A is .008" and of Type B, .006". Both types available untreated or treated. If treated, may be supplied in colors. Standard I.D. sizes 1/16" to ½" inclusive. Larger sizes on request.

SYNTHOLVAR EXTRUDED TUBING. Made from vinyl polymers. High dielectric and tensile strength. Will not support combustion nor absorb moisture. Smooth surface, thin wall and flexibility all make for ease in assembling operations. Super HH for installations where temperatures of 105°C. must be withstood. Type XLT will function at temperatures down to —65°C. Specify fungus resistant tubing where needed. Conforms to applicable MIL specifications.

COTTON OR RAYON TUBING. These tubings are furnished with varnish as the impregnant. They are braided from long staple yarns. Standard NEMA grades. They are Classes A-A-1 and A-B-1. Also, sleeving is available in three NEMA grades. Classes A-C-1, A-C-2 and A-C-3.

ELECTRONIC SUB-CONTRACTING

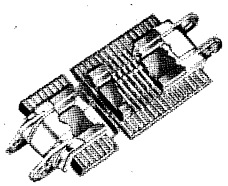
BUNKER RAMO AMPHENOL

Running Cables and Wired Products

Wired running cable assemblies offer the telephone industry the answer to one of its biggest operating questions: how to save time, effort, and money. Amphenol Cadre Division's wired running cables for key set installations are factory-wired.

With the plug-ended concept, the installer merely mates the Amphenol Micro-Ribbon® connectors (or plugs) on either end of the cable with another running cable key set, bridging adaptor or additional system component connectors. It takes seconds, is elementary, and is low in cost.

The Micro-Ribbon Connector



More than 100 million Micro-Ribbon Amphenol 57 Series Connectors are in use today, without a single reported failure.

Unlike pin-and-socket connectors, the Micro-Ribbon contacts are self-cleaning; all foreign matter is dislodged during insertion. Greater contact continuity is assured. And the ribbon type is less expensive, too, with off-the-shelf availability.

The Cable

Amphenol Cadre running cable is constructed of solid, annealed, bare copper wire insulated with high-density, heat-stabilized, color-coded, semi-rigid polyvinyl chloride. To minimize crosstalk, individual conductors are twisted in color-coded pairs. Outer jacket consists of polyvinyl chloride or equivalent material, resistant to moisture, weathering, abrasion, corrosion, heat, and environmental cracking. A nylon ripcord inserted between jacket and conductors allows free stripping of jacket without damage to conductors.

Electrical Characteristics

Conductor Size	24 AWG.
Maximum Conductor resistance at 68F (ohms/M ft.)	27.5
Average Mutual capacitance at 1 kHz (mf/M ft.)	0.17
Minimum Insulation resistance (megohms/M ft.)	100

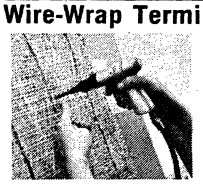
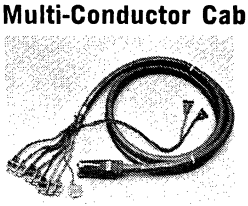
Wire-Wrap Termination



Amphenol Cadre delivers as many as 200,000 manual and semiautomatic wraps per day in 22 to 30 gage single, twisted-pair, or triple-twisted wire. Panels with up to 8,000 wraps and incorporating unique routing and buss configurations are shipped within several days of order.

Multi-Conductor Cables



Amphenol Cadre specializes in multi-conductor cables and is expert in every phase of production. Each cable must meet rigidly controlled quality standards at every stage of production. Just before shipment, each cable is again completely tested on custom-modified automatic inspection equipment.

Electromechanical Assemblies

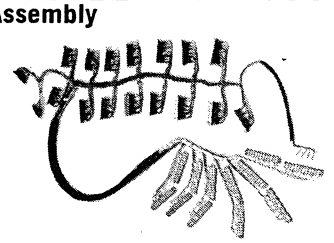
Amphenol Cadre can help keep you on schedule and your costs in line. Temporary plant overloads not only delay shipments but also tie up valuable time and material in process. Extended overtime and decreased efficiency rapidly begin to cut into profits. One way to avoid these problems and stay on schedule is by subcontracting the over-capacity production.

Amphenol Cadre's reaction time is such that we can quickly absorb short-term plant overloads usually at a price less than in-house cost.

Working closely with a customer's engineering laboratory, our production design people can competently turn engineering models into practical production realities.

Our design recommendations on chassis and printed circuit board layout, harness and cable configurations, molded plastic alternates for costly hardware, and connector and termination approaches have saved many manufacturers expensive trial and error prototype production and redesign.

Harness Assembly



Amphenol Cadre has years of experience in harness manufacturing. One result has been a large accumulation of harness know-how. Many customers come to Amphenol Cadre for redesign of point-to-point wiring in engineering prototypes; others for high volume production of complex harness systems.

When advanced programs require optimum-reliability intra-unit connections, many defense contractors turn to Amphenol Cadre for high environmental harness systems.

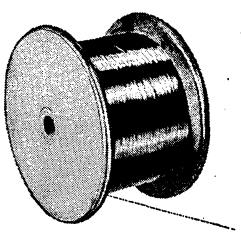
We have a way with wire

(any way you want it)



For example. Let's take a spool of wire. We can straighten it and cut it. (Diameters from .004 to .125, in lengths from .020" to 12 feet). And form it into shapes of all kinds. Or coil it. Head it in sizes as fine as .008". Upset it even in multiples as fine as .009". Or flatten it wherever you want. Pierce it to specs. Swage it in many ways. Or chamfer one end or both ends–make a full radius on .025". And even give you any combination you may want.

Our range is from fine of .004" to heavy .125". Parts shown are subject to type of wire and temper. Send us your drawings and specs for an estimate. No obligation. And if you need **small metal stampings,** we do that too.

Fused quartz or fused silica. Call on Amersil.

When your plans call for fused quartz or fused silica, call us. Amersil produces both in forms that are highly pure, non-contaminating, resistant to acid and thermal shock, and exhibit high dielectric strength. Our materials can be ordered in a variety of forms and sizes that are either transparent, opaque, or combinations of each. Both types are available as furnace tubes, epitaxial reactors, bell jars, insulators, slice boats, diffusers, distillation apparatus, beakers, flasks, joints . . . and tubing, rod, plates and discs. Amersil is also sales agent for Worden Quartz microbalances and springs.

Triple header

Thermometals® for thermostatic functions

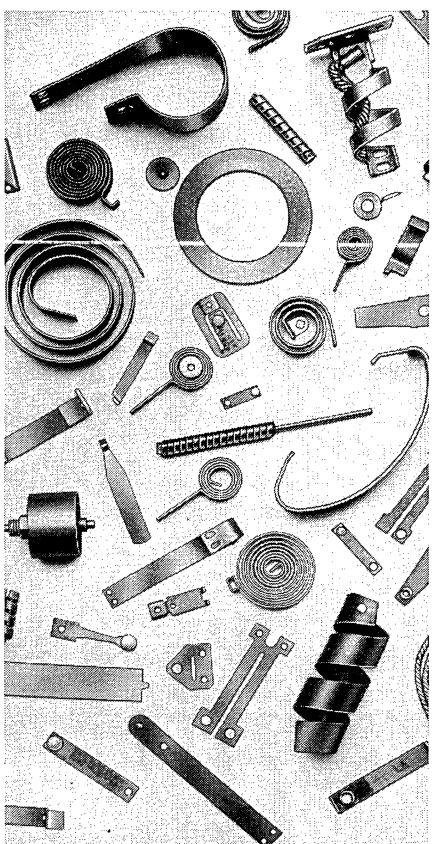
Thermometals are thermostatic bimetals that change shape with temperature and build up force with change of temperature when constrained. They can be used for Temperature Indication, Control and Compensation or Sequence Control. Thermometals can be rolled to any thickness, formed into almost any shape . . . plated, brazed or welded.

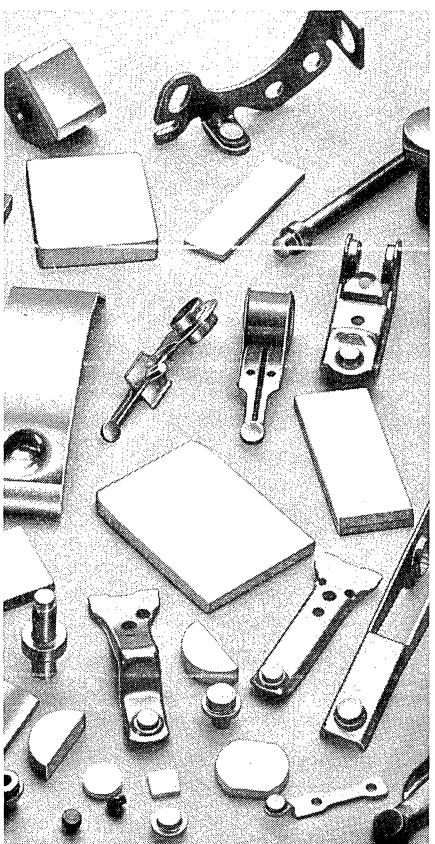
Tungsten and sintered metals for contacts

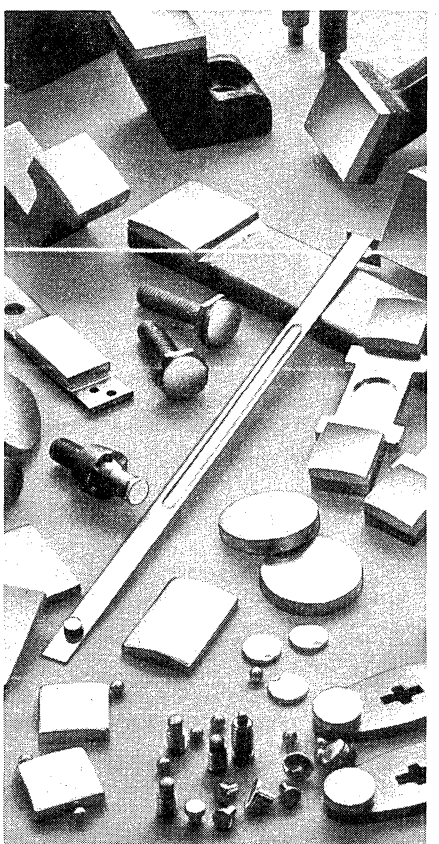
Ideal materials for contacts for heavy duty applications. Our special powder metallurgy processes make possible contacts of sintered materials that can't be alloyed. Available in rivet form, steelbacks, faced screws, discs, washers and special shapes. Assemblies available riveted, hot upset, welded or brazed.

Precious metals and alloys for contacts

Over 1750 precious and sintered metals for electrical contacts. With this variety we can produce every conceivable form of contact in sizes ranging from microminiature to 1¼ in. square (NEMA #6 & #7) motor starters. Whether it's for make and break or for rotating systems we can design and produce the contacts you need.







We have the experience, the engineering and production capabilities to solve any of your contact or thermostatic metal problems. For information and/or engineering assistance write the H. A. Wilson Technical Service Department.

440	.488 ± .002		.205 ± .008

Type E086: Linear Resistance Range: 100Ω to 1M ±20%: 13 ranges

Effective angle of rotation ..... 240 ±5°
Maximum permissible power dissipation (of total resistance) at an ambient temperature of 40°C 0.1W
Permissible ambient temperature range ..... −25° to +70°C

Type E097: Linear Resistance Range: 100Ω to 4.7M ±20%: 15 ranges

Effective angle of rotation ..... 220 ±5°
Maximum permissible power dissipation (of total resistance) at ambient temperature of 40°C 0.25W
Permissible ambient temperature range ..... −25° to +70°C

Type 440: Linear Resistance Range: 4700Ω, 10KΩ, 22KΩ, ±20%

Nominal resistance values 4.7K, 10K, 22K
Resistance law ..... linear and logarithmic
Working temperature range ..... −10° to +70°C
Life expectancy ..... in excess of 15,000 cycles

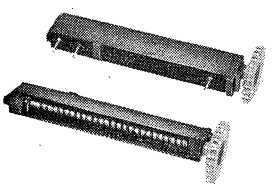
CARBON PRE-SET POTENTIOMETER

Application:
These potentiometers have been designed for pre-set resistance adjustment in capacitance diode television tuners. However, they can also be applied for capacitance diode tuning of other apparatus, e.g. radio receivers, or for any other fine resistance adjustment.

Construction:
The straight carbon track is fitted in a housing of black synthetic resin. The slider, which is connected to the centre contact, is activated by a silvered brass spindle. No damage occurs when one continues to turn the spindle after the slider has reached the extreme position. For adjustment the spindle is provided with a plastic knurled wheel.
The potentiometers are suited for mounting on printed-wiring boards.

Technical Performance

Nominal resistance values ..... 1K-2.2 Megohms
Tolerance on the nominal resistance ..... ±20%
Maximum permissible dissipation at 70°C (P_n) 0.125W
Maximum current through slider contact ..... 1 mA
Voltage range between pins 1 and 3 (or 4) at a voltage of 30 V_{dc} connected to pins 1 and 2 ..... 0.1±0.1 to 29.5+0.5 V_{dc}
Limiting voltage ..... 100 V_{rms}
Setting stability at ΔT_{amb} = 30°C and 0.1 P_n ..... ≤0.1%
Setting stability after damp-heat test (21 days, T_{amb} = 40°C, R.H. = 90—95%) and at 0.1 P_n ..... ≤0.5%
Repeatability (clockwise or counterclockwise) 0.1%
Operating-temperature range ..... −10 to +70°C
Operating torque ..... 0.5 — 1 Ncm
Number of effective operating turns 20



VOLTAGE DEPENDENT

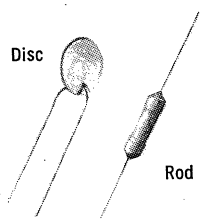
Most important property is the non-linearity between their resistance and the applied voltage. Voltage dependency is due to contact resistance between the silicon carbide crystals. Crystal contacts form a network of series and parallel resistors which determine the electrical characteristics.

Available Types

Disc types available: 0.8W to 3W
Rod types available: 0.7W

Applications

VDRs can be used in spark suppression and contact-protection applications, as well as in series with a resistor for voltage stabilization. Although the stabilizing circuit with a VDR cannot compete with more elaborate circuits, it has vital advantages of simplicity and small space adaptability.



POSITIVE TEMPERATURE COEFFICIENT THERMISTORS

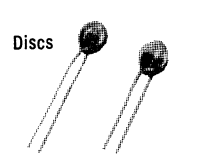
PTC Thermistors increase in resistance as the temperature increases. PTCs are disc shaped with connecting leads and are lacquer coated for protection against atmospheric influences.

Available Types

Standard Discs 1W 40 to 50V series
Standard Discs 0.5W 25V series

Applications

Resistance changes of 10%/°C or better permit the use of PTCs wherever any of the following factors are decisive: ambient temperature; dissipated power; inertia of PTC and positive temperature coefficient.



NEGATIVE TEMPERATURE COEFFICIENT THERMISTORS

NTC thermistors are resistors which exhibit a high negative temperature coefficient of resistivity. They are made of semiconducting oxidic materials. The resistance of the oxides decreases rapidly when the temperature rises.

Available Types

Rod Type
Disc Type
Miniature Bead Type
Special Types for Automobiles
Special Types for Radio and TV

Applications

Resistance changes of 3% to 6% per °C permit the use of NTCs in applications such as: ambient temperature measurement and control; resistance determined by dissipation and time delays.

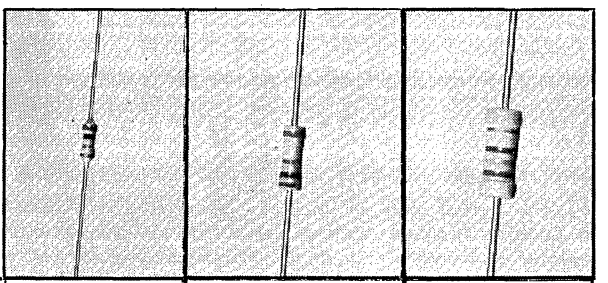
Amperex CARBON FILM FIXED Resistors

High stability, very low noise level, and exceptionally long life make these resistors ideal for applications requiring a steady low power drop. Their accuracy and consistency are relatively unaffected by adverse climatic conditions.

Resistors of 10Ω to 10MΩ have a homogenous film of pure carbon deposited on a high grade ceramic body by cracking a hydrocarbon gas. Resistors having values lower than 10Ω have a nickel film instead of cracked carbon.

Contact caps of special alloy are pressed onto the ends of the resistor body to which the tin coated electrolytic copper connecting wires are welded. Finally the resistors are coated with three or more layers of a special lacquer for electrical, mechanical and climatic protection. This special lacquer will withstand regular industrial cleaning solutions used for cleansing printed circuit boards.



SPECIFICATIONS	⅛W (CR16)	¼W (CR25)	½W (CR37)
Power rating P_{NOM} T_A <70°C	0.125W	0.25W	0.5W
Maximum voltage AC or DC	150V	250V	350V
Voltage (RMS) that may be applied for 1 sec. across insulated coat	300V	500V	700V
Insulation resistance	10^4MΩ	10^4MΩ	10^4MΩ
ALL TYPES			
Ambient temperature	−55 to +155°C		
Temperature coefficient	see figure 2		
Noise voltage	see figure 1		

Voltage Breakdown

2x limiting voltage for 1 min. between terminals of resistor and metal foil ..... no breakdown or flashover

Short Term Overload (Room Temperature)

loaded 5 sec. at 6.25 P_{MAX} at 25°C (not to exceed 2x maximum voltage)
10 cycles: 5 sec on 10 sec off

ΔR_{MAX} 1%

Shelf Test at 25°C_{NOM} for 12 months

ΔR_{MAX} for R < 1MΩ 1.5%
R > 1MΩ 3%

Temperature Cycling

5 cycles: 3 hours −55°C
3 hours +155°C
ΔR_{MAX} .....0.5% or 0.5Ω

Humidity Specifications

After long-term exposure to damp heat at 40°C, 5 VDC
RH = 90-95% for 56 days with no drying
5 VDC

ΔR_{MAX} for R_{NOM} = 10Ω to 100 kΩ 1%
R_{NOM} = 100 kΩ to 1MΩ 2%
R_{NOM} = 1 MΩ or higher 3%

Solder Test (thermal shock)

Terminations immersed for 3 sec. up to .24 inches from end cap in solder bath at 350°C

ΔR_{MAX} .....0.5% or 0.5Ω

Lead Test

a. Tensile: diameter .024-.032 inches; load 2.20 lbs; 10 sec.
diameter > .032 inches; load 4.41 lbs;
10 sec. .....no damage

b. Bending: diameter .024-.032 inches; load 1.10 lbs; 4 x 90°
diameter > .032 inches; load 2.20 lbs;
4 x 90° .....no damage

c. Torsion: 2 x 360° in opposite directions .....no damage

ΔR_{MAX} (for all tests) .....0.5% or 0.5Ω

Shock Test

3 x 1500 shocks in three directions: 50 G;

ΔR_{MAX} .....0.5% or 0.5Ω

Vibration

Frequency: 10-500 Hz
Displacement 0.06 in. or acceleration 10G; three directions; total 9 hrs.

ΔR_{MAX} .....0.5% or 0.5Ω

Voltage Coefficient 5PPM/Volt (0.0005%/Volt)

Resistor Range

Style	Limiting Voltage (Vdc or Vrms)	Resistance Range	Tolerance ±
CR16 (⅛ Watt)	150	10Ω to 220kΩ 270kΩ to 1MΩ	5% 10%
CR25 (¼ Watt)	250	1Ω to 9.1Ω 10Ω to 1MΩ 1.2MΩ to 10MΩ	5% 2% or 5% 10%
CR37 (½ Watt)	350	1Ω to 9.1Ω 10Ω to 1MΩ 1.2Ω to 10MΩ	5% or 10% 2%, 5%,or 10% 10%

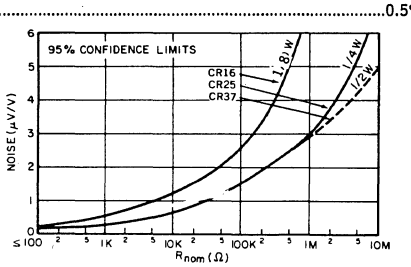


Figure 1. Noise as a function of the resistance value, applicable to all resistor wattages (as per IEC specifications 195; Method of measurement of current noise generated in fixed resistors).

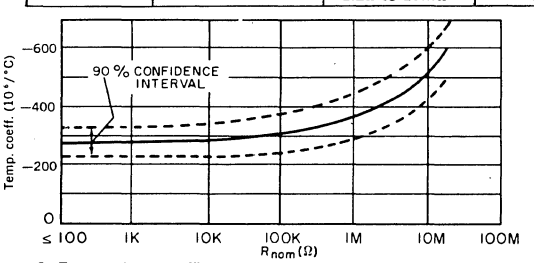

Figure 2. Temperature coefficient as a function of the resistance value, applicable to all resistor wattages.

PRECISION WIRE-WOUND RESISTORS

Balco/Marstan brings together the precision capacitor experience of Balco Capacitors and the precision resistor capability of Marstan Electronics. Balco/Marstan specializes in the design of ultraprecision film capacitors, wirewound resistors, and networks — resistive, capacitive, or RC. The product line — special or standard — is designed for the user who needs a combination of demanding performance parameters such as high stability, low temperature coefficient, and tight tolerance over a wide range of environmental extremes.

BALCO/MARSTAN ENCAPSULATED RESISTORS
Feature:

- Accuracies to 0.005%
- Matching of Sets to 0.005%
- Tracking of 1 PPM/°C
- Available Per MIL-R-93D

RESISTANCE WIRE CHARACTERISTICS

The following chart lists typical specifications. Special techniques developed by Marstan permit reliable combination winding of the listed alloys to provide any value of temperature coefficient from −10 to +6000 PPM/°C.

WIRE TRADE NAME	TEMPERATURE COEFFICIENT (PPM/°C)	THERMAL EMF vs COPPER (μV/°C)	RESISTIVITY (ohms/cmf)	USES
Moleculoy III Alloy COJ	0 ±5 0 ±5	+3.0 +10.0	800 1040	For high resistance values and very low temperature coefficient requirements. Excellent for resistive network applications.
Moleculoy Allow 800 Evanohm	0 ±20 0 ±20 0 ±20	+3.0 +2.5 +2.0	800 800 800	For high resistance values and low temperature coefficient requirements. Good for resistive network applications.
Neutroloy Alloy 45 Cupron	0 ±20 0 ±20 0 ±20	−43.0 −43.0 −43.0	300 300 300	For low resistance values and low temperature coefficient requirements. Good for resistive network applications.
Protoloy Alloy A Tophet A	+80 ±20 +65 +85	+6.0 +6.0 +4.7	650 650 650	For high resistance values and positive temperature coefficient requirements. Used for matching capacitor temperature coefficient in RC network applications.
Electroloy Alloy C Tophet C	+150 +150 +150	+2.0 +2.0 +0.6	675 675 675	For high resistance values and positive temperature coefficient requirements. Used for matching capacitor temperature coefficient in RC network applications.
Pelcoloy Balco	+4500 +4500	−40.0 −40.0	120 120	For high temperature coefficient requirements. Good for temperature sensitive resistor applications.
Nickel 270 HP Nickel	+5000 +6000	−22.0 −22.0	60 50	For very high temperature coefficient requirements. Excellent for temperature sensitive resistor applications.

For Precision Capacitors see pages 2346 and 2347; for Precision RC Networks see page 1296.

PRECISION RESISTOR TYPES

MAW axial lead resistors are suitable for point to point wiring. Standard units are supplied with 2 inch solderable leads, but can be provided with weldable leads. Available in a range from 0.1 ohm to 20 megohms and 0.1 watt (0.093″ diameter x 0.188″ long) to 2 watts (½″ diameter x 2″ long).

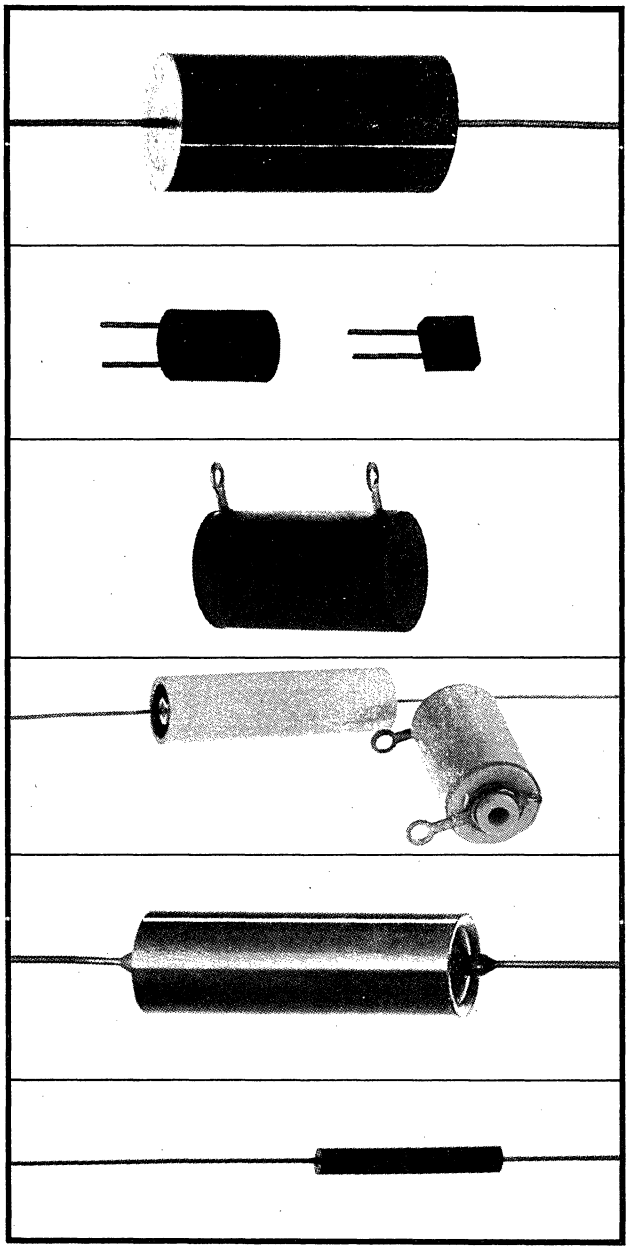
MPC printed circuit style resistors are designed for applications where board space is critical. They are available in a range from 0.1 ohm to 10 megohms and ¼ watt (¼″ diameter x ⅜″ long) to 1½ watts (½″ diameter x 1½″ long).

MRL radial lug resistors are designed for center hole mounting to provide a rugged, space saving configuration. They can be provided with radial lead wire, if required. Available in ranges from 0.1 ohm to 15 megohms and ¼ watt (¼″ diameter x ¼″ long) to 2½ watts (⅞″ diameter x 2⅛″ long).

MCRL and **MCAW** ceramic bobbin resistors provide exceptionally high stabilities under wide extremes of temperature. Axial leads are standard on the MCAW series, while radial lugs or leads are available on the MCRL series.

MAHS hermetically sealed resistors provide exceptionally high stabilities under extreme environments. The MOA oil filled, hermetically sealed series is designed to permit more effective transmission of heat from the winding to the metal case and to provide greater long term stabilities.

Specials include the MTS series of temperature sensitive resistors with matched temperature coefficient characteristics, MNS "needle" shape and Multi Tap Precision Resistors. Many special sizes and shapes can be tailored to meet your specifications.



PRECISION NETWORKS

Our unique side by side resistor and capacitor processing ensures the ultimate in component compatibility and overall network performance. Resistors and capacitors can be precisely matched to track over wide temperature ranges.

Typical Networks Manufactured by Balco/Marstan:

- Matched impedance Attenuators
- Summing Networks
- Integrators
- Voltage Dividers
- Phase Shifters
- Binary Resistance Networks
- Twin T Networks
- Bridges
- A/D and D/A Converters
- Timing Networks

S-Level Hot-Molded Fixed Resistors.

Allen-Bradley hot-molded composition resistors are approved for the S-LEVEL of MIL-R-39008 in all wattage ratings and resistance values. Available in this high reliability category are style RCR05—⅛ watt, RCR07—¼ watt, RCR20—½ watt, RCR32—1 watt and RCR42—2 watt.

Allen-Bradley's exclusive hot-molding process molds the resistance material, insulation, and lead wires into a solid, integral structure. The result is a uniform, rugged unit that has excellent thermal characteristics.

RELIABLE—Recognized as the most reliable of all electronic components. We have accumulated over 300-million test hours in accordance with MIL-R-39008.

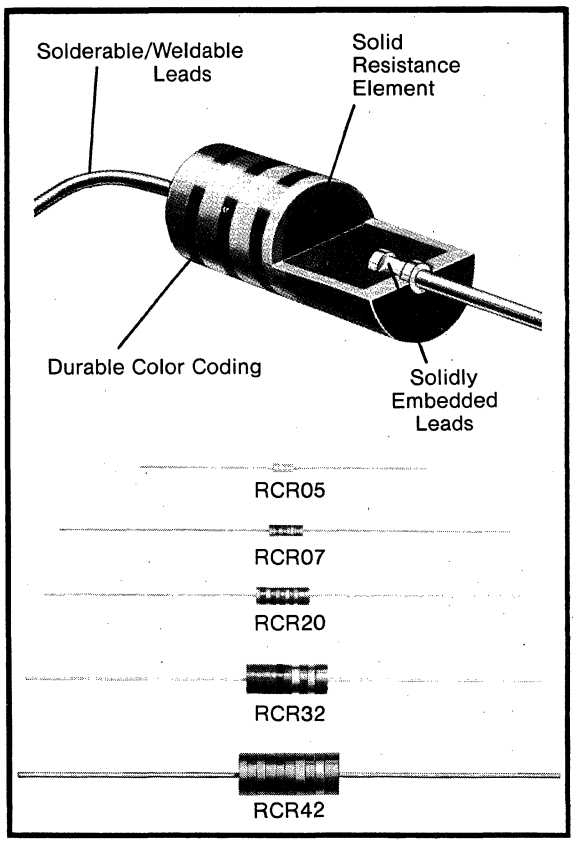
TRACKING—When tested in flip-flop circuits, pairs of A-B resistors randomly drawn from the same package or reel track with each other throughout changes of temperature, humidity, and load.

CONSERVATIVE RATINGS—All performance specifications are based on extensive testing, protracted field experience, and substantial safety factors.

TEMPERATURE STABLE — Between 0°C and 85°C, A-B hot-molded resistors exhibit a very low temperature characteristic, typically less than two or three percent deviation from room temperature values.

SOLDERABLE/WELDABLE LEADS—The hot-solder coated, oxygen-free copper leads are suitable for soldering or welding.

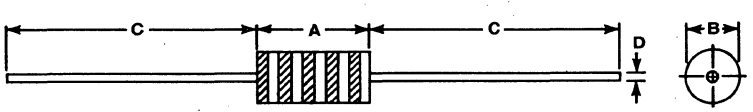
MASSIVE RESISTANCE ELEMENT—Large, uniform cross-section of the conducting material results in low current density without hot spots. This means a high overload capacity.



SOLIDLY EMBEDDED LEADS—Lead wire ends are formed to provide secure embedment and large contact area.

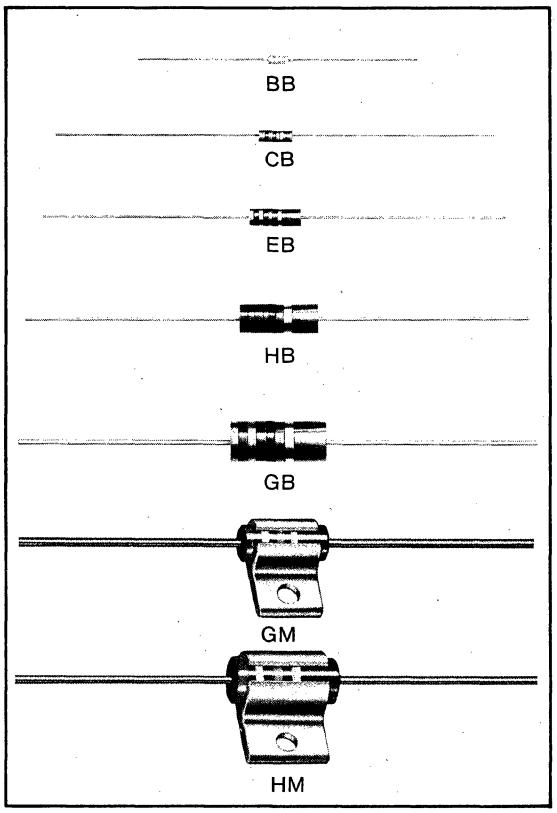
PERMANENT COLOR CODING—Bright, baked-on colors are highly resistant to commonly used solvents.

Style	Power at 70°C	Resistance Range	Tolerance	Voltage Rating (RMS)	Dimensions (Inches)			
					a	b	c	d
RCR05	1/8 watt	2.7 ohms to 22 megohms	±5% ±10%	150 V	0.145	0.062	1.0	0.015
RCR07	1/4 watt			250 V	0.250	0.090	1.5	0.025
RCR20	1/2 watt			350 V	0.375	0.140	1.5	0.033
RCR32	1 watt			500 V	0.562	0.225	1.5	0.041
RCR42	2 watt	10 ohms to 22 megohms		500 V	0.688	0.312	1.5	0.045



ALLEN-BRADLEY

Milwaukee, Wisconsin 53204



Hot-Molded Fixed Resistors.

Allen-Bradley hot-molded composition resistors are high-quality units intended for general purpose use in the electronics industry. They are backed by many years of manufacturing experience comprising billions of resistors. All units feature rugged and reliable construction, solderable/weldable leads, uniform tracking characteristics, temperature stability, and conservative ratings.

These resistors are available in five ratings—⅛ watt (BB), ¼ watt (CB), ½ watt (EB), 1 watt (GB), and 2 watt (HB). Because of their small size, uniformity, ruggedness and moderate cost, they are equally at home in industrial or consumer product applications. Units are available in all standard EIA and MIL resistance values.

Copper-clad hot-molded resistors (Types GM and HM) are vested with copper clamps for rigid mounting directly on metal chassis or panel. Such mounting is an advantage in equipment subject to shock and vibration. The copper efficiently conducts heat from the resistors to the chassis or panel. Insulation resistance is greater than 100,000 megohms. And the electrical insulation between the leads and the copper clamp can easily withstand 1500 volts. Capacitance between lead wires and clamp is approximately 5.6 MMF for Type GM and 9 MMF for Type HM.

Type	Power At 70°C	Resistance Range	Tolerance	Voltage Rating (RMS)	Maximum Ambient Temperature	Dimensions (Inches)						
						a	b	c	d	e	f	g
BB	1/8 watt	2.7 ohms to 100 megohms	±5% ±10% ±20%	150 V	+130° C	0.145	0.062	1.0	0.015			
CB	1/4 watt	2.7 ohms to 100 megohms		250 V	+150° C	0.250	0.090	1.5	0.025

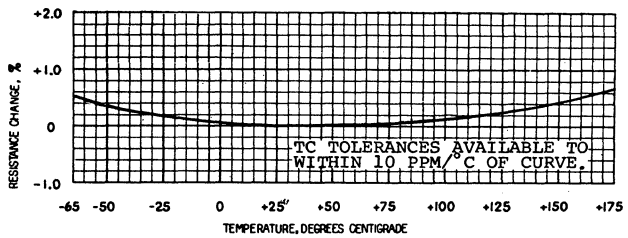
CADDOCK ADVANCED STATE OF THE ART

MICRONOX* Resistance Films

Micronox resistance films are produced exclusively by Caddock Electronics. They are composed of complex oxides fired in air at temperatures above 1400°F. The resulting films are relatively insensitive to high ambient temperatures and thermal shock. Precision resistors, useable to 1000°F. can be made with these films. The films show negligible effect from moisture.

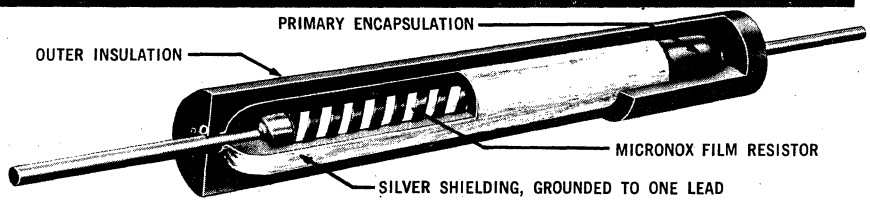
This totally new approach to precision resistors and networks opens new design possibilities because of the wide resistance range, precise temperature characteristics, and high temperature and power capability. Temperature coefficient can be accurately reproduced (±10ppm/°C. if required). The typical curve shown will vary slightly with resistivity of the film and configuration of the substrate.

Micronox oxide systems provide an almost continuous range of resistivity from 5 ohms per square to 25,000 ohms per square, without degradation of electrical characteristics throughout this range.

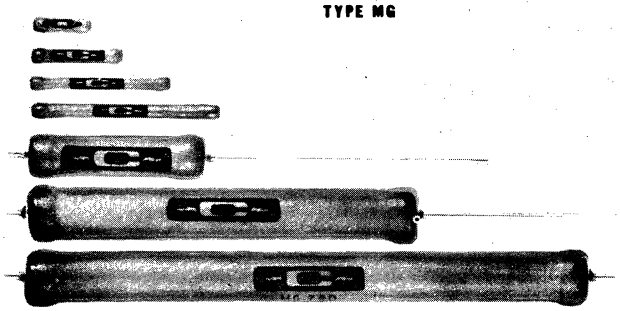


TYPE MG & MH Miniature Megohm Resistors

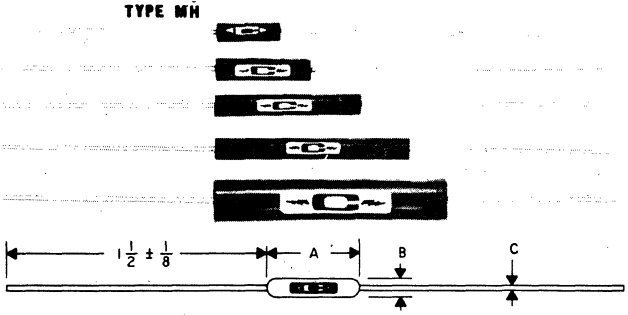
EXCLUSIVE SHIELDED RESISTOR MODEL MH711, designed for extremely high voltage applications, in very high resistance strings. Unit remains exceptionally stable since shielding prevents film degradation from corona developed in high voltage fields.



TYPE MG



TYPE MH



Miniaturized to one-fifth the size of conventional types, covering the 1 to 220 megohm range. Micronox film sintered on high strength core. End cap construction.

Resistance Tolerance: ±1% (tolerances to .2% on special order). **Insulation Resistance:** 100 megohms, minimum. **Overvoltage:** 1.5 times working voltage for 5 seconds, R shift .8% max. **Thermal Shock:** MIL-STD-202, method 107, cond. C, R shift .5% max. **Moisture Resistance:** MIL-STD-202, method 106, R shift .8% max. **Loadlife:** 1000 hours at rated power, R shift .8% max.

†Temperature Coefficient: Referenced to 25°C, ΔR taken at −15°C and +105°C

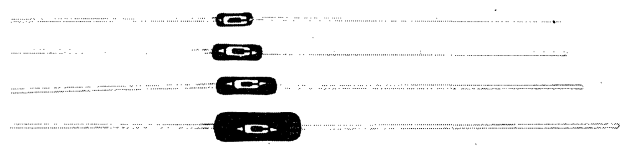
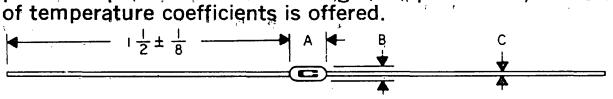
TYPE MR & MS Power Film Resistors

Micronox film on high strength core. End cap construction. Featuring smallest size for given power ratings. Specially designed with a wide range of resistance values for high temperature operation. For less stringent requirements, a choice of temperature coefficients is offered.





Resistance Tolerance: ±1% (tolerances to .1% on special order). **Insulation Resistance:** 100 megohms, minimum. **Overload:** 5 times rated power for 5 seconds, R shift .5% max., or .5 ohms max., whichever is greater. **Overvoltage:** 1.5 times max. voltage for 5 seconds, R shift .5% max., or .5 ohms max., whichever is greater. **Thermal Shock:** MIL-STD-202, method 107, cond. C, R shift .5% max., or .5 ohms max., whichever is greater. **Moisture Resistance:** MIL-STD-202, method 106, R shift .5% max., or .5 ohms max., whichever is greater. **Loadlife:** 1000 hours at rated power, R shift .5% max., or .5 ohms max., whichever is greater.

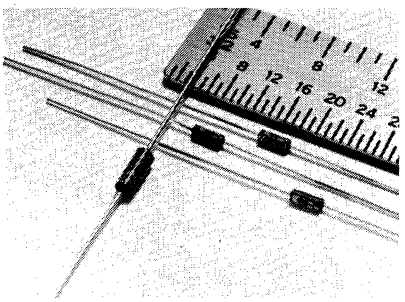
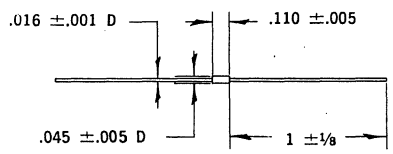
NEW FILM RESISTORS

MICROMINIATURE PRECISION FILM RESISTOR — MODEL ML 103





The ML 103 is the newest addition to the Caddock line of microminiature precision film resistors; reduced to less than half the overall size of the RN50 without sacrificing environmental performance characteristics. Construction is Micronox film on high strength core. Molded case provides environmental protection.

SPECIFICATIONS:

Resistance Range:
10Ω to 250K

Power Rating:
.06 Watt @ 125°C (Derated to 0 @ 175°C)

Resistance Tolerance:
±1% (Tolerances to 0.1% on special orders)

Encapsulation:
Green Molded Type

Leadwire Material:
Gold Plated Dumet

Insulation Resistance:
100 megohms minimum

Temperature Coefficient:
±50 PPM/°C (Reference 25°C, ΔR at −15°C and +105°C)

Overload:
5 times rated power for 5 seconds, R Shift .5% Max.

Overvoltage:
1.5 times max. voltage for 5 seconds, R Shift .5% Max.

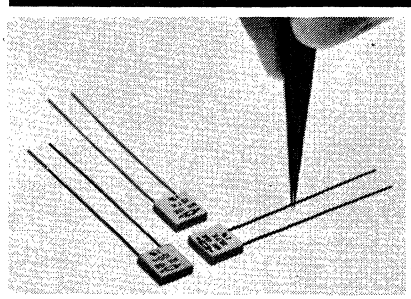
Thermal Shock:
Mil-Std 202, Method 107, Cond. B, R Shift .2% Max.

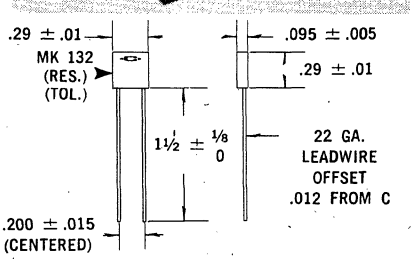
Moisture Resistance:
Mil-Std 202, Method 106, R Shift .5% Max.

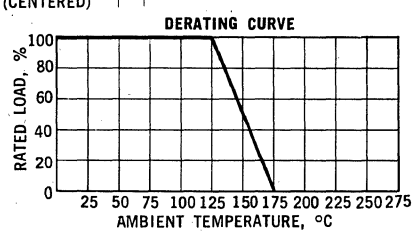
Loadlife:
1000 hours at rated power, R Shift .5% Max.

Marking:
Caddock Logo, Model Number, Resistance Value, Tolerance

LOW COST NON-INDUCTIVE PRECISION FILM RESISTOR IN RECTANGULAR CASE — MODEL MK 132







New precision film resistors encased in rectangular molded cases with radial leads are low cost units designed for high density packaging in large volume printed circuit applications. Non-inductive pattern makes these units desirable for high frequency or fast response applications.

The new resistor incorporates the same high stability Micronox resistive film and quality materials used in other aerospace components in the Caddock precision resistor line.

SPECIFICATIONS:

Resistance Range:
10 ohms to 5 meg

Tolerance:
±1% (Tolerances to ±.1% on special order)

Wattage:
.75 Watt @ 125°C (Derated to 0 @ 175°C)

Max. Working Voltage:
400 Volts

Operating Temperature:
−55°C to 175°C

Temperature Coefficient:
50 PPM/°C (Ref. 25°C, ΔR taken at −15°C and +105°C)

Encapsulation:
Molded silicone

Leadwire Material:
Tinned copper

1000 Hour Load Life:
R Shift .4% Max. or .2Ω

Moisture Resistance:
R Shift .5% Max. or .2Ω

Low Temp. Operation:
R Shift .05% Max. or .2Ω

Temperature Cycling:
R Shift .2% Max. or .2Ω

Short Time Overload:
R Shift .15% Max. or .2Ω

Low Temp. Storage 4 Hour @ −40°C:
R Shift .05% Max. or .2Ω

Soldering:
R Shift .03% Max. or .2Ω

Insulation Resistance:
$> 10^9$ ohms

Shock:
R Shift .05% Max. or .2Ω

Vibration:
R Shift .05% Max. or .2Ω

Lead Pull 5 lbs.:
R Shift .04% Max. or .2Ω

Marking:
Caddock Logo, Model Number, Resistance Value, Tolerance

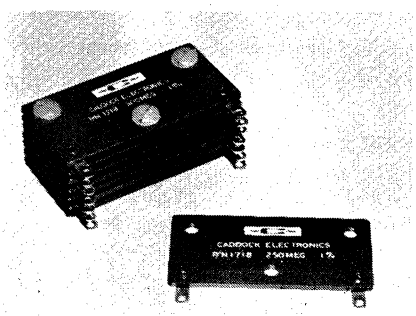
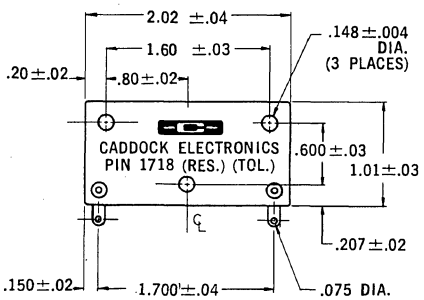
MULTI-MEGOHM FILM RESISTOR EXCLUSIVE MODULAR STACK-UP PACKAGE

MODEL 1718





This Multi-Megohm Resistor is designed to provide non-inductive high resistance values with precise resistance-temperature characteristics. These are especially useful in high resistance voltage dividers where fast response is important. On special order, resistor sets can be provided with voltage ratio accuracy to ±.01% and temperature tracking within 2ppm/°C.

Construction is high strength alumina substrate with fired-on Micronox resistance film and coated with material specially selected to prevent parallel leakage throughout temperature range. Units are compatible with most RTV potting.

SPECIFICATIONS:

Resistance Range:
1 meg-333 meg

Power Rating:
3 Watts @ 25°C

Max. Working Voltage:
12000 Volts

Resistance Tolerance:
±1% (Tolerances 0.2% on special order)

Terminal Material:
Gold Plated Copper

Encapsulation:
Conformal Coating

Insulation Resistance:
100,000 Megs, Min. when mounted as specified below

Temperature Coefficient:
±80 PPM/°C. Referenced to 25°C, ΔR taken at −15°C and +105°C

Thermal Shock:
Mil Std 202, Method 107, R Shift .5% Max.

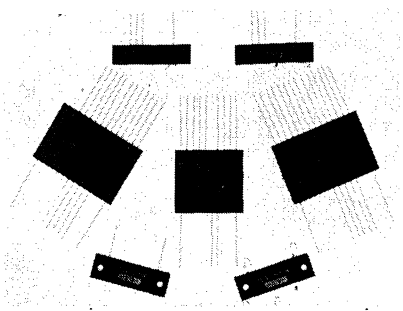
Loadlife:
1000 hours at rated power, R Shift .8% Max.

Mounting:
Three 6-32 Nylon Screws with Standoff Spacers, .050 Thick, Supplied with unit

Operating Temperature:
−55°C to +125°C

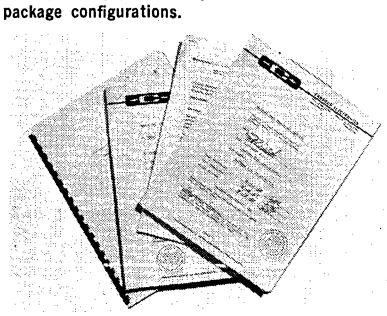
SPECIAL RESISTIVE DEVICES

- **HIGH RESISTANCE RESISTORS to 5000 megs, 1%, 80 PPM/°C**
- **PRECISION VOLTAGE DIVIDERS with tracking as close as 2 PPM/°C**
- **DAC LADDER NETWORKS to 12 bits, and DECADE NETWORKS to your specs**

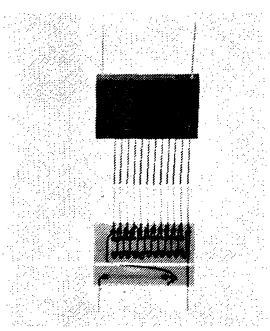


MOLDING FACILITIES equipped to produce your package design, or mold your networks in available package configurations.

Caddock produces miniature wirewound and film resistors, as well as networks on ceramic substrate. We can combine the best of these techniques in producing your special resistor or network requirement.



TESTING FACILITIES to supply output and performance data under actual operating temperature extremes. Qualifying test data available to satisfy qualification requirement on similar devices.



X-RAY FACILITIES available to verify and assure integrity and soundness of package — up to 100% inspection.

SEND US PRINTS OR SKETCHES ON YOUR SPECIFIC REQUIREMENTS FOR A PROMPT DESIGN AND COST PROPOSAL.

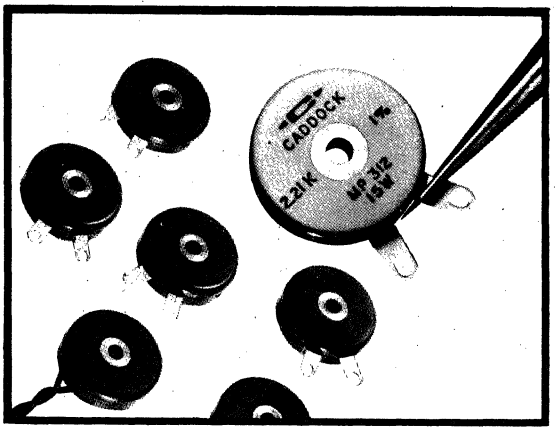
NEW TYPE MP POWER FILM RESISTORS*

CHASSIS MOUNTED



Features: High Stability Micronox Film Element ▪ Non-Inductive ▪ Higher Resistance Range ▪ Lower Cost ▪ Low Profile—Smaller Size—Lighter Weight

Micronox film is fired on high strength ceramic substrate; then mounted on anodized aluminum base. This construction gives vastly improved efficiency in heat transfer from resistor element to chassis. Molded silicone encases the electrical elements for high environmental performance.

‡TC — 50ppm Referenced to 25°C, ΔR taken at +150°C and +275°C. (Low temp. TC will be nominally —85ppm/°C at —55°C. See typical R-T curve.)

Resistance Tolerance: ±1% standard (Other tolerances on special order.)
Insulation Resistance: 10,000 Megohms, dry. Method — Mil-R-18546D, para. 4.6.8.
Solderability: Per Mil-R-18546D, para. 3.7, para. 4.6.4.
Terminal Strength: Per Mil-Std-202, Method 211, Cond. A (Pull Test), 5 lbs., and Cond. B (Bend Test). Max ΔR, .2% or .2Ω, whichever is greater.
Thermal Shock: Per Mil-R-18546D, para. 4.6.9, max. ΔR, .5% or .2Ω, whichever is greater.
Momentary Overload: 2 times rated power or 1.5 times max. allowable working voltage, whichever gives the lower power, for 5 seconds. Max. ΔR, .5% or .2Ω, whichever is greater.
Moisture Resistance: Mil-Std-202, Method 106B, less steps 7a and 7b, max. ΔR, .5% or .2Ω, whichever is greater.
Life: Per Mil-R-18546D, para. 4.6.12, 1,000 hrs., Max. ΔR 1% or .2Ω, whichever is greater.
Shock, Medium Impact: 50G, per Mil-Std-202, Method 205, Cond. C.
Vibration, High Frequency: Per Mil-Std-202, Method 204, Cond. B, Max. ΔR .2% or .2Ω, whichever is greater, through shock and vibration sequence.

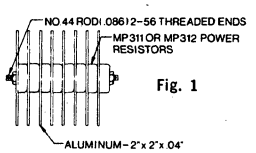

Fig. 1

Fig. 1. **Stacked Assembly** shows **high density packaging** of power resistors. By stacking with 2 inch square aluminum plates between the resistors, heat can be dissipated in three ways:

1. **Convection with plates oriented horizontally.** The power rating per graph, Fig. 2, is 4 watts each resistor and would be useful in rating applications where horizontal installation is necessary or where equipment is rotating and part orientation is variable.
2. **Convection with plates oriented vertically.** The power rating, per graph, Fig. 2, is 6 watts each resistor.
3. **Ducted Air Flow.** This method of application permits the highest possible power density and offers the additional advantage of ducting heat out of the equipment.

Fig. 3. **Power Rating vs. Chassis Area** provides design information for conventional application of MP resistors, per Mil-R-18546, by mounting on aluminum chassis or panel.

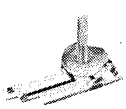
HIGH RESISTANCE/HIGH VOLTAGE CERMIDE® POTENTIOMETER-RESISTOR NETWORK

670 SERIES



A potentiometer-resistor network for high voltage circuits where an adjustable pick-off is desired.

Resistance Range:
R1 — 1-50 Megohms
R2 — 1-30 Megohms
R3 — 1-25 Megohms
R4 — 1-10 Megohms

Standard Resistance Tolerance: ±30%

Minimum Resistance Tolerance:
R1, R3 & R4 — ±10%
R2 — ±25%

Max. Voltage Rating (through Series combination) — 8,500 V

Power Rating — 3 watts @ 55°C derated to no load at 105°C

Mfg. at Elkhart

HIGH RESISTANCE/ HIGH VOLTAGE CERMIDE® RESISTOR

680 SERIES

High resistance, high voltage Cermide® resistor available with and without taps. It is designed for bleeder resistor, voltage divider networks and other high voltage applications.

Resistance Range:
20K Ohms to 1,000 Megohms

Standard Resistance Tolerance — ±30%

Minimum Resistance Tolerance — ±10%

Max. Voltage Rating — 30,000 V not to exceed power rating

Power Rating — 3 watts @ 55°C derated to no load at 105°C

Mfg. at Elkhart

a subsidiary of CapTech, Inc.

PRECISION POWER RESISTORS

FEATURES

1. Copperweld leads standard. Nickel A or Alloy 180 available.
2. Core-alumina and steatite ceramics.
3. Silicone coating to give maximum wire protection and extra high resistance to moisture.
4. Failure rates of less than .006% per 1000 hours @ +25°C with 60% confidence.

ELECTRICAL CHARACTERISTICS

A. TOLERANCES: 5.0% to .01%. 1% standard for off-shelf delivery. Special matching available to .001% tolerance.
B. TEMPERATURE COEFFICIENT: 20 ppm/degree C standard. Special T.C.'s to 5 ppm/degree C available.
C. Dielectric strength greater than 1000 V.A.C.
D. Special configurations available on request.
E. SA (X) Types Thermal shock proof from 275°C to —55°C.
F. SAV (X) Types Thermal shock proof from 350°C to —55°C.
G. STABILITY: consistent with tolerances, all parts stabilized in production. Less than 0.1% drift in 2000 hours operation at full Cal-R wattage rating for 1% tolerance parts.
H. RESISTANCE RANGES: .05 ohms to 250K ohms.
I. INDUCTIVE TYPES: Single layer space wound with largest wire permissible.
J. Non-inductive Types feature dual balanced windings for minimum inductance.

ENVIRONMENTAL

Meet or exceed applicable paragraphs of MIL-R-26E and MIL-R-39007.

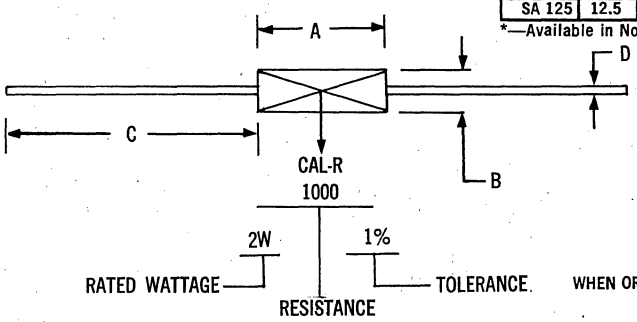
3 —Tolerance for noninductive types below 150Ω ±.062.
4 —Noninductive maximum resistances are one-half of listed values.



WHEN ORDERING SPECIFY: TYPE, WATTAGE, RESISTANCE AND TOLERANCE.

POWER RESISTORS

OUTSTANDING FEATURES

1. Copperweld leads hot tin dipped for maximum solderability.
2. Completely welded construction terminal to terminal.
3. High density extruded aluminum housing provides superior heat conduction.
4. Housing deep finned for maximum heat dissipation under natural and forced convection.
5. Windings—High uniformity single layer space wound, designed to give maximum core coverage for even heat dissipation. MCX (non-inductive) types have dual balanced windings for minimum inductance.
6. Core—Steatite ceramic, centerless ground for uniformity.
7. Silicone coated resistance element to give maximum wire protection and extra high resistance to moisture.

ELECTRICAL CHARACTERISTICS

Tolerances—5.0% to .05%, 1% standard for off-shelf delivery.

Temperature Coefficient—20 ppm/degree C standard. Special T.C.'s to 5 ppm/degree C available.

Dielectric strength greater than 1000 V.A.C. on MC-100 and MC-250, and greater than 2000 V.A.C. on MC-500.

Dielectric Test—performed on 100% basis.

Stability—consistent with tolerances, all parts stabilized in production. Less than 0.5% drift in 1000 hours operation at full Cal-R wattage rating for 1% tolerance parts. Resistance ranges—.05 ohms to 210K ohms.

ENVIRONMENTAL

Meet or exceed all requirements of MIL-R-18546D, including "N" characteristic and MIL-R-39009.

Available in Noninductive (code symbol "X"—Cal-R) (code symbol "N"—Mil)

*Noninductive maximum resistances are one-half of listed values.

POWER RESISTORS . . . Cont'd.

T-5 (5 WATTS) OUTSTANDING FEATURES

1. Copperweld leads hot tin dipped — Gold plated DUMET or "A" nickel available.
2. High density extruded aluminum housing provides superior heat conduction.
3. Housing deep finned for maximum heat dissipation.
4. Windings — high uniformity single layer space wound, designed to give maximum core coverage for even heat dissipation. T5X (non-inductive) types have dual balanced windings for minimum inductance.
5. Core — Alumina ceramic, centerless ground for uniformity.

T-3 (3 WATTS) OUTSTANDING FEATURES

1. Windings — Reverse pie wound — all pies filled for maximum heat dissipation.
2. Unique recessed end cap designed to isolate winding termination from all lead stress.
3. Protective overcoating covering entire resistor before molding insures maximum protection and secures winding without introducing stress.
4. Resistor element encased in nonburning epoxy by transfer molding techniques.
5. Copperweld leads hot tin dipped standard — Gold plated DUMET or "A" nickel available.

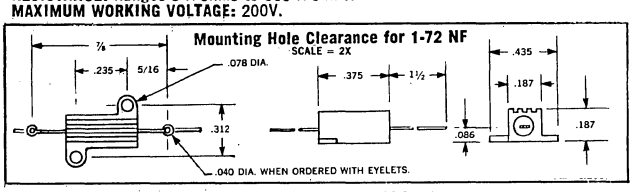
*200 VAC MAX.

T-5 ELECTRICAL CHARACTERISTICS

TOLERANCES: 5.0% to .05%. 1% standard for off-shelf delivery.
TEMPERATURE COEFFICIENT: 30 ppm/°C standard. Special T.C.'s to 5 ppm/°C available.
STABILITY: consistent with tolerances, all parts stabilized in production. Less than 0.5% drift in 1000 hours operation at full CAL-R wattage rating for 1% tolerance parts.
RESISTANCE RANGES: .5 ohms to 3 K ohms.
DIELECTRIC STRENGTH: greater than 500 V.A.C.
DIELECTRIC TEST: performed on 100% basis.

T-3 ELECTRICAL CHARACTERISTICS

TOLERANCE: 1 to .005% absolute. To .002% matching tolerance for matched sets.
TEMPERATURE COEFFICIENT: 10 ppm/°C is standard. Special TCs in ranges from +6000 ppm to 2 ppm/°C available.
STABILITY: consistent with tolerances. All parts stabilized in production, including 1% parts. Components available with stability of .002% per year.
WINDINGS: multiple pie reversed type to minimized inductance. Special windings available to provide fast rise times.
RESISTANCE: Ranges 3 K ohms to 300 K ohms.
MAXIMUM WORKING VOLTAGE: 200V.



PRECISION RESISTORS

OUTSTANDING FEATURES

1. All pies filled for maximum heat dissipation.
2. Unique recessed end cap designed to isolate winding termination from all lead stress.
3. Terminals welded to end cap for maximum strength — will withstand 15 lbs. linear pull.
4. Double slots tangent to mandrel to prevent shorting between pie windings eliminating space-wasting construction features or the need for insulating tape.
5. Protective overcoating covering entire resistor before molding insures maximum moisture protection and secures winding without introducing stress.
6. Standard leads — copperweld hot tin dipped or annealed Dumet gold plated.
7. Special matching available to .001% tolerance.

EECTRICAL CHARACTERISTICS

TOLERANCE: 1 to .005% absolute. To .002% matching tolerance for matched sets.

TEMPERATURE COEFFICIENT: 10 ppm/°C is standard. Special TCs in ranges from +6000 ppm to 2 ppm/°C available.

STABILITY: consistent with tolerances. All parts stabilized in production, including 1% parts. Components available with stability of .002% per year.

WINDINGS: multiple pie reversed type to minimized inductance (except on Miniature Series). Special windings available to provide low rise times.

RESISTANCE: Ranges 1 ohm to 10 megohms.

PHYSICAL CHARACTERISTICS

MATERIAL: Hi-Temp epoxy with matching coefficient of expansion between core and case. Leads are gold over Dumet.

ENVIRONMENTAL

Meet or exceed all requirements of MIL-R-93C and MIL-R-39005.

PRECISION NETWORKS

Cal-R engineers, specialists in advanced network design, offer precision assemblies, packaged to meet the most exacting specifications, allowing the circuit designer maximum freedom without costly packaging problems.

GENERAL SPECIFICATIONS

RESISTOR VALUES: From 1 ohm thru 5 megohms
FULL SCALE ACCURACY: to .005%
TEMPERATURE COEFFICIENT TRACKING: to 1 PPM/°C.
TEMPERATURE COEFFICIENT ABSOLUTE: to 2 PPM/°C.
AMBIENT TEMPERATURE RANGE: —55°C to +125°C.
STANDARD TEMPERATURE COEFFICIENT: 0 to ±10 PPM.
STABILITY: to 10 PPM per year.
FAST RECOVERY TIME: to within .02% of final value within 100 ns.

*1. Allowable energy per one shot pulse. For continuous duty, pulse repetition rate and duration must be considered.

*2. Peak voltages. Up to 100% increase can be obtained by special dielectric coatings and/or anti-corona terminations.

*3. Nickel metallization standard for AS types. Aluminum metallization standard for SP types. Other metallization available upon request; example: copper, solder-tinned copper or silver.

*4. Refer values other than shown to the plant for special quotation.

CARBORUNDUM The Carborundum Company, Electronics Plant, Niagara Falls, N.Y. 14302, 716–278-2521

Each of the three volumes of **eem** contains a Product Index and Directory, the Green Section. This Index is a complete alphabetical listing of products. If the product you are looking for appears in the particular volume you are consulting, the green pages will provide a complete list of manufacturers who make that product. If the product is included in another volume of **eem**, the Index will provide a cross reference, directing you to the correct volume.

Boldface listings under product headings indicate that the listed manufacturer has products cataloged in **eem. Boldface** listings with page numbers indicate that this manufacturer's catalog pages include detailed data on the product indicated in the product heading.

Similar products are grouped together. For example, the many kinds of meters are listed in this manner: "Meters, Ampere," "Meters, Capacitance," "Meters, Flux" etc. To help you locate the prime product heading, there are hundreds of cross references, e.g. "Voltmeters — See Meters, Volt."

Catalog pages in **eem** are divided into three volumes based on very broad product groupings. These are:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies / Controls and Drives

Volume 3 — Passive Components / Materials / Hardware

These volumes are further divided into 55 **eem** Product Sections which are assigned individually to the most appropriate volume. Within each of the 55 product sections manufacturers are arranged alphabetically, wherever possible. A complete index of all manufacturers' catalog pages is included in every volume. To locate the catalog pages of a specific manufacturer, refer to this index at the beginning of the white section in any of the three volumes. This index will provide the page numbers you require. In Volume 1, the index begins on page 302, in Volume 2 on page 1274 and in Volume 3, page 2310.

NOTE: CORNING is QPL to MIL-R-39017 and MIL-R-55182

(1) MIL-R-39017 Parts receive a 100% power conditioning for 24 hours @ 1.5 rated wattage 25°C. Reject parts with Δ R>±.50%

(2) MIL-R-55182 Parts receive a 100% overload and temperature cycle Overload RNC50, RNC55, RNC60 RNC65 5 x rated wattage for 1 hour @ 25°C 4 x rated wattage for 1 hour @ 25°C Reject parts with combined ΔR>±.20%.

(3) MIL-R-55182 Failure rates "P", "R", "S" also receive a 100% Z-Ray.

(4) Terminal Substitution data. Resistors with style and terminal symbol "RNC" are a direct one-way substitute for resistors of symbol "RNR" provided all other characteristics are equal or better.

GLASS AND METAL OXIDE FILM RESISTORS

Perfect combination to handle resistor jobs.

Dependable resistor performance, tailored to specific circuit requirements results from CORNING® Materials and process skills.

High resistivity tin oxide film is combined with optical quality glass substrate yielding exceptionally strong, uniform resistance components.

This molecular bonding at red heat eliminates degradation normally experienced with films that are free to oxidize. The matched thermal expansions of the glass substrate and tin oxide film eliminate fatiguing stresses.

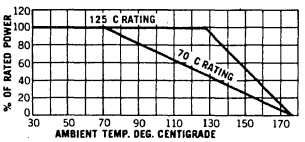
For Optimum Value in Resistors... DALE®

METAL FILM PRECISION RESISTORS, ESTABLISHED RELIABILITY

■ TYPE EMF

Failure Rate: Verified Failure Rate of .01% per 1000 hours at 60% confidence level. Estimated Failure Rate: .001% per 1000 hours per MIL-R-55182

DERATING
Dale EMF resistors have an operating temperature range of −65°C to +175° C. They must be derated according to the curve at right.



DALE TYPE	MIL. TYPE*	70° C RATING	125° C RATING	MAX. WT. (Grams)	MAX. WORKING VOLTAGE	RESISTANCE RANGE (OHMS) By T.C.**		
						T-1 (K)	T-2 (H)	T-9 (J)
EMF 50	RNR50	1/10 w	1/20 w	.11	200	49.9 to 100K	49.9 to 100K	49.9 to 100K

EMF 65	RNR65	1/2 w	1/4 w	.84	300	24.9 to 2 Meg.	49.9 to 1 Meg.	49.9 to 1 Meg.
EMF 70	RNR70	3/4 w	1/2 w	1.6	350	24.9 to 2.49 Meg.	24.9 to 1 Meg.	24.9 to 1 Meg.
EMF 75	—	—	1 w	4.4	500	24.9 to 4.07 Meg.	49.9 to 2.61 Meg.	49.9 to 2.61 Meg.

Standard Resistance Tolerances: .1% (B), .25%, .5% (D) and 1% (F).
*Available in corresponding RNC & RNN styles.
**Extended resistances above and below this range available as Non-MIL parts.

DIMENSIONS
See section on MF resistors. Dimensions on Types RNR50 thru RNR70 will conform to Types RN-50 thru RN-70.
Note: EMF 75 conforms to RN-75.

POWER RATING
Dale EMF power ratings are based on the following two conditions:
1. 0.5% maximum ΔR in 2000 hours load life.
2. 175° C maximum operating temperature.

WIREWOUND PRECISION RESISTORS, ESTABLISHED RELIABILITY

■ TYPE ARS*

Failure rate .000136% per 1000 hours at 50% rated power, 25°C ambient (60% confidence level). Failure defined as ΔR>0.5%.

■ TYPE AGS*

Miniature version of ARS Series with BeO core for optimum thermal conductivity, operational stability and increased reliability. Significantly smaller size. Failure rate .000044% per 1000 hours at 50% rated power, 25°C ambient (60% confidence level). Failure defined as ΔR>0.5%.

*Available with solderable and weldable leads.

DALE TYPE	MIL-R-39007B TYPE	POWER RATING (watts)	MIN. RES. (ohms)	MAX. RES. (ohms)	MAX. WORKING VOLTAGE	MAX. WEIGHT (grams)	DIM. A	DIM. B	DIM. C	DIM. D

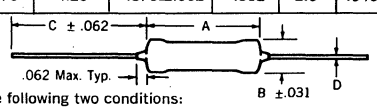
AGS-10	RWR-84	7	0.1	12.4K	275	4.25	.875±.062	.312	2.0	.040

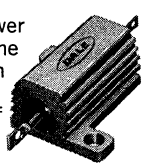
Tolerance: All established reliability resistors have a standard resistance tolerance of 1%.



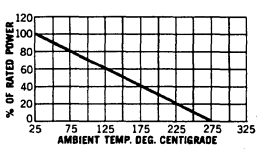
POWER RATING
Dale ARS and AGS power ratings are based on the following two conditions:
1. 0.5% maximum ΔR in 2000 hours load life. 2. 275°C maximum operating temperature.

■ TYPE ARH

Advanced design housed power wirewounds made on the same line and under the same high reliability standards as the ARS and AGS. Failure rate of .01% at 100% rated power.



DERATING ARS, AGS, ARH
At high ambient temperatures, the derating curve at right applies.



DALE TYPE	MIL-R-39009A TYPE	POWER RATING (watts)		RESISTANCE RANGES (ohms)		MAX. WORKING VOLTAGE	MAX. WT. GRAMS
		MTD.	FREE AIR	MIN.	MAX.		
ARH-5	RER-60	5	3	.1	4.12K	220	3
ARH-10	RER-65	10	6	.1	5.62K	340	8
ARH-25	RER-70	20	8	.1	12.1K	650	15
ARH-50	RER-75	30	10	1.0	39.2K	1400	32

Tolerance: All established reliability resistors have a standard resistance tolerance of 1%. Non-inductive versions also available.

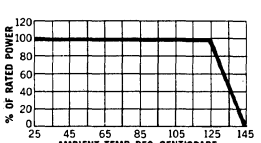
DIMENSIONS: See section on RH resistors. Types ARH-5 thru 50 will correspond with RH-5 thru 50.

POWER RATING
Dale ARH resistor ratings are based on the following requirements:
1. 275° maximum internal hotspot temperature
2. 1% maximum ΔR in 2000 hour load life
3. Proper heat sink
   4x6x2x.040 aluminum chassis = ARH-5 and ARH-10
   5x7x2x.040 aluminum chassis = ARH-25 and ARH-50

■ TYPE AWA

Established reliability epoxy-molded precision bobbin wirewound resistor with high stability and low T.C.; offers excellent moisture protection and low noise. Quality verified by acceptance testing.

DERATING
Dale AWA resistors have an operating temperature range of −55°C to +145°C. Derating is required for temperatures above 125°C. The curve at right applies.



DALE TYPE	MIL-R-39005B TYPE	POWER RATING (Watts)	MINIMUM RESISTANCE RANGE (Ohms)					MAX. RES. (Ohms) ALL TOL.	MAX. WORKING VOLTAGE	MAX. WT. (Grams)
			.01%	.02%	.05%	.1%	1%

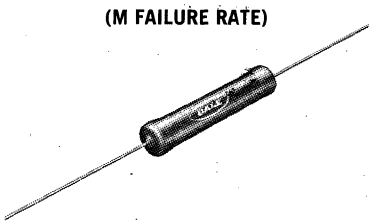
DIMENSIONS:
See section on WWA resistors. Dimensions on Types RBR-52 thru RBR-55 will conform to Types RB-52 thru RB-55.

POWER RATING
Dale AWA power ratings are based on the following two conditions:
1. 1% maximum ΔR in 2000 hours load life.
2. 125°C maximum operating temperature.

DALE® for Optimum Value in Wirewound Resistors

WIREWOUND PRECISION RESISTORS, ESTABLISHED RELIABILITY

(M FAILURE RATE)



■ **TYPE ESS** (Solderable Leads)
■ **TYPE ESW** (Weldable Leads)

■ **TYPE EGS** (Solderable Leads)
■ **TYPE EGW** (Weldable Leads)

These styles meet the requirements of MIL-R-39007 Failure Rate Level M (1%/1000 hours). See ARS and AGS for lower failure rates.

POWER RATING

Power ratings are based on the following two conditions:

1. .5% maximum ΔR in 2000 hours load life.
2. 275° C maximum operating temperature.

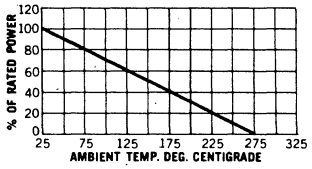
**Figures in parentheses indicate wattage printed on these resistors. They can be rated at 7.5 and 12 watts respectively, but will be printed with these higher ratings only upon request.

DIMENSIONS

See section on RH resistors. Types ENH and ERH-5 thru 50 will correspond with RH-5 thru 50.

DERATING
ESS, ESW, EGS, EGW, ERH, ENH

At high ambient temperatures, the derating curve at right applies.



DOCUMENTATION

Qualification, acceptance and failure-rate maintenance test data is retained by Dale and is available upon request. Lot traceability and identification data is maintained by Dale for 5 years.

RELIABILITY PROGRAMS

The established reliability series are the result of an extensive reliability program at Dale Electronics which includes basic design and materials improvement, special production and test facilities, and trained, reliability-oriented personnel. A separate program group has been set up to provide customer service on established reliability programs, and the facilities and know-how of the Dale established reliability organization can be directed toward the development of reliability programs for specific user requirements. Inquiries may be directed to your local Dale representative or to the factory.

WIREWOUND PRECISION RESISTORS, SILICONE COATED *(Available with Weldable Leads)*

■ TYPE G

Beryllium oxide core for decreased size, increased stability. Meets applicable specifications of MIL-R-26 and MIL-R-23379. Non-inductive styles available.

■ TYPE GL

Radial leads for printed circuit board mounting. Meets applicable requirements of MIL-R-26E.

POWER RATING
Power ratings of Dale G resistors are 1.4 to 4 times higher than those of conventional wirewound resistors of equivalent size.

Stability When Dale G resistors are operated at the same ratings (Char. U) as conventional Dale RS resistors of equivalent size, the shift in resistance is 50% or less than that of the RS.

For additional power and derating information, see section on RS resistors.

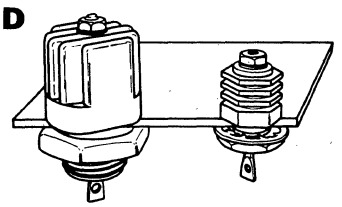
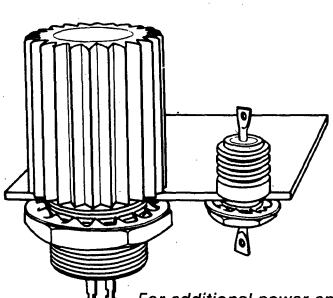
WIREWOUND POWER RESISTORS, HEAT SINK ENCASED

■ TYPE PH



TWO TERMINAL CONFIGURATIONS (PH-10-1, PH-25, PH-50 and PH-100). Thru chassis mounting—two connections required on one or both sides of panel. Meet electrical and environmental requirements of MIL-R-18546.

SINGLE TERMINATION, CHASSIS GROUND (PH-10-5 and PH-25-8). Speeds assembly time as only one connection is required. Often utilized as a drive line resistor in a high speed core memory system using a series termination technique. Non-inductive windings have low reactance properties giving exceptionally fast cycle time.



For additional power and derating information, see section on RH resistors

DALE® *for Optimum Value in Housed Wirewound Resistors*

WIREWOUND POWER RESISTORS, HEAT SINK ENCASED

Patented design. Mount to the chassis. Provide high power and precision tolerance in a variety of sizes, mounting and terminal configurations. RH and HG types exceed MIL-R-18546. Non-inductive styles available.

■ TYPE RH

5 through 250 watts. Bonus power dissipation ability within MIL-R-18546 size.

■ TYPE HG

Beryllium oxide core for optimum heat dissipation. Doubles Mil. Spec. power at no increase in size. Exceptional stability at mil. levels.

*Rating is based on chassis mounting area and stability.

**NOTE: Figures in parentheses on RH-5 and RH-10 indicate wattage printed on these resistors. New construction allows them to be rated at 7.5 and 12.5 watts—but they will be printed with these higher ratings only upon customer request.

†A weight increase of 10% should be allowed for non-inductive styles.

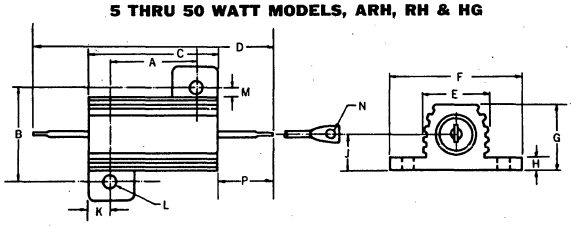
††Consult factory for values below 1 ohm and for special T.C. requirements.

POWER RATING RH, HG, PH TYPES

Dale housed resistor ratings are based on the following requirements:

1. 275°C maximum internal hotspot temperature
2. 1% maximum ΔR in 1000 hour load life for RH-5, 10, 25, 50; PH-10, 25, 50. 3% maximum ΔR in 1000 hour load life for RH-100, 250; PH-100.
3. Proper heat sink.
   4x6x2x.040 aluminum chassis = RH-5, 10; HG-5, 10; PH-10
   5x7x2.040 aluminum chassis = RH-25; HG-25, 50; PH-25
   12x12x.059 aluminum panel = RH-50
   12x12x.125 aluminum panel = RH-100, 250; PH-50, 100

5 THRU 50 WATT MODELS, ARH, RH & HG



DERATING

Dale housed resistors have an operating temperature range of −55°C to +275°C. Derating is required for reduced chassis mounting area and for high ambient temperatures. The following curves apply to operation of unmounted resistors:

A = RH-5, 10
B = RH-25; PH-10, 25
C = RH-50, 100, 250; PH-50, 100; HG-5, 10, 25, 50

*Consult factory for tolerances below .05%.

†Although there is no direct mil. model of the same physical size, the Dale type will meet the electrical and environmental requirements of MIL-R-93.

■ TYPE WWA

Patented design insures high stability. Special tolerances and matching available.

■ TYPE MWA

Subminiature size retains Dale's unique bobbin-type design and high protection molding coating.

SPECIAL MODIFICATIONS

- Special tolerances are available to as low as .005%.
- Resistors can be matched to a tolerance of .001%.
- Special T.C.'s are available to ±2 ppm/° C over a limited temperature range.
- T.C.'s can be matched to an accuracy of 1 ppm/° C.

POWER RATING

MWA, WWA and WWP power ratings correspond to MIL-R-93 ratings and are based on .5% maximum ΔR in 1500 hours load life. For commercial applications, power ratings may be doubled.

DERATING

Dale MWA, WWA and WWP resistors have an operating temperature range of −55° C to +145° C. Derating is required for temperatures above 125° C. The curve at right applies.

DALE® for Optimum Value in Wirewound Resistors

INDUSTRIAL WIREWOUND POWER RESISTORS, SILICONE OR VITREOUS ENAMEL COATED

Dale's expanded industrial wirewound line provides both silicone and vitreous coated models. Silicone models are recommended where maintenance of tolerance and T.C. is of primary concern. Vitreous models are recommended where maximum resistance to chemical action is required.

CONTACT DISTRIBUTOR FOR PRICES.

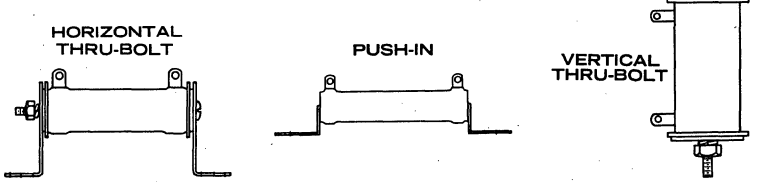
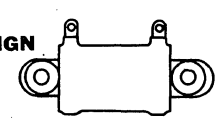
MOUNTING BRACKETS for TUBULAR STYLES



EXCLUSIVE BRACKET DESIGN FOR MINIATURE FLAT STYLE



Mounting strap fits snugly through core and is bound tightly against unit by two eccentric spacers. Eliminates expensive cements and improves heat transfer and power handling capabilities.

DALE® for Optimum Value in Power Wirewound Resistors

■ TYPE CP

- Fireproof inorganic construction
- Special inorganic potting compound provides high thermal conductivity.
- Superior moisture resistance

Construction: Resistance wire is high quality, premium grade wound onto a woven fiberglass core. Terminals are tinned copperweld crimped to the wound core with a special brass alloy.

Tolerance: ±10% standard. ±5% also available.

Operating Temperature: −55° C to +275° C.

Terminal Strength: 5 lbs.

Ordering Information:

When ordering, please specify Dale type, wattage, resistance value and tolerance.

Example: A 2-watt CP resistor with resistance at 1000 ohms and tolerance of ±10% is designated as shown.

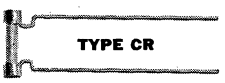
■ TYPES CA and CR

TYPE CA



TYPE CR

Construction:

Dale CA and CR Series have a high quality, premium resistance wire wound on woven fiberglass core impregnated and coated with a special grade silicone. Available with special smokeproof coating.

Resistance Range: .1 ohm minimum to 7K, dependent on resistor core length.

Tolerance: ±10% standard, ±5% also available.

Leads: Standard lead diameter is .036" (#19 AWG). .032" diameter (#20 AWG) is also available. Standard minimum lead length is 1½". Standard lead material is tinned copperweld. Axial lead pull strength on CA Series is 4 lbs.

1. Resistor type
2. Core diameter designation
3. Overall resistor body length
4. Resistance
5. Tolerance

■ TYPE RF FUSE RESISTOR

Dale RF resistors can reliably function as a fuse and as a wirewound resistor. RF resistors are similar in appearance to Type CA, CP or CR models, but are wound with special wire conforming to performance required. Contact factory for design assistance.

■ TYPES CL and CLC

TYPE CL

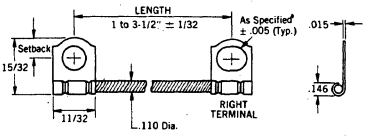
TYPE CLC

- Recessed core prevents resistance wire protrusion.
- Lugs are double-crimped for positive electrical contact and high terminal pull strength.
- Any variation of mounting hole and slot available. Construction, Resistance Range, Tolerance and Derating same as CA.

Resistance Identification: Resistance is always stamped on the left terminal tab.

Terminals: (CL Series) Mounting holes as shown are Dale standard. Any variation of hole and slot is available, also tabs with no holes are available. Standard terminal material is tin plated steel. Special tinned brass is available on request.

Ordering Information: Same as CA except (3) **3.** Mounting length between centers.

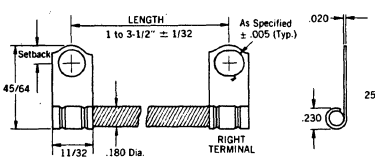


CL-4000 SERIES - 4½ watts per inch

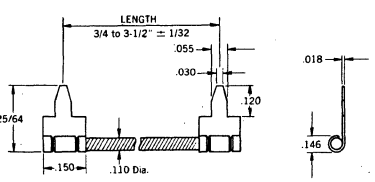
DIMENSIONS

	CL-4000	CL-6000
Setback	.145"	.135"
Left Terminal	.133" dia.	.215" dia.
Right Terminal	.133" x .153" slot	.215" dia.

Other terminal dimensional variations available on request.



CL-6000 SERIES - 6 watts per inch



CLC-4000 SERIES - 4½ watts per inch (Printed Circuit Tab)

METAL and CARBON FILM RESISTORS

APPLICABLE MIL. ENVIRONMENTAL SPECIFICATIONS MIL-R-10509

TYPES MF & MFF

These environmental performance figures are typical for MFF conformally coated resistors. However, this style is dimensionally smaller than the RN types per MIL-R-10509.

POWER RATING
Dale MC and DC power ratings are based on 1% maximum ΔR in 1000 hours load life at 70° C.

DERATING
Dale MC and DC resistors have an operating temperature range of –55° C to +165° C. They must be derated at high ambient temperatures from 100% power at 70° C to 0% power at +165° C.

DALE® for Optimum Value in Metal Film Resistors

PRECISION METAL FILM RESISTORS *(Available with Weldable Leads)*

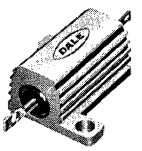
Vacuum-deposited metal film resistors. Good R.F. characteristics. Low noise level.
Wide choice of tolerances, T.C.'s and resistance.

■ TYPE MF, LMF, HMF

Epoxy molded. Meets MIL-R-10509.

■ TYPE MFF, CMF

Epoxy conformal coated.
Type MFF meets electrical and environmental characteristics of MIL-R-10509F, but is dimensionally smaller. Type CMF meets functional requirements of MIL-R-22684.



■ TYPE D

Molded in aluminum housing to utilize heat sink effect of chassis. Resistance ranges from 24.9Ω to 2.6 Meg., with power ratings of 4, 8 and 12 watts.

POWER RATING

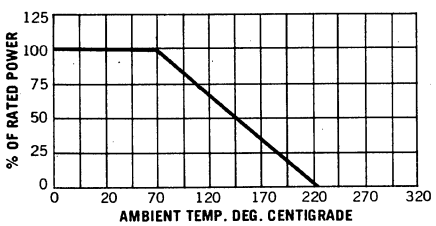
Dale TMF and TCF power ratings are based on 1% maximum ΔR in 1000 hours load life at 70°C.

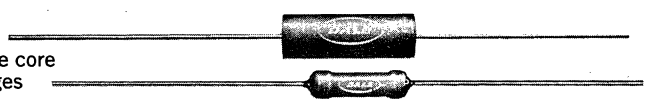
DERATING

Operating temperature range is –55°C to +220°C. They must be derated at high ambient temperatures according to the curve below.



■ TYPE MFB & CFB

Vacuum-deposited metal film on high thermal conductive core allows greater wattage rating and or lower resistor changes over long use (R) at conventional wattage ratings. This allows higher wattage rating at smaller sizes. Controlled T.C. Good high frequency characteristics.



All Dale film resistors are provided with flame retardant coating or molding.

POWER RATING

Dale MFB and CFB resistors have two power ratings, depending on operating temperature of 25°C and 70°C and are based on maximum ΔR of .5% in 1000 hour load life.

DERATING

Operating temperature range is –65°C to +175°C. They must be derated according to the curves at right.

General Resistance

ECONISTORS™

TO ±0.005% – SHIPPED FROM STOCK – LOW LOW COST

NOW IN STOCK NATIONALLY, ECONISTORS WILL BE SHIPPED IN ANY QUANTITY IN ANY STANDARD VALUE WITHIN 72 HOURS ARO!

ECONISTORS are in every important particular—see specifications—equivalent to other high accuracy components costing several times as much. ECONISTORS are available at prices comparable to, for example, thick film units although thick films cannot compare with ECONISTORS in terms of accuracy, stability, load life, hysteresis and other performance characteristics.

And General Resistance passes the ECONISTOR cost and delivery breakthrough along to its customers in the form of rock bottom prices, immediate availability and a quality, high reliability component proven in missile, space flight and other demanding applications.

MINIATURE PRECISION WW RESISTORS— TO ±0.01%
IMMEDIATE DELIVERY!
IN STOCK NATION-WIDE! $\frac{5}{32}$"OD x $\frac{5}{16}$" LG

STANDARD (exact) VALUES: 10-20-30-40-50-60-70-80-90-100-200-250-300-400-500-600-700-800-900 OHMS; 1k-1.5k-2k-2.5k-3k-4k-5k-6k-7k-8k-9k-10k-20k-30k-40k-50k-60k-70k-80k-90k-100k-180k-200k-250k-300k OHMS

STANDARD TOLERANCE: ±0.01%; ±0.025%; ±0.1%

MINIOHMS are General Resistance's miniature, high accuracy, high stability precision wirewound resistors. Incorporating most of the high performance characteristics of GR's famous ECONISTORS, MINIOHM units are unsurpassed for those applications requiring the unique qualities of wirewounds where component densities are high and/or where size is critical. MINIOHMS are shipped from stock at prices slightly higher than low, low ECONISTOR prices.

CONDENSED SPECIFICATIONS—SERIES 5E10 MINIOHMS

Ohmic Values: See above; any non-standard value from 1 ohm to 300k ohms available with 2-week delivery
Accuracy @ 25°C: ±0.01% / ±0.025% / ±0.1%
Stability: ±50 PPM/year; ±75 PPM/3 years
T.C.: ±5 PPM/°C, -55°C to +125°C
Power Rating: .15 w @ +125°C; .2 w @ 85°C
Max. Voltage: 200 VDC or AC peak
Noise: Essentially non-measurable
Dimensions: $\frac{5}{32}$" OD x $\frac{5}{16}$" lg
Leads: Axial, #24 AWG tinned copper, 1.5" lg, min.
Encapsulation: Molded epoxy
Windings: Multiple Π ; balanced GR "Air Cushion", low reactance

CURRISTORS™

4-TERMINAL PRECISION CURRENT-SENSING WW RESISTORS

GR's CURRISTORS: low resistance (0.01 ohm to 100 ohms), low reactance (0.2 henries, essentially non-measurable capacitance) 4-terminal wirewounds.

CURRISTORS are used: for precision current sensing; for analog summing; as precision loads or termination; as precision meter shunts; as secondary standard resistors; in calibration consoles, etc., etc.

CURRISTORS are produced using proprietary bi-filar and other winding techniques permitting their use in digital, high frequency pulse and AC circuit applications.

CONDENSED SPECIFICATIONS — SERIES 8C16 CURRISTORS

RESISTANCE RANGE: 0.01 ohm to 100 ohms, std; other values special order. TOLERANCE: ±0.01% / 0.02% / 0.05% / 0.1% / 0.25% / 1.0%. T.C.: As low as ±2 PPM/°C. POWER RATING: To 5 watts @ +125°C (depends upon model). STABILITY: ±20 PPM/year. ENCAPSULATION: Epoxy.

Write for Bulletin 501.

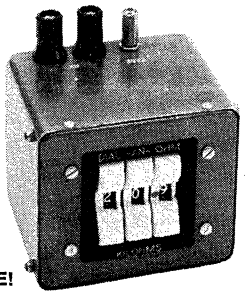
TEMPISTORS™

PRECISION TEMPERATURE-SENSING, COMPENSATING, CONTROLLING WW RESISTORS

TEMPISTORS offer the designer concerned with temperature sensing, compensating and/or control a unique new component with the perfected accuracy, stability, temperature-predictability and other characteristics of wirewound resistors but with temperature vs resistance characteristics permitting widespread use in temperature connected applications.

TEMPISTORS feature a proprietary compound element design permitting virtually any desired temperature coefficient from -10 ppm/°C to +6000 ppm/°C over operating temperature range from -55°C to +125°C. Ohmic values available are from 1 ohm to 900K ohms; tolerances are ±1%; 0.5%; 0.25%; 0.1%; 0.05%; 0.025%; 0.01%.

TEMPISTORS applications include: temperature sensing bridge circuits, thermocouple compensator circuits, temperature controllers, R/C circuit compensation; or any application requiring repeatable, accurate and linear temperature coefficients and absolute resistance accuracy. Basic construction conforms to MIL-R-93D. Prices are surprisingly low. Write for Bulletin TE-175.



DIAL-AN-OHM™

WITH 0.1% OR 0.01% ACCURACY, FOR AS LITTLE AS $18/DECADE!

General Resistance's Series DA "Dial-An-Ohm" units are universal resistance decades providing accuracies of either 0.1% or 0.01% in total "dialed" resistance. Over 50 basic models are available in OEM, console or test bench configurations with 3 to 7 decades providing total resistances from 99.9 ohms to 9999.99K ohms.

PRICES START AT LESS THAN $18. PER DECADE.

All Series DA units use an unique switching code allowing use of fewer resistors per decade with attendant cost reduction and improved performance. Total resistance value is selected for each decade via a rocker switch; this value appears numerically, in-line on the face of the unit.

CONDENSED SPECIFICATIONS—SERIES DA DECADES

Resistance Range: 0.1 ohm to 10 megohms
Accuracy: ≈ ±0.1% and 0.01% tolerance models available
Resistor T.C.: ±10 PPM/°C, typical; 50 PPM/°C, max.
Switching: Rocker type decade switching; make before break
Switch Life: Greater than 50,000 operations
Power: $\frac{1}{4}$ watt per resistor
Component Reactance: Less than 0.1° phase shift @ 10 KHz

Data Subject to Change Without Notice.

Charles T. Gamble Industries

New Jersey & Fairview Avenue • Riverside, New Jersey 08075 • 609-461-1900

PRECISION WIRE WOUND RESISTORS & NETWORKS

Charles T. Gamble Industries has engineered and designed non-inductive precision wire wound resistors to meet the requirements of Mil-R-93D. These resistors are completely sealed against the effects of high humidity and salt water immersion cycling. The material used in the manufacture of our resistors has a very high dielectric strength. The bobbin material used in winding the resistors is one and the same as the encapsulating material. All resistors use resistance wire with very low thermal E.M.F. to the copper leads. Where thermal effects can be disregarded, welded construction with nickel alloy leads may be specified.

Standard temperature coeficient is ±10 PPM/°C. Lower T.C.'s, and T.C.'s as high as 6000 PPM/°C can be supplied.

Tolerance available (non power styles): 1%, 0.5%, 0.1%, 0.05%, 0.025%, 0.02% and 0.01%. Resistors with tolerances of 0.1% and below are stabilized by artificial aging and temperature cycling.

NETWORKS: RC NETWORKS, LADDER NETWORKS, VOLTAGE DIVIDERS, BINARY NETWORKS

Sub-miniature Axial lead Precision resistors have been designed for applications where space is a prime factor.

Encapsulated printed circuit resistors are designed for printed circuit board application, where space is a factor.

Radial lug type resistors have been designed to meet the requirements of Mil-R-93D.

All resistors are hermetically sealed with epoxy resin to protect the windings against the effects of high humidity and salt water immersion cycling. Resistors can either be inductive or non-inductive wound.

The materials used in the construction of radial lug type resistors are identical to those used in the construction of axial lead types.

These resistors are supplied with a thru hole for mounting to the chassis by means of a #6 thru bolt.

HEAT SINK MOUNTED PRECISION WIREWOUND POWER RESISTORS

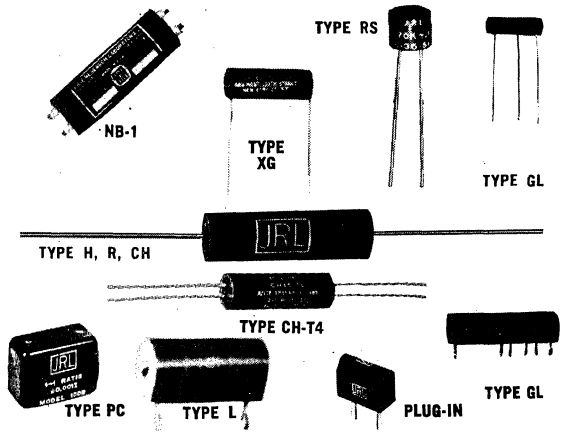
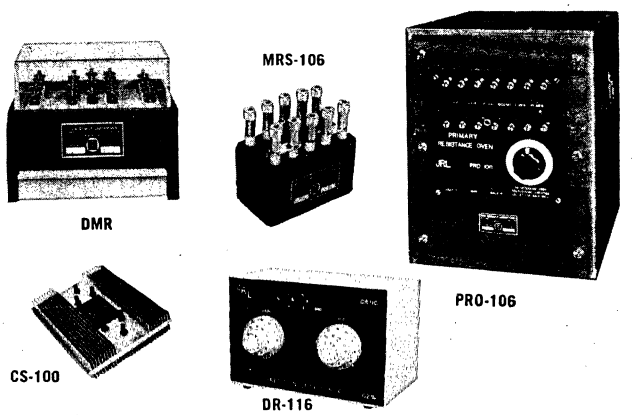
JULIE RESISTORS — RESISTANCE REFERENCES AND CURRENT SHUNTS

Julie evanohm resistors, acknowledged to be the most stable available anywhere, are offered in a wide variety of styles and sizes. The table below lists some of the more common specifications that the user must know in order to make a practical selection for his application. The Julie engineering staff is always pleased to assist in selecting the proper resistors and is able and willing to assist in designing special purpose or custom resistors. Further technical information is available upon request.





Resistor Type Description	Range: Resistors	Range: Ratios	Accuracy (%): Resistors	Accuracy (%): Ratios	Stability %/year	Temp. Coefficient PPM/°C: Resistors	Temp. Coefficient PPM/°C: Ratios	Voltage (Volts)	Current/ Power	Size	Remarks	Price** per one

Total Resis. Price	1.11 M $240.	11.1 M $265.	

CURRENT SHUNTS

High quality shunts are high quality 4-terminal resistors especially designed to operate at relatively higher current levels without suffering appreciable resistance change. Most high ranges (50 A for example) are the finned heat-sink type. Most lower ranges are available in single and multiple-range (oil-filled) units. Accuracies up to .0025% are available although .05% or .01% are most typical. Yearly stabilities of .01% are typical and temperature coefficients a 5 ppm/°C or better. Ask for data sheet.

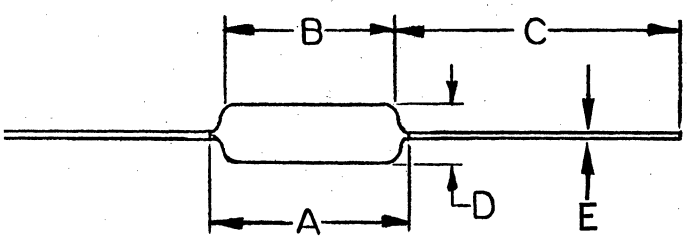
* Diameter may be exceeded on very low value resistors.



COATING:

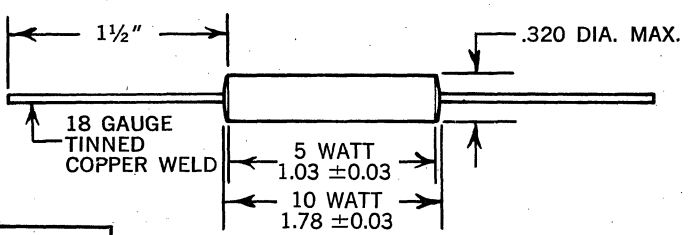
Lectrohm's ceramic silicone coating has dimensional uniformity which is required for automatic insertion.

WATTAGE:

Watt ratings have been established for hot spot temperatures of 275°C and 350°C for use in an ambient temperature of 25°C.

SAX SERIES RESISTORS

For low resistance values below 0.5 ohms in 5 and 10 watt size. All welded construction, sealed in ceramic shell.



Resistance Range: 0.01 to 0.50Ω

Tolerances: ±5%, ±3% & ±1%

LECTROHM OVALS

Flat- or oval-core type units have an oval cross section and are mounted by flat brackets of "stud type" for stacking, or "step brackets" for normal mounting. The mounting bracket is constructed of aluminum which acts as a heat sink and makes the higher wattage rating for the size core. They are available with ceramic silicone coating.

"RIB-ON-EDGE" RESISTORS

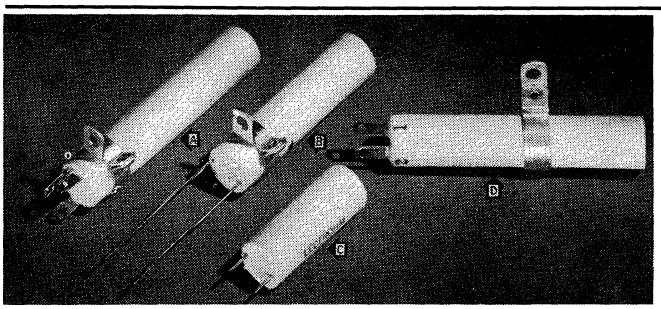
Rib-on-edge resistors are made to order for high wattage service where low resistances are required. They are also used for intermittent duty where relatively small size resistors must dissipate high wattages.

Rib-on-edge resistors are constructed of special alloy ribbon resistance wire crinkled and wound on edge around a tubular ceramic core. The resistance element is welded to a heavy terminal. The entire assembly is then secured to the ceramic tube by a special high temperature vitreous enamel. This type of resistor is classed as a "bare" resistor by NEMA and Underwriters' Standards and has a 375°C maximum operating temperature. The higher temperature rise permits the higher rating.

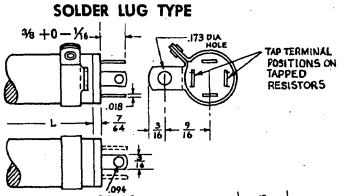
Rib-on-edge resistors can be made in fixed, adjustable, or tapped styles.

* Maximum resistances can be increased 25% with Lectrohm's unique full-crinkle winding.

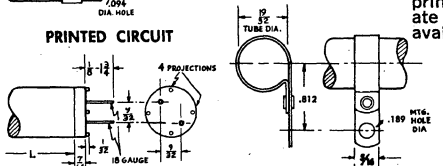
Order by series number and resistance required.
(ROE followed by watts and ohms.)
OTHER SIZES CAN BE MADE TO FIT YOUR REQUIREMENTS.



SOLDER LUG TYPE



PRINTED CIRCUIT



HORIZONTAL MOUNTING BRACKET
Catalog No. 53163

STANDARD UPRIGHT

Lectrohm's STANDARD UPRIGHT style resistor is constructed so as to present the simplest form of mounting for "above chassis." The element is in an insulated shell with a metal bracket having a single mounting hole. The terminals can be wire leads, solder lugs, or spaced wire leads for printed board use. Intermediate taps on the windings are available.

RESISTOR SPECIFICATIONS

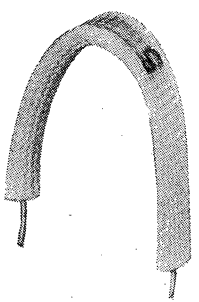
Order by series number and resistance required.



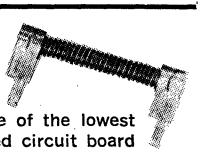
LECTROHM FLEXIBLES

FLU Series are fixed wirewound resistors that can be used in small, confined spaces. Wound on a specially treated flat fiberglas core and insulated by a fiberglas sleeve. Free air rating is 2 watts per inch with the surface temperature at the hottest spot not exceeding 340°F. Lead wires are hot tinned 18, 20 and 22 gauge, 1⅜ inches long.

Maximum resistance is 2000 ohms per inch of winding and minimum resistance is 0.2 ohms per inch.

It is also available without sleeving (bare element) in our ELE series.

TYPE FP RESISTORS



Lectrohm type FP power resistor is one of the lowest cost power resistors available for printed circuit board applications.

The resistance element is tightly wound with premium quality resistance wire on fiberglas cores. Tinned steel terminals are clinched to the resistance element by automatic machines.

Terminals are designed to be inserted in 0.070" diameter holes. Center-to-center distance of prongs on terminals are variable from 0.5" to 2.5". Power rating is 4 watts per inch and resistance range is from 0.2 ohms per inch to 1,000 ohms per inch.

MILWAUKEE RESISTOR CORPORATION
700 WEST VIRGINIA STREET, MILWAUKEE, WISCONSIN 53204 • PHONE (414) 271-9900

MILWAUKEE has become THE recognized brand for quality and service as well as ingenuity and development within the wirewound resistor industry.

Briefly described on these six pages are MILWAUKEE's standard lines, including:

AXIAL RESISTORS
POWER RESISTORS
METAL CASE RESISTORS
PRINTED CIRCUIT BOARD RESISTORS
RIBWOUND RESISTORS
GRID RESISTORS
MINIATURE OVAL RESISTORS
REGULAR OVAL RESISTORS
BATHTUB RESISTORS
FUSE & STRIP RESISTORS

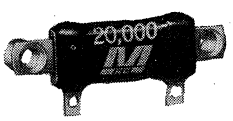
All MILWAUKEE products are carefully engineered, made of high quality materials selected specifically for each particular product. Resistance materials and termination materials are alloys selected for each wattage and ohmic value to assure the correct combination to meet customer requirements.

MILWAUKEE has the staff and facilities to help you meet your needs best, whether it be a stock or standard item or, if desired or necessary, a resistor specifically engineered and designed to meet your requirements.

MILWAUKEE IS ALSO THE SOURCE FOR **MERL** PRECISION RESISTORS, (not described herein). Write for our MERL literature describing this line of wirewound resistors offering tolerances to ±.005%.

FOR ADDITIONAL INFORMATION OR DETAILS NOT SHOWN ON THESE PAGES—WRITE FOR CATALOG

OVAL RESISTORS

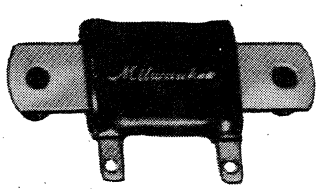


MINIATURE OVALS

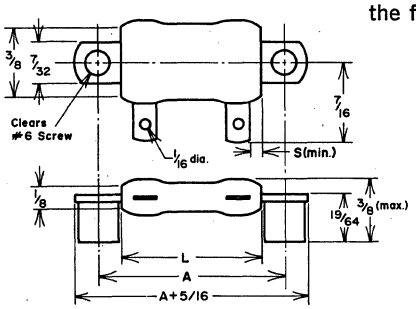
OVAL RESISTORS are for use where space saving is desired and where the use of the 'Heat Sink' function of the metal chassis, rack or panel may be employed. Resistance tolerance of ±5% is standard except on low resistance and multi-tapped units. COATINGS of vitreous enamel or silicone base are offered.

OVALS are available in regular or miniature sizes an original development of MILWAUKEE Resistor.

Additional miniature oval core sizes are available increasing the possibility of taps and isolated sections. Other intermediate sizes are also available. Only regular ovals are available as adjustable. For temperature coefficients of 20 ppm/°C or below, consult the factory.



REGULAR OVALS

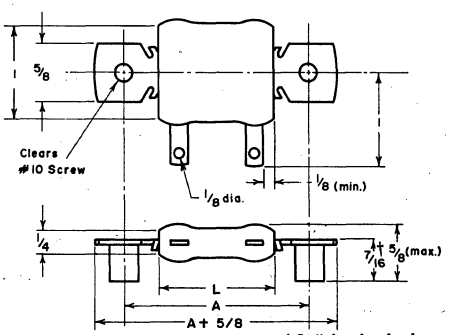


Watts*	Ohms	Dimensions A	L	S
10	.1 to 5K	1″	¾″	1/16″
15	.15 to 25K	1¼″	1″	1/16″
20	.2 to 50K	2 5/16″	2″	1/16″

* Rating based on mounting on steel panel 10″x10″x.040″.

Oval Resistors are stackable. When stacking, the resistors should be derated to avoid excessively high temperatures. The table below shows approximate rating percentages.

Number of Resistors Stacked	Percent of Single Unit Rating Vertical Stacking	Horizontal Stacking
2	80	75
3	70	60
4	65	50



† 7/16″ is standard.

Watts*	Ohms	Dimensions A	L
30	.10 to 10K	2″	1¼″
40	.13 to 25K	2¾″	2″
55	.18 to 30K	4¼″	3½″
70	.22 to 55K	5½″	4¾″
95	.25 to 75K	6¾″	6″

*Rating is based on mounting on steel pad 10″x10″x.040″.

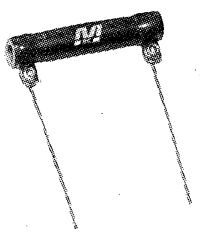
MILWAUKEE FIXED AND ADJUSTABLE VITREOUS ENAMELED POWER RESISTORS

Also available with silicone or sand and cement coating

WATTAGE RATINGS:
Free air rating of 8 through 225 Watt resistors meet EIA and Military requirements for a 325°C rise in a 25°C ambient.

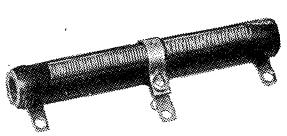
STANDARD RESISTORS:
Wattage ratings in the table to the right marked with an asterisk (*) are MILWAUKEE standard sizes and with the exception of 75 Watt size are stocked in values shown on page 2860. 1½" Tinned leads are standard on 8, 12 and 20 Watt fixed resistors. All other standard resistors have lug type terminals.



MILWAUKEE resistors are designed to meet all requirements of MIL-R-15109 (Ships) "Resistors and Rheostats, Naval Shipboard."

STANDARD TOLERANCE: ±5% is standard on MILWAUKEE Power Resistors.

OPTIONAL FEATURES — TERMINALS:
Most resistors are also available with Single Quick Connect or MILWAUKEE's patented Double Quick Connect terminals. Ferrule type and live brackets are also available. Standard lug terminals are also available with or without terminal hardware. Special terminals are available for unusual or special applications.



MOUNTING:
All sizes of resistors are available with Spring Mounting Clips, Vertical Thru Bolts and Horizontal "L" Mounting Brackets (1 to 4 resistors high). Such mounting hardware is available mounted, as loose assemblies or as individual parts (mica and centering washers, brackets only, etc.).

CUSTOM RESISTORS:
MILWAUKEE resistors are readily available customized to your requirements. NON-INDUCTIVE, TAPPED and SPECIAL TC's are readily available built to your specific requirements. Special Terminals, Mounting Features and other features can be readily fabricated with our tooling and manufacturing facilities.

* Standard Wattages — See stock list, next page for all stock values of Standard Watts except 75 Watts.

DELIVERY:
Reasonable quantities of stock resistors are normally available for immediate delivery. Other values of standard resistors and custom resistors are available in reasonable time (4 to 6 weeks depending on general level of activity).

PREMIUM DELIVERY SERVICE — "PDS" — is also available. MILWAUKEE's new PDS service is designed to meet customers' unusual requirements. For a stated premium (averaging between $15 and $17) normal delivery is halved or better and delivery date guaranteed. In delivery trouble? — call us and inquire about PREMIUM DELIVERY SERVICE.

STOCK RESISTORS: Resistors listed above are normally available from stock in reasonable quantities. These resistors are available at a lower minimum billing price. Most values are stocked both by stocking distributors and the factory. Standard hardware units are also readily available.

OTHER OHMIC VALUES: MILWAUKEE also has large stocks of other values in both standard and non-standard sizes. Many of these items are stocked for particular customers or have been added to stock because of current demand. If you have a non-stock requirement — check with factory as to possible availability.

RIBWOUND RESISTORS

APPLICATIONS

Particularly useful where high energy is to be dissipated in the lower ohmic ranges. Due to its ability to operate at higher temperatures and dissipate greater heat, the ribwound resistor is almost one-half the physical size of the equivalently rated round-wire style resistor. Ribwound wattage ratings are based on a temperature rise of 375°C. They may be mounted with spring clips (thru 1 ⅛" dia.); thrubolt mounting hardware, individual or multiple-stacked bracket assemblies or live bracket mountings.

CONSTRUCTION

Crimped ribbon resistance wire is edge-wound and then locked to the ceramic core with vitreous enamel. Resistance wire is spot-welded to the terminal connectors. Ribwound resistors can be furnished in fixed, adjustable, or tapped styles. Cement coating can be furnished.

Several 300 watt units are stocked in both fixed and adjustable styles. Listed are the more popular 300 watt ohmic values. All other wattage ratings and styles are made to order.

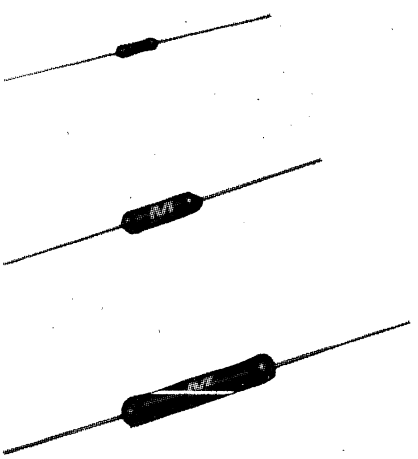
AXIAL RESISTORS



Available in a variety of sizes from 1 watt through 11 watts on request.

APPLICATIONS

- Electronic Circuitry
- Printed Circuits
- Radio, Television and Sound Reproduction
- Miniature Controls

FEATURES

- Rugged yet small.
- Highly stable.
- Matched expansion in core caps and coating for temperature stability.
- Standard 5% tolerance over 1 ohm, available in closer tolerances on request.
- Wattage ratings based on 325°C rise at 25°C ambient.
- Standard Stock — 3, 6.5 and 11 watt sizes.
- Leads Hot Tin Dipped.

CONSTRUCTION

- Wire Wound on Ceramic Core
- All Welded
- Vitreous or Silicone Base Coating

Number	Watts	Size	Ohms
2-7-ΩL	3	9/64 Dia x 5/16	1 to 10,000
4-14-ΩL	6.5	11/32 x 1	1 to 20,000
5-28-ΩL	11	13/32 Dia x 1⅞	1 to 50,000

Ohmic values below 1 ohm or higher than shown, available on request.

When ordering use number, dash, resistance value; i.e. 3 watt, 500 ohm, 2-7-500L.

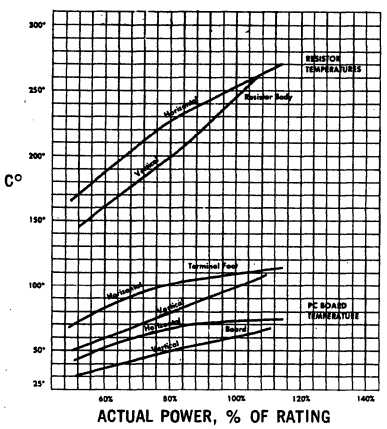
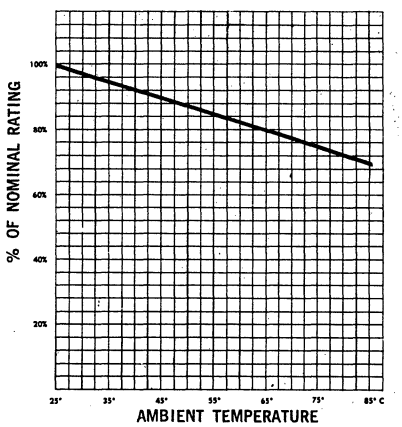
FEATURES

- Built-in standoff keeps board cool.
- Mounting feet prevent rocking.
- Power ratings 3 to 20 watts.
- Complete OHM range.
- One-piece, welded terminals
- Rectangular leads .020 x .040 in.
- Silicon base coating. Vitreous enamel coating available.
- Standard tolerance ±5%.
- 20 PPM upon request.
- Patent 3,462,651.





BATHTUB RESISTORS

"MILWAUKEE" Bathtub Resistors are wound on a high quality fiberglass cord. Terminals with axial leads are securely clamped to the windings and encapsulated in a square ceramic case with a high temperature, inorganic, humidity proof, silicone compound. The rectangular shape of the ceramic case lends itself to compactness for easy installation and rapid heat dissipation. Good dielectric qualities with voltage breakdowns up to 1500 volts are achieved through encapsulation. Standard tolerance is ±10%. Closer tolerances are available.

SPECIAL LOW OHMIC VALUES for auto radio 5 watt size are in stock.

CONTACT FACTORY FOR 5 & 10 WATT STOCK LIST

M.R.C. Part No.	Watts	Dim. "L" ±1/32	Dim. "W"	Dim. "H"	Max. Ohms	Min. Ohms

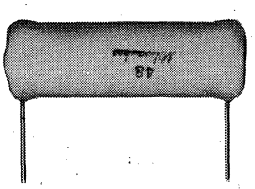
15 Watt & 20 Watt — 18 Ga. Std. Leads
All above RESISTORS also available with 18 or 20 Ga leads upon request.

STRIP AND FUSE RESISTORS



STRIP Resistors are designed for special applications and provide excellent performance characteristics at very economical prices. Sturdy asbestos cores support the high quality resistance wire which terminates with 1½" tinned copper leads. Completely protected with high temperature cement and sand.

Special wattages, length, width, or thickness are custom engineered for your specific requirement.

The core width and length are in 1/16th inch increments. The core thickness for the listed units is 1/8th inch. Other thicknesses are available, as are tapped units. Standard tolerance is ±10% and other tolerances are available.

FUSE Resistors are available in the same rating as any strip resistor. Dimensions are the same. Fuse specifications of trip current and trip time should be specified.

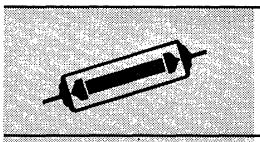
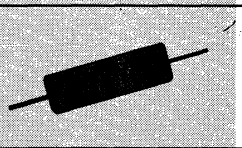
MEPCO



FH HERMETIC SEAL METAL FILM RESISTORS

• MAN RATED-SPACE PROVEN DESIGN • TRUE HERMETIC SEAL • ULTIMATE MOISTURE PROTECTION • EXCEEDS ALL MIL-R-55182 ENVIRONMENTAL REQUIREMENTS • BETTER THAN "S" FAILURE RATE • EXCELLENT STABILITY • ESTABLISHED RELIABILITY



FE SERIES - MOLDED METAL FILM RESISTORS

• ESTABLISHED RELIABILITY — PER MIL-R-55182 • MEETS OTHER STANDARD MIL REQUIREMENTS • PRECISION NETWORKS AND MATCHED SETS • ABSOLUTE TOLERANCE AS LOW AS .1% • RATIO TOLERANCE AS LOW AS .05% • TC's TO 15PPM • AVAILABLE FROM FACTORY STOCK FOR IMMEDIATE DELIVERY

MR SERIES - METAL FILM RESISTORS

• HI REL DEVICES AT LOW REL PRICES • 100% SCREENING • IMMEDIATE DELIVERY FROM FACTORY INVENTORY

MR 25 and 30 - COMMERCIAL LEVEL • CONFORMAL COATED • COLOR CODING • MEETS ENVIRONMENTAL REQUIREMENTS OF MIL-R-22684 and 10509* • TC ±100PPM • TOLERANCES TO 1%

MR 24 and 34 - MILITARY INDUSTRIAL LEVEL • CONFORMAL COATED • MIL-R-10509 CHARACTERISTIC D • TC's ±100PPM • TOLERANCES TO 1%

MR 31 and 39 - MILITARY RELIABILITY LEVEL • MOLDED ENCLOSURE • MIL-R-10509 CHARACTERISTIC C • TX RELIABILITY LEVEL • ±50PPM • TOLERANCE TO 1%

*EXCEPT POLARIZED MOISTURE TEST

HERMETICALLY SEALED CARBON FILM RESISTORS

• TRUE HERMETIC SEAL — PROVIDES ABSOLUTE ENVIRONMENTAL PROTECTION • PERFORMANCE PROVEN RELIABILITY • TOLERANCES AS LOW AS ±1% • TC's ±200 TO-500PPM • MIL-R-10509 — CHARACTERISTIC G • RESISTANCE RANGES 50Ω THRU 20 MEG

GE SERIES - THICK FILM DISCRETE RESISTORS

• RESISTANCE RANGE TO 50 MEG OHMS • MIL CONFIGURATIONS 1/20W. TO 1/4W • TC's ±150PPM • TOLERANCE TO 1% • MOLDED ENCLOSURE

"TINYCHIP" THICK FILM RESISTOR CHIPS

• MINIATURE SIZE — .050" x .050" TYPICAL • TOLERANCES TO 1% AVAILABLE • CUSTOM DESIGN AVAILABLE • SUPERIOR STABILITY • BONDABLE TERMINATIONS

PRECISION WIREWOUND RESISTORS
